READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give the history of regulations. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised. A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

THE COURTS

Title 204—JUDICIAL SYSTEM GENERAL PROVISIONS

PART V. PROFESSIONAL ETHICS AND CONDUCT [204 PA. CODE CH. 87]

Amendments to Rules of Organization and Procedure of the Disciplinary Board of the Supreme Court of Pennsylvania; Order No. 82

By this Order, the Disciplinary Board of the Supreme Court of Pennsylvania is amending its Rules of Organization and Procedure to modify Rule 87.2 and 87.3 to permit the filing of complaints in electronic form.

The Disciplinary Board of the Supreme Court of Pennsylvania finds that:

(1) To the extent that 42 Pa.C.S. § 1702 (relating to rule making procedures) and Article II of the act of July 31, 1968 (P.L. 769, No. 240), known as the Commonwealth Documents Law, would otherwise require notice of proposed rulemaking with respect to the amendments adopted hereby, those proposed rulemaking procedures are inapplicable because the amendments adopted hereby relate to agency procedure and are perfunctory in nature.

(2) The amendments to the Rules of Organization and Procedure of the Board adopted hereby are not inconsistent with the Pennsylvania Rules of Disciplinary Enforcement and are necessary and appropriate for the administration of the affairs of the Board.

The Board, acting pursuant to Pa.R.D.E. 205(c)(12), orders:

(1) Title 204 of the *Pennsylvania Code* is hereby amended as set forth in Annex A hereto.

(2) The Secretary of the Board shall duly certify this Order, and deposit the same with the Administrative Office of Pennsylvania Courts as required by Pa.R.J.A. 103(c).

(3) The amendments adopted hereby shall take effect 30 days after publication in the *Pennsylvania Bulletin*.

*By the Disciplinary Board of the
Supreme Court of Pennsylvania*

JULIA M. FRANKSTON-MORRIS,
Secretary

CHAPTER 6. TRIAL PROCEDURES IN COURT CASES

PART A. General Provisions

Rule 602. Presence of the Defendant.

(A) The defendant shall be present at every stage of the trial including the impaneling of the jury and the return of the verdict, and at the imposition of sentence, except as otherwise provided by this rule. The defendant’s absence without cause at the time scheduled for the start of trial or during trial shall not preclude proceeding with the trial, including the return of the verdict and the imposition of sentence.

(B) A corporation may appear by its attorney for all purposes.

(C) CHALLENGES TO A FINDING OF ABSENCE WITHOUT CAUSE

(i) If a defendant is tried *in absentia* but not sentenced *in absentia*, the defendant, prior to or at time of sentencing, may file a motion seeking a new trial on the grounds that his or her absence at trial was with cause.

(ii) If a defendant is tried and sentenced *in absentia*, or if a defendant is present at trial but sentenced *in absentia*, and the defendant is subsequently taken into custody:

(a) the defendant promptly shall be brought before the sentencing judge, or a judge designated by the president judge, and notified that he or she may file a motion within 30 days seeking a new trial or sentencing hearing on the grounds that his or her absence at trial or at sentencing was with cause.

(b) Counsel for the defendant shall be present at the proceeding at which this notification is given.

(c) The notification shall occur while the defendant is within the jurisdiction of the sentencing court.

(d) The defendant shall remain within the jurisdiction of the sentencing court during the pendency of any motion filed pursuant to this rule or 30 days, whichever is longer.

Comment

* * * * *

A defendant's presence may be deemed waived by the defendant intentionally failing to appear at any stage of the trial after proper notice. See *Commonwealth v. Wilson*, 551 Pa. 593, 712 A.2d 735 (1998) (a defendant, who fled courthouse after jury was impaneled and after subsequent plea negotiations failed, was deemed to have knowingly and voluntarily waived the right to be present); *Commonwealth v. Sullens*, 533 Pa. 99, 619 A.2d 1349 (1992) (when a defendant is absent without cause at the time his or her trial is scheduled to begin, the defendant may be tried *in absentia*).

Any defendant who has been convicted or sentenced *in absentia* may challenge the holding of the proceeding in his or her absence by filing a motion for a new trial or sentencing hearing once the defendant is before the court. The defendant has the burden of demonstrating that there was justifiable cause for his or her absence. If the judge determines that the absence was with cause, the defendant must be afforded a new trial or sentencing hearing. Any defendant who is apprehended on a bench warrant as a result of a sentencing *in absentia* must be notified that he or she may file a motion, within 30 days of the notification, challenging the sentencing having been held *in absentia*. This notice must be given while the defendant is still within the jurisdiction of the sentencing court and prior to any transfer to a correctional facility for execution of sentence. Once a motion is filed pursuant to this rule, the defendant must be retained within the jurisdiction of the sentencing court. If no motion has been filed within the 30 days permitted under this rule, the sentence may be executed.

Nothing in this rule is intended to preclude a defendant from affirmatively waiving the right to be present at any stage of the trial, see, e.g., *Commonwealth v. Vega*, 553 Pa. 255, 719 A.2d 227 (1998) (plurality) (requirements for a knowing and intelligent waiver of a defendant's presence at trial includes a full, on-the-record colloquy concerning consequences of forfeiture of the defendant's right to be present). Once a defendant appears before the court, he or she cannot waive his or her right to appear in capital case. See *Commonwealth v. Ford*, 539 Pa. 85, 650 A.2d 433 (1994) (right of defendant to be present at trial of capital offense is transformed into obligation due to gravity of potential outcome).

In Absentia Relief

The Committee recently examined the question of relief for those defendants who assert that they have been tried or sentenced *in absentia* under Rule 602. Rule 602(A) provides that "the defendant's absence without cause at the time scheduled for the start of trial or during trial shall not preclude proceeding with the trial, including the return of the verdict and the imposition of sentence." However, the rule does not specify a procedure for challenging an incorrect finding of absence without cause. There was a suggestion that the rules should provide a specific procedure for raising such challenges, particularly when the defendant has been sentenced *in absentia*.

During the Committee's discussion it was argued that there was no need to develop separate procedures since existing procedures such as a writ of *habeas corpus* or *nunc pro tunc* post-sentence motions should be sufficient to raise these types of challenges. Other members argued that these suggested remedies are not likely to be available. Any post-sentence motion or appeal that is filed by a fugitive defendant will be quashed due to fugitivity, and that, generally, a trial judge loses authority to enter an order in a case 30 days after the judgment of sentence pursuant to 42 Pa.C.S. § 5505. *Habeas corpus* would not be available because the *habeas corpus* statute specifically excludes any claims that might be covered by the PCRA and these challenges might be cognizable under the PCRA. However, a PCRA does not appear to be an adequate vehicle for these types of claims due to the fact that challenges cannot be filed while the defendant is a fugitive since the defendant must be in custody serving a sentence and, while the defendant may be able to raise this in a PCRA once taken into custody, he or she may be precluded from this remedy by the PCRA's severe time limitations.

The Committee concluded that the rules should provide explicit procedures to give a defendant a venue to seek this relief. Where a defendant is tried but not sentenced *in absentia*, the finding of absence without cause may be challenged at the sentencing hearing. This was based on a concept first proposed in a concurrence by Justice Papadakos in the case of *Commonwealth vs. Sullens*, 619 A.2d. 1349 (Pa. 1992). In that case, Justice Papadakos suggested an erroneous order permitting trial *in absentia* could be corrected when the defendant appears for sentencing and establishes good cause for his absence at trial, in which case a new trial will be awarded. However, the case in which a defendant is also sentenced *in absentia* was not addressed in *Sullens*. Ordinarily when such a defendant is arrested, because sentence has already been imposed, they normally would be taken for execution of sentence.

The Committee discussed the fact that when a defendant is tried *in absentia*, a bench warrant would have been issued against him or her. In that case, the defendant would be required to be brought before the judge who issued the bench warrant for a bench warrant hearing when apprehended. Initially it was thought that a challenge to the *in absentia* finding could be raised at the bench warrant hearing or at least the defendant could

be advised of the option of seeking relief from the *in absentia* finding. However, the Committee believed that a bench warrant hearing would be an inadequate venue for determining such an issue, particularly since the burden would be on the defendant to prove that his or her absence was with cause. Additionally, there was a concern that by combining the advice regarding *in absentia* relief with the bench warrant proceeding, there may be confusion for the defendant regarding the *in absentia* relief procedures. The Committee concluded that the advice regarding the motion procedure for *in absentia* challenges should be given at a separate proceeding, conducted by the sentencing judge or a judge designated by the president judge. In order for the defendant to understand the significance of this advice, particularly because this might be his or her last opportunity before the execution of his or her sentence, counsel must be present.

The defendant would have 30 days from the time of the advice proceeding to file the motion challenging the *in absentia* sentencing. As a logistical matter, the defendant should be kept within the geographical jurisdiction of the sentencing court during the 30 days in which he or she may file the motion. If no motion is filed, the defendant's sentence would be executed.

The provisions for seeking relief from an *in absentia* proceeding, either guilt determination or sentencing or both, would be included in a new paragraph (C) in Rule 602. Further explanation would be included in the Comment to Rule 602. A cross-reference to Rule 602(C) would be added to the Comment to Rule 150 to alert the judge conducting the bench warrant hearing that a defendant who had been sentenced *in absentia* will need to be scheduled for a Rule 602(C) proceeding.

PA0276014, Pesticides, SIC Code 0782, 7900, **Lake Naomi Club**, Rte 423, PO Box T, Pocono Pines, PA 18350.

Description of Proposed Activity: The application is for a new NPDES permit for a new discharge associated with the application of pesticides in Tobyhanna Township, **Monroe County**.

The receiving stream(s), Upper Tunkhannock Creek, is located in State Water Plan watershed 2-A and is classified for High Quality—Cold Water and Migratory Fish, aquatic life, water supply and recreation. Applicators are required to follow product labeling instructions of pesticides, which may include provisions to reduce application doses and notify public water suppliers in the event applications are conducted near public water supply intakes. The discharges associated with the pesticide applications are not expected to affect public water supplies.

PA DEP has made a tentative determination to issue the NPDES permit subject to the terms and conditions of the permit. An anti-degradation analysis has been completed to document that pesticide application activities in High Quality (HQ) or Exceptional Value (EV) waters will be conducted in a manner that minimizes adverse environmental effects. The proposed permit contains conditions that require implementation of Pest Management Measures, Recordkeeping and Annual Reporting Requirements, Corrective Action Documentation and Reporting, and a Pesticides Discharge Management Plan.

You may make an appointment to review the DEP files on this case by calling the File Review Coordinator at 570-826-5472. You may submit written comments on the application and draft permit within 30 days to the address above. After the 30-day comment period, PA DEP will make a final determination on the issuance of the permit.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period

for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department’s analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department’s Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P.S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

This results in a potential emission increase of 3.63 tpy for PM₁₀ and 1.88 tpy for PM_{2.5} from the original plan approval 10-001N analysis. This Plan Approval will contain emission restriction, testing, recordkeeping, work practice standard and additional requirement conditions, which will satisfy the requirements of 25 Pa. Code § 127.12b (pertaining to plan approval terms and conditions) and will demonstrate Best Available Technology (BAT) for the source including, but are not limited to, the following:

- Source 127 (# 26 Carlite Acid Clean)

 - Emissions shall comply with 25 Pa. Code §§ 123.1, 123.31 and 123.41 for fugitive, odor, and visible emissions respectively.
 - The emissions from the source shall not exceed the following:
 - NO_x: 1.96 #/hr and 8.57 tpy based on a consecutive 12-month period [This condition replaces the following condition from plan approval 10-001N: NO_x: 0.073 #/MMBtu]
 - CO: 13.43 #/hr and 58.81 tpy based on a consecutive 12-month period [This condition replaces the following condition from plan approval 10-001N: CO: 0.501 #/MMBtu]
 - PM₁₀: 0.92 #/hr and 4.01 tpy based on a consecutive 12-month period [This condition replaces the following condition from plan approval 10-001N: PM₁₀: 0.003 #/MMBtu]
 - The source shall burn only natural gas.
 - Stack test, initially, for filterable PM, NO_x, CO, and PM₁₀ and at operating permit renewal.

 - From 25 Pa. Code § 127.203a(a)(5)(iii), If the projected actual emissions for a regulated NSR pollutant are in excess of the baseline actual emissions, the following apply: (A) The projected actual emissions for the regulated NSR pollutant must be incorporated into the required plan approval or the operating permit as an emission limit. (B) The owner or operator shall monitor the emissions of the regulated NSR pollutant for which a limit is established in clause (A) and calculate and maintain a record of emissions, in TPY on a calendar year basis, for 5 years following resumption of regular operations after the change, or for 10 years following resumption of regular operations after the change if the project increases the design capacity or potential to emit of that regulated NSR pollutant at the emissions unit. (C) The owner or operator shall record sufficient information to identify for all emission units in the approved project their total actual annual emissions and their actual annual emissions increase due to the project. (D) The owner or operator shall submit a report to the Department, within 60 days after the end of each calendar year, which contains the emissions data required by clauses (B) and (C). This report must also contain a demonstration of how these emissions were determined if the determination was not by direct measurement with a Department-certified CEMS system. [Submission of the annual emissions statement for the facility, pursuant to 25 Pa. Code 135, satisfies the reporting and

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments

received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

E20-558A, Snow Waters Development, LLC, 20 South Santa Cruz Avenue, Suite 320, Los Gatos, CA 95030. Snow Waters Development, in Summit Township, **Crawford County**, ACOE Pittsburgh District (Harmonsburg, PA Quadrangle N: 41°, 38', 40"; W: 80°, 18', 55").

Permit E20-558 was issued January 9, 2008 (and extended October 24, 2013) authorizing construction of 183 condominium residences, golf course, clubhouse, restaurant, 189 slip boat harbor and associated infrastructure, along with dredging of PA FBC boat launch area (1.1 acre; ~600 LF) and Inlet Run (1.5 acre; ~1,200 LF) to Conneaut Lake. The original project was authorized to impact 1.19 acre of wetland. Mitigation was proposed in the form of creation of 1.7 acre of new wetland on-site and approximately 1,100 LF of stream restoration along Inlet Run. As of the date of publication, only the dredging of the PA FBC boat launch area has been completed, along with the construction of the associated de-watering basin.

The project plans have been revised, and the applicant has requested that permit E20-558 be modified to authorize up to 110 condominium residences, restaurant, 189 slip boat harbor, 16 residential lots, dredging of Inlet Run to Conneaut Lake, and associated roadways, parking, utilities, and stormwater management facilities, impacting 2.16 acres of wetland, and approximately 1,200 LF of Inlet Run. Applicant proposes to mitigate for these impacts by converting the dewatering basin into a 3.03 acre wetland complex, conducting restoration work on approximately 1,000 LF of Inlet Run, including bank grading, vegetative stabilization, and J-hooks, and providing approximately 300 LF of additional riparian plantings along Inlet Run.

PUBLIC WATER SUPPLY PERMITS

The Department has taken the following actions on applications received under the Pennsylvania Safe Drinking Water Act (35 P.S. §§ 721.1—721.17) for the construction, substantial modification or operation of a public water system.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this document to a lawyer at once. Persons who cannot afford a lawyer may qualify for free pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

SEWAGE FACILITIES ACT PLAN DISAPPROVAL

Plan Disapprovals Under the Pennsylvania Sewage Facilities Act (35 P.S. § 750.5)

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Fermanagh Township	109 Municipal Rd. Mifflintown, PA 17059	Juniata

Plan Description: The request for planning exemption submitted for the WMT Holding Subdivision, DEP Code No. A3-34904-171-2E, APS Id 944150, is disapproved. The submission proposed a subdivision to create two new single family residential building lots, a proposed vacant lot, and a residual tract with an existing dwelling and market. Each structure is to use an individual onlot sewage disposal. The proposed subdivision is located on the north side of State Route 0035, west of the junction with Jericho Road. This plan is disapproved because no testing has been done for "Lot A", and per Chapter 71, section 71.51(b)(1)(v), use of the sewage planning exemption requires that "complete soils testing and site evaluation establish that separate sites are available for both a permittable primary soil absorption area or spray field and a replacement soil absorption area or spray field on each lot of the subdivision . . .".

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995
PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area

remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Has been given consent to:

Construct and maintain a road crossing (aka Magnolia Drive) in Moon Run (WWF), consisting of an 89 linear foot, 120" diameter, corrugated metal pipe, to provide access to the Arbor Trail Phase 2 residential development. The project will permanently impact 159 linear feet of Moon Run (aka Waterway 3), including impacts from the proposed culvert, wingwalls, rip rap and associated outlet protection. In addition to the Phase 2 disturbances associated with the proposed road crossing, two intermittent, unnamed tributaries to Moon Run (aka Waterway 1 and Waterway 2) had been previously relocated and culverted as part of Phase 1 of the project. Approximately 380 linear feet of cumulative stream impact occurred to Waterway 1 and Waterway 2. Impacts will be mitigated on-site through riparian plantings and placement of in-stream habitat structures. The project is located approximately 800' southwest of the intersection of Aiken Road and Arbor Trail Drive (Pittsburgh, West, PA USGS topographic quadrangle; Latitude: 40° 27' 23"; Longitude: -80° 6' 52"; Sub-basin: 20G; US Army Corps of Engineers, Pittsburgh District), in Robinson Township, Allegheny County.

SPECIAL NOTICES

MUNICIPAL WASTE GENERAL PERMITS

Permit Modification Proposed Under the Solid Waste Management Act (35 P.S. §§ 6018.101—6018.1003); the Municipal Waste Planning, Recycling and Waste Reduction Act (53 P.S. §§ 4000.101—4000.1904); and Municipal Waste Regulations for a General Permit to Operate Municipal Waste Processing Facilities and the Beneficial Use of Municipal Waste.

Central Office: Division of Municipal and Residual Waste, Rachel Carson State Office Building, 14th Floor, 400 Market Street, Harrisburg, PA 17105-8472.

General Permit Numbers WMGM061 and WMGM020. General Permit WMGM061 authorizes the processing and beneficial use of course or fine aggregate from municipal solid waste incinerator ash for use as an aggregate in construction material. WMGM020 authorizes the processing of ferrous/non-ferrous metal coated with ash residue that is recovered municipal waste incineration facilities. The proposed modification would consolidate General Permit Numbers WMGM061 and WMGM020, into a single general permit, WMGM061.

The proposed combination of these two general permits will result in one general permit that authorizes the processing of municipal solid waste incinerator ash and ash residue for the beneficial use of:

1. ferrous and nonferrous metals, and
2. course or fine aggregate for use as an aggregate in construction material.

The Department is authorized under the Solid Waste Management Act and 25 Pa. Code § 287.611 (relating to authorization for general permit) to modify general permits for any category of beneficial use or processing that results in beneficial use of residual waste on a statewide basis when the Department determines that the use will not harm or present a threat of harm to the health, safety or welfare of the public or the environment and the activity can be adequately regulated using standard permit conditions.

Written comments concerning these amendments should be directed to Chris Solloway, Solid Waste Program Specialist, Division of Municipal and Residual Waste, Bureau of Waste Management, P.O. Box 69170, Harrisburg, PA 17106-9170. TDD users may contact the Department through the Pennsylvania AT&T Relay Service, (800) 654-5984. Comments may also be submitted via e-mail at ra-epbenuseall@pa.gov. When submitting comment via e-mail, place "Comments on General Permit Number WMGR019" in the subject line. Faxed comments will not be accepted. Public comments must be submitted within 60 days of this notice and may recommend revisions to, and approval or denial of the application. For more information, contact the Division of Municipal and Residual Waste at 717-787-7381.

RESIDUAL WASTE GENERAL PERMITS

Permit(s) Renewed Under the Solid Waste Management Act; the Municipal Waste Planning, Recycling and Waste Reduction Act; and Residual Waste Regulations for a General Permit to Operate Residual Waste Processing Facilities and the Beneficial Use of Residual Waste other than Coal Ash.

Central Office: Division of Municipal and Residual Waste, Rachel Carson State Office Building, 14th Floor, 400 Market Street, Harrisburg, PA 17105-8472.

General Permit Application No. WMGR028 Base. This permit authorizes the beneficial use of baghouse fines or scrubber pond precipitates, generated by hot-mix asphalt plants, as an aggregate in roadway construction, a soil additive, a soil conditioner, or a component or ingredient in the manufacturing of construction products. The Department re-organized and re-formatted General Permit No. WMGR028 for overall clarity and ease of use. The general permit was renewed by Central Office and became effective on August 1, 2017.

A person or municipality that proposes to beneficially use baghouse fines or scrubber pond precipitates by operating under the terms and conditions of this general permit after the date of permit renewal must apply for and obtain a Determination of Applicability prior to commencing authorized activities under this general permit. A completed application on forms available from the Department must be submitted to the appropriate Department Regional Office (see p. 12 of the general permit for a list of regional offices).

Persons interested in obtaining a copy of the renewed general permit can download a copy at <http://www.dep.pa.gov/Business/Land/Waste/SolidWaste/Residual/Permitting/Pages/BeneficialUsePermits.aspx> or may request a copy by contacting the Division of Municipal and Residual Waste, Bureau of Waste Management, P.O. Availability of the 2016 Integrated Water Quality Monitoring and Assessment Report

The Department of Environmental Protection (Department) is providing the 2016 Integrated Water Quality Monitoring and Assessment Report (Integrated Report) to the United States Environmental Protection Agency (EPA) for review and approval. The Integrated Report is available to the public and it includes both a narrative description of the Commonwealth's water quality management programs (formerly the Federal Clean Water Act section 305(b) Report) and waterbody-specific lists depicting the status of Commonwealth surface waters as required by section 303(d) of the Federal Clean Water Act (33 U.S.C.A. § 1313(d)). The Integrated Report underwent a 45-day public review and comment period from July 31, 2016, through September 12, 2016, during which the Department received 21 comments. Following this public review and comment, the Department addressed the comments and completed a Comment and Response document that is included as Appendix J to the Integrated Report.

Section 303(d) of the Federal Clean Water Act and 40 CFR Part 130 (relating to water quality planning and management) require states to identify waters which would be impaired, even after the appropriate pollution control technology has been applied to point sources and required best management practices are in place for nonpoint sources. The Integrated Report establishes five categories for listing the assessed waterbodies. Waterbodies that do not meet water quality standards and that require a Total Maximum Daily Load are placed on Category 5 of the Integrated Report waterbody list.

The Integrated Report and its related documents are available on the Department's eLibrary web site at <http://www.elibrary.dep.state.pa.us/> (select "Publications," then "Clean Water," then "2016 Pennsylvania Integrated Water Quality Monitoring and Assessment Report").

For questions regarding the Integrated Report contact the Water Quality Division at (717) 787-9637 or RA-WQ Assessments@pa.gov.

Service Limits

The MA Program has established service limits for some of these procedure codes. When a provider determines that a MA beneficiary is in need of a service or item in excess of the established limits, the provider may request a waiver of the limits through the 1150 Administrative Waiver (Program Exception) process. For instructions on how to apply for a Program Exception, refer to the provider handbook at http://www.dhs.pa.gov/publications/forproviders/promiseproviderhandbooksandbillingguides/index.htm#.Vvj_vk32ZtR.

Managed Care Delivery System

MA Managed Care Organizations (MCO) are not required to impose the service limits that apply in the MA Fee-for-Service (FFS) delivery system, although they are permitted to do so. MA MCOs may not impose service limits that are more restrictive than the service limits established in the MA FFS delivery system. An MA MCO that chooses to establish service limits must notify their network providers and members of the limits before implementing the limits.

Fiscal Impact

The estimated cost for Fiscal Year 2017-2018 is \$0.522 million (\$0.252 million in State funds). The estimated cost for Fiscal Year 2018-2019 is \$0.696 million (\$0.335 million in State funds).

GAME COMMISSION

Chronic Wasting Disease—Designation of Disease Management Areas and Endemic States and Canadian Provinces Order # 2

Executive Order

Whereas, Chronic Wasting Disease (CWD) is an infectious and progressive neurological disease that is found in, and always proves fatal to, members of the family Cervidae (deer, elk or moose, and other susceptible species, collectively called cervids); and

Whereas, There are no known treatments for CWD infection, no vaccines to protect against CWD infection, and no approved tests that can detect the presence of CWD in live cervids; and

Whereas, CWD is designated as a “dangerous transmissible disease” of animals by order of the Secretary of Agriculture under 3 Pa.C.S. § 2321(d) (relating to dangerous transmissible diseases); and

Whereas, The Game and Wildlife Code (Code) (34 Pa.C.S. §§ 101 et seq.) and regulations promulgated

thereunder (58 Pa. Code §§ 131.1 et seq.) collectively provide broad authority to the PGC to regulate activities relating to the protection, preservation, and management of game and wildlife, including cervids; and

Whereas, On March 28, 2017, the Commission added 58 Pa. Code § 137.35 (relating to Chronic Wasting Disease Restrictions) to give more permanent status and structure to the CWD requirements and restrictions previously established and maintained over the past decade by and through executive orders; and

Whereas, Section 137.35(d) provides the Executive Director with the authority to designate CWD Disease Management Areas (DMAs) within this Commonwealth; and

Whereas, Section 137.35(d) also provides the Executive Director with the authority to designate CWD-endemic States or Canadian Provinces; and

Whereas, The Commission has determined that designation of CWD DMAs and CWD-endemic States and Canadian Provinces is necessary to fully implement these programmatic amendments to the Commission’s CWD program; and

Whereas, A previous executive order concerning designation of CWD DMAs and CWD-endemic States and Canadian Provinces within this Commonwealth was issued by the Commission on June 1, 2017 and published in the *Pennsylvania Bulletin* on June 17, 2017 at 47 Pa.B. 3469.

INDEPENDENT REGULATORY REVIEW COMMISSION

Notice of Comments Issued

Section 5(g) of the Regulatory Review Act (71 P.S. § 745.5(g)) provides that the Independent Regulatory Review Commission (Commission) may issue comments within 30 days of the close of the public comment period. The Commission comments are based upon the criteria contained in section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b).

The Commission has issued comments on the following proposed regulations. The agencies must consider these comments in preparing the final-form regulation. The final-form regulation must be submitted within 2 years of the close of the public comment period or it will be deemed withdrawn.

Environmental Quality Board Regulation # 7-499 (IRRC # 3169)

Radiological Health

July 26, 2017

We submit for your consideration the following comments on the proposed rulemaking published in the May 13, 2017 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (RRA) (71 P.S. § 745.5a(a)) directs the Environmental Quality Board (EQB) to respond to all comments received from us or any other source.

1. General—Economic impact; Protection of the public health; Less intrusive alternatives for small business; Implementation procedures; Reasonableness; Feasibility; Need; Possible conflict with existing regulations; Clarity.

Advances in equipment technology

The Preamble states the EQB has not updated its regulations since 2009. Allegheny Health Network commented that “the rapid technological changes occurring in diagnostic images, including computerization and automation, require additional flexibility in these proposed regulations to allow appropriate responses to these ever accelerating changes and improvements.” Allegheny Health Network suggests relying more on the Qualified Medical Physicist (QMP) expertise and is concerned that detailed regulations will quickly become outdated and irrelevant. Another comment describes equipment that self-calibrates. In other instances, commentators describe computer controlled technology that incorporates internal controls to shut down the equipment if it is not used safely. In light of the public comments, we are concerned that, despite an allowance for exemptions such as Section 215.31, portions of the proposed regulatory scheme will quickly become outdated. We recommend that the EQB reconsider the regulatory scheme of using prescriptive requirements and, where possible and appropriate, provide flexibility to accommodate advances in technology that are presently occurring and are certain to occur in the future. The EQB should also consider whether more reliance on the QMP might better accommodate advances in technology and better implement safety.

Department of Health regulations

Regulatory Analysis Form (RAF) 13 asks the promulgating agency: “Will the regulation affect any other regulations of the promulgating agency or other state agencies? If yes, explain and provide specific citations.” The response to RAF 13 explains the Department of Environmental Protection’s (Department) authority and states that “The Department of Health may have regulations regarding radiation. However, DEP’s radiological health regulations would supersede them.” Why didn’t the response include citations to the Department of Health regulations that address radiology including 28 Pa. Code Chapters 127 (relating to radiology services) and 565 (relating to laboratory and radiology services)? While RAF 13 explains that the Department’s regulation would supersede Department of Health regulations, the regulated community must comply with both regulations. How was the development of this regulation coordinated with the Department of Health to make sure there are no conflicts? We recommend that the EQB provide in the final regulation submittal an explanation of how it coordinated its regulation with the Department of Health regulations to make sure there are no conflicts for the regulated community.

Definitions

Commentators identified several terms that are defined, but not used in the regulation. As an example, our search for the defined phrase “Medical reportable event for radiation-producing diagnostic or interventional X-ray procedures” did not find this term used in the body of either the proposed regulation or the existing regulation. In other instances, such as the terms “ALARA—as low as reasonably achievable” and “Blind study” defined in Section 240.3, these terms are only used once in the proposed regulation (Sections 240.305 and 240.203(a)(5), respectively). It would be clearer to include an explanation of these terms in those sections rather than defining them in Section 240.3. Therefore, we ask the EQB to review all of the proposed definitions to eliminate terms not used in the body of the regulation, make sure defined terms are used consistently in the body of the regulation, and consider whether definitions are needed for terms in instances where the terms are only used once.

Preamble

In our review of regulations, we refer to the Preamble for an explanation of the amendments, including the need for the amendment. The Preamble to the proposed regulation does not include all amendments and also does not explain why certain amendments are needed. For the final regulation, the Preamble should be amended to include these explanations.

Compliance costs

The Preamble explains costs imposed by the regulation including costs relating to Qualified Medical Professionals and radon certification. However, the response to RAF 18 states there are no costs or adverse effects associated with the proposed rulemaking. How are these explanations consistent with each other? Furthermore, commentators believe the proposed regulation imposes operational costs, supervisory costs and compliance costs relating to outdated regulations. We ask the EQB to review and amend the responses in the Preamble and the RAF for the final regulation.

Business days

Several provisions require notice to the Department within a specific time period such as five days or 10 days. Commentators asked that these time periods be business days rather than calendar days. We agree.

2. Section 219.3. Definitions.—Clarity.

Medical reportable event for radiation-producing diagnostic or interventional X-ray procedures

If this definition is retained in the final regulation, we have two comments. First, Paragraph (i) specifies a dose of “3 Gy (300 rad).” Commentators questioned this dose and believe it is too low. The EQB should explain why 3 Gy is the appropriate dose.

Second, this definition uses the phrase “unintended dose.” The phrase “unintended dose” is defined in Section 221.2. Should this definition also be included in Section 219.3?

3. Section 219.229. Other medical reports.—Clarity.

Subsection (b)

The phrase “medical event” is used in this subsection. However, it is not clear what constitutes a “medical event” that would require reporting. Should this subsection use the defined term “Medical reportable event for radiation-producing diagnostic or interventional X-ray procedures”?

4. Section 221.2. Definitions.—Protection of the public health.

QMP—Qualified medical physicist

The American Association of Physicists in Medicine (AAPM) commented that this definition is insufficient to ensure that individuals providing the designated medical physics services are qualified to do so. AAPM provides suggestions for amending the definition. We recommend that the EQB consider incorporating AAPM’s suggested revisions into the final regulation, or explain why it is not in the public interest to do so.

5. Section 221.11. Registration responsibilities.—Clarity; Protection of the public health.

Paragraphs (b)(1) and (2) require continuing education, but the regulation does not specify the number of hours. We recommend adding the required number of hours in the final regulation.

6. Section 221.16. Training, competency and continuing education.—Clarity; Protection of the public health.

Subparagraphs (b)(1)(i) and (ii) require continuing education, but the regulation does not specify the number of hours. We recommend adding the required number of hours in the final regulation.

7. Section 240.2. Scope.—Protection of the public health; Clarity; Reasonableness; Implementation procedures.

The Preamble explains that there are two proposed amendments to this section:

Proposed amendments to § 240.2 (relating to scope) revise certification exceptions from the building that the person occupies to the building in which the person resides for clarity. A new certification exception is proposed to be added to clarify existing requirements for employees of local governments and schools who perform radon testing.

Several public comments were submitted on this section. Some comments addressed proposed amendments and some addressed existing language that was not proposed for revision. For example, S.W.A.T. Environmental of Pennsylvania believes existing language in Paragraph (a)(2) violates the statute and does not adequately protect the public health. A.B.E. Radiation Measurements Laboratory’s comments address concerns with amendments to Sections (a)(4), (a)(4)(ii) and (a)(5).

There appears to be concerns and confusion with Section 240.2, which sets the scope for all of Chapter 240, relating to Radon Certification. We recommend that the EQB review this entire section and work with the regulated community to clarify the scope of Chapter 240.

8. Section 240.3. Definitions.—Clarity; Reasonableness.

ALARA—as low as reasonably achievable

The definition of this term is vague and unreasonable because it sets a standard of “making every reasonable effort” to limit exposure and “taking into account economic considerations and other societal concerns.” These phrases are subjective and do not set a clear standard for compliance. What would meet the standard of every reasonable effort? What economic considerations must be considered? What constitutes a societal concern that must be considered? As noted above under Comment 1, it may be clearer to delete ALARA from Section 240.3 and specify the practices that must be followed in Section 240.305, which appears to be the only section of the regulation where ALARA is referenced.

9. Section 240.101. Requirements for radon testing certification.—Need; Reasonableness; Economic impact.

Subsection (b)

This subsection is amended from allowing “at least one person certified to test” to “one individual certified to test.” Commentators explained the new language presents problems when a single person is not available due to illness, quitting or retirement. We agree that the new language is unnecessarily restrictive. We recommend maintaining the existing language. Alternatively, the EQB should explain the need for, reasonableness and economic impact of precluding a firm from employing more than one individual who is certified to test. This same concern

applies to similar amendments or language proposed for Subsections (b) in Sections 240.102, 240.121 and 240.122.

10. Section 240.102. Prerequisites for radon testing certification.—Need; Reasonableness; Economic impact; Less costly and less intrusive alternatives.

Need for and less intrusive alternatives to requiring written approval from the Department

We have several concerns with this section of the regulation as set forth in the following discussion. Our concerns relate to the following criteria found in the RRA:

- Economic impact including:
 - Adverse effects on prices of services, and
 - Costs to the private sector;
- Need for the regulation;
- Reasonableness of requirements; and
- Whether a less costly or less intrusive alternative method of achieving the same goal of the regulation has been considered for regulations impacting small business.

We ask the EQB to carefully consider these criteria in its responses to the comments on this section, as well as similar provisions in Sections 240.112 and 240.122 cited at the conclusion of this comment.

Subparagraph (b)(1)(ii)

This provision states certification is void: “. . .until the Department approves in writing the firm owner’s written and signed request for a certified individual to be in responsible charge of that firm’s radon testing activities.” The proposed amendment replaces a relatively simple notice to the Department with an indefinite time period during which the firm would be out of business while waiting for written approval from the Department. The Preamble description does not include this proposed amendment. Therefore, the EQB has not provided an explanation of the need for the amendments and it is not clear whether the economic impact of this amendment is included in the EQB’s cost analysis of this regulation.

In determining whether the regulation is in the public interest, the criteria in the RRA require us to consider whether a less costly and less intrusive alternative method of achieving the goal of the regulation has been considered for regulations impacting small business. A firm may lose its certified individual on very short notice and may find a new certified individual quickly. Under existing regulation, this process could potentially be completed in a day, particularly because it is in the firm’s business interest to do so. The regulation fails to specify a time period for the Department to respond. For these reasons, we recommend deleting this amendment. Alternatively, the EQB should explain the costs imposed by the amendment, how those costs are justified and how it considered less costly and less intrusive alternatives, including retaining the existing regulation.

Paragraph (b)(2)

This paragraph adds a new requirement that the firm’s certified individual may not also be a testing firm employee. What is the reason for this requirement? The Preamble does not include this addition and therefore does not explain the need for it. A commentator questioned why this provision was added. We agree that the EQB has not provided an explanation of the need for, reasonableness and economic impact of adding this provision. We recommend deleting it unless the EQB can provide justification for adding it.

Paragraph (b)(3)

This provision requires a notice by the firm’s certified individual to invalidate an employee’s Department listing. Why wouldn’t notice be the responsibility of the firm owner?

Paragraph (b)(4)

This paragraph states a testing firm may list a maximum of five testing firm employees at one time. The Preamble states this limit is to “ensure adequate responsible charge by the certified individual.” We agree with several commentators who do not believe the EQB has provided adequate support for the need for, reasonableness and economic impact of this provision. Therefore, we recommend deleting this provision. Alternatively, if the EQB retains a limit in the final regulation, it should explain its authority to impose a limit, provide support for the need for a limit including supporting data, explain how the limit was determined, provide an analysis of the economic impact of the limit on businesses, and explain why the limit is in the public interest.

Paragraph (b)(7)

Should the Department’s written approval be to the firm’s owner rather than the firm’s certified individual?

Subsections 240.112(b) relating to radon mitigation certification and 240.122(b) relating to laboratory certification

These concerns with Subsection 240.102(b) also apply to similar requirements in Subsections 240.112(b)(1)(ii), (2), (3), (5) and (7), relating to radon mitigation certification and 240.122(b)(1)(ii), (2), (3) and (6) relating to laboratory certification.

11. Section 240.103. Radon testing application contents.—Need.

Paragraph (a)(3)

This paragraph requires the applicant’s date of birth. Commentators questioned the need for the date of birth. We also question how the Department will use the applicant’s date of birth. Is the intent to limit the age of an applicant? The EQB should explain the need for this requirement. The same questions apply to Paragraphs 240.113(a)(3) and 240.123(a)(3).

12. Section 240.306. Continuing education program.—Clarity; Need; Reasonableness; Economic impact.

A commentator questions the last sentence of this section which states continuing education hours may only be used for one certification period for each certification activity. If a person is certified as both a tester and a laboratory, are 16 or 32 hours of continuing education required? The explanation of this amendment is not clear in the Preamble. We recommend that the EQB clearly establish in the regulation the number of continuing education hours required. Furthermore, if it is the EQB’s intent to require 32 hours for those certified in two areas, the EQB should explain why the continuing education hours should not apply to both certifications.

13. Section 240.308. Radon mitigation standards.—Reasonableness; Feasibility; Clarity.

Subsection (a)

We have three concerns. First, this subsection states a terminal discharge must meet “all” of the seven requirements listed. However, the requirements then describe different discharge scenarios, such as vent pipes attached

to the side of the building and vent pipes that penetrate the roof. Would a vent pipe typically be attached to the side of a building and penetrate the roof? If not, the discharge would not meet “all” of the seven requirements. We recommend rephrasing Subsection (a).

Second, Paragraph (6) requires a termination point to be 10 feet or more horizontally from a vertical wall that extends above the roof. Could the termination point also comply by extending above the vertical wall that extends above the roof?

Third, Subsection (a) uses the term “conditioned spaces,” whereas Subsection (b) uses the term “heated or cooled space of a building.” Is there a difference? If so, the EQB should explain the difference in the regulation. If not, the same terminology should be used in both subsections.

Subsection (c)

In Subparagraph (3)(i) should the word “cost” be used rather than “penalty”?

In Subparagraph (3)(ii) would the “efficiency” of the radon mitigation system be decreased or the “effectiveness”?

14. Section 240.309. Testing protocols.—Clarity.

Clause (a)(4)(v)(G)

This provision states the mitigation system must be functioning during the test period. A commentator questioned what to do if the mitigation system isn’t working. The final regulation should address the situation where a mitigation system is not working.

Subparagraph (a)(6)(i)

This subparagraph requires testing devices to be “secured against movement by employing anti-tampering methods.” This requirement is vague and it is not clear what actions would be required to comply. This provision should be rewritten to provide clear direction on how to comply.

15. Miscellaneous clarity.

- Should the definition of “General supervision” in Section 221.2 state “by a licensed practitioner” rather than “of a licensed practitioner”?

- In Paragraphs 221.65(1) and (3), the phrasing of the exemption is not clear. Would these paragraphs be clearer by stating “the CT system is exempt from Section. . . .”?

- Paragraph 221.204(c)(1) requires surveys in certain circumstances. A timeframe to complete the surveys should be added.

- Should Section 223.22 also include research on animals?

Pennsylvania Liquor Control Board Regulation # 54-91 (IRRC # 3170)

Return of Liquor

July 26, 2017

We submit for your consideration the following comments on the proposed rulemaking published in the May 27, 2017 *Pennsylvania Bulletin*. Our comments are based on criteria in Section 5.2 of the Regulatory Review Act (71 P.S. § 745.5b). Section 5.1(a) of the Regulatory Review Act (71 P.S. § 745.5a(a)) directs the Pennsylvania Liquor Control Board (Board) to respond to all comments received from us or any other source.

1. Determining whether the regulation is in the public interest; Reasonableness of requirements, implementation procedures and timetables for compliance by the public and private sectors; and Economic or fiscal impact.

The Preamble submitted with the proposed regulation provides a general overview of the amendments to Chapter 11 and Chapter 9. However, it does not include a description or rationale for each section under the new Subchapter O (Return of Liquor to the Board by Licensees). This Commission is unable to determine if the regulation is in the public interest without this information. In the Preamble to final-form regulation, we ask the Board to provide a description for each section of the rulemaking and an explanation of why the language is needed.

Time limits

The Board states that time limits within which products may be returned are based on its operational needs and believes they are reasonable relative to each stated reason for return. In Section 11.232 (relating to Defective products) and Section 11.233 (relating to Error in products delivered) licensees may return products that are defective or incorrect within 15 days of delivery or pick up. Similarly, in Sections 11.236 and 11.237 products that have been changed or discontinued by the manufacturer or importer may be returned within 30 days of delivery or pick up. How did the Board determine that the time limits were reasonable for the regulated community to comply? The Board should explain in the Preamble to the final regulation its rationale for the proposed time limits.

We note that Sections 11.234—11.237 are conditions beyond the control of the licensee. It is unclear from the Preamble why the Board treats certain product returns differently. We ask the Board to explain its distinction of Sections 11.236 and 11.237 from Sections 11.234 and 11.235 which neither allow for the Board’s discretion nor impose a time limit.

It is our understanding that product manufacturers will inform the Board about product recalls, changes or discontinuations. They may, at times, directly notify licensees of the same. Since licensees rely on the Board, as the primary wholesaler of liquor, to inform them about issues with products, we ask the Board to explain the significance of using the product delivery or pick up date as it relates to product returns. Why does the Board use these dates rather than when the licensee is notified by the Board that there is a problem with a product?

Our concern is all licensees who have the product (that is the subject of a change or is discontinued) will not be treated equally. Licensees that took delivery or picked up the product within 30 days of the Board’s notice would be eligible to return that product for an exchange or refund while others who have had the same product in their inventory for a longer time period would not. The Board should explain how the return policy for changed or discontinued products is fair and is in the economic interest of the regulated community.

2. Section 11.231. General provisions.—Clarity and Economic or fiscal impact.

Under this section, if the Board accepts the returned product, the licensee will receive either the price of the product at the time of purchase or the current price, whichever is lower. Given that most of the circumstances under which a return is permitted are beyond the licensee’s control, why wouldn’t the refund be for the price

paid? The Board should explain in the Preamble to the final-form rulemaking its rationale for this provision and how it will determine whether a licensee will be refunded the price paid at the time of purchase or the current price.

3. Section 11.232. Defective products.—Clarity and Economic or fiscal impact.

Under this section, a product that is unmarketable at the time of delivery or pick up because it is leaking, damaged or has a missing or mutilated tamper evident closure may be returned to the Board “within 15 days of product delivery for a refund *which may then be applied to the purchase of an equal quantity of the same product.*” (Emphasis added.) What is the Board’s intent with this language? It is unclear whether the Board intends for the refund to be applied to an equal quantity of the same product or is just stating an option for the licensee to decide. The Board should clarify its intent and explain in the Preamble to the final regulation why it is necessary to include this language.

The same comment applies to similar language that appears in Section 11.233 (relating to Error in products delivered) Subsection (a) and Section 11.236 (relating to Change in product).

4. Section 11.238. Occasional sellers.—Clarity.

This section gives the Board discretion to waive the handling charge for product returns from occasional sellers. Under what circumstances or conditions would the Board waive such charges? Without criteria or standards for the Board’s determination, it could appear that the Board is making decisions in an arbitrary and capricious manner. In the Preamble to the final-form rulemaking, the Board should explain why this language is necessary and how it will ensure fair treatment of licensees, special occasion permit and wine auction permit holders in determining whether to waive handling charges.

5. Miscellaneous.

- In Sections 11.233, 11.236, and 11.237, products may be returned or exchanged within 15 or 30 days of product delivery or pick up. For purposes of clarity and consistency, we recommend the Board add “or pick up” following the phrase “within 15 days of product delivery.”

PHILADELPHIA PARKING AUTHORITY

Petition for Changes to Taxicab Tariff; Doc. No. 17-005

Order

By the Authority:

The Authority is the sole regulator of all taxicab and limousine service in Philadelphia.¹ The Authority is empowered to conduct rate investigations and determine the uniform rate that shall be charged by all taxicabs authorized to provide call or demand service in Philadelphia.²

On March 31, 2017, the Authority authorized the Taxicab and Limousine Division ("TLD") to reopen a rate investigation to gather information and comment concerning the petition that was filed with the TLD seeking certain specific amendments to the taxicab tariff.³ After repeated notices were issued by the TLD seeking written comments from the taxicab and limousine industry members, the general public and the Taxicab and Limousine Advisory Committee, and having held a public meeting, and upon review of all information received and investigated, the TLD submitted a recommendation to amend the taxicab tariff as outlined below.

Now, Therefore, Be It Resolved and Ordered by the Board of the Authority as follows:

Section 1. Metered Rates.

(a) Upon review of the recommendation of TLD staff, mileage and waiting time increments in the taxicab tariff schedule of rates are amended as follows:⁴

Each additional 1/10 mile or fraction thereof \$0.25

Waiting time—each 37.6 seconds under
10-11 MPH \$0.25

(b) The changes to the mileage and waiting time increments shall be effective on September 1, 2017.

(c) All other rates outlined in the taxicab tariff remain unchanged. An updated taxicab tariff reflecting the new schedule of rates follows as Exhibit "A".

Section 2. Action by all Taxicab Owners.

(a) All owners of taxicabs under the jurisdiction of the Authority shall make immediate arrangements with the meter technology vendor of each taxicab for adjustments to the meter concerning this rate change.

(b) Immediately upon compliance with subsection (a), the taxicab vehicle shall be presented to the TLD for a meter inspection and a seal in accordance with the schedule issued by the TLD pursuant to Section 3.(b) of this Order.

Section 3. Action by Taxicab and Limousine Division.

(a) The TLD staff shall ascertain that the new taxicab rates as outlined in Section 1. of this Order are posted in all medallion taxicabs.

¹ See the act of July 16, 2004, (P.L. 758, No. 94), 53 Pa.C.S. §§ 5701 et seq., as amended, (the "Act").

² See 53 Pa.C.S. §§ 5703 and 5720 (relating to rates, wages).

³ See TLD Docket No. P-17-02-01 Petition for Rate Change, filed by taxicab driver Ronald Blount on February 24, 2017.

⁴ The current mileage and waiting time increments is \$0.23.

(b) The TLD shall issue a schedule upon which each taxicab under the jurisdiction of the Authority shall be presented to the TLD for a meter inspection and seal.

(c) The TLD staff shall broadcast this Order to all members of the taxicab and limousine industry by email as well as posting it on the Authority's website and within TLD Headquarters along with depositing this Order with the *Pennsylvania Bulletin* for publishing.

Exhibit A

APPENDIX SCHEDULE OF RATES FOR ALL PHILADELPHIA TAXICABS EFFECTIVE SEPTEMBER 1, 2017

Applicable for the transportation of persons and their baggage in any taxicab providing service under the jurisdiction of the Philadelphia Parking Authority

Section 1. Metered Rate.

- First 1/10 mile (flag drop) or fraction thereof: \$2.70
- Each additional 1/10 mile or fraction thereof: \$0.25
- Each 37.6 seconds of wait time under 10-11 MPH: \$0.25
- * Tips are not included in the fare.
- * Fares are per cab, not per person.
- * Applies to all trips except for flat rate trips defined in Section 2.

* Tolls are to be paid by the customer to cover round-trips. Tolls that are charged one-way such as the bridges to New Jersey must be paid regardless of the direction of travel. Tolls that are charged each way such as turnpike tolls shall be doubled to compensate the driver for the return trip.

* There is no additional charge for handling baggage or other items that can be safely carried in the vehicle.

Section 2. Flat Rate Trips Between the Center City Zone and the Airport.

Flat Rate Zone Boundaries

The flat rate is charged in lieu of the metered rate by all Medallion Taxicabs for trips between the Philadelphia International Airport and the Center City Zone. Effective July 1, 2017, as expanded by Authority Order 17-004, the Flat Rate Zone is defined as the area between the Schuylkill and Delaware Rivers and between Washington Avenue on the south and Fairmount Avenue on the north. West of the Schuylkill River, the northern boundary continues west along the north side of 30th Street Station on 2900 Arch Street then southward on 30th Street to its intersection with Market Street. The boundary proceeds west along the north side of Market Street to 48th Street, south on 48th Street to Spruce Street and east on Spruce Street to its intersection with South Street.

Flat Rate Zone Trip Rates

Flat Rate from the Center City Zone to the Airport: \$28.50 per one way trip regardless of the number of passengers.

Flat Rate from the Airport to the Center City Zone: \$28.50 per one way trip for one (1) passenger. A \$1.00 per passenger surcharge for each additional passenger after the first will be added to the meter after the flat rate fee is engaged on the meter by the driver after leaving the Airport. This applies only to passengers over the age of twelve (12). If the trip necessitates a drop-off at more than one destination in the Center City Zone, the following applies: the flat rate and all additional per passenger

surcharges of \$1.00 each are to be collected upon departure of the first passenger in the Center City Zone. The driver will then reset the meter initiating a new flag drop using the standard meter rates above for each of the remaining passengers if each requires a separate drop-off.

Section 3. Airport Egress Fee & Minimum Airport Fares.

- The \$1.50 Airport egress fee shall be added to all metered fares leaving the Philadelphia International Airport.
- The minimum fare that will include the egress fee for any trip starting at an airport taxicab stand shall be \$11.00.

• The Airport egress fee will not be added to any trip that is being charged the flat-rate to the Center City Zone as defined in Section 2.

Section 4. Fuel Surcharge.

On April 23, 2012, the Authority Board approved a measure implementing a fuel surcharge system for all Philadelphia taxicabs and airport transfer service (a classification of limousine service). The surcharge system allows for the fuel surcharge to change monthly based on fluctuating gas prices as described in the April 23, 2012 resolution. As required, the average price per gallon of regular, unleaded gasoline must be evaluated each month, the corresponding surcharge determined and then posted on the Taxicab and Limousine page of the Authority's website on the third Friday of that month for the following month. Please refer to www.philapark.org/tld for the current fuel surcharge that is added to the taxicab metered fare.
