READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances where the agency may omit the proposal step; they still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania*

Bulletin before it can take effect. If the agency wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, they must re-propose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number and page number. Example: Volume 1, *Pennsylvania Bulletin*, page 801 (short form: 1 Pa.B. 801).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa.Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*.

The *Pennsylvania Code* contains, as Finding Aids, subject indexes for the complete *Code* and for each individual title, a list of Statutes Used As Authority for Adopting Rules and a list of annotated cases. Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

PART I. GOVERNOR'S OFFICE

[4 PA. CODE CH. 6]

[EXECUTIVE ORDER NO. 2006-09]

Governor's Cabinet for People With Disabilities and Governor's Advisory Committee for People With Disabilities

November 21, 2006

Whereas, discrimination against individuals or groups by reason of disability is unlawful; and

Whereas, such discrimination based upon disability threatens the rights and privileges of residents of the Commonwealth; and

Whereas, the denial of equal employment, housing, and public accommodation opportunities because of such discrimination, and the failure to use the productive abilities of individuals to their fullest extent, deprive people with disabilities from opportunities to enhance their standard of living; and

Whereas, the public health, safety, and general welfare of the Commonwealth is promoted by providing equal opportunities for all individuals, regardless of disability, to public accommodation and secure, accessible, affordable housing accommodation and commercial property; and

Whereas, services and programs provided by the Commonwealth for individuals with disabilities and their families and guardians should be provided in a timely manner that promotes independent living, enables people to obtain and maintain employment, and supports people with disabilities in the least restrictive environment; and

Whereas, the Commonwealth should strive to promote the employment of all individuals in accordance with their fullest abilities to safeguard their right to obtain and hold employment without discrimination; and

Whereas, a state-level office is needed to advise and assist the Office of the Governor and departments within State government in developing policies addressing the concerns of individuals with disabilities; and

Whereas, access to the office will enable individuals with disabilities and their families and guardians to have their concerns and issues addressed.

Now, Therefore, I, Edward G. Rendell, Governor of the Commonwealth of Pennsylvania, by virtue of the authority vested in me by the Constitution of the Commonwealth of Pennsylvania and other laws of the Commonwealth, do hereby create the Governor's Cabinet for People with Disabilities and the Governor's Advisory Committee for People with Disabilities and do order and direct as follows.

Governor

PART I. GOVERNOR'S OFFICE
[4 PA. CODE CH. 6]
[EXECUTIVE ORDER NO. 2006-07]
Governor's Pandemic Advisory Council

July 27, 2006

Whereas, influenza pandemics have occurred three times in the last century, and history and science suggest that the country and the world could face one or more pandemics in this century;

Whereas, the Spanish Flu of 1918 was the most widely-reaching, lethal pandemic the world has ever known, and within 10 months, one in four Americans had contracted the disease and more than 675,000 Americans died, and globally, an estimated 20 to 40 million people died;

Whereas, influenza outbreaks can occur in many different locations simultaneously, causing severe illness, death and disruption throughout the country and the world;

Whereas, highly pathogenic H5N1 avian influenza in birds has demonstrated an ability to spread across National boundaries through both human and wild bird activity, and has the potential to have a detrimental impact on the Commonwealth's valuable poultry industry, as well as other industries, if and when it arrives here;

Whereas, preparing for an influenza pandemic requires coordinated action at all levels of Federal, State and local governments, and all sectors of society, including businesses, schools, faith-based and community organizations, families and individuals;

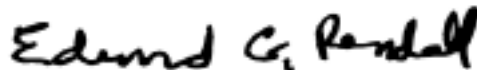

Whereas, Pennsylvania is committed to being a leader in pandemic preparation by monitoring international and domestic outbreaks, by providing funding and technical assistance to foster State and local preparedness and by stockpiling and distributing vaccines and antivirals;

Whereas, states and local communities are responsible for responding to an outbreak within their jurisdictions and having comprehensive pandemic preparedness plans and measures in place to protect their citizens;

Whereas, response planning for pandemic influenza should be integrated into the Commonwealth's and its State agencies' all-hazards response plan and be consistent with the National Response Plan, the National Incident Management System and the Incident Command System; and

Whereas, all-hazard preparedness will help communities address any type of medical emergency and will have lasting benefits for the health of our Nation.

Now Therefore, I, Edward G. Rendell, Governor of the Commonwealth of Pennsylvania, by virtue of the authority vested in me by the Constitution of the Commonwealth of Pennsylvania and other laws of the Commonwealth, do hereby create the Governor's Pandemic Advisory Council (hereafter referred to as "Council") as the Commonwealth's entity to provide guidance to the Commonwealth's action and activities for pandemic planning and preparedness.

Whereas, events in Pennsylvania before and during Lincoln’s Administration profoundly affected Lincoln’s presidency; and

This final-form rulemaking is available electronically through the Department's web site www.dep.state.pa.us.

C. Statutory Authority

This final-form rulemaking is being made under the authority of sections 301 and 302 of the Radiation Protection Act (act) (35 P. S. §§ 7110.301 and 7110.302), which, respectively, direct the Department to develop and conduct comprehensive programs for the registration, licensing, control, management, regulation and inspection of radiation sources and radiation source users, and delegates to the Board the power to adopt the regulations of the Department to implement the act.

These amendments are also made under section 1920-A of The Administrative Code of 1929 (71 P. S. § 510-20), which authorizes and directs the Board to adopt regulations necessary for the proper performance of the work of the Department and under the Radon Certification Act (63 P. S. §§ 2001—2014).

D. Background of the Amendments

In 2001, the Board updated chapters of its radiological health regulations to provide for compatibility with other states and to serve as a basis for the Commonwealth to assume authority from the United States Nuclear Regulatory Commission (NRC) for radioactive material licensees in this Commonwealth under the Agreement State program. These updates were published at 31 Pa.B. 5239 (September 15, 2001) and 31 Pa.B. 6280 and 6282 (November 17, 2001). Subsequently, in 2004, the Board published a final-form rulemaking at 34 Pa.B. 3823 (July 17, 2004) that corrected cross-references in the regulations for radiological health that were no longer accurate.

In the period following the 2004 amendments to the regulations for radiological health, there have been substantive changes to Federal regulations incorporated by reference, most notably 10 CFR Part 71. It is required that these references be corrected for the Commonwealth to have consistent regulations that are compatible with the NRC for submission as part of its application, which is currently under review by the NRC, to become an agreement state and assume authority over Federally-regulated radioactive materials. Under the Energy Policy Act of 2005 (Pub. L. No. 109-58, 119 Stat. 594), the Commonwealth may otherwise lose authority over accelerator-produced radioactive materials and discrete radium sources in 2009 if agreement state status is not attained. This final-form rulemaking also takes advantage of the opportunity to provide further clarification of the regulations in general regarding X-ray use and radon.

As required by section 301(c)(14) of the act, the Department provided the Radiation Protection Advisory Committee (RPAC) with an opportunity to review the proposed amendments and to advise the Department prior to submittal to the Board. On October 27, 2005, and December 26, 2005, the RPAC met and reviewed the proposed amendments. The RPAC accepted the regulations as proposed without issue and with minimal discussion. The RPAC, by letter dated December 29, 2005, from the chairperson, recommended that the amendments to the radiological health regulations be sent to the Board as proposed rulemaking. The unchanged proposed amendments were presented to the RPAC as final-form on July 19, 2007, and August 21, 2007. At the August 21, 2007, meeting, RPAC approved the final-form rulemaking and recommended the Department submit the final rulemaking to the Board for action.

No public meetings were held. The proposed regulations were published at 36 Pa.B. 7028 (November 18, 2006) with a 30 day comment period. No comments were received during the public comment period.

The regulations regarding transportation of radioactive material currently affect about 480 licensees of naturally occurring and accelerator produced isotopes. Approximately 720 licensees of the NRC in this Commonwealth are already subject to these regulations. Failure to enact the final-form rulemaking may delay or prevent the NRC approving the Commonwealth's application for agreement state. This could delay overall cost savings and efficiency under state rule for NRC licensees. Without agreement status, the Commonwealth will lose its authority to regulate all radioactive material in 2009, except diffuse naturally occurring radioactive material. The final-form rulemaking for radon reduces the regulatory burden and cost for about 600 certificate holders by removing the

requirement for notarization of permit applications. This also streamlines the application process. The remaining changes to the regulations for clarity and consistency are a general benefit to some 12,000 X-ray registrants and radon service certificate holders.

E. *Summary of Changes to the Proposed Rulemaking*

The final-form rulemaking is unchanged from the proposed version.

F. *Summary of Comments and Responses on the Proposed Rulemaking*

No comments were received regarding the proposed rulemaking.

G. *Benefits, Costs and Compliance*

Benefits

The primary benefits of this final-form rulemaking are to: (1) correct references that are no longer accurate as a result of changes in previous rulemakings and changes in the regulations of the NRC incorporated by reference to provide compatibility necessary to be an agreement state and to provide additional clarity and consistency; (2) restore shielded room radiography equipment malfunction report requirements so appropriate regulatory response can be considered and others in the regulated community potentially affected can be alerted; and (3) relieve radon services applicants of the unnecessary burden of attestation and to provide updated references to approved radon standards and protocols and reporting intervals. This is part of a comprehensive effort to provide additional clarity to the regulations for radiological health to make it easier for the regulated community to understand and comply. Compatible regulations are necessary for an agreement state that will eventually result in a net savings to the regulated community by eliminating duplicative State and NRC licenses, reducing the net burden on the regulated community for licensing fees, decreasing time lost to inspection and providing more responsive local regulation. Changes to the healing arts screening regulations will allow the Department to make more informed decisions regarding applications for approval to conduct screenings. The removal of notary requirements for radon service applications will speed up the application process and potentially save on application costs.

Compliance Costs

The majority of final-form amendments represent clarifications of requirements. Thus, the underlying requirements have not actually changed so there is no additional cost to comply. The failure of shielded room radiography equipment is not common and the additional cost to supply a written report should be negligible since a facility would investigate any serious failure anyway.

Compliance Assistance Plan

The majority of final-form amendments clarify references and definitions are self-explanatory. The updated guidance on radon measurement protocols and standards is freely available. There is a free radon hotline for additional assistance with radon guidance and applications.

Paperwork Requirements

Most of the final-form rulemaking is not associated with paperwork requirements. The time to report an equipment malfunction involving shielded room radiography of 30 days should not be a burden. The removal of notary requirements from radon services applications lessens the paperwork requirements for filing an application.

H. *Sunset Review*

These regulations will be reviewed in accordance with the sunset review schedule published by the Department to determine whether the regulations effectively fulfill the goals for which they were intended.

I. *Regulatory Review*

Under section 5(a) of the Regulatory Review Act (71 P. S. § 745.5(a)), on November 2, 2006, the Department submitted a copy of the proposed rulemaking, published at 36 Pa.B. 7028 (November 18, 2008), to the Independent Regulatory Review Commission (IRRC) and the Chairpersons of the House and Senate Environmental Resources and Energy Committees for review and comment.

In addition to submitting the proposed amendments, the Department has provided IRRC and the Committees with a copy of a detailed Regulatory Analysis Form prepared by the Department. A copy of this material is available to the public upon request.

Under section 5(c) of the Regulatory Review Act, IRRC and the Committees are to be provided with copies of the comments received during the public comment period, as well as other documents when requested. In preparing these final-form regulations, the Department has received no comments to consider.

Under section 5.1(j.2) of the Regulatory Review Act (71 P. S. § 745.5a(j.2)), on March 19, 2008, this final-form rulemaking was deemed approved by the House and Senate Committees. Under section 5(g) of the Regulatory Review Act, the final-form rulemaking was deemed approved by IRRC, effective March 19, 2008.

J. *Findings of the Board*

The review may also consider relevant information from appropriate Federal agencies. For procedures that result in an individual organ dose or deep dose equivalent greater than 1 mSv (100 mrem) to a screened individual the Department will consult with the Department of Health (DOH) for assistance in reviewing the efficacy of the proposed procedures but the final decision will remain that of the Department. The DOH will have access to all relevant materials when rendering its review.

§ 225.102. Shielded room X-ray radiography.

(a) A room used for shielded room X-ray radiography shall be shielded so that every location on the exterior meets conditions for an unrestricted area and the only access to the room is through openings which are interlocked so that the radiation source will not operate unless all openings are securely closed and meet the requirements of 10 CFR 20.1601 (relating to control of access to high radiation areas).

Title 58—RECREATION
PENNSYLVANIA GAMING CONTROL BOARD
[58 PA. CODE CH. 437a]
Vendor Certification and Registration

The Pennsylvania Gaming Control Board (Board), under the general authority in 4 Pa.C.S. §§ 1202(b)(30) and 1321 (relating to general and specific powers; and additional licenses and permits and approval of agreements) amends Chapter 437a (relating to vendor certification and registration) to read as set forth in Annex A.

Purpose of the Proposed Rulemaking

These amendments modify provisions related to registration of vendors, clarify which individuals must obtain certification and update the names of several forms.

Explanation of Amendments to Chapter 437a

Currently, applications for certification or registration of vendors must be submitted by an applicant for or

holder of a slot machine license. These amendments give applicants for registration as a vendor the option to file their applications directly with the Board. This simplifies the application process and is expected to increase the number of registered vendors on the Board's approved vendor list. Because slot machine applicants and licensees may use any vendor on the Board's approved list, this will increase the vendors' opportunities to provide services and give slot machine applicants and licensees more vendors to choose from.

In § 437a.4 (relating to individual certifications and investigations), minor revisions clarify who will be required to file for certification.

Additionally several references to forms have been updated throughout the chapter to reflect the current names of the applicable forms.

Comment and Response Summary

Notice of proposed rulemaking was published at 37 Pa.B. 6420 (December 8, 2007).

The Board did not receive any comments during the public comment period. No comments were received from the Standing Committees and by letter dated February 6, 2008, the Independent Regulatory Review Commission (IRRC) notified the Board that IRRC had no objections, comments or recommendations to offer on these amendments.

No changes have been made to the proposed regulation in this final-form regulation.

Affected Parties

Applicants for vendor registration will benefit from having another option for applying for registration as a vendor. Slot machine applicants and licensees may benefit by having more vendors to choose from.

There are currently 11 slot machine licensees, 5 applicants for slot machine licenses and 244 registered vendors.

Fiscal Impact

Commonwealth

There will be no new costs to the Board or other Commonwealth agencies as a result of this regulation. Because the application for an unsponsored vendor registration does not require a Slot Machine Licensee/Applicant's Verification form, there will be some minor savings to the Board related to review of vendor registration applications submitted directly by vendors.

Political Subdivisions

This final-form rulemaking will have no fiscal impact on political subdivisions of the Commonwealth.

Private Sector

The Board anticipates that there may be some small direct savings to slot machine applicants and licensees and to applicants for vendor registrations as a result of having another option for applying for registration as a vendor.

Because the Board anticipates an increase in the number of vendors, slot machine applicants and licensees may benefit from increased competition for their business.

General Public

This final-form rulemaking will have no fiscal impact on the general public.

Paperwork requirements

These amendments eliminate the need for a Slot Machine Licensee/Applicant's Verification form as part of the vendor registration application when the vendor applies directly.

Effective Date

The rulemaking will become effective upon final-form publication in the *Pennsylvania Bulletin*.

Contact Person

The contact person for questions about this final-form rulemaking is Richard Sandusky, Director of Regulatory Review, at (717) 214-8111.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (act) (71 P. S. § 745.5(a)), on November 28, 2007, the Board submitted a copy of the proposed rulemaking, published at 37 Pa.B. 6420, and a copy of the Regulatory Analysis Form to the Independent Regulatory Review Commission (IRRC) and the Chairpersons of the House Gaming Oversight Committee and the Senate Committee on Community, Economic and Recreational Development.

Under section 5(c) of the act (71 P. S. § 745.5(c)), IRRC and the Committees were provided with copies of the comments received during the public comment period, as well as other documents when requested. In preparing the final-form rulemaking, the Board has considered all comments received from IRRC, the House and Senate Committees and the public.

Under section 5.1(j.2) of the act (71 P. S. § 745.5a(j.2)), the final-form rulemaking was deemed approved by the House Gaming Oversight Committee and the Senate Committee on Community, Economic and Recreational

Development on April 2, 2008. Under section 5(g) of the act (71 P. S. § 745.5(g)), the final-form rulemaking was deemed approved by IRRC effective April 2, 2008.

Findings

The Board finds that:

(1) Public notice of intention to adopt these amendments was given under sections 201 and 202 of the act of July 31, 1968 (P. L. 769, No. 240) (45 P. S. §§ 1201 and 1202) and the regulations thereunder, 1 Pa. Code §§ 7.1 and 7.2.

(2) The final-form rulemaking is necessary and appropriate for the administration and enforcement of 4 Pa.C.S. Part II (relating to gaming).

Order

The Board, acting under 4 Pa.C.S. Part II, orders that:

(a) The regulations of the Board, 58 Pa. Code Chapter 437a, are amended by amending §§ 437a.2—437a.5, 437a.9 and 437a.10 to read as set forth at 37 Pa.B. 6420.

(b) The Chairperson of the Board shall certify this order and 37 Pa.B. 6420 and deposit them with the Legislative Reference Bureau as required by law.

(c) This order shall take effect upon publication in the *Pennsylvania Bulletin*.

MARY DIGIACOMO COLINS,
Chairperson

(Editor's Note: For the text of the order of the Independent Regulatory Review Commission relating to this document, see 38 Pa.B. 1905 (April 19, 2008).)

Fiscal Note: Fiscal Note 125-74 remains valid for the final adoption of the subject regulation.

PROPOSED RULEMAKING

DEPARTMENT OF AGRICULTURE

[7 PA. CODE CH. 113]

General Provisions for Seed Certification

The Department of Agriculture (Department), under the authority conferred by 3 Pa.C.S. Chapter 71 (relating to the Seed Act) (act) and under the specific authority of sections 7111 and 7117 of the act (relating to powers and duties of secretary and department; and rules and regulations) proposes to amend Chapter 113 (relating to general provisions for seed certification). The act replaces The Pennsylvania Seed Act of 1965 (3 P. S. §§ 285-1—258-11).

Section 7111 of the act authorizes and empowers the Department to enforce the provisions of the Act and to "... prescribe, modify and enforce such reasonable rules, regulations, standards, tolerances and orders as in the judgment of the secretary shall be necessary to carry out the provisions of [the act]." See 3 Pa.C.S. § 7111(a). In addition, section 7111 of the act establishes specific powers and duties of the Department and provides for delegation of such authority. See 3 Pa.C.S. §§ 7111(b) and (c). Section 7117 of the act specifically delineates that the Department "... shall promulgate and enforce rules and regulations necessary for administration and implementation of [the act]." See 3 Pa.C.S. § 7117 Therefore, consistent with that authority and to establish regulations which are consistent with the act, the Department hereby proposes the following amendments to Chapter 113.

Background

The proposed amendments are made necessary by and are established under the authority of, and in accordance with, the act.

The major features and amendments to the proposed amendments are summarized as follows:

Summary of Major Features and Amendments

§ 113.1. Definitions.

The Department added and amended several definitions to be consistent with and clarify the provisions of the act.

§ 113.3. Responsibility and applicability.

The Department deleted the Pennsylvania Seedsman's Association from the list of cooperating entities in subsection (b) and added PennAg Industry Association's Seed Council to the list and clarified subsection (d) with regard to the Association standards to be utilized when no standards exist in this Commonwealth.

§ 113.4. Classes and sources of seed.

The Department added another class or seed source to the classes of seed recognized for seed certification. This is to assure the regulations are consistent with the act.

§ 113.6. Limitations of generations for certified seed.

The Department added a section to establish limitations on generations for certified seed. This is consistent with the act and industry standards.

§ 113.22. Completion of application.

The Department added subsections (b) and (c) to the application provisions. Subsection (b) requires applicants

to maintain genetic purity and identity of a crop at all stages of the certification process. Subsection (c) requires an applicant to furnish maps identifying the location of the fields of the crop to be inspected. This is now an ongoing process, because crops tend to be rotated. Therefore, the old provisions—in § 113.23 (relating to new applications)—requiring mapping only at the time of a new application have been deleted and this change implemented. These provisions will help assure proper enforcement of the act.

§ 113.23. New applications.

This provision was rescinded because the mapping criteria was combined with the application provisions of § 113.22.

§ 113.26. Fees.

This entire section, including the table of fees, was deleted because the fees are now set forth in the act. New language was added stating the applicant shall be responsible for payment of fees as outlined in the act.

§ 113.34. Reinspection

The Department revised paragraph (1) to allow a grower to request reinspection from the inspector "or the Certification Office."

§ 113.42. Color code for tags.

The Department amended this section by further segregating seed classes and adding tag colors for different types of registered and certified seed. These standards are more in line with National standards.

§ 113.43. Two-tag system.

The Department amended subsection (c) to reference the current act.

§ 113.44. Attachment of tags and labels.

The Department added a provision to require that tags and labels be attached in a manner which will prevent obvious removal and reattachment.

§ 113.51. Handling and blending of seed—conditioner's responsibilities.

The Department added language to subsection (f) to make it clear that the applicant is the responsible party.

§ 113.53. Seed testing.

The Department amended language in subsection (c) to assure the regulation properly cites the current act.

Fiscal Impact

Commonwealth

The proposed amendments will not impose additional fiscal impacts upon the Commonwealth for administration and enforcement. The amendments will not require the Department to commit an additional amount of time or manpower to the enforcement of the act or regulations.

Political Subdivisions

The proposed amendments will impose no additional costs and have no fiscal impact upon political subdivisions. The proposed amendments do not impose any additional burden of enforcement or review on political subdivisions.

Private Sector

The proposed amendments will not impose additional costs on the regulated community, which is part of the private sector or any other part of the private sector. Any additional fees are set forth in the act and merely referenced in the regulations. There are no new certification or licensure requirements and any new labeling requirements are merely consistent with the act and will not impose additional costs on the regulated community.

General Public

The proposed amendments will impose no costs and have no fiscal impact on the general public.

Paperwork Requirements

The proposed amendments will not result in a substantial increase of paperwork.

Public Comment Period

Interested persons are invited to submit written comments regarding the proposed amendments within 30 days following publication in the *Pennsylvania Bulletin*.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)), the Department submitted a copy of these proposed amendments on May 2, 2008, to the Independent Regulatory Review Commission (IRRC) and to the Chairpersons of the House Agriculture and Rural Affairs Committee and the Senate Agriculture and Rural Affairs Committee (Committees). In addition to submitting the proposed amendments, the Department has provided IRRC and the Committees with a copy of a detailed Regulatory Analysis Form. A copy of this material is available to the public upon request.

If the IRRC has any objections to any portion of the proposed amendments, it will notify the Department within 30 days after the close of the public comment period. The notification shall specify the regulatory review criteria which have not been met by that portion. The Regular Review Act specifies detailed procedures for review, prior to final publication of the regulations, by the Department, the General Assembly and the Governor of objections raised.

Contact Person

Further information is available by contacting the Department of Agriculture, Bureau of Plant Industry, 2301 North Cameron Street, Harrisburg, PA 17110-9408; Attention: Joe Garvey, (717) 787-4843.

Effective Date

These proposed amendments will be effective upon final-form publication in the *Pennsylvania Bulletin*.

The Department will maintain, and provide upon request, a schedule of the current values of the variables in this mathematical formula. The Department may establish laboratory testing fees, or may change the fees for established tests through publication in the *Pennsylvania Bulletin* of the schedule of the current values of the variables justifying the fees under the mathematical formula described in this paragraph. The fee for

a particular laboratory test will not be increased, but may be decreased, within 9 months of a prior fee increase with respect to that same laboratory test.] The applicant shall be responsible for the payment of fees as outlined in the Seed Act.

[7 PA. CODE CH. 111]

Seed Testing, Labeling and Standards

The Department of Agriculture (Department), under the authority of 3 Pa.C.S. Chapter 71 (relating to Seed Act) (act) and under the specific authority of sections 7111 and 7117 of the act (relating to powers and duties of secretary and department; and rules and regulations) proposes to amend Chapter 111 (relating to seed testing, labeling and standards). This act replaces The Pennsylvania Seed Act of 1965 (3 P. S. §§ 285-1—285-11).

Section 7111 of the act authorizes and empowers the Department to enforce the provisions of the act and to "... prescribe, modify and enforce such reasonable rules, regulations, standards, tolerances and orders as in the judgment of the secretary shall be necessary to carry out the provisions of [the act]." See 3 Pa.C.S. § 7111(a). In addition, section 7111 of the act establishes specific powers and duties of the Department and provides for delegation of such authority. See 3 Pa.C.S. § 7111(b) and (c). Section 7117 of the act specifically delineates that the Department "... shall promulgate and enforce rules and regulations necessary for administration and implementation of [the act]." See 3 Pa.C.S. § 7117. Therefore, consistent with that authority and to establish regulations which are consistent with the provisions of the act, the Department hereby proposes the following amendments to Chapter 111.

Background

The proposed amendments are made necessary by and are established under the authority of, and in accordance with, the act.

The major features and amendments of the proposal are summarized as follows:

Summary of Major Features and Amendments

§ 111.1. Sampling and testing of seeds.

The Department proposes to delete the part of the language of the last sentence of this section related to

receiving a copy of the rules which states, "A copy of the rules may be obtained from the current Secretary-Treasurer of the association (AOSA), or from: Botany and Seed Division, Bureau of Plant Industry, Department of Agriculture, 2301 North Cameron Street, Harrisburg, PA 17110, at cost. The proposal would delete the final portion of that sentence, starting with "or from . . ."

§ 111.2. Condition of seeds for testing.

The Department proposes to delete parts of subsection (a) related to nontesting of seed samples of any kind and add language to deny testing of mixed seeds "when the percentage of analysis is not provided."

§ 111.3. Fees and schedule of charges.

The Department amended subsection (a) to allow for billing of the testing fee and amended subsection (b) in a manner that will no longer allow for cash payment of the fees. A minor and a major amendment were made to subsection (c). First, the word "all" was removed because it is implied and therefore redundant. Second, the Department deleted the chart containing the cost of purity analysis, germination testing and combined testing because that chart and those fees now appear in section 7109(b)(5) of the act (relating to unlawful seed sales).

§ 111.4. Prohibitions and requirements.

The Department deleted subsection (c), which referred to the pricing table that was deleted from § 111.3.

§ 111.11. General labeling requirements.

In subsection (a), the Department deleted old citations to the act and replaced them with the proper citations to the new act. In subsection (a)(1), language was added to clarify the names "and classification" used shall be consistent with the Rules for Seed Testing by the Association of Official Seed Analysts.

§ 111.12. Labeling of flower seeds.

The Department deleted old citations to the act and replaced them with the proper citations to the new act. In addition, the Department added paragraph (3). The new paragraph clarifies labeling requirements for vegetable and flower seeds.

§ 111.13. Labeling of lawn or turf grasses and mixtures.

The Department deleted subsections (a) and (b) and replaced them with language consistent with the provisions of the act related to lawn and turf grasses. See section 7104(b)(2) of the act (relating to labels and labeling).

§ 111.15. Misleading labeling.

The Department rescinded this section because the issues addressed (related to the labeling of lawn and turf grasses and mixtures) are now covered by the act and the revisions to § 111.13.

§ 111.16. Responsibility for labeling.

The Department amended the substantive provisions of the section to assure the citations to the act are correct and to add a provision relating to the expiration time period for lawn and turf grass analysis.

§ 111.17. Labeling of seeds for sprouting.

The Department amended the substantive provisions of the section to clarify what salad and culinary purposes are and to address hard seed germination when applicable.

§ 111.21. Weed seeds classified.

The Department rescinded this section classifying and regulating weed seeds. Seed classifications are covered by the AOSA's Rules for Testing Seed included in § 111.11(a).

§ 111.22. Prohibited noxious weed seeds.

The Department amended this section by adding additional species to the list of prohibited noxious weed seeds.

§ 111.23. Restricted noxious weed seeds.

The Department amended subsection (a)(1) by adding additional species to the list of noxious weed seeds and added canary grass to subsection (a)(3). In addition, the Department amended subsection (b)(1) to include a reference to "Restricted Noxious Weed Seeds."

§ 111.41. Stop sale procedures.

The Department amended the citations in this provision to assure they were consistent with the act.

Fiscal Impact

Commonwealth

The proposed amendments will not impose additional fiscal impacts upon the Commonwealth for administration and enforcement. The amendments will not require the Department to commit an additional amount of time or manpower to the enforcement of the provisions of the act or regulations.

Political Subdivisions

The proposed amendments will impose no additional costs and have no fiscal impact upon political subdivisions. The amendments do not impose any additional burden of enforcement or review on political subdivisions.

Private Sector

The proposed amendments will not impose additional costs on the regulated community, which is part of the private sector or any other part of the private sector. Any additional fees are set forth in the act and merely referenced in the regulations. There are no new certification or licensure requirements and any new labeling requirements are merely consistent with the act and will not impose additional costs on the regulated community.

General Public

The proposed amendments will impose no costs and have no fiscal impact on the general public.

Paperwork Requirements

The proposed amendments will not result in a substantial increase of paperwork.

Public Comment Period

Interested persons are invited to submit written comments regarding the proposed amendments within 30 days following publication in the *Pennsylvania Bulletin*.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P. S. § 745.5(a)), the Department submitted a copy of these proposed amendments on May 2, 2008, to the Independent Regulatory Review Commission (IRRC) and to the Chairpersons of the House Agriculture and Rural Affairs Committee and the Senate Agriculture and Rural Affairs Committee (Committees). In addition to submitting the proposed amendments, the Department has provided IRRC and the Committees with a copy of a

detailed Regulatory Analysis Form. A copy of this material is available to the public upon request.

If IRRC has any objections to any portion of the proposed amendments, it will notify the Department within 30 days after the close of the public comment period. The notification shall specify the regulatory review criteria which have not been met by that portion. The Regulatory Review Act specifies detailed procedures for review, prior to final-form publication of the regulations, by the Department, the General Assembly and the Governor of objections raised.

Further information is available by contacting the Department of Agriculture, Bureau of Plant Industry, 2301 North Cameron Street, Harrisburg, PA 17110-9408; Attention: Joe Garvey, (717) 787-4843.

Effective Date

LABELING

§ 111.11. General labeling requirements.

(a) In labeling the kind of agriculture, vegetable, flower, tree or shrub seeds as required in [section 3 of The Pennsylvania Seed Act of 1965 (3 P. S. § 285-3)] 3 Pa.C.S. § 7104 (relating to labels and labeling), of the following [shall] apply:

(1) Names and classifications (that is "crop" or "weed") used shall be those specified in the Rules for Seed Testing by the Association of Official Seed Analysts.

* * * * *

(4) The following kinds of agricultural seed are generally labeled as to variety and shall be labeled to show either the variety name or the words "Variety Not Stated" or "VNS":

* * * * *

§ 111.12. Labeling of flower seeds.

[Section 3 of The Pennsylvania Seed Act of 1965 (3 P. S. § 285-3) requires] The provisions in 3 Pa.C.S. § 7104 (relating to labels and labeling) require that flower seeds be labeled with the name of the kind and variety or a statement of type and performance characteristics as prescribed by the Department of Agriculture. This provision shall be complied with as follows:

* * * * *

(3) It is permissible to label vegetable and flower seed kinds in containers of 1 pound or less with the statement: "Packed for (YY)" and "Sell by (12/YY)"

and an identifying lot number for the calendar year in which they are being offered for sale.

§ 111.13. Labeling of lawn or turf grasses and mixtures.

(a) [In labeling lawn and turf seeds, the following information shall be provided:

(1) The commonly accepted name of the kind or kind and variety of each agricultural seed component in excess of 5.0% of the whole and the percentage by weight of pure seed in the order of its predominance. Where more than one component is required to be named, the word, "mixture," or the word, "mixed," shall be stated. Percentages of pure seed for mixtures shall be listed under the headings, "Pure Seed."

(2) The percentage by weight of all agricultural seed other than those required to be labeled.

(3) The percentage by weight of inert matter not to exceed 10%, except that 15% inert matter is permitted in Kentucky bluegrass labeled without a variety manner. Foreign material, other than material used for coating or pelleting to enhance the planting value, not common to grass seed may not be added.

(4) The percentage by weight of all weed seeds, not to exceed 1.0%.

(5) Noxious weed seeds shall be listed under the heading "Noxious Weed Seeds" or as otherwise specified.

(6) The percentage of germination, exclusive of hard seed; hard seed, if present, and the calendar month and year that the germination test was completed. If a single test date is used for mixtures, it shall be that of the oldest tested component.

(7) Percentages of germination for mixtures shall be listed under the headings, "Germination" or "Germ."

(b) In addition to this section, labeling of lawn and turf mixtures shall comply with the requirements of section 3 of The Pennsylvania Seed Act of 1965 (3 P. S. § 285-3).]

It is permissible to label cool season lawn and turf grass mixtures that include less than 5% white or ladino clover with a "Sell By Date" and 15 month germination period not including the month of test.

(b) Unless otherwise stated as to use, all those kinds listed under cool season lawn and turf grasses and their mixes must have a "Sell by MM/YY" which may be no more than 15 months from the date of test, exclusive of month of test. Those labeled as: "For Forage Use" or "For Pasture Use" or "For Conservation Use" or some type of qualifying statement indicating that the mixture is not for lawn or turf purposes will require a 9 month date of test not including the month of test and no "Sell By MM/YY" is required.

§ 111.15. [Misleading labeling] (Reserved).

[(a) Notwithstanding § 111.13 (relating to labeling of lawn or turf grasses and mixtures) white clover may be claimed as a component of a mixture in quantities of 1.0% or more and redtop may be claimed as a component in mixtures, other than for lawn and turf, in quantities of 3.0% or more. The germination percentage of each shall be given.

(b) Other components of less than 5.0% shall be totaled and this sum listed as "other crop seed."

(c) Labeling not complying with this section may be considered as misleading.]

§ 111.16. Responsibility for labeling.

* * * * *

(b) The person or dealer shall also be responsible for procuring a new germination test and subsequently attaching new analysis tags before the expiration date of the required [nine] 9-month period or 15 months for cool season lawn and turf grasses as provided in [section 4 of The Pennsylvania Seed Act of 1965 (3 P. S. § 285-4)] 3 Pa.C.S. § 7104 (relating to labels and labeling). Tests shall be made according to the Rules for Testing Seed published by the Association of Official Seed Analysts, and no test may be considered official unless the rules are followed.

Standards for Seed Certification

The Department of Agriculture (Department), under 3 Pa.C.S. Chapter 71 (act) (relating to the Seed Act) and under the specific authority of sections 7111 and 7117 of the act (relating to powers and duties of secretary and department; and rules and regulations), proposes to amend Chapter 115 (relating to standards for seed certification). The act replaces The Pennsylvania Seed Act of 1965 (3 P. S. §§ 285-1—258-11).

Section 7111 of the act authorizes and empowers the Department to enforce the provisions of the act and to “. . . prescribe, modify and enforce such reasonable rules, regulations, standards, tolerances and orders as in the judgment of the secretary shall be necessary to carry out the provisions of [the act].” See 3 Pa.C.S. § 7111(a). In addition, section 7111 of the act establishes specific powers and duties of the Department and provides for delegation of such authority. See 3 Pa.C.S. §§ 7111(b) and (c). Section 7117 of the act specifically delineates that the Department “. . . shall promulgate and enforce rules and regulations necessary of administration and implementation of [the act].” See 3 Pa.C.S. § 7117. Consistent with that authority and to establish regulations which are consistent with the provisions of the act, the Department hereby proposes the following amendments to Chapter 115.

Background

The proposed amendments are made necessary by and are established under the authority of, and in accordance with, the act.

The major features and amendments to the proposed amendments are summarized as follows:

Summary of Major Features and Amendments

§ 115.71. Definitions.

The Department amended the definition of commercial hybrid field corn, by deleting “modified single cross” as a type of commercial hybrid field corn and replacing it with “top cross.” In addition, the Department added two more types (inbred line and open-pollination) to the definition of commercial hybrid field corn.

§ 115.82. Isolation requirements.

The Department deleted the current table, in subsection (d), related to the minimum number of border rows required for fields of various sizes and replaced it with an updated table.

§ 115.211. Seed standards.

The Department added the word “restricted” to the last sentence of this section.

§ 115.271. Seed source.

The Department added language clarifying that seed potatoes will be limited to 8 generations. In accordance

with that change, the Department changed the language stating that foundation G3 was the minimum acceptable source to produce certified G4 to foundation G7 being the minimum acceptable source to produce certified G8.

§ 115.282. Diseases.

The Department reduced the tolerance allowed for diseases in Leaf Roll G4 through G8 from 2% to 1%.

§ 115.283. Varietal mixtures.

The Department added G4 through G8 to the chart related to pre-nuclear varietal mixtures.

§ 115.293. Eligibility factors for tags.

The Department expanded the generations eligible for production and tagging by deleting the language limiting the generations to generations 1—3 and adding language which makes generations 1—7 eligible for production and tagging.

§ 115.302. Treatment for diseases.

The Department rescinded this section.

§ 115.321. Preplanting.

The Department amended a grammatical error in subsection (c) by changing “is” to “are.” In addition, the Department modified the language of subsection (c)(4) to assure the citation to the act was correct.

§ 115.444. Harvesting.

The Department amended subsection (a)(5) to assure the citation to the act was correct.

Subchapter T. Interagency Turf Grass

PENNSYLVANIA GAMING CONTROL BOARD

[58 PA. CODE CH. 441a]
Slot Machine Licensing

The Pennsylvania Gaming Control Board (Board), under the general authority in 4 Pa.C.S. § 1202(b)(30) (relating to general and specific powers) and the specific authority in 4 Pa.C.S. §§ 1205 and 1206 (relating to license or permit application hearing process; public input hearings; and Board minutes and records) proposes to amend Chapter 441a (relating to slot machine licenses) to read as set forth in Annex A.

Purpose of the Proposed Rulemaking

This proposed rulemaking amends the provisions related to licensing hearings for applicants for slot machine licenses.

Explanation of Amendments to Chapter 441a

Section 441a.7 (relating to licensing hearings for slot machine licenses) lays out the procedures for the conduct of slot machine licensing hearings. Through this proposed rulemaking, the Board is expanding these provisions.

Specifically, the Board will require the Bureau of Investigations and Enforcement to report any information concerning an applicant that was obtained from sources in the public domain at the licensing hearing.

Additionally, the Board may request, on the record, that an applicant respond to questions that relate to confidential information at the licensing hearing. The applicant will have the option of waiving the right to confidentiality and answering the questions at the public hearing or requesting that the matter be heard in executive session. If the applicant provides sufficient reason to justify the invocation of confidentiality, the Board will hear the responses to the Board's questions in executive session.

The proposed rulemaking also makes it clear that under no circumstances will an applicant be required to waive the right to confidentiality as a condition to receiving a slot machine license.

STATE BOARD OF EDUCATION

[22 PA. CODE CH. 4]

Academic Standards and Assessment

The State Board of Education (Board) proposes to amend Chapter 4 (relating to academic standards and assessment) to read as set forth in Annex A. The Board is acting under the authority of sections 2603-B and 2604-B of the Public School Code of 1949 (24 P. S. §§ 26-2603-B and 2604-B).

Purpose

Chapter 4 sets forth requirements for State academic standards and assessments and State high school graduation requirements for this Commonwealth's public schools.

Background

Pennsylvania, like other states in the 1990s, increased its educational standards and high school graduation requirements by adopting State academic standards and establishing a Statewide accountability system designed to measure student and school performance. Yet 9 years later, these reforms have not yielded consistent results at

the high school level. One-quarter of our students do not graduate from high school on time. Nearly 40% of those who graduate—57,000 students each year—are awarded diplomas without having passed the State's reading, writing and math tests. Less than half of our high school graduates enroll in college upon graduation and only 37% make it to their sophomore year. Only one-third graduate from college on time.

These results severely limit economic opportunity for thousands of graduates to earn a living wage; they erode this Commonwealth's overall competitiveness for jobs, and reduce our future tax base thereby reducing resources available for vital government services. Every student must graduate from high school with the knowledge and skills that are essential for college and career success if this Commonwealth's economy is to fulfill its promise.

As social and economic forces have demanded a more highly educated citizenry, the Board has responded by increasing the State's high school graduation requirements over time. In 1963, the Board required students to successfully complete 13 credit units of study in grades 10—12. Over the next 3 decades, the Board increased State high school graduation requirements, eventually to require successful completion of 21 course credits in grades 9—12. Then, in 1993, the Board eliminated high school course and credit requirements and replaced them with 56 student learning outcomes—the precursor to today's State academic standards. The student learning outcomes describe what students should know and be able to do upon graduation. School districts were charged with developing the assessment systems that would determine whether students achieved the student learning outcomes. At the same time, a State assessment system was established to assess the academic performance of each school.

In 1999, the Board established the State academic standards, which provide a clear and detailed description of what students were expected to know and be able to do. The Pennsylvania System of School Assessment (PSSA) was redesigned to measure both school and individual student achievement of the State academic standards. The Board also required school district high school graduation policies to address: course completion and grades; completion of a culminating project and results of local assessments aligned with the academic standards. The policy also required students, beginning in 2002-2003, to demonstrate proficiency in reading, writing and mathematics on the PSSA or local assessments aligned with State academic standards and State assessment at the proficient level or above to graduate.

At the time, the Board believed this policy reflected a reasonable approach that honored the tenets of local control. However, as stated at the time in the *Pennsylvania Bulletin*:

Graduation requirements. The Senate Committee, members of the House Committee and staff of IRRC sought greater clarity in the graduation requirements including a determination of whether and when a proficient level on State assessments is required for graduation. Language in § 4.24(a) (relating to high school graduation requirements) was amended in the final-form version to clarify that students graduating in 2002-2003 must demonstrate the attainment of academic standards in reading, writing and mathematics at the proficient level on State assessments or local assessments aligned with the academic standards and State assessments.

* * * * *

Comparability of local assessment. Members of the House and Senate Committees and IRRC staff recommended that there be established a process for determining the comparability of local assessment. Language under § 4.24(a) was changed so that local assessments must be aligned with academic standards and State assessments. The most certain evidence of the comparability or degree of alignment between these assessments will come from repeated administrations of State assessments and local assessments. If it becomes apparent that large numbers of students not achieving at the proficient level on State assessments are deemed proficient by local assessments, regulation and administrative review will become important. Until then, the Board does not feel the extra administrative burden for schools and the Department is warranted.

29 Pa.B. 399 (January 16, 1999).

Over the past several years it has become clear that the concerns raised by the House and Senate Education Committees and IRRC as expressed in their comments to the Board were indeed valid.

To address this concern, in September 2005 Governor Rendell established a Commission on College and Career Success. The Commission was given a charge to: define "college and career ready" in mathematics, English and science; examine and make specific recommendations for better alignment of academic standards and assessments across the secondary and post-secondary educational sectors, as well as industry in Pennsylvania; encourage local school districts to adopt a core high school curriculum for all Pennsylvania students; present to the Governor a legislative and regulatory package that would address the needs outlined in their findings; and to investigate policies and programs that ensure a higher number of prepared students enter and remain in our colleges and universities.

The Commission delivered its report to the Governor in December 2006. The proposed regulations, with several modifications, implement the Commission's recommendations. The modifications are based on input the Board received at six regional public roundtable meetings, one public hearing and five public committee meetings.

Requirements of the Proposed Rulemaking

The proposed rulemaking would amend the following items:

§ 4.3 (*relating to definitions*). The Board proposes to add definitions of the two State assessments: "Pennsylvania System of School Assessment" and "Graduation Competency Assessments" (GCA).

§ 4.4(e) (*relating to general policies*). The Board proposes to add requirements that the Department of Education (Department) provide the supports and assistance necessary for school districts and area vocational-technical school (AVTS) to assist students to attain proficiency in the State academic standards, including the development of a voluntary model curriculum; effective student tutoring, remediation and extended instructional time programs; and continuing professional education for teachers.

§ 4.24 (*relating to high school graduation requirement*). The Board proposes to continue the existing State high school graduation requirements through the 2012-2013 school year. Beginning in the 2013-2014 school year, each school district and AVTS, including charter schools, would be required to specify requirements for high school gradu-

ation in their strategic plan. At a minimum, these requirements would include: course completion and grades; culminating project; demonstration of proficiency in each of the academic standards not assessed by the State; and proficiency in reading, writing, math, science and social studies using one or any combination of the following—PSSA, GCAs, Advanced Placement/International Baccalaureate exams or validated local assessments. The Board also proposes to require school entities to provide any student who does not score proficient or above on the 11th grade PSSA or GCA administered in any grade with supplemental instructional support to assist the student to attain proficiency in the State academic standards.

The Board proposes to eliminate the Pennsylvania Certificates of Proficiency and Distinction. Since under the new high school graduation requirements every student awarded a high school diploma would meet State standards, the certificates are no longer necessary. The Board also proposes to add GCA scores and locally validated assessment scores to each student's academic transcript. Regulations in place since 2001 have required that a student's PSSA scores be included on the student's transcript.

§ 4.51 (*relating to State assessment system*). To distinguish between different State assessments, the Board proposes to revise the term "State assessment" as used in subsections (b) and (d) to mean the "PSSA." A new proposed subsection (e) would direct the Department to develop GCAs in math (3), language arts (2), social studies (3) and science (2). The new requirement would provide that GCAs be offered at least three times each year and that the scores of candidates for graduation be provided to the student's school at least 10-calendar days prior to graduation. Proposed language also would require the GCAs to be designed as modules of sequenced, related content, so that students who do not score proficient need only retake those portions of the test in which they did not score proficient. Proposed language also would direct the Department to provide guidance to school entities regarding appropriate accommodations for students with disabilities and English language learners.

§ 4.52 (*relating to local assessment system*). The Board proposes to add language that allows schools to use GCAs in place of traditional final exams administered at the middle or high school level.

Affected Parties

The proposed rulemaking would affect the students and professional employees of the public schools of this Commonwealth.

Cost and Paperwork Estimates

Direct costs to the Commonwealth include the cost to develop the GCAs which is estimated at \$15 million over 3 years. Costs to the Commonwealth to administer, score and report the ten tests are estimated at \$40.0 million each year. The cost to the Commonwealth to develop the voluntary model curriculum in 10 subjects is estimated at \$5.9 million over 3 years.

Effective Date

The proposed rulemaking would become effective upon final publication in the *Pennsylvania Bulletin*.

Sunset Date

The Board will review the effectiveness of Chapter 4 every 4 years in accordance with the Board's policy and practice respecting all of its regulations. Thus, no sunset date is necessary.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (act) (71 P. S. § 745.5(a)), on May 2, 2008, the Board submitted a copy of this proposed rulemaking and a copy of a Regulatory Analysis Form to the Independent Regulatory Review Commission (IRRC) and to the Chairpersons of the House and Senate Committees on Education. A copy of this material is available to the public upon request.

Under section 5(g) of the act, IRRC may convey any comments, recommendations or objections to the proposed rulemaking within 30 days of the close of the public comment period. The comments, recommendations or objections must specify the regulatory review criteria that have not been met. The act specifies detailed procedures for review, prior to final publication of the rulemaking, by the Board, the General Assembly and the Governor of comments, recommendations or objections raised.

* * * * *

(b) [State assessment] All PSSA instruments administered in reading, writing and mathematics in grades 5, 8 and 11 will be standards-based and criterion referenced and include essay or open-ended response items in addition to other item formats. The proportion of type of items will vary by grade level. Neither State assessments nor academic standards under § 4.12 may require students to hold or express particular attitudes, values or beliefs. The Department will make samples of assessment questions, instrument formats[,] and scoring guides available to the public after each administration of State assessments. The criteria for judging performance on State assessments are as follows:

(1) Performance on [State] PSSA reading assessments shall be demonstrated by students' responses to comprehension questions about age-appropriate reading passages and by their written responses to in-depth comprehension questions about the passages.

(2) Performance on [State] PSSA mathematics assessments shall be demonstrated by students' responses to questions about grade-appropriate content and by the quality of their responses to questions that require a written solution to a problem.

(3) Performance on [State] PSSA writing assessments shall be demonstrated by the quality of students' written compositions on a variety of topics and modes of writing.

(4) Performance on PSSA science assessments shall be demonstrated by students' responses to grade appropriate content and by the quality of their responses to questions that demonstrate knowledge of each category of the standards for science and technology and environment and ecology.

(5) Levels of proficiency shall be advanced, proficient, basic and below basic. In consultation with educators, students, parents and citizens, the Department will develop and recommend to the Board for its approval specific criteria for advanced, proficient, basic and below basic levels of performance.

(c) The Department will develop or cause to be developed [State] PSSA assessments based on academic standards in mathematics, reading [and], writing and science under § 4.12 and contained in Appendix A. In developing assessments, the Department will consult with educators, students, parents and citizens regarding the specific methods of assessment. To ensure that information regarding student performance is available to parents and teachers, State assessments developed under this section [shall] must include student names. Individual test results shall be used in planning instruction only by parents, teachers, administrators and guidance counselors with a need to know based upon local board policy on testing and in reporting academic progress. The Department or other Commonwealth entities are prohibited from collecting individual student test scores, and may only collect aggregate test scores by school and district.

* * * * *

(e) Students not achieving at the proficient level in the administration of State assessments in grade 11 shall be

provided one additional opportunity in grade 12 to demonstrate a proficient level on [State] the PSSA assessments.

(f) The Department will develop or cause to be developed GCAs as follows:

(1) Three assessments aligned with the mathematics standards, contained in Appendix A, that assess the academic content traditionally included in Algebra I, Algebra II and Geometry courses.

(2) Two assessments aligned with select reading, writing, speaking and listening standards, contained in Appendix A, that assess academic content traditionally included in high school literature and composition courses.

(3) Three assessments aligned with select History and Civics and Government standards, contained in Appendix C, that assess content traditionally included in high school level American history, World history and civics and government courses.

(4) Two assessments aligned with select standards for science and technology and environment and ecology, contained in Appendix B, that assess academic content traditionally included in high school level biology and chemistry courses.

(5) GCAs shall be offered at least 3 times each year, once each in the fall, spring and summer. GCAs shall be reviewed and scored so that the

scores for candidates for graduation are provided to schools no later than 10 calendar days prior to graduation.

(6) Students shall be permitted to retake any GCA, or GCA module, in which the student did not score proficient or above at the next available testing date.

(7) Each GCA may be designed into modules that reflect distinct, related academic content that is common to the traditional progression of coursework to allow students who do not score proficient or above to retake those portions of the test in which they did not score proficient or above.

(8) The Department will provide guidance to school entities as to the appropriate accommodations school entities shall provide to students with disabilities and English language learners, when appropriate.

Maximum Lawful Rate of Interest for Residential Mortgages for the Month of June 2008

The Department of Banking (Department), under the authority contained in section 301 of the act of January 30, 1974 (P. L. 13, No. 6) (41 P. S. § 301), determines that the maximum lawful rate of interest for residential mortgages for the month of June, 2008, is 6 1/2%.

The interest rate limitations under the State's usury statute were preempted to a great extent by Federal law, the Depository Institutions Deregulation and Monetary Control Act of 1980 (Pub. L. No. 96-221). Further preemption was instituted with the signing of Pub. L. No. 96-399, which overrode State interest rate limitations on any individual who finances the sale or exchange of residential real property which the individual owns and which the individual occupies or has occupied as his principal residence.

Each month the Department is required by State law to compute and announce the ceiling rate on residential mortgages in this Commonwealth. This maximum rate is determined by adding 2.50 percentage points to the yield rate on long-term government bonds as published by the Federal Reserve Board and/or the United States Treasury. The latest yield rate on long-term government securities is 4.06 to which was added 2.50 percentage points for a total of 6.56 that by law is rounded off to the nearest quarter at 6 1/2%

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. Persons intending to use the Background Standard, Statewide Health Standard, the Site-Specific Standard or who intend to remediate a site as a special industrial area must file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one, a combination of the cleanup standards or who receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for any contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a Site-Specific Standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the sites identified, proposed for remediation to a Site-Specific Standard or as a special industrial area, the municipality within which the site is located may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office before which the notice appears. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

NEW SOURCES AND MODIFICATIONS

The Department of Environmental Protection (Department) has developed an "integrated" plan approval, State operating permit and Title V operating permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit all the permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department has received applications for plan approvals and/or operating permits from the following facilities.

Copies of the applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office identified in this notice. Persons interested in reviewing the application files should contact the appropriate regional office to schedule an appointment.

Persons wishing to receive a copy of a proposed plan approval or operating permit must indicate their interest to the Department regional office within 30 days of the date of this notice and must file protests or comments on a proposed plan approval or operating permit within 30 days of the Department providing a copy of the proposed document to that person or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that a hearing be held concerning the proposed plan approval and operating permit. Comments or protests filed with the Department regional offices must include a concise statement of the objections to the issuance of the Plan approval or operating permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office identified before the application. TDD users should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final plan approvals and operating permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121—143, the Federal Clean Air Act (act) and regulations adopted under the act.

The bread oven is a roll line that will produce up to 12,000 rolls/loaves per hour. The facility will remain as a synthetic minor facility.

The Department of Environmental Protection's (Department) review of the information provided by Butter Krust Baking Company, Inc. indicates that the proposed source and control device will comply with all air quality requirements, including the BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, pertaining to air contamination sources and the emission of air contaminants. Based on this finding, the Department intends to issue a plan approval for the proposed construction, installation and temporary operation. Additionally, if the Department determines that the proposed source and the air cleaning device are operating in compliance with the plan approval conditions, the conditions established in the plan approval will be incorporated into the operating permit by means of an administrative amendment under 25 Pa. Code § 127.450. The following is a summary of the conditions that the Department proposes to place in the plan approval to ensure compliance with all applicable regulatory requirements.

1. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the emission of NOx from the exhaust of the

CATOX associated with the bread oven shall not exceed 1.01 pounds per hour and 4.40 tons in any 12-consecutive month period.

2. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the emission of CO from the exhaust of the CATOX associated with the bread oven shall not exceed 0.84 pound per hour and 3.70 tons in any 12-consecutive month period.

3. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the emission SO_x, expressed as SO₂, from the exhaust of the CATOX associated with the bread oven shall not exceed 0.01 pound per hour and 0.03 ton in any 12-consecutive month period.

4. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the emission of PM and PM/PM10 from the exhaust of the CATOX associated with the bread oven shall not exceed 0.08 pound per hour and 0.33 ton in any 12-consecutive month period.

5. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the emission of VOCs from the exhaust of the CATOX associated with the bread oven shall not exceed 1.34 pounds per hour and 5.85 tons in any 12-consecutive month period.

6. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, The emission of total combined HAPs from the exhaust of the CATOX associated with the bread oven shall not exceed 0.02 pound per hour and 0.08 ton in any 12-consecutive month period.

7. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, no person may permit the emission of PM from the exhaust of the CATOX associated with the bread oven into the outdoor atmosphere in a manner that the concentration in the effluent gas exceeds 0.002 gpd standard cubic foot. Compliance with the requirement specified in this plan approval condition assures compliance with the provision in 25 Pa. Code § 123.13.

8. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, there shall be no visible emissions from the exhaust of the CATOX associated with the bread oven. Compliance with the requirement specified in this streamlined condition assures compliance with the visible emissions requirements as specified in 25 Pa. Code §§ 123.41 and 123.42.

9. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the CATOX associated with the bread oven shall destroy the VOC emissions ducted to it from the bread oven at a destruction efficiency of no less than 96% (by weight). However, the CATOX associated with the bread oven shall be designed to achieve VOC destruction efficiency greater than 98%.

10. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, only natural gas shall be fired in the bread oven and only natural gas shall be fired in the CATOX associated with the bread oven.

11. Within 180 days from the commencement of operation of the bread oven, the permittee shall perform stack testing upon the inlet and outlet of the CATOX while the CATOX is being used to control VOC emissions from the bread oven to determine the amount of VOCs present and the VOC destruction efficiency of the CATOX. Simultaneous testing of the inlet and outlet of the CATOX (two sampling trains running simultaneously) shall be performed. The stack testing shall be conducted while the bread oven is operating at representative operating conditions. Additionally, the test shall verify compliance with a VOC destruction efficiency of 96% for the CATOX associ-

ated with the bread oven. The testing is to be performed with an inlet temperature range of 600° F to 650° F, or higher as approved by the Department, for the CATOX. The permittee shall continuously monitor the inlet and outlet temperature of the CATOX during the duration of the stack test. Additionally, the pressure drop across the catalytic bed shall be continuously recorded during the test. The testing is to be performed using Environmental Protection Agency reference method test procedures acceptable to the Department. Subsequently, the Department may revise the required minimum VOC destruction efficiency and VOC emission limitations. Additionally, the Department may establish the pressure drop range of the CATOX based upon these stack test results and any other available data approved by the Department.

12. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the permittee shall install, operate, calibrate and maintain instrumentation for the continuous measurement of the inlet and outlet gas stream temperatures of the catalyst bed of the CATOX associated with the bread oven to assure a minimum inlet temperature of 650° F is achieved during operation. The CATOX shall be equipped with instrumentation that alerts the operator when any of the following conditions occur: low inlet temperature and high outlet temperature of the catalytic bed, low and high gas pressure, low process fan pressure, low combustion fan pressure, and flameout. Additionally, the UV Scanner shall be used to detect the flameout.

13. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the CATOX associated with the bread oven shall be equipped with instrumentation to monitor the pressure drop across the catalytic bed on a continuous basis. Additionally, the permittee shall inspect and record the pressure drop across the catalytic oxidizer bed of the CATOX, at least once per day, to determine if the catalyst is plugged, blocked or damaged and to ensure that the CATOX is operating as designed.

14. The permittee shall keep records of: the supporting calculations on a monthly basis for the NO_x, CO, SO_x, PM/PM10, VOC and total combined HAPs emissions from the exhaust of the CATOX associated with the bread oven to verify compliance with the NO_x, CO, SO_x, PM/PM10, VOC and total combined HAPs emissions limitations of pounds per hour and tons in any 12-consecutive month period. These records shall be retained for a minimum of 5 years and shall be made available to the Department upon request.

15. The permittee shall keep records of all stack test reports for the bread oven and the CATOX associated with the bread oven. These records shall be retained for a minimum of 5 years and shall be made available to the Department upon request.

16. The permittee shall keep records of the identity and quantity of baking products produced in the bread oven on a monthly basis. The permittee shall keep records sufficient to perform VOC emission calculations for the bread oven. These records shall be retained for a minimum of 5 years and shall be made available to the Department upon request.

17. The permittee shall keep records of the inlet and outlet temperature readings of the CATOX associated with the bread oven on a continuous basis at all times the bread oven is in operation, including start-up and shut-down. The temperature recordings shall be made by means of a charter recorder or similar device, as approved by the Department. The records shall include the dates and times of all data that is generated by the inlet and

outlet temperature monitor recording system associated with the CATOX. The permittee shall keep records of the pressure drop across the catalytic bed of the CATOX associated with the bread oven on at least a daily basis. These records shall be retained for a minimum of 5 years and shall be made available to the Department upon request.

18. The permittee shall keep records of the amount of natural gas combustion in the bread oven on a monthly basis. The permittee shall keep records of the amount of natural gas combustion in the CATOX associated with the bread oven on a monthly basis. These records shall be retained for a minimum of 5 years and shall be made available to the Department upon request.

19. The permittee shall submit reports to the Department on a semi-annual basis that include the supporting calculations to verify compliance with the VOC emissions limitations for the CATOX associated with the bread oven in any 12-consecutive month period. The semi-annual reports shall be submitted to the Department no later than March 1 (for January 1 through December 31 of the previous year) and September 1 (for July 1 of the previous year through June 30 of the current year).

20. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the permittee shall not operate the bread oven without the simultaneous operation of the CATOX. The VOC emissions from the bread oven shall be controlled by the CATOX.

21. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the permittee shall develop and implement a catalyst management plan, which at a minimum, shall include testing of the catalyst material and a determination of the CATOX's capabilities to comply with the plan approval requirements. The permittee shall submit the catalyst management plan to the Department 30 days prior to the start-up of the CATOX. As part of the catalyst management plan, the permittee shall test or sample on an annual basis the catalyst face of the CATOX and compare the VOC destruction efficiency potential of the used catalyst to the potential of new or clean catalyst. Based on the analysis performed as previously, the permittee shall clean the catalyst, replace the entire catalyst or, if recommended by the manufacturer, continue to utilize the same catalyst to meet the VOC destruction efficiency requirements of the CATOX.

22. Under BAT requirements of 25 Pa. Code §§ 127.1 and 127.12, the inlet temperature of the catalytic bed of the CATOX shall not drop below 650° F at any time, except during stack testing upon the CATOX.

23. The bread oven is a Turkington APV model 960 tunnel oven with a capacity of 12,000 loaves of bread per hour, utilizing 127 direct fired burners with a total rated capacity of 9,356 mmBtu/hr. The CATOX is a CSM Worldwide, Inc. model 40A catalytic oxidizer with a capacity of 4,000 standard cubic feet per minute, equipped with a maximum capacity 1.0 mmBtu/hr burner.

24. All conditions contained in State-only Operating Permit SMOP 49-00011 remain in effect unless superseded or amended by conditions contained in this plan approval (49-00011B). If there is a conflict between a condition contained in this plan approval and a condition contained in SMOP 49-00011, the permittee shall comply with the condition contained in this plan approval.

The PM emissions from the aggregate dryer, the elevator, hot mix bins and the mixer will be controlled by the proposed cyclone and fabric collector.

The Department of Environmental Protection's (Department) review of the information contained in the application submitted by Corson indicates that the aggregate dryer, the elevator, hot mix bins, and the mixer (Source ID P101) controlled by the proposed cyclone (ID C101A) and fabric collector (ID C101B) will comply with all applicable air quality requirements pertaining to air contamination sources and the emission of air contaminants, including the fugitive air contaminant emission requirement of 25 Pa. Code § 123.1, the PM emission limitation of 25 Pa. Code § 123.13 and the visible emission limitation of 25 Pa. Code § 123.41. The plan approval, if issued, will subsequently be incorporated in a State-only operating permit via an administrative amendment in accordance with 25 Pa. Code § 127.450 at a later date.

Based upon this finding, the Department proposes to issue a plan approval for the construction of asphalt plant and installation of the cyclone and fabric collector to control PM emissions from the aggregate dryer, the elevator, hot mix bins and the mixer. COAL AND NONCOAL MINING ACTIVITY APPLICATIONS

Applications under the Surface Mining Conservation and Reclamation Act (52 P. S. §§ 1396.1—1396.19a); the Noncoal Surface Mining Conservation and Reclamation Act (52 P. S. §§ 3301—3326); The Clean Streams Law (35 P. S. §§ 691.1—691.1001); the Coal Refuse Disposal Control Act (52 P. S. §§ 30.51—30.66); and The Bituminous Mine Subsidence and Land Conservation Act (52 P. S. §§ 1406.1—1406.21). Mining activity permits issued in response to applications will also address the applicable permitting requirements of the following statutes: the Air Pollution Control Act (35 P. S. §§ 4001—4015); the Dam Safety and Encroachments Act (32 P. S. §§ 693.1—693.27); and the Solid Waste Management Act (35 P. S. §§ 6018.101—6018.1003).

The following permit applications to conduct mining activities have been received by the Department of Environmental Protection (Department). A copy of an application is available for inspection at the district mining office indicated before an application. Where a 401 Water Quality Certification is needed for any aspect of a particular proposed mining activity, the submittal of the permit application will serve as the request for certification.

Written comments, objections or requests for informal conferences on applications may be submitted by any person or any officer or head of any Federal, State or local government agency or authority to the Department at the district mining office indicated before an application within 30 days of this publication, or within 30 days after the last publication of the applicant's newspaper advertisement, as provided by 25 Pa. Code §§ 77.121—77.123 and 86.31—86.34.

Where any of the mining activities listed will have discharges of wastewater to streams, the Department will incorporate NPDES permits into the mining activity permits issued in response to these applications. NPDES permits will contain, at a minimum, technology-based effluent limitations as identified in this notice for the respective coal and noncoal applications. In addition, more restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining

which may occur will be incorporated into a mining activity permit, when necessary, for compliance with water quality standards (in accordance with 25 Pa. Code Chapters 93 and 95). Persons or agencies who have requested review of NPDES permit requirements for a particular mining activity within the previously mentioned public comment period will be provided with a 30-day period to review and submit comments on the requirements.

Written comments or objections should contain the name, address and telephone number of the person submitting comments or objections; the application number; and a statement of sufficient detail to inform the

Department on the basis of comment or objection and relevant facts upon which it is based. Requests for an informal conference must contain the name, address and telephone number of requestor; the application number; a brief summary of the issues to be raised by the requestor at the conference; and a statement whether the requestor wishes to have the conference conducted in the locality of the proposed mining activities.

This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92 and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of Chapter 3 of the Land Recycling and Environmental Remediation Standards Act (act) require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, shall also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a Site-Specific Standard remediation. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media; benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the Environmental Cleanup Program manager in the Department regional office after which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the Community Relations Coordinator at the appropriate regional office. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.908).

Provisions of 25 Pa. Code § 250.8, administration of the Land Recycling and Environmental Remediation Standards Act (act), require the Department of Environmental Protection (Department) to publish in the *Pennsylvania Bulletin* a notice of final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by provisions of the act for compliance with selection of remediation to a Site-Specific Standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation, concentration of regulated substances in environmental media, benefits of refuse of the property and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential

remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by provisions of the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

Proposed Phase 1 Nontradable Mercury Allowance Allocations under the Pennsylvania-specific Mercury Reduction Program

The Commonwealth's "State-specific" mercury reduction program to reduce mercury emissions from coal-fired electric generating units (EGUs) and co-generation units with a nameplate rated capacity of 25 megawatts or more that produce electricity for sale was promulgated by the Environmental Quality Board 37 Pa.B. 883 (February 17, 2007). The final-form rulemaking establishes mercury emission standards, annual emission limitations as part of a Statewide annual nontradable mercury allowance program and monitoring, recordkeeping and reporting requirements to reduce mercury emissions from coal-fired EGUs or cogeneration units.

The Department of Environmental Protection (Department) is providing notice and an opportunity for a 30-day public comment period on the proposed nontradable mercury allowance allocations authorized under the Statewide Mercury Nontradable Allowance Program for affected coal-fired EGUs and cogeneration units. The

proposed allocations are being made for the Phase 1 (January 1, 2010—December 31, 2014) control period of the Commonwealth-specific mercury reduction program under 25 Pa. Code §§ 123.201—123.215 (relating to standards for contaminants mercury emissions). These allocations are required to be published in the *Pennsylvania Bulletin* by May 31, 2008, under 25 Pa. Code § 123.207(h) (relating to annual emission limitations for coal-fired EGUs).

The total ounces of mercury emissions available for emission limitation set-asides as annual nontradable mercury allowances in this Commonwealth for Phase 1 is 56,928 ounces. Ninety five percent, or 54,080 ounces, of this total amount is available for allocation to existing EGU owners and operators during the Phase 1 control period. The total number of nontradable allowances proposed to be allocated to the existing affected EGUs is 50,681 ounces. The remaining 3,399 ounces will be placed in the annual emission limitation supplement pool as required under 25 Pa. Code § 123.208 (relating to annual emission limitation supplement pool).

New affected units eligible for nontradable mercury allowances under 25 Pa. Code § 123.207(c) are also included in the proposed allocations. The total allowances set aside for new affected units are 2,848 ounces. The Department will set aside a total number of annual non-tradable mercury allowances for owners and operators of new affected EGUs that do not yet have a baseline heat input determined in accordance with the requirements of an approved plan approval or operating permit. Units in this category are designated as new units in the allocation table. Those new source set aside allowances not allocated by the Department will be placed in the annual emission limitation supplement pool as required under 25 Pa. Code § 123.208.

The table lists the following: "Status" for whether the unit's allocation was calculated based on the procedure for new or existing units; the units' average "EGU Avg. Heat Input;" the "EGU Name" of each facility; the "Oris Code"; "Unit Number"; and the "Allocation." The proposed nontradable allowance allocations listed in the table are subject to revision if the Department determines that corrections to heat input averages and/or other relevant data are necessary.

INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P. S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P. S. § 645.5b).

The Commission has issued comments on the following proposed regulations. The agency must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

Regulation #125-79 (IRRC #2677)
Preliminary Provisions; Employees;
Junket Enterprises;
Slot Machine Licenses;
Slot Machine Testing and Control;
Possession of Slot Machines; and
Accounting and Internal Controls
May 7, 2008**

We submit for your consideration the following comments on the proposed rulemaking published in the March 8, 2008 *Pennsylvania Bulletin*. Our comments are

based on criteria in section 5.2 of the Regulatory Review Act (71 P. S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P. S. § 745.5a(a)) directs the Pennsylvania Gaming Control Board (Board) to respond to all comments received from us or any other source.

1. Section 441a.19. Notice of employee misconduct and offenses and employee resignations.—Reasonableness; Clarity.

Subsection (d) requires the licensee to notify the Board within five days of the receipt of a resignation of any "key employee." A commentator asserts that it currently has an internal policy, which was approved by the Board, that the Board will be notified within 15 days of the resignation of a "key employee." Will the Board-approved internal

policy be grandfathered from this new requirement? If so, language should be added to the final-form regulation that clearly states the Board's intent regarding the applicability of this new provision on existing, Board-approved internal policies.

2. Section 461a.7. Slot machine minimum design standards.—Reasonableness; Clarity.

Service buttons

Subsection (x) requires the slot machine to be equipped with a service button designed to allow the player to request assistance. A commentator states that some of their electronic games do not have a service button because they are designed to be played only with an attendant present. The Board should explain why a service button is required for all machines or consider exempting the machines that fall into the category described by the commentator.

Other color combination approved by the Office of Gaming Operations

Under Subsection (y)(3), a licensee can use a label with "other color combination approved by the Office of Gaming Operations." We have three questions.

First, what process is required to get another color combination approved?

Second, commentators have indicated that they currently have signage on their machines that may not meet these standards. Will the Board require these licensees to change the existing signs or apply for approval of their current labels?

The two questions directly above also apply to §§ 461a.10(b), 461a.22(b) and 465a.28(l).

Finally, why doesn't the labeling provision in Section 465a.29(b) also include "other color combination approved by the Office of Gaming Operations?"

Label that may not be easily removed

Subsection (y)(3), as well as §§ 461a.10(b), 461a.22(b) and 465a.29(b), requires labels that "may not be easily removed." This requirement is subjective and it is not clear how to comply. We recommend rewriting this provision so that licensees will know how to label machines to comply with the regulation.

3. Section 463a.7. Off premises storage of slot machines.—Need; Fiscal impact; Reasonableness.

A commentator believes the change from written requests for off premise storage to a petition to the Board is burdensome and that the current process is adequate. The Board should explain why this change to a petition process is needed. The Board should also explain the time difference between getting approval under the petition process compared to the written requests and the change in cost to the licensee to file a petition rather than a written request.

4. Section 465a.2. Internal control systems and audit protocols.—Reasonableness; Clarity.

Subsection (j) requires a paper copy of the two attestations to be maintained for at least five years. Has the Board considered allowing licensees to electronically save these documents?

5. Section 465a.13. Possession of weapons within a licensed facility.—Reasonableness, Clarity.

Several sentences in this section contain the phrase "or other device that could injure or incapacitate a person." This is a vague phrase because many common items such

as an ink pen could be used to injure or incapacitate a person. What specifically is the Board trying to prohibit?

6. Section 465a.26. Jackpot payouts.—Reasonableness; Clarity.

Lead slot attendants

Various provisions in Subsection (b) refer to "lead slot attendants." However, a commentator states that it does not have such a job classification. Does the Board intend to require the licensee to establish this classification?

Two-part manual jackpot receipt and a two-part electronically generated jackpot payout slip

Subsection (b) sets forth provisions requiring a "two-part manual jackpot payout receipt and a two-part electronically generated jackpot payout slip." The Board should explain the need for "two-part manual jackpot payout receipt and a two-part electronically generated jackpot payout slip."

Jackpot amount

For clarity, the Board should review the language of Paragraph (b)(4) which states "... if the jackpot is between \$10,000 or more but less than \$25,000. ..."

State Board of Examiners of Nursing Home Administrators Regulation #16A-629 (IRRC #2678)

Temporary Permits

May 7, 2008

We submit for your consideration the following comments on the proposed rulemaking published in the March 8, 2008 *Pennsylvania Bulletin*. Our comments are based on criteria in section 5.2 of the Regulatory Review Act (71 P. S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P. S. § 745.5a(a)) directs the State Board of Examiners of Nursing Home Administrators (Board) to respond to all comments received from us or any other source.

Section 39.17. Temporary permits—statement of policy.—Clarity and lack of ambiguity.

This proposed rulemaking amends § 39.1, pertaining to definitions and § 39.4, pertaining to admission to practice and temporary permits. The annex submitted with the proposal also amends § 39.17, a statement of policy pertaining to temporary permits. Statements of policy are nonregulatory documents that provide guidance by which an agency will carry out its duties. Unlike regulations, statements of policy are not enforceable. Consequently, they are not binding upon third parties and cannot include requirements that would impose penalties for noncompliance.

This Commission is charged with reviewing and approving regulations or amendments to regulations. If the Board intends to change the statement of policy to a regulation, we suggest that the text of § 39.17 be moved to § 39.4 and that § 39.17 be deleted or reserved. If the Board intends to keep § 39.17 as a policy statement, then § 39.17 and any amendments to it should not be included in the annex of the final-form regulation.
