READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give the history of regulations. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised. A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of March 2016

The Department of Banking and Securities (Department), under the authority contained in section 301 of the act of January 30, 1974 (P. L. 13, No. 6) (41 P. S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of March, 2016, is 5%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. 96-221). Further preemption was instituted with the signing of Pub. L. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which such individual owns and which such individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 2.48 to which was added 2.50 percentage points for a total of 4.98 that by law is rounded off to the nearest quarter at 5%.

Applications must be submitted electronically through the Department's Grants Portal. No paper, faxed or e-mailed applications will be accepted. Grant information, project guidance documents, program policies, applications and instructions are available online at <http://www.dcnr.state.pa.us/brc/grants>. For assistance with the Department's Grants Portal, contact the Department's Grants Customer Service Center at (800) 326-7734, DCNR-Grants@pa.gov.

Grant assistance from the Department helps, communities and organizations in this Commonwealth plan, acquire and develop recreation, park and trail facilities, and conserve open space. The Bureau administers the Community Conservation Partnerships Program which combines several State and Federal funding sources including the Keystone Recreation, Park and Conservation Fund, Environmental Stewardship Fund, Pennsylvania Recreation Trails Program and the Land and Water Conservation Fund.

In 2016, the grant program encourages applications that advance local conservation and recreation vision and those that implement the Statewide Comprehensive Outdoor Recreation Plan 2014-2019. The new plan, entitled Natural Connections, can be found at <http://paoutdoorreplan.com/>. The Bureau's programmatic structure, goals and priorities have been aligned with the findings and recommendations of Natural Connections.

Community Parks and Recreation: The planning and development of safe, clean, accessible and ready-to-use local parks for all is the overall priority for this program. Projects that address sustainability and rehabilitation of park and recreation facilities, specifically in regard to compliance with the Americans with Disabilities Act and upgrades to small community playgrounds, are high priorities.

Land Conservation: Land conservation projects that protect critical habitat, forested watersheds, wetlands and riparian corridors are the overall priorities for this program. In addition, lands that create critical connections with other public lands and expand green space in urban areas also are important.

Partnerships: This program focuses on collaborative Statewide or regional recreation, conservation or heritage projects that: convene, educate or provide training; build capacity; undertake special purpose studies or implementation projects; and/or offer mini-grant programs that implement publically identified priorities.

Rivers Implementation: Projects that protect and enhance the conservation or recreational value of waterways in this Commonwealth are the focus of this program. Priority activities include those that: implement river conservation plan recommendations; enhance water trails; expand public access to waterways for recreation; or increase awareness of the system of waterways in this Commonwealth.

Trails and Greenways: Projects that close priority gaps in Statewide major greenways and regionally significant trails as well as projects that maintain and upgrade existing trails are the focus of this program.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area,

the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

AMS 15253: (Philadelphia Energy Solutions (PES) 3144 Passyunk Avenue, Philadelphia, PA 19145) for the Tier 3 Project. The Tier 3 Project will make several operational and process changes to comply with the U.S.E.P.A. Tier 3 gasoline standards. The changes will allow PES to meet the regulatory standards by performing additional sulfur-removal from finished gasoline, straight run naphtha, and other gasoline blending streams currently generated and processed at the refinery. The changes are not expected to provide for increased net production of gasoline, but rather will provide more intensive processing of existing refinery streams. Major project activities will include: (1) installation of low NO_x burners on three existing process heaters (each 74 MMBTU/hr or greater); (2) replacement of a 45.5 MMBTU/hr process heater with a 70 MMBTU/hr (refinery gas) process heater equipped with ultra low NO_x burners (ULNB); (3) installation of a 110 MMBTU/hr process heater (refinery or natural gas) equipped with ULNB; and (4) installation of heat exchangers, valves, reactors and rerouting piping.

From the project, there will be a potential increase of 11.2 tpy of NO_x, 69.7 tpy of CO, 6.7 tpy of VOCs, 12 tpy of PM, and 4 tpy of SO₂. The plan approval will contain emission limits, work standard practices, monitoring, recordkeeping, and reporting requirements to ensure operation within all applicable requirements.

Anyone affected by the proposed plan approval may submit written comments or a request for a public hearing by mail to Air Management Services, 321 University Avenue, 2nd Floor, Philadelphia, PA 19104, Attn: Debra Williams within thirty (30) days from today. Comments received by facsimile will not be accepted. If requested, AMS will hold a public hearing to accept public comments on March 29, 2016, at 6 PM at the Spellman Building, 321 University Avenue, 1st Floor Conference Room, Philadelphia, PA 19104. Persons with a disability who desire to attend the meeting and require an auxiliary aid, service, or other accommodation to participate in the proceedings should contact Henry Kim at (215) 685-9439 to discuss how AMS may accommodate their needs.

Noncoal Applications Received

Effluent Limits—The following effluent limits will apply to NPDES permits issued in conjunction with a noncoal mining permit:

Parameter	Table 2		
	30-day Average	Daily Maximum	Instantaneous Maximum
Suspended solids	10 to 35 mg/l	20 to 70 mg/l	25 to 90 mg/l
Alkalinity exceeding acidity* pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applied to surface runoff resulting from a precipitation event of less than or equal to a 10-year 24-hour event. If coal will be extracted incidental to the extraction of noncoal minerals, at a minimum, the technology-based effluent limitations identified under coal applications will apply to discharges of wastewater to streams.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

The Department of Environmental Protection ("Department"), under the authority of the Hazardous Sites Cleanup Act (HSCA), 35 P. The Havertown PCP Site is a National Priority List Site under CERCLA which is located along Eagle Road in Havertown, PA, approximately one mile north of Route 3 (West Chester Pike). This notice is provided under Section 1113 of HSCA, 35 P. S. § 6020.1113. The Agreement may be examined from 8 a.m. to 4 p.m. at the Department's Offices at 2 East Main Street, Norristown, PA 19401 by contacting either Ragesh Patel at (484) 250-5719 or Anderson Lee Hartzell at (484) 250-5866. date of publication of this Notice. Interested persons may submit written comments regarding the PPA to the Department by submitting them to Mr. Patel at the above address.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

09-00105: Naceville Materials, Inc. (483 Springfield Street Coopersburg, PA 18036) On January 21, 2015 for the modification of a State Only, Synthetic Minor Operating Permit in Springfield Township, **Bucks County**. Naceville Materials operates an Asphalt Plant at this site.

Naceville Materials has requested to decrease the maximum production rate of asphalt from 375 tons per hour to 255 tons per hour. This is based on the results from the

source test conducted on September 29, 2014 which indicated that the company was not able to operate at maximum routine operating conditions required by the operating permit. Also, the company has requested to increase the percentage of recycled asphalt pavement (RAP) from 22.5% per hour to 25.0% per hour. During the source test the company operated at a rate of 25% RAP. Since Naceville Materials demonstrated that they can operate at 25% RAP and remain below their permitted emission limits the Department can approve the increase in RAP percentage.

There are no changes to any other conditions and no emissions in the modification of the operating permit. The facility maintains a synthetic minor operating status by maintaining total NO_x emissions to less than 22.50 tons per year. The modified permit also still includes testing, monitoring, recordkeeping and reporting requirements designed to keep the facility operating within all applicable local, state, and federal air quality requirements.

AMS 15253: (Philadelphia Energy Solutions (PES)) 3144 Passyunk Avenue, Philadelphia, PA 19145) for the Tier 3 Project. The Tier 3 Project will make several operational and process changes to comply with the U.S.E.P.A. Tier 3 gasoline standards. The changes will allow PES to meet the regulatory standards by performing additional sulfur-removal from finished gasoline, straight run naphtha, and other gasoline blending streams currently generated and processed at the refinery. The changes are not expected to provide for increased net production of gasoline, but rather will provide more intensive processing of existing refinery streams. Major project activities will include: (1) installation of low NO_x burners on three existing process heaters (each 74 MMBTUs/hr or greater); (2) replacement of a 45.5 MMBTU/hr process heater with a 70 MMBTU/hr (refinery gas) process heater equipped with ultra low NO_x burners (ULNB); (3) installation of a 110 MMBTU/hr process heater (refinery or natural gas) equipped with ULNB; and (4) installation of heat exchangers, valves, reactors and rerouting piping.

From the project, there will be a potential increase of 11.2 tpy of NO_x, 69.7 tpy of CO, 6.7 tpy of VOCs, 12 tpy of PM, and 4 tpy of SO₂. The plan approval will contain emission limits, work standard practices, monitoring, recordkeeping, and reporting requirements to ensure operation within all applicable requirements.

Anyone affected by the proposed plan approval may submit written comments or a request for a public hearing by mail to Air Management Services, 321 University Avenue, 2nd Floor, Philadelphia, PA 19104, Attn: Debra Williams within thirty (30) days from today. Comments received by facsimile will not be accepted. If requested, AMS will hold a public hearing to accept public comments on March 29, 2016, at 6 pm at the Spellman Building, 321 University Avenue, 1st Floor Conference Room, Philadelphia, PA 19104. Persons with a disability who desire to attend the meeting and require an auxiliary aid, service, or other accommodation to participate in the proceedings should contact Henry Kim at (215) 685-9439 to discuss how AMS may accommodate their needs.

Final Assessment and Listing Methodology

The Department of Environmental Protection (Department) is providing its final Assessment and Listing Methodology (methodology) following the public comment period of October 3, 2015, through November 17, 2015. Sections 303(d) and 305(b) of the Federal Clean Water Act (33 U.S.C.A. §§ 1313(d) and 1315(b)) require states to report on the condition of all their waters in the biennial Integrated Report (report). The methodologies referred to in this public notice will be used to assess the quality of this Commonwealth's waters under this legal mandate. The proposed Nutrient Impact Assessment Protocol for Wadeable Streams (NIAP) is not available because it is not being finalized at this time. During the public comment period for the methodology, the Department only received comments pertaining to the NIAP. For this reason, the Department is currently reviewing and as-

sessing these public comments and will provide further notice of any finalization of the NIAP document.

Stream and lake evaluations presented in the report must be supported by assessment methodologies based on sound science and technical procedures that are clear and complete. The methodology is a compilation of the protocols being used to assess waters that may appear in the 2016 Pennsylvania Integrated Water Quality Monitoring and Assessment Report (Integrated Report) and subsequent Integrated Reports.

The protocols comprising the methodology describe the field data collection procedures and data analysis methods used to obtain and evaluate water quality data. The individual protocols apply to a wide range of water resource types, data sources and environmental indicators.

The methodology is available on the Department's web site at http://www.dep.pa.gov/Business/Water/PointNonPointMgmt/WaterQuality/Pages/Draft-2015-Assessment-Methodology.aspx#.Vo1W4aMo6_4 (select "Citizens," then "My Water," then "Rivers, Lakes & Streams," then "2015 Assessment Methodology"). Because of the large number of pages, the methodology will not be available in hard copy.

The 2015 Assessment Methods includes the following documents: Instream Comprehensive Evaluations (ICE), Limestone Streams, Multi-Habitat Pool/Glide Streams, Riffle/Run Freestone Streams, Continuous Instream Monitoring, Periphyton, Streambed Sediment, Surface Water Collection, Semi-Quantitative Fish Sampling protocol, Cause and Effect Surveys, Lake Assessment Protocol, Aquatic Macrophyte Cover, Lake Fisheries, Evaluations of Phosphorus Discharges to Lakes, Ponds, and Impoundments, Plankton Sampling, Chlorophyll A Sampling, Chemistry—Bacteriological Evaluations, Bacteriological Sampling Protocol, Fish Tissue Sampling, Natural Pollutant Sources, Outside agency Data, Appendix A—Sources and Cause Definitions, Appendix B—Taxa Tolerances, Appendix C—Biological Field Methods, Appendix C1—Habitat, Appendix C2—Benthic Macroinvertebrates, Appendix C3—Fish and Appendix C4—Taxonomic Reference.

DEPARTMENT OF STATE

Bureau of Corporations and Charitable Organizations; Proposed Official Forms

The Department of State (Department), Bureau of Corporations and Charitable Organizations (Bureau) proposes to amend 19 Pa. Code Appendix C (relating to official forms) to read as set forth in the Annex A.

A. Effective Date

The proposed form will be effective upon final-form publication in the *Pennsylvania Bulletin*.

B. Statutory Authority

The Department has the authority to promulgate Bureau sample forms and instructions under 15 Pa.C.S. § 133 (relating to powers of Department of State). Section 133(a)(1) of 15 Pa.C.S. specifies that sample filing forms shall not be agency regulations and are therefore explicitly excluded from the requirements of section 612 of The Administrative Code of 1929 (71 P. S. § 232) and review under the Commonwealth Attorneys Act (71 P. S. §§ 732-101—732-506) and the Regulatory Review Act (71 P. S. §§ 745.1—745.14). Section 133(a)(1) of 15 Pa.C.S. does, however, require that the forms and instructions be subject to the opportunity for public comments under section 201 of the act of July 31, 1968 (P. L. 769, No. 240) (45 P. S. § 1201), known as the Commonwealth Documents Law (CDL).

C. *Description of Proposed Revisions*

This proposal revises one of the existing forms and instructions promulgated by the Department and currently published in the *Pennsylvania Code*.

Form DSCB: 15-8221/8998 (Certificate of Annual Registration)

This form is updated every 3 years to reflect the change in base annual registration fees payable by limited liability partnerships and restricted professional companies in accordance with 15 Pa.C.S. §§ 8221(b) and 8998(b) (relating to annual registration). Fee increases have taken place on December 31, 1997, December 31, 2000, December 31, 2003, December 31, 2006, December 31, 2009, December 31, 2012, and most recently on December 31, 2015.

The previously-referenced form and instructions, which is currently published in 19 Pa. Code Appendix C, is being deleted and replaced with the revised form set forth in Annex A. Even though Rule 2.12(a) of the *Pennsylvania Code and Bulletin Style Manual* recommends that forms be referenced in regulations rather than adopted in regulations, 15 Pa.C.S. § 133 requires that the forms and instructions be published in the *Pennsylvania Code*.

D. *Fiscal Impact*

Although this proposal would have no measurable fiscal impact upon the Commonwealth, its political subdivisions

or the private sector, a formal fiscal analysis was not conducted because this form is exempt from the requirements of section 612 of The Administrative Code of 1929.

E. *Paperwork Requirements*

This proposal would not create new paperwork.

F. *Regulatory Review*

Under 15 Pa.C.S. § 133(a), sample forms are exempt from the requirements of the Regulatory Review Act, but shall be subject to the opportunity of public comment requirement under section 201 of the CDL.

G. *Public Comment*

Under 15 Pa.C.S. § 133(a)(1), which requires that publication of Bureau forms be subject to the opportunity for public comment, the Department invites interested persons to submit written comments, suggestions or objections regarding this proposal to Martha H. Brown, Assistant Counsel, Department of State, 306 North Office Building, Harrisburg, PA 17120 within 30 days following publication of this notice in the *Pennsylvania Bulletin*. If a certificate of annual registration is not filed by May 15, a penalty of \$500 will be assessed against the partnership, which will create a second lien on the assets of the partnership. Failure to file the certificate of annual registration for five consecutive years will result in the automatic termination of registered limited liability partnership status.

3. To be completed by Restricted Professional Companies only.

The certificate of annual registration must include a statement by the company as to whether or not it engaged in any business not permitted by section 8996(a) (relating to purposes of restricted professional companies) during the year with respect to which the certificate is being filed.

The base fee was increased to \$520 on December 31, 2015. See §8998(b)(2). Failure to file the annual registration by April 15 will result in a lien on the assets of the company. If a certificate of annual registration is not filed by May 15, a penalty of \$500 will be assessed against the company, which will create a second lien on the assets of the company.

Signature and Verification

An authorized representative of the limited liability partnership or restricted professional company must sign the Certificate of Annual Registration. Signing a document delivered to the Department for filing is an affirmation under the penalties provided in 18 Pa.C.S. § 4904 (relating to unsworn falsification to authorities) that the facts stated in the document are true in all material respects. **This field is required.**

FISH AND BOAT COMMISSION

Additions to List of Class A Wild Trout Waters

The Fish and Boat Commission (Commission) approved the addition of 37 stream sections to its list of Class A Wild Trout Streams as set forth at 45 Pa.B. 6647 (November 14, 2015). The Commission deferred action on Laurel Run, Clearfield County.

Under 58 Pa. Code § 57.8a (relating to Class A wild trout streams), it is the Commission's policy to manage self-sustaining Class A wild trout populations as a renewable natural resource and to conserve that resource and the angling that it provides. Class A wild trout populations represent the best of this Commonwealth's naturally reproducing trout fisheries.

Classification of Wild Trout Streams; Additions, Revisions and Removals

The Fish and Boat Commission (Commission) approved the addition of 99 new waters to its list of wild trout streams, the revision of the section limits of 3 streams already on the list and the removal of 1 water from the list as published at 45 Pa.B. 6643 (November 14, 2015). Under 58 Pa. Code § 57.11 (relating to listing of wild trout streams), it is the policy of the Commission to accurately identify and classify stream sections supporting naturally reproducing populations of trout as wild trout streams. The listing of a stream section as a wild trout stream is a biological designation that does not determine how it is managed. The Commission relies upon many factors in determining the appropriate man-

agement of streams. The Commission's Fisheries Management Division maintains the complete list of wild trout streams, and it is available on the Commission's web site at http://www.fish.state.pa.us/trout_repro.htm.

Notice to Workers' Compensation Insurance Carriers; Special Schedule "W" Data Call

The Insurance Department (Department) is conducting its annual workers' compensation Special Schedule "W" data call. Authority for this data call is in section 655 of The Insurance Company Law of 1921 (40 P. S. § 815).

Insurance companies that write workers' compensation insurance in this Commonwealth are required to complete the data call on or before April 15, 2016.

Note: The Statement of Principles Regarding Property and Casualty Loss and Loss Adjustment Expense Reserves has been rescinded by the CAS Board of Directors and replaced with the Statement of Principles Regarding Property and Casualty Unpaid Claims Estimates. In accordance with this change, the Department has replaced the "considerations affecting data" document with the "limitations affecting unpaid claims estimates" document.

Consistent with prior Special Schedule "W" data calls, the cover letter, general instructions and instructions for limitations affecting unpaid claims estimates are available on the Department's web site at www.insurance.pa.gov. (select "Companies," then "Industry Activity," then "Data Calls").

An e-mail announcing the data call was sent to all Pennsylvania workers' compensation insurance carriers.

The Pennsylvania Compensation Rating Bureau's (Bureau) Financial Data Reporting Application (FDRA) will again be used to report all Special Schedule "W" information (including Coal Mine experience) instead of submitting directly to the Department. Refer to the Bureau's web site, www.pcrb.com, for further information on reporting workers' compensation experience for Special Schedule "W" by the FDRA.

Questions regarding this data call should be directed to Bojan Zorkic, Insurance Department, Office of Insurance Product Regulation, 1311 Strawberry Square, Harrisburg, PA 17120, (717) 787-6968, bzorkic@pa.gov.

Electric Generation Supplier License Cancellations of Companies with an Expired Financial Security

Public Meeting held
January 28, 2016

Commissioners Present: Gladys M. Brown, Chairperson;
Andrew G. Place, Vice Chairperson; Pamela A. Witmer;
John F. Coleman, Jr.; Robert F. Powelson

*Electric Generation Supplier License Cancellations of
Companies with an Expired Financial Security;
M-2015-2490383*

Tentative Order

By the Commission:

The Commission's regulations at 52 Pa. Code § 54.40(a) state that an Electric Generation Supplier (EGS) license

will not be issued or remain in force until the licensee furnishes a bond or other security approved by the Commission. In addition, 52 Pa. Code § 54.40(d) states that the maintenance of an EGS license is contingent on the licensee providing proof to the Commission that a bond or other approved security in the amount directed by the Commission has been obtained.

Failure to file the requested documentation before the financial security's expiration date may cause Commission staff to initiate a formal proceeding that may lead to the following: cancellation of each company's electric supplier license, removal of each company's information from the Commission's website and notification to all electric distribution companies, in which each company is licensed to do business, of the cancellation of the license.

As of January 15, 2016, each EGS listed in the Supplier Table below has not provided proof to the Commission that it has a bond or other approved security in the amount directed by the Commission, to replace its expired bond as noted in the table below.

* Taking title to electricity

As part of its EGS license validation procedures, the Commission's Bureau of Technical Utility Services sent a 60-day Security Renewal Notice Letter to each entity in the Supplier Table above stating that original documentation of a bond, or other approved security, must be filed within 60 days prior to each entity's security expiration date. None of the companies listed in the Supplier Table provided the required documentation.

Based on the above facts, we tentatively conclude that the EGSs listed in the Supplier Table are not in compliance with 52 Pa. Code § 54.40(a) and (d) and therefore it is appropriate to initiate the cancellation process for each EGS license of each company listed in the Supplier Table, without the necessity of a formal complaint, as being in the public interest; *Therefore,*

It Is Ordered That:

1. Cancellation of the Electric Generation Supplier Licenses of each company listed in the Supplier Table is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, the Bureau of Investigation & En-

forcement, Department of Revenue—Bureau of Corporation Taxes, all electric distribution companies, all of the Electric Generation Suppliers in the Supplier Table and also cause a copy of this Tentative Order to be published in the *Pennsylvania Bulletin* with a 30-day comment period.

3. Absent the filing of adverse public comment or the filing of approved security within 30 days after publication in the *Pennsylvania Bulletin*, the Bureau of Technical Utility Services shall prepare a Final Order for entry by the Secretary and shall advise the affected Bureaus within the Commission in writing that the Electric Generation Supplier Licenses held by each company listed in the Supplier Table, are cancelled and the cases may be closed.

4. Upon entry of the Final Order described in ordering Paragraph No. 3 above, each company listed in the Supplier Table will be stricken from all active utility lists maintained by the Commission's Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration, removed from the Commission's website, and notifications be sent to all electric distribution companies in which the Electric Generation Suppliers are licensed to do business.

5. Upon entry of the Final Order described in ordering Paragraph No. 3, each electric distribution company in which the Electric Generation Suppliers are licensed to do business, shall return the customers of the Electric Generation Suppliers to default service.

COMPLAINT

The Pennsylvania Public Utility Commission (Commission) is a duly constituted agency of the Commonwealth of Pennsylvania empowered to regulate public utilities within the Commonwealth. The Commission has del-

egated its authority to initiate proceedings which are prosecutory in nature to the Bureau of Investigation and Enforcement. Pursuant to that delegated authority and Section 701 of the Public Utility Code, the Bureau of Investigation and Enforcement Prosecutory Staff hereby represents as follows:
