READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give you the history of the documents. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

GENERAL INFORMATION AND FINDING AIDS: (717) 783-1530**

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from such a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised; and that the fiscal note shall provide the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the five succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the five succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

Title 204—JUDICIAL SYSTEM GENERAL PROVISIONS

PART V. PROFESSIONAL ETHICS AND CONDUCT [204 PA. CODE CH. 83]

Proposed Amendment to Rule of Disciplinary Enforcement 514

Notice is hereby given that the Pennsylvania Lawyers Fund for Client Security (the "Fund") is considering submitting proposed changes to the Supreme Court of Pennsylvania to amend the Pennsylvania Rules of Disciplinary Enforcement as set forth in Annex A. Some concern has been expressed regarding the number of claims being filed with the Fund as well as the dollar value of the alleged losses being claimed. Additionally, some concern has been expressed that certain business entities should be excluded from recovery from the Fund. Opinions have been expressed that the Fund is not intended to be an insurance program for businesses and corporations. Business entities, through their owners or board members should monitor the business' exposure to attorney malfeasance and to take appropriate steps to prevent and minimize such damages.

Interested persons are invited to submit written comments regarding the proposed amendments to the Executive Director, Pennsylvania Lawyers Fund for Client Security, P.O. Box 62585, Harrisburg, PA 17106, by facsimile to 717-231-9511 or by email to admin@palawfund.com on or before September 24, 2013.

CHAPTER 400. ENFORCEMENT OF JUDGMENTS RENDERED BY MAGISTERIAL DISTRICT JUDGES FOR THE PAYMENT OF MONEY

Rule 403. Issuance and Reissuance of Order of Execution.

A. Upon the filing of the request form, the magisterial district judge shall note on the form the time and date of its filing and shall issue the order of execution thereon. The magisterial district judge shall deliver the order of execution for service and execution to the sheriff of, or any certified constable in, the county in which the office of the magisterial district judge issuing the order is situated. If this service is not available to the magisterial district judge, service may be made by any certified constable of the Commonwealth.

B. (1) Upon written request filed by the plaintiff within five years from the date of entry of the judgment, an order of execution shall be reissued at any time, and any number of times.

(2) If an order of execution is superseded by an appeal, writ of certiorari, supersedeas, or a stay pursuant to a bankruptcy proceeding **or other federal or state law**, and

If payment of the judgment was ordered to be made in installments under Rule 323, the magisterial district judge should not issue an order of execution on the judgment unless it appears that there was a default in the installment payments.

Subdivision B will permit the reissuance of an order of execution upon written request of the plaintiff timely filed. Compare Pa.R.C.P. No. 3106(b). The written request for reissuance may be in any form and may consist of a notation on the permanent copy of the request for order of execution form, "Reissuance of order of execution requested," subscribed by the plaintiff. The magisterial district judge shall mark all copies of the reissued order of execution, "Reissued. Request for reissuance filed _____ (time and date)." A new form may be used upon reissuance, those portions retained from the original being exact copies although signatures may be typed or printed with the mark "/s/." There are no filing costs for reissuing an order of execution, for the reissuance is merely a continuation of the original proceeding. However, there may be additional server costs for service of the reissued order of execution.

The magisterial district court shall enter stays in compliance with federal or state law, such as the Servicemembers Civil Relief Act., 50 App. U.S.C. § 501 et seq.

(3) Upon request of the defendant or party in interest to the magisterial district court made in compliance with federal or state law.

(B) When execution is stayed pursuant to this rule, the stay may not be lifted without written order of the magisterial district judge.

(C) After a stay is lifted, execution may proceed without reissuance of the order of execution.

Official Note: Compare Pa.R.C.P. No. 3121(a). Other rules in this chapter may also provide for a stay in specific circumstances covered by those rules. **The magisterial district court shall enter stays in compliance with federal or state law, such as the Servicemembers Civil Relief Act., 50 App. U.S.C. § 501 et seq.**

FINAL REPORT

Recommendation 1-2013, Minor Court Rules Committee Amendments to Rules 1008 and 1013 of the Minor Court Civil Rules

Exceptions for Indigent Residential Tenants in Appeals

On August 16, 2013, effective September 15, 2013, upon recommendation of the Minor Court Rules Committee¹, the Supreme Court of Pennsylvania approved amendments to Rules 1008 and 1013 of the Minor Court Civil Rules.²

I. Background and Discussion

The Minor Court Rules Committee (the "Committee") recommended amendments to the rules of procedure governing exceptions for indigent tenants in appeals from judgments of magisterial district courts. The goal of these rule changes is to amend the rules for depositing sums of rent to secure a supersedeas by low income tenants appealing judgments for possession and filing praecipes for writs of certiorari. Moreover, these rule changes promote consistency between the rules and the Supplemental Instructions for Obtaining a Stay of Eviction³ ("Supplemental Instructions").

Rule 1008 was the past subject of constitutional challenges by legal services organizations. Subsequently, the Court instructed the Committee to draft changes to the rules similar to changes made by the Philadelphia Municipal Court following litigation in the federal district court case *Pleasant v. Evers*, 1998 WL 205431 (E.D. Pa. April 24, 1998), C.A. NO. 97-4124 (Ludwig, J.). The changes to Rules 1008 and 1013, adopted by the Court on April 15, 2008, allow an indigent tenant to appeal and/or file a praecipe for writ of certiorari while still maintaining his or her housing. The indigent tenant is required to pay a sum of money, but it is a lesser sum of money than a non-indigent tenant, who would pay three times the monthly rent or the rent determined to be in arrears by the magisterial district judge.

Presently, the solicitor for a county prothonotary contacted the Committee to report a discrepancy between Rules 1008 and 1013, and the Supplemental Instructions. Specifically, the solicitor noted that Rules 1008C(3)(a) and 1013C(3)(a) required a tenant who had already paid rent in the month in which the appeal or praecipe was filed to "pay into an escrow account with the prothonotary the monthly rent as it becomes due under the lease for the months subsequent to the filing of the [appeal or praecipe]." (Emphasis added.) In contrast, the Supplemental Instructions, made available to tenants online and at the prothonotary's office, directed a tenant in the same circumstance to "pay your monthly rent on an ongoing basis into an escrow account with the prothonotary in thirty (30) day intervals from the date the notice of appeal or praecipe was filed until the time of trial."

In determining whether to conform the Supplemental Instructions to the rules or vice versa, the Committee agreed that calculating the date for future rent payments by using the date the notice of appeal or praecipe was filed, instead of the date rent comes due under the lease, would create greater certainty for the parties. As the magisterial district courts are not courts of record, there is no record evidence of the due date of rent. Using the

date of appeal or praecipe filing as the trigger for calculating future rent payments ensures the use of a date certain that is recorded by the prothonotary, and, therefore, eliminates uncertainty as to when a payment to escrow is due.

II. *Approved Rule Changes*

To address the issues discussed above, the Committee proposed amending Rules 1008C(3)(a) and 1013C(3)(a) to delete the requirement that rent be paid into an escrow account “as it becomes due under the lease for the months subsequent to the filing of the [appeal or praecipe],” and, instead, require the payment of rent into escrow “in thirty (30) day intervals from the date the [notice of appeal or praecipe] was filed.” This change brings consistency to Rules 1008 and 1013, and the Supplemental Instructions.

(b) Only players who are seated at the Raise It Up Stud Poker table may place a wager at the game. Once a player has placed a wager and received cards, that player shall remain seated until the completion of the round of play. If a player leaves the table during a round of play, any wagers made by the player may be considered abandoned and may be treated as losing wagers.

(c) All Ante, Blind, Pair Plus, Progressive Payout and Six Card Bonus Wagers shall be placed prior to the dealer announcing “no more bets” in accordance with the dealing procedure in § 587.8, § 587.9 or § 587.10 (relating to procedure for dealing the cards from a manual dealing shoe; procedure for dealing the cards from the hand; and procedures for dealing the cards from an automated dealing shoe). Except as provided in § 587.11(b), (d) and (f) (relating to procedures for completion of each round of play), a wager may not be made, increased or withdrawn after the dealer announces “no more bets” and begins dealing the cards.

(d) The following wagers may be placed in the game of Raise It Up Stud Poker:

(1) To participate in a round of play, a player shall place an Ante Wager and a Blind Wager, equal to the player’s Ante Wager, that the three cards dealt to the player and the three community cards will form a pair of 10s or better as described in § 587.6(b) (relating to Raise It Up Stud Poker hand rankings).

(2) In accordance with § 587.11(b), (d) and (f), a Play Wager that the three cards dealt to the player and the three community cards will form a pair of 10s or better as described in § 587.6(b).

(4) If specified in its Rules Submission under § 601a.2 (relating to table games Rules Submissions), a certificate holder may offer to each player at a Raise It Up Stud Poker table the option to make an additional Progressive Payout Wager that the three cards dealt to the player will form a pair or better as described in § 587.6(c). After placing Ante and Blind Wagers, a player may make an

additional Progressive Payout Wager by placing a value chip into the progressive wagering device designated for that player. Each player shall be responsible for verifying that the player’s respective Progressive Payout Wager has been accepted.

(5) If specified in its Rules Submission under § 601a.2, a certificate holder may offer to each player at a Raise It Up Stud Poker table the option to make an additional Six Card Bonus Wager that the three cards dealt to the player and the three community cards will form a three-of-a-kind or better as described in § 587.6(b).

(e) A player may not wager on more than one player position at a Raise It Up Stud Poker table.

§ 587.8. Procedure for dealing the cards from a manual dealing shoe.

(a) If a manual dealing shoe is used, the dealing shoe must be located on the table in a location approved by the Bureau of Casino Compliance in accordance with § 601a.10(g) (relating to approval of table game layouts, signage and equipment). Once the procedures required under § 587.5 (relating to shuffle and cut of the cards) have been completed, the stacked deck of cards shall be placed in the dealing shoe either by the dealer or by the automated card shuffling device.

(b) Prior to dealing the cards, the dealer shall announce “no more bets” and, if the Progressive Payout Wager is being offered, use the progressive table game system to prevent the placement of additional Progressive Payout Wagers. The dealer shall then collect any Progressive Payout Wagers and, on the layout in front of the table inventory container, verify that the number of value chips wagered equals the number of Progressive Payout Wagers accepted by the progressive table game system. The dealer shall then place the value chips into the table inventory container.

(c) Each card shall be removed from the dealing shoe with the hand of the dealer that is the closest to the dealing shoe and placed on the appropriate area of the layout with the opposite hand.

(d) The dealer shall, starting with the player farthest to the dealer’s left and continuing around the table in a clockwise manner, deal the cards, face down, as follows:

(1) Deal one card at a time to each player who placed Ante and Blind Wagers in accordance with § 587.7(d)(1) (relating to wagers) until each player who placed a wager has three cards.

(2) Three cards to the area designated for the placement of the community cards.

(e) After three cards have been dealt to each player and three cards have been dealt to the area designated for the community cards, the dealer shall remove the stub from the manual dealing shoe and, except as provided in subsection (f), place the stub in the discard rack without exposing the cards.

(f) If an automated card shuffling device, which counts the number of cards in the deck after the completion of each shuffle and indicates whether 52 cards are present, is not being used, the dealer shall count the stub at least once every 5 rounds of play to determine if the correct number of cards are still present in the deck. The dealer shall determine the number of cards in the stub by counting the cards face down on the layout.

(g) If the count of the stub indicates that 52 cards are in the deck, the dealer shall place the stub in the discard rack without exposing the cards.

(h) If the count of the stub indicates that the number of cards in the deck is incorrect, the dealer shall determine if the cards were misdealt. If the cards were misdealt (a player has more or less than 2 cards or the area designated for the placement of the community cards has more or less than 3 cards) but 52 cards remain in the deck, all hands shall be void and all wagers shall be returned to the players. If the cards were not misdealt, all hands shall be void, all wagers shall be returned to the players and the entire deck of cards shall be removed from the table.

§ 587.9. Procedure for dealing the cards from the hand.

(a) If the cards are dealt from the dealer's hand, the following requirements shall be observed:

(1) An automated shuffling device shall be used to shuffle the cards.

(2) After the procedures required under § 587.5 (relating to shuffle and cut of the cards) have been completed, the dealer shall place the stacked deck of cards in either hand. After the dealer has chosen the hand in which he will hold the cards, the dealer shall continue to use that hand whenever holding the cards during that round of play. The cards held by the dealer shall be kept over the table inventory container and in front of the dealer at all times.

(3) Prior to dealing the cards, the dealer shall announce "no more bets" and, if the Progressive Payout Wager is being offered, use the progressive table game system to prevent the placement of additional Progressive Payout Wagers. If any Progressive Payout Wagers have been made, the dealer shall then collect the wagers and, on the layout in front of the table inventory container, verify that the number of value chips wagered equals the number of Progressive Payout Wagers accepted by the progressive table game system. The dealer shall then place the value chips into the table inventory container.

(b) The dealer shall, starting with the player farthest to the dealer's left and continuing around the table in a clockwise manner, deal the cards, face down, as follows:

(1) Deal one card at a time to each player who placed Ante and Blind Wagers in accordance with § 587.7(d)(1) (relating to wagers) until each player who placed a wager has three cards.

(2) Three cards to the area designated for the placement of the community cards.

(c) After three cards have been dealt to each player and three cards have been dealt to the area designated for the community cards, the dealer shall, except as provided in subsection (d), place the stub in the discard rack without exposing the cards.

(d) If an automated card shuffling device, which counts the number of cards in the deck after the completion of each shuffle and indicates whether 52 cards are present, is not being used, the dealer shall count the stub at least once every 5 rounds of play to determine if the correct number of cards are still present in the deck. The dealer shall determine the number of cards in the stub by counting the cards face down on the layout.

(e) If the count of the stub indicates that 52 cards are in the deck, the dealer shall place the stub in the discard rack without exposing the cards.

(f) If the count of the stub indicates that the number of cards in the deck is incorrect, the dealer shall determine if the cards were misdealt. If the cards were misdealt (a

player has more or less than 2 cards or the area designated for the placement of the community cards has more or less than 3 cards) but 52 cards remain in the deck, all hands shall be void and all wagers shall be returned to the players. If the cards were not misdealt, all hands shall be void, all wagers shall be returned to the players and the entire deck of cards shall be removed from the table.

§ 587.10. Procedures for dealing the cards from an automated dealing shoe.

(a) If the cards are dealt from an automated dealing shoe, the following requirements shall be observed:

(1) After the procedures required under § 587.5 (relating to shuffle and cut of the cards) have been completed, the cards shall be placed in the automated dealing shoe.

(2) Prior to the dealing shoe dispensing any stacks, the dealer shall announce "no more bets" and, if the Progressive Payout Wager is being offered, use the progressive table game system to prevent the placement of additional Progressive Payout Wagers. The dealer shall then collect any Progressive Payout Wagers and, on the layout in front of the table inventory container, verify that the number of value chips wagered equals the number of Progressive Payout Wagers accepted by the progressive table game system. The dealer shall then place the value chips into the table inventory container.

(b) The dealer shall deliver the first stack of three cards dispensed by the automated dealing shoe face down to the player farthest to the dealer's left who has placed Ante and Blind Wagers in accordance with § 587.7(d)(1) (relating to wagers). As the remaining stacks are dispensed to the dealer by the automated dealing shoe, the dealer shall, moving clockwise around the table, deliver a stack face down to each of the other players who has placed Ante and Blind Wagers. The dealer shall then deliver a stack of three cards face down to the area designated for the placement of the three community cards.

(c) After each stack of three cards has been dispensed and delivered in accordance with subsection (b), the dealer shall remove the stub from the automated dealing shoe and, except as provided in subsection (d), place the stub in the discard rack without exposing the cards.

(d) If an automated card shuffling device that counts the number of cards in the deck after the completion of each shuffle and indicates whether 52 cards are present is not being used, the dealer shall count the stub at least once every 5 rounds of play to determine that the correct number of cards are still present in the deck. The dealer shall determine the number of cards in the stub by counting the cards face down on the layout.

(e) If the count of the stub indicates that 52 cards are in the deck, the dealer shall place the stub in the discard rack without exposing the cards.

(f) If the count of the stub indicates that the number of cards in the deck is incorrect, the dealer shall determine if the cards were misdealt. If the cards were misdealt (a player has more or less than 2 cards or the area designated for the placement of the community cards has more or less than 3 cards) but 52 cards remain in the deck, all hands shall be void and all wagers shall be returned to the players. If the cards were not misdealt, all hands shall be void, all wagers shall be returned to the players and the entire deck of cards shall be removed from the table.

§ 587.11. Procedures for completion of each round of play.

(a) After the dealing procedures required under § 587.8, § 587.9 or § 587.10 (relating to procedure for dealing the cards from a manual dealing shoe; procedure for dealing the cards from the hand; and procedures for dealing the cards from an automated dealing shoe) have been completed, each player shall examine his cards, subject to the following limitations:

(1) Each player who wagers at Raise It Up Stud Poker shall be responsible for his own hand and no person other than the dealer and the player to whom the cards were dealt may touch the cards of that player.

(2) Each player shall keep his cards in full view of the dealer at all times.

(3) A player may not exchange or communicate information regarding his hand prior to the dealer revealing all of the community cards. A violation shall result in a forfeiture of all wagers on that round by that person.

(b) After each player has examined his cards and replaced them face down on the layout, the dealer shall, beginning with the player farthest to the dealer's left and moving clockwise around the table, ask each player who placed an Ante Wager if he wishes to check or place a Play Wager in an amount equal to one, two or three times the amount of the player's Ante Wager.

(c) Once all players have either checked or placed a Play Wager, the dealer shall turn over and reveal the first community card and place it in the 4th Street box on the layout.

(d) Each player shall then either check or place a Play Wager in an amount equal to one or two times the amount of the player's Ante Wager.

(e) Once all remaining players have either checked or placed a Play Wager, the dealer shall turn over and reveal the second community card and place it in the 5th Street box on the layout.

(f) Each player shall then either place a Play Wager in an amount equal to the amount of the player's Ante Wager or fold. If a player folds, the Ante and Blind Wagers shall be immediately collected and placed in the table inventory container and the folded hand shall be collected and placed in the discard rack unless the player made a Progressive Payout or Six Card Bonus Wager in which case the cards shall be left on the table until all wagers are resolved in accordance with subsection (i).

(g) If a player has placed an Ante, Blind and a Progressive Payout or Six Card Bonus Wager but does not make a Play Wager, the player shall forfeit the Ante, Blind and Progressive Payout Wager but does not forfeit the eligibility to receive an Envy Bonus under § 587.12(e)(5) (relating to payout odds; Envy Bonus; rate of progression) or a Six Card Bonus payout under § 587.12(f).

(h) Once all remaining players have either placed a Play Wager or folded, the dealer shall turn over and reveal the third community card and place it in the 6th Street box on the layout.

(i) Beginning with the player farthest to the dealer's right and continuing around the table in a counterclockwise direction, the dealer shall turn over and reveal the

player's three cards and complete the following applicable procedures in succession for each player:

(1) If a player placed a Pair Plus Wager, the dealer shall form the highest possible ranking three-card hand. If the player's three cards form a pair or better, as described in § 587.6(c) (relating to Raise It Up Stud Poker hand rankings), the dealer shall pay each winning Pairs Plus Wager in accordance with the payout odds in § 587.12(a).

(2) The dealer shall form the highest possible ranking five-card hand from the player's three cards and the three community cards. If a player's highest ranking five-card hand:

(C) Have a floorperson or above validate the progressive payout in accordance with the certificate holder's approved internal control procedures.

If a player has won a progressive payout that is not being paid from the table inventory container, the cards of that player shall remain on the table until the necessary documentation has been completed.

(E) Pay any Envy Bonus won in accordance with § 587.12(e)(5). Players making a Progressive Payout Wager shall receive an Envy Bonus when another player at the same Raise It Up Stud Poker table is the holder of an Envy Bonus Qualifying Hand. Players are entitled to multiple Envy Bonuses if more than one player is the holder of an Envy Bonus Qualifying Hand. A player is not entitled to an Envy Bonus for his own hand.

(ii) If a player has placed a Six Card Bonus Wager and the player's three cards and the three community cards form a three-of-a-kind or better, the dealer shall pay the winning Six Card Bonus Wager in accordance with § 587.12(f).

(j) After all wagers have been settled, the dealer shall remove all remaining cards from the table and place them in the discard rack in a manner that permits the reconstruction of each hand in the event of a question or dispute.

Section VII	NPDES	NOI for Coverage under NPDES General Permits

For NPDES renewal applications in Section I, the Department of Environmental Protection (Department) has made a tentative determination to reissue these permits for 5 years subject to effluent limitations and monitoring and reporting requirements in their current permits, with appropriate and necessary updated requirements to reflect new and changed regulations and other requirements.

For applications for new NPDES permits and renewal applications with major changes in Section II, as well as applications for MS4 Individual Permits and Individual Stormwater Construction Permits in Sections IV and VI, the Department, based upon preliminary reviews, has made tentative determinations of proposed effluent limitations and other terms and conditions for the permit applications. In accordance with 25 Pa. Code § 92a.32(d), the proposed discharge of stormwater associated with construction activities will be managed in accordance with the requirements of 25 Pa. Code Chapter 102. These determinations are published as proposed actions for comments prior to taking final actions.

Unless indicated otherwise, the United States Environmental Protection Agency (EPA) Region III Administrator has waived the right to review or object to proposed NPDES permit actions under the waiver provision in 40 CFR 123.24(d).

Persons wishing to comment on NPDES applications are invited to submit statements to the contact office noted before the application within 30 days from the date of this public notice. Persons wishing to comment on WQM permit applications are invited to submit statements to the office noted before the application within 15 days from the date of this public notice. Comments received within the respective comment periods will be considered in the final determinations regarding the applications. A comment submittal should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests for public hearings on applications. A public hearing may be held if the responsible office considers the public response significant. If a hearing is scheduled, a notice of the hearing will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. The Department will postpone its final determination until after a public hearing is held.

Persons with a disability who require an auxiliary aid, service, including TDD users, or other accommodations to seek additional information should contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101–6026.907)

Sections 302–305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302–6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop

and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS NEW SOURCES AND MODIFICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the public. This approach allows the owner or operator of a facility to complete and submit permitting documents relevant to its application one time, affords an opportunity for public input and provides for sequential issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of these applications, subsequently prepared draft permits, review summaries and other support materials are available for review in the regional office listed before the applications. Persons interested in reviewing the application files should contact the appropriate regional office to schedule appointments.

Persons wishing to receive a copy of a proposed Plan Approval or Operating Permit shall indicate interests to the Department regional office within 30 days of the date of this notice and shall file protests or comments on a proposed Plan Approval or Operating Permit within 30 days of the Department providing a copy of the proposed documents to persons or within 30 days of its publication in the *Pennsylvania Bulletin*, whichever comes first. Interested persons may also request that hearings be held concerning a proposed Plan Approval or Operating Permit. A comment or protest filed with the Department regional office shall include a concise statement of the objections to the issuance of the Plan Approval or Operating Permit and relevant facts which serve as the basis for the objections. If the Department schedules a hearing, a notice will be published in the *Pennsylvania Bulletin* at least 30 days prior to the date of the hearing.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the source is constructed and operating in compliance with applicable requirements in 25 Pa. Code Chapters 121–143, the Federal Clean Air Act (42 U.S.C.A. §§ 7401–7671q) and regulations adopted under the Federal Clean Air Act.

26-00057: Matt Canestrale Contracting, Inc. / Labelle Site (1035 Labelle Rd, La Belle, PA 15450) for the operation of a barge unloading and transferring operation to support the reclamation area on top of the hill adjacent to the unloading/loading area located in Luzerne Township, **Fayette County**. Coal ash and FGD sludge are being used as a capping material on the coal refuse pile to reduce infiltration and to provide a buttress for long-term stability. In accordance with 25 Pa. Code §§ 127.424 and 127.425 the Department of Environmental Protection (DEP) has received an application and is providing notice that it intends to issue an Air Quality Operating Permit for the above mentioned facility.

The subject facility consists of two docks for barge unloading, two excavators each with a clamshell and an area for truck/rail transshipping with front loaders. One dock/ excavator is considered primary, but both docks can be used at the same time. The rate of unloading the barges is limited by the number of trucks available. Barges are unloaded and material is transported to the reclamation area on the hill behind the barge unloading area. The trucks transporting the material cross one public road from the barge unloading area to reclamation area. The facility provided potential emission calculations based on 416,000 tons of material handled per 12 month period and AP-42 Emission Factors. Operating approximately ten hours a day and five days a week, the potential emissions are calculated to be 23.9 tons per year PM₁₀. This includes the potential emissions from transferring material from barge to truck, haul roads, truck unloading, wind erosion and bulldozing.

The proposed authorization is subject to State and Federal Regulations. The permit includes operational requirements, monitoring requirements, and recordkeeping requirements as follows:

1. The Owner/Operator shall test the moisture content of each material received on barge at least once per week. Records of the sample tests shall be maintained in a log on-site. The Owner/Operator may request a reduction in the frequency of the moisture content sample testing, in writing, provided there are no observations by the Department of any inconsistent test samples from the previous six month period.

2. The Owner/Operator shall conduct a daily survey of the facility during daylight hours while the facility is operating to ensure compliance with the fugitive emission and malodor restrictions in 25 Pa. Code §§ 123.1, 123.2 and 123.31. If any fugitive emissions or malodors in violation of §§ 123.1, 123.2 or 123.31 are apparent, the permittee shall take immediate corrective action to eliminate them.

3. The Owner/Operator shall maintain a daily record of all fugitive emission and odor surveys performed. The

records shall include the date, time, name and title of the observer, whether fugitive emissions or malodors were observed and any corrective action. Records shall be kept on-site for a minimum of five years and made available to the Department.

4. The Owner/Operator shall maintain a daily log of material delivered to the facility, inventory on hand, and material shipped from the facility.

5. The Owner/Operator shall operate and maintain all sources at this facility in accordance with 25 Pa. Code § 127.444.

6. All trucks carrying material with a moisture content of less than 5 percent by weight are required to be tarped.

7. The Owner/Operator shall notify the Department at least 5 days in advance of handling materials at the facility that have not been previously handled or approved by the Department. The Owner/Operator shall await the Department's written approval prior to accepting any new material.

8. The drop height from the front-end loaders and clamshell buckets being used to transfer and load material into trucks shall be kept as short as possible to minimize fugitive emissions.

9. The facility shall not handle materials with a moisture content of less than 5 percent by weight under excessively windy conditions, where the force of the wind contributed to the generation of fugitive dust.

10. All unpaved in-plant roads shall be watered on a preventative basis. Other methods of dust control must be used when the weather conditions make the watering of unpaved roads hazardous.

11. All in-plant roads shall be maintained to prevent particulate matter from becoming airborne in accordance with 25 Pa. Code §§ 123.1 and 123.2

12. A set vehicle pattern shall be established and maintained for vehicles entering and exiting the facility.

13. In accordance with 25 Pa. Code § 123.1(c), the Owner/Operator shall promptly remove earth or other material from paved roads.

14. An operable water truck must be maintained on-site at all times.

15. The Department may require additional controls (water sprayers, paving, conveyor covers, etc.) based on evaluation of the operation after inspection and determination that existing controls are not adequate for controlling fugitive emissions.

Those who wish to provide the Department with additional written information that they believe should be considered prior to the issuance of the Plan Approval may submit the information to Sheila Shaffer, Pennsylvania Department of Environmental Protection, 400 Waterfront Drive, Pittsburgh, PA, 15222. Written comments must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Operating Permit (26-00057), and concise statements regarding the relevancy of the information or objections to issuance of the Operating Permit.

A public hearing may be held, if the Department, in its discretion, decides that such a hearing is warranted based on the information received. All persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper or by the *Pennsylvania Bulletin*, or by telephone,

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapter 77 are as follows:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	35 mg/l	70 mg/l	90 mg/l
Alkalinity exceeding acidity*			
pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation—Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

EROSION AND SEDIMENT CONTROL PERMITS

The following parties have applied for Erosion and Sediment Control Permits for earth disturbance activities associated with either road maintenance or timber harvesting operations.

Unless otherwise indicated, on the basis of preliminary review and application of lawful standards and regulations, the Department proposes to issue a permit to discharge, subject to certain limitations in the permit conditions. These proposed determinations are tentative. Limitations are provided as erosion and sediment control best management practices which restrict the rate and quantity of sediment discharged.

A person wishing to comment on a proposed permit are invited to submit a statement to the appropriate Department regional office listed before the application within 30 days of this public notice. Comments reviewed within this 30-day period will be considered in the formulation of the final determinations regarding this application. Responses should include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and relevant facts upon which it is based. A public hearing may be held after consideration of comments received by the appropriate Department regional office during the 30-day public comment period.

Following the 30-day comment period, the appropriate regional office water management program manager will make a final determination regarding the proposed permit. Notice of this determination will be published in the *Pennsylvania Bulletin* at which time this determination may be appealed to the Environmental Hearing Board (Board).

The application and related documents, including the erosion and sediment control plan for the earth disturbance activity, are on file and may be inspected at the appropriate regional office.

Persons with a disability that require an auxiliary aid, service or other accommodation to participate during the 30-day public comment period should contact the specified regional office. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Important legal rights are at stake, however, so individuals should contact a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995

PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P. S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

*The parameter is applicable at all times.

In addition, the Department imposes a technology-based aluminum limit of 2.0 mg/l (30 day average) to protect stream uses.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The BAT limits for noncoal mining activities as provided in 40 CFR Part 436 and 25 Pa. Code Chapter 77 are as follows:

<i>Parameter</i>	<i>30-day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Suspended solids	35 mg/l	70 mg/l	90 mg/l
Alkalinity exceeding acidity*			
pH*		greater than 6.0; less than 9.0	

* The parameter is applicable at all times.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 362-0600-001, NPDES Program Implementation-Memorandum of Understanding (MOU) Concerning Water Quality Management, NPDES Program Implementation, and Related Matters. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

FEDERAL WATER POLLUTION CONTROL ACT SECTION 401

The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Copies of the appeal form and the Board's rules of practice and procedure may be obtained from the Board. The appeal form and the Board's rules of practice and procedure are also available in Braille or on audiotape from the Secretary to the Board at (717) 787-3483. This paragraph does not, in and of itself, create a right of appeal beyond that permitted by applicable statutes and decisional law.

For individuals who wish to challenge an action, the appeal must reach the Board within 30 days. A lawyer is not needed to file an appeal with the Board.

Important legal rights are at stake, however, so individuals should show this notice to a lawyer at once. Persons who cannot afford a lawyer may qualify for pro bono representation. Call the Secretary to the Board at (717) 787-3483 for more information.

Actions on applications for the following activities filed under the Dam Safety and Encroachments Act (32 P.S. §§ 693.1—693.27), section 302 of the Flood Plain Management Act (32 P.S. § 679.302) and The Clean Streams Law and Notice of Final Action for Certification under section 401 of the FWPCA.

Federal Consistency under the Coastal Zone Management Act; Philadelphia Navy Yard Annex

The Department of Environmental Protection (Department) is reviewing the proposed renovation of Building 592, Philadelphia Navy Yard Annex, in Philadelphia, PA for consistency with the Pennsylvania Coastal Resources Program's (Program) enforceable policies, as required by the Federal Coastal Zone Management Act of 1972 (16 U.S.C.A. §§ 1451–1466). This project is subject to Department review for Federal consistency because it is a Federal development activity and is located within this Commonwealth's designated coastal zone.

The proposed renovations to Building 592 consist of the removal of asbestos coated metal siding; the installation

of new metal and foam-insulated panel siding; the removal and sealing of selected stacks, vents, pipes and ducts from the exterior of the building; gutter and downspout repairs; the covering of existing nonmezzanine windows; possible replacement of mezzanine windows; and interior moisture-damage repairs. The purpose of the renovations is to ensure that Building 592 is consistent with Navy energy guidelines and to ensure the preservation of Building 592 as a historic structure.

The Department of the Navy has submitted a Federal Coastal Consistency Negative Determination to the Program in accordance with 15 CFR Part 930 (relating to Federal consistency with approved coastal management programs) of the Federal coastal consistency regulations. The Department of the Navy has certified that the proposed Federal activity is not reasonably likely to affect the land, water or natural resource of the Pennsylvania Coastal Zone and is therefore consistent with the applicable enforceable policies of the Commonwealth's approved Coastal Zone Management Plan to the maximum extent practicable. Interested parties may request a copy of the complete Federal Coastal Consistency Determination from the Department contact listed as follows.

The Department will consider all comments received by September 16, 2013, before issuing a final Federal consistency concurrence or objection. Comments submitted by facsimile will not be accepted. Comments, including comments submitted by e-mail must include the originator's name and address. Written comments should be submitted to Matt Walderon, Federal Consistency Coordinator, Interstate Waters Office, 400 Market Street, P.O. Box 8465, RCSOB, Harrisburg, PA 17101-8465, (717) 772-2196, mwalderon@pa.gov.

Questions concerning this notice should be directed to Matt Walderon at (717) 772-2196 or mwalderon@pa.gov.

PENNSYLVANIA PUBLIC UTILITY COMMISSION

Investigation Regarding Transmission Service Charge Reconciliation Methods

Public Meeting
August 15, 2013

Commissioners Present: Robert F. Powelson, Chairperson; John F. Coleman, Vice Chairperson; Wayne E. Gardner; James H. Cawley; Pamela A. Witmer

Investigation re Transmission Service Charge (TSC); Reconciliation Methods; M-2011-2239714

Order

By the Commission:

On May 19, 2011, the Commission solicited comments on reconciliation methods for transmission service charges, which are pass-through costs. Interested entities could address, inter alia, methods of aligning demand costs with cost causation, the frequency and timing of reconciliations, and riders. Several entities filed comments and reply comments.

Background

The Pennsylvania Electricity Generation Customer Choice and Competition Act (Act) requires electric distribution companies (EDCs) to unbundle transmission rates from other charges, e.g., generation and distribution. 66 Pa.C.S. § 2804(3). The EDC remains responsible for distribution of electricity to all customers. Customers can shop for generation services and associated transmission

services from electric generation suppliers (EGS), but not all customers shop. Customers that do not choose an EGS receive default service from EDCs.

Each EDC recovers the cost of delivering power from generation sources through high voltage transmission lines to the local electric distribution system through a transmission service charge (TSC) in its tariff. PJM is the regional transmission organization (RTO) that coordinates this movement (transmission) of power on a wholesale basis in Pennsylvania, twelve other states, and the District of Columbia. PJM bills the EDCs for this transmission service. TSC is a recoverable cost subject to Section 1307(e) reconciliation.

While related to volumetric usage and applied in conjunction with the volume of generation consumed, TSC tariff rates are not strictly volumetric. In addition, EDCs do not use a uniform method to reconcile TSC. At least one EDC has been reconciling actual revenues to historical estimates of usage to allocate actual costs among customer classes.¹

By order entered on May 19, 2011, at this docket, we solicited comments on reconciling transmission costs. We questioned whether it is appropriate to reconcile TSC revenue to estimates of demand used to set the TSC rates² (e.g., prior year allocators) or whether the reconciliation should be based on the actual TSC revenues received and the actual costs incurred for demand. We opened this investigation to explore the implications of using historical estimates demand or prior year allocators, as opposed to actual demand, costs, and revenues, for TSC reconciliation purposes on a going-forward basis. Commenters were to address, *inter alia*, whether it is appropriate to allocate an EDC's actual current TSC demand based on (a) historical TSC, (b) actual annual or monthly TSC per customer class, (c) volumetric throughput, or (d) some other method in order to align demand costs with cost causation during the reconciliation period. Commenters were also to address the use of quarterly reconciliations and the timing of reconciliations. Additionally, commenters could address riders in conjunction with reconciliation.

Comments were filed by the Office of Consumer Advocate (OCA); the Office of Small Business Advocate (OSBA); Duquesne Light Company (Duquesne); Metropolitan Edison Company, Pennsylvania Electric Company, Pennsylvania Power Company, and West Penn Power Company (collectively, FirstEnergy); PECO Energy Company (PECO); PPL Electric Utilities Corp. (PPL); and Industrial Customer Groups (ICG).³ Reply comments were filed by FirstEnergy, OSBA, and ICG.

Comments

OCA's Witness Glenn A. Watkins described the complexity of predicting transmission demand and setting TSC rates for default service classes:

When default service providers develop their prospective estimates of class loads, MWH usages, and/or number of customers for each upcoming TSC rate

year, it is impossible to forecast which specific customers will leave default service and begin shopping during the upcoming rate year, let alone when these switches will occur within the rate year.

Watkins Affid. at 2 ¶7, M-2011-2239714, attached to OCA Comments.

OCA notes that transmission loads are decreasing for EDCs and increasing for EGSs due to shopping. OCA Comments at 2. OCA opines that EDCs should reconcile TSC revenue to actual usage rather than to estimates of that usage and that EDCs must account for shopping. OCA Witness Watkins, supporting this proposition, provided:

However, if the ratemaking methodology used to develop forward-looking TSC "estimate" rates as well as the methodology used to reconcile a default service provider's total annual TSC costs and revenue do not reflect class changes in monthly revenues and costs, inequitable ultimate TSC cost reimbursement across customer classes may result. That is, the allocation of a default service provider's total transmission costs across retail classes should reasonably reflect the dynamics of cost causation and retail customer migration that occurs during each rate year.

Watkins Affid. at 2 ¶7, M-2011-2239714, attached to OCA Comments.

OCA notes that a monthly TSC rate may be appropriate. OCA Comments at 1. OCA Witness Watkins further opined that:

In my opinion, a fair and reasonable method to assign cost responsibility across classes is to first estimate retail class contributions to monthly demands on a prospective basis. The forecast contributions to monthly demands will then serve as the basis for the upcoming year's estimate rates for each class. During the reconciliation process, actual contributions to each monthly demand that occurred during the rate year can be used. This class allocation based on actual monthly demands will then reasonably reflect changes in the total transmission costs incurred by the default service provider during the year and reasonably reflect changes in cost causation and resulting cost responsibility.

It is my understanding that method outline above, is very similar, if not identical to, the TSC method currently utilized by PECO.

Watkins Affid. at 2-3 ¶¶8-9, M-2011-2239714, attached to OCA Comments.

PECO submits that the most accurate way to reconcile TSC costs for a prior period is to use the actual monthly TSC because this method effectively ties the TSC surcharge closely to the actual PJM transmission service charge. PECO opines that using a historical demand allocator is likely to create significantly higher over- or under-recovery in classes that experience significant shopping after the development of the allocator. PECO does not support allocating demand on a volumetric basis. PECO does not see a need for reconciliations more frequently than annually. PECO Comments at 4.

FirstEnergy asserts that transmission-related rates should be based on forecasted costs and reconciled to actual costs to achieve an accurate correlation between cost causation and allocation. According to FirstEnergy, to the extent not already allocated by PJM, actual costs should be allocated by customer class based on actual default service load, which would help to mitigate the risk

¹ See PPL Proposed TSC Reconciliation for 12-Months Ending Nov. 30, 2010, M-2010-2213754, (PPL 2010 TSC Reconciliation) and PPL Transmission Service Charge, M-2011-2239805 (2008 FERC Rates Refund), order entered August 15, 2013. PPL reconciled TSC revenue to historical estimates of demand (or historical allocators), which did not anticipate disproportionate migration from its large C&I default service customer classes. As we said in our recent order in those consolidated proceedings, TSC reconciliation is not retroactive ratemaking. Further, it does not affect base rates.

² Some EDCs use TSCd and also have a rate element "TSCe" that includes TSCd reconciliation and regulatory lag factors.

of cross-subsidization and stranded costs and would treat customers similarly regardless of whether the customer chooses to shop with a competitive supplier. FirstEnergy Comments at 3. FirstEnergy explains the relationship between historical and actual demand as follows: The “historic[al]” demands during [the prior year] are used to create the ‘actual’ [network service peak load] demands during [the following year].” FirstEnergy Reply Comments at 3.

West Penn, a FirstEnergy EDC, allocates TSC across distinct customer classes based on each class’ load ratio share of the monthly TSC. In doing so, West Penn claims that it mitigates the risk of cross subsidization among classes and reduces the possibility of stranded costs should all the customers in an entire rate schedule chose to shop. According to FirstEnergy, this presents pricing more comparable to competitive pricing structures. FirstEnergy Comments at 6. West Penn reconciles on a yearly basis with a provision for interim revisions if the original rates would result in material over- or under-collections. FirstEnergy Comments at 6-7.⁴

PPL believes that monthly adjustments of each customer class’ assigned peak load responsibility to reflect the class’ share of default service load in a given month will minimize over- and under-collections, avoid cost shifting, and ensure that customers bear their fair shares of TSC costs. PPL at 7. PPL believes that historical PJM peak load contribution demand data should be adjusted for the forecast amount of default service for each upcoming TSC application period and that adjustments should be monthly to prevent cost shifting and to fairly allocate costs.⁵ PPL Comments at 8. PPL believes, however, that it is appropriate to use historical allocators, which are estimates of future usage, to reconcile current demand. PPL Comments at 6. See also PPL comments and filings at PPL 2010 TSC Reconciliation (M-2010-2213754).

PPL argues against volumetric allocation of demand as unfair to large customers who shift load out of peak periods through demand response. PPL Comments at 8 and 9. PPL does not favor quarterly reconciliations, especially if an EDC is allowed to use monthly allocation data. PPL Comments at 9. PPL proposes a migration rider for generation and transmission cost variances. PPL notes that the lack of a migration rider distorts an EDC’s ability to ensure that refund reconciliations benefit only those customers previously burdened with an over-collection and that recoupment reconciliations burden only those customers previously benefited from an under-collection; further, it results in distorted and unstable PTC figures. PPL Comments at 9-13.

Duquesne maintains that, because it has not had any significant shifts in demand over the past ten years, it uses historical demand to reconcile TSC. Since there is so little variance between historical and projected demand in its service territory, Duquesne would prefer to continue to use historical demand for reconciliations. Duquesne Comments at 2 and 5. Duquesne adjusts projected expenses for known changes that it expects to see the rate year. Duquesne Comments at 3. Duquesne believes that volumetric pricing of demand would remove the incentive for large customers to shift load to non-peak times. Duquesne Comments at 5. Because Duquesne’s provider of last resort (POLR) load is decreasing on a steady, consistent

basis, Duquesne sees no need for quarterly reconciliations. Duquesne Comments at 6.

OSBA asserts that because PJM uses 2009 TSC data to bill 2010 TSC costs an EDC must reconcile its 2010 TSC costs to 2009 market configurations. OSBA Comments at 3. OSBA asserts that there is no support for requiring uniformity as to methods or time periods for reconciliation. OSBA Reply Comments at 2 and 3. Changes, whether for the sake of uniformity or on a case-by-case basis could cause material differences among rate classes and have unanticipated consequences on PTC figures. If uniformity is desired, a rulemaking should be commenced. Individual changes should be based on evidentiary records. OSBA Reply Comments at 4. Settlements regarding TSC should be honored unless the settlements are unclear or subject to alternative interpretations. Such discrepancies should be cleared on a case by case basis. OSBA suggests that while quarterly reconciliations might cause more volatility in rates, they also mitigate intergenerational mismatches and might better align an EDC’s PTC with competitive offers. OSBA asserts that this decision should be made in Investigation of Retail Electricity Market, I-2011-2237952. (See order entered April 29, 2011, in that proceeding.) OSBA Comments at 3 and 4.

ICG asserts that TSC rates and reconciliations should be designed to minimize differences in TSC pricing between an EDC’s and an EGS’s offerings. ICG comments at 3. ICG maintains that an EDC’s TSC charges should align with concurrent PJM transmission charges and supports use of monthly reconciliation for TSC based on actual usage. Yearly reconciliations do not send appropriate signals to customers. ICG Comments at 3 and 4. Customers should receive pricing information in sufficient time to make shopping decisions prior to any pricing changes. ICG Comments at 5.

Discussion

As the comments indicate, the propriety of one reconciliation method versus another in any given set of circumstances is subject to a variety of opinions and historical EDC practices. However, Section 1307(e) the Public Utility Code provides unambiguous instruction on how the Commission is to evaluate whether a reconciliation mechanism complies with its requirements.

TSC is an adjustable rate within the meaning of Section 1307. As such, tariff provisions establishing a TSC over-and-under reconciliation mechanism must comply with the terms of that section and with the fundamental requirement that the rates be just and reasonable. 66 Pa.C.S. §§ 1301 and 1307. Because transmission is a pass-through item, an EDC’s rate of return and base rates are not affected by reconciliation of TSC revenues and costs.

Regarding reconciliations, Section 1307 (e) provides, in pertinent part, that:

(e) Automatic adjustment reports and proceedings.

(1) Within 30 days following the end of such 12-month period as the commission shall designate, each public utility using an automatic adjustment clause shall file with the commission a statement which shall specify for such period:

(i) the total revenues received pursuant to the automatic adjustment clause;

(ii) the total amount of that expense or class of expenses incurred which is the basis of the automatic adjustment clause; and

⁴ FirstEnergy suggests that transmission costs which are not market-based but rather consistent with utility-based charges be removed from the price to compare (PTC) via a rulemaking or provisions in an EDC’s default service plan. FirstEnergy Comments at 8 and Reply Comments at 3.

⁵ It does not appear that this was PPL’s practice as of 2010. See PPL 2010 TSC Reconciliation.

(iii) the difference between the amounts specified by subparagraphs (i) and (ii).

Such report shall be a matter of public record and copies thereof shall be made available to any person upon request to the commission.

* * * * *

(3) Absent good reason being shown to the contrary, the commission shall, within 60 days following such hearing, by order direct each such public utility to, over an appropriate 12-month period, refund to its patrons an amount equal to that by which its revenues received pursuant to such automatic adjustment clause exceeded the amount of such expense or class of expenses, or recover from its patrons an amount equal to that by which such expense or class of expenses exceeded the revenues received pursuant to such automatic adjustment clause.

66 Pa.C.S. § 1307(e)(1) and (3). This statutory language is unambiguous; Section 1307(e) reconciliation mechanisms adjust for the difference between revenues received and expenses incurred within the reconciliation period. All Section 1307(e) rates and reconciliations approved by this Commission must comply with this statutory directive.

In addition, Pennsylvania Commonwealth Court has opined on the indicia of reconciliations acceptable under Section 1307(e). In a discussion of what qualified for a Section 1307 adjustable rate, it recently wrote:

Indeed, the very function of the typical automatic adjustment clause is to permit rapid recovery of a specific, identifiable expense item, with a more comprehensive analysis upon reconciliation of actual costs with previously projected costs used to establish the effective rate.

Popowsky v. Pa. PUC, 13 A.3d 583, 591, (Pa. Cmwlth. 2011) quoting *Masthope Rapids Property Owners Council v. Pa. PUC*, 581 A.2d 994, 1000 (Pa. Cmwlth. 1990). Thus, at core, annual or quarterly Commission review of Section 1307(e) reconciliation filings should reflect “essentially a mathematical review” of the “actual costs with previously projected costs used to establish the effective rate.” We agree that this is the essence of the revenue and expense reconciliation requirements of Subsections (i)–(iii) of Section 1307(e)(1). As such, we believe that delving further into the EDC’s TSC projections or forecasting mechanisms, or the various bases of approved TSC allocations, are matters better reserved for TSC-rate or base-rate proceedings where a full panoply of cost and revenue justifications come into play.

We proceed with this standard in mind and have structured our consideration of the comments on these topics: Reconciliation of TSC Costs, Volumetric Pricing of TSC; Frequency of Reconciliations, Riders, and PTC Issues.

Reconciliation of TSC Costs

TSCs are pass-through costs. The issue is how to reconcile transmission revenue received by an EDC with the actual costs incurred by the EDC in obtaining that transmission on behalf of its various default service customer classes, consistent with Section 1307(e).

OSBA notes that settlements regarding TSC should be honored unless the settlements are unclear or subject to alternative interpretations and that such discrepancies should be cleared on a case by case basis.

Our review of the comments indicates that no commenter identified any tariff, statute, regulation, market rule, PJM provision, settlement, or case law that requires an EDC to reconcile transmission revenues to projections or estimates of costs or usage rather than to actual costs. *Lloyd* and its progeny expected that transmission revenues and costs would be reconciled; the PPL settlement after *Lloyd* expected that reconciliation would be based on actual revenues and actual costs. See *Lloyd, et al. v. Pa. PUC*, 904 A.2d 1010, 1018-1020. (Pa. Cmwlth. 2006) (*Lloyd*); see also *Pa. PUC v. PPL*, R-00049255 (July 25, 2007), 2007 WL 2198189 (Remand Settlement). To this extent, *Lloyd* is consistent with the requirements of Section 1307(e). If the parties to the remand believed that *Lloyd* mandated reconciliation of actual transmission costs and revenues to the prior year’s market configurations by class and estimates of costs and usage based on that configuration, then that method should have been spelled out in the PPL settlement reached in the remand of *Lloyd* or a subsequent case. Similarly, we could have evaluated the proposed settlement for consistency with Section 1307(e) and ensuing reconciliations under those terms. See *Pa. PUC v. PPL*, Docket No. R-00049255 (July 25, 2007).

During the reconciliation period, customers are billed at the tariff rate applicable to their specific customer class per unit of transmission used. Reconciliation for transmission should true-up actual costs related to actual usage and actual revenues based on tariff rates, without regard to a prior estimate of expected demand. Trueing-up actual costs to assigned, estimated, or projected demand, rather than to actual demand, is contrary to Section 1307(e) and does not reconcile actual revenue to actual cost based on actual demand and tariff rates. Instead, it changes the Section 1307(e) tariff rate to match estimated usage, thus introducing circularity and inefficiency into what should be a transparent tariff rate and simple mathematical reconciliation process.

TSC charges are permitted under the Competition Act, and the procedures to reconcile the revenues collected and the costs incurred are not base rate case matters. The inquiry in reconciliation of pass-through costs such as TSC is: “Did class TSC payments at tariff rates cover the cost of providing transmission to that class for the reconciliation period? If not, was there an over or undercollection applicable to a specific class?” TSC is billed at tariff rates on a volumetric basis within each class, and it should be reconciled within each class and not among or across classes. The issue is not whether a class used (or caused transmission costs equal to) the estimated transmission that the EDC expected that class to use. Rather, the query is whether the EDC collected more or less from each class than its actual TSC costs for that class during the period in question. Reconciliation should not depend on whether transmission usage is in the same class-to-class ratio as the EDC may have anticipated when the EDC set class-specific transmission rates. We recognize that forecasting tools are required to set going-forward rates. However, the role of forecasting tools in reconciliation should be negligible at best.

Accordingly, we find that the TSC reconciliation process should be just a comparison between actual revenues resulting from tariffed rates and actual costs incurred. This approach is consistent with both the language of Section 1307(e) and the fundamental requirement that rates be just and reasonable. The Section 1307(e) reconciliation process is not intended to smooth utility budgeting efforts or to make actual revenue streams match forecasts.

PECO reconciles to actual monthly TSC costs in order to tie TSC surcharges to actual PJM transmission service charges. ICG supports use of monthly transmission for reconciliation and maintains that an EDC's transmission charges should align with concurrent PJM transmission charges. OCA asserts that reconciliations must recognize shopping in order to reasonably reflect the dynamics of cost-causation and retail customer migration that occur during a rate year.

We find that the PECO,⁶ ICG, OCA considerations are consistent with Sections 1301 and 1307(e).

FirstEnergy asserts that actual costs should be allocated by customer class based on actual default service load to reduce the risk of cross-subsidization and stranded costs. FirstEnergy also asserts that historical demand "creates" the next year's actual demand.

We find that allocating actual costs by customer class based on actual default service load is consistent with Section 1307(e). However, other than for budgeting or forecasting purposes, we do not subscribe to the assertion that historical demand "creates" actual future demand. We find that historical demand is but one of the elements used to predict future demand and to set TSC rates going forward. Thereafter, those tariffed TSC rates are to be applied to the actual demand experienced in that next year, thereby creating the actual revenue against which the actual costs (i.e., PJM billings for transmission services for DSP classes) are to be reconciled pursuant to Section 1307(3).

There is no basis in *Lloyd*, or in Section 1307(e), to support the argument that reconciliation of TSC requires imputing DSP class-specific demand usage percentage estimates from the prior year into the reconciliation period. While historical demand is useful to predict what future demand might be, it does not "create" actual demand.

OSBA asserts that PJM uses prior year transmission data to bill current transmission costs and that this mandates reconciliation of current costs to prior year market configurations despite the potential for a mismatch between cost causers and costs.

We disagree. We find that OSBA is misconstruing the way that PJM bills for TSC. PJM generally bills EDCs for transmission service based on actual usage on a near real time basis; PJM does not bill based on how an EDC expected its customers to use transmission.⁷

Duquesne would prefer to continue to use historical demand for reconciliations since its historical demand has generally matched its projected demand and actual demand.

We do not agree that Duquesne's past experience justifies the use of historical demand for reconciliation on a going-forward basis. While we can appreciate that Duquesne has not experienced any issues, challenges, or questions related to its practice of reconciling revenues to historical projections of usage, we are not persuaded that this method is appropriate, reasonable, consistent with the purpose of a Section 1307(e) reconciliation, or justifiable going forward based on the experiences of other EDCs that have used similar historical methods.

If the ratios of class-usage to total-usage remain constant, regardless of changes in total usage, reconciling to a historical projection of transmission might not appear to

present any issues, despite the inconsistency with Section 1307(e). For example, if an EDC projected a class would use 50% of total TSC usage and the EDC then assigns that class 50% of its actual TSC costs in the reconciliation process, there may be no significantly apparent mismatch as a result of the reconciliation if the class actually used between 48% and 52% of total TSC.

The mismatch between costs and cost causers becomes apparent, however, if the ratios of class-usage to total-usage do not remain constant. Requiring a class that created only 25% of TSC to pay, through a reconciliation recoupment, for 50% of TSC because the EDC projected that the class would use 50% results in that class subsidizing the other classes. Conversely, if a class that actually created 75% gets a refund such that its members are only paying for 50% of total TSC because the EDC projected that the class would use only 50% of TSC, then that class is being impermissibly subsidized by the other class.

PPL believes that it is appropriate to reconcile to historical allocators rather than reconcile based on actual demand and that monthly adjustment of assigned peak load responsibility would minimize over- and under-collections, avoid cost shifting, and ensure that each class bears its fair shares of TSC costs even if the reconciliation itself is based on historical allocators.

We disagree. We conclude that reconciling actual revenues to "assigned" load or estimated percentages of load, rather than to actual costs based on actual usage, is contrary to Section 1307(e) and to Section 1301. Section 1307(e) requires that revenues be compared to costs, and that the difference be refunded to customers if revenues exceeded costs or recovered from customers if the costs exceeded revenues. EDCs must realize that the 1307(e) reconciliation process is not a budgeting tool used to true-up revenue to cash flow projections. The 1307(e) reconciliation process is a statutory method by which adjustable rates remain just and reasonable. This is the case no matter how frequently adjusted the forecasts may be. The reconciliation must compare actual revenues collected pursuant to tariff rates to actual costs based on actual usage. Accordingly, going forward, actual class revenues shall be reconciled to the actual class costs and not to estimated class usage, consistent with Section 1307(e).

OSBA further asserts that there is no support for requiring uniformity as to methods of reconciliation and that the only way to achieve uniformity in reconciliation is through a rulemaking.

We disagree. There is no need for the rulemaking that OSBA suggests. First, Section 1307(e)(4) provides the Commission with wide discretion regarding its supervision and administration of Section 1307(e) reconciliation periods and methods such that the Commission may amend a Section 1307(e) reconciliation "at any time." Subsection 1307(e)(4) provides that:

(4) For the purpose of this subsection, where a 12-month report period and 12-month refund or recovery period shall have been previously established or designated, nothing in this section shall impair the continued use of such previously established or designated periods nor shall anything in this section prevent the commission from amending at any time any method used by any utility in automatically adjusting its rates, so as to provide the commission more adequate supervision of the administration by a utility of such method and to decrease the likelihood of collection by a utility, in subse-

⁶ We are not persuaded, however, that limiting reconciliation to once a year, as PECO suggests, is necessary to implement use of actual demand allocators for reconciliations.

⁷ A possible exception being, for example, take-or-pay pricing.

quent periods, of amounts greater or less than that to which it is entitled, or, in the event that such deficiency or surplus in collected amounts is found, more prompt readjustment thereof.

66 Pa.C.S. § 1307(e)(4). We specify herein that, going forward, TSC revenues be reconciled to the actual cost of actual demand consistent with Section 1307(e). This is the uniform result required by Section 1307(e). Pursuant to our discretion under Section 1307(e)(4), we recognize, however, that the EDCs may propose alternate ways of accomplishing this true-up. To the extent that we are clarifying our discretion under 1307(e)(4) in this circumstance, a rulemaking is not required.

Second, questions specifically related to whether an EDC's methodology is consistent with Section 1307(e) will be addressed in conjunction with that EDC's reconciliation submission, including but not limited to the accuracy of the method employed.

Third, some of the disparity in reconciliation processes stems from the fact that some EDC tariffs and some settlement documents related to TSC merely provide that "transmission costs will be reconciled." They provide no specificity as to the formulae or methodology for reconciliation. Accordingly, we will require that any future settlements and any future tariffs for TSC must provide specificity as to how reconciliations will be calculated.

Volumetric Pricing

In the May 19, 2011 order, the Commission also asked the parties to address "volumetric pricing" of transmission costs. Duquesne asserts that volumetric pricing of demand would remove the incentive for large customers to shift load to non-peak times. PECO does not favor allocating demand on a volumetric basis. PPL argues that volumetric allocation of demand is unfair to large customers who shift load out of peak periods through demand response.

We did not anticipate any dispute or significant differences to surface regarding pricing or the way the EDCs estimate and set reconcilable TSC rates. We find OCA Witness Watkins presented a credible and supportable summary description of the complexity of the calculation of reconcilable TSC rates based on his underlying analysis. EDCs estimate their costs of transmission based on estimates of what the costs of transmission service rendered by PJM will be for the next year for each class of default service customers. EDCs then establish a reconcilable tariff rate for each customer class for transmission service based on those cost estimates. PJM does not mandate how the EDCs charge their various customers for transmission service, only that it be paid by the EDCs for the transmission services billed by PJM to the EDCs.

Upon consideration of this issue, we find no suggestion that the method of setting tariffed transmission rates is defective. Further, we find no support or articulation of need for volumetric pricing for large C&I customers and do not see a need to pursue this option further at this time in this proceeding. We anticipate that the requirement to reconcile actual revenue to actual costs could alleviate some of the concerns that prompted us to request comments relative to volumetric pricing for transmission provided to large C&I DSP customers. Absent more input on this topic, we do not have a record before us upon which either to predicate a mandatory change or to prohibit a voluntary change to volumetric allocation of transmission costs. If an interested party wishes to revisit this matter, it may petition the Commission to open such an inquiry. Therefore, we shall not require the EDCs to

change the way they set their tariff rates for transmission or to change their transmission pricing methods at this time.

Frequency of Reconciliation

Section 1307(e) establishes a mandatory annual reconciliation and a 12-month ceiling on reconciliation periods (i.e., maximum), but utilities cannot unilaterally change a reconciliation period set by Commission order. Thus, presently an EDC may reconcile transmission costs and revenues on a yearly or more frequent basis, as approved by the Commission. The May 19, 2011 order asked the parties to address the frequency of reconciliations.

PECO believes that annual reconciliations are sufficient. The FirstEnergy EDCs reconcile on a yearly basis with a provision for interim revisions of the rates if the original rates would result in material over- or under-collections. PPL prefers annual reconciliations, especially if an EDC is allowed to use monthly allocation data. Duquesne asserts that annual reconciliations are sufficient in light of the steady and consistent decrease of its default service load. ICG favors monthly reconciliation for transmission on the premise that yearly reconciliations do not send appropriate signals to customers.

OSBA asserts that there is no need to require all EDCs to use the same time frame for reconciliations and that if uniformity is desired, a rulemaking should be commenced. Individual changes should be based on evidentiary records. OSBA does suggest quarterly reconciliations might mitigate intergenerational mismatches and might better align an EDC's PTC with competitive offers even if the more frequent reconciliation could cause more volatility in rates.

Upon consideration of the comments, the issue with frequency of reconciliation is that some customers who paid the revenues and caused the costs being reconciled will have moved out of the EDC's DSP customer classes and others may have moved into the classes prior to the reconciliation. The longer the interval between reconciliations, the more likely the customer configuration within a class will change. We do not, however, see an across-the-board problem with yearly reconciliations. At least some of the EDCs appear to have sufficient mechanisms in place to address anomalies as they arise between annual reconciliations. Further, we find no support for mandated uniform timing or procedures for quarterly or monthly reconciliations for transmission costs and, thus, do not see a need to pursue such a mandate further at this time.

We anticipate that the process of reconciling actual revenue to actual costs could alleviate some of the concerns that prompted us to ask for comments on the frequency of transmission reconciliations in this proceeding. While we chose not to specify a frequency of reconciliation, we instruct the industry that the longer the reconciliation interval, the more likely that there may be mismatches between costs and cost causers because of a reconciliation. We shall review the potential for such mismatches in the context of reconciliation proceedings.⁸ If the EDCs are unable to minimize the mismatches resulting from fluctuations in class sizes, we will revisit this frequency issue.

While we have directed the EDCs to track transmission costs and revenues monthly, we recognize that some EDCs may choose to adjust their TSC rates only on a yearly basis. The more frequently an EDC recomputes its

⁸ See Section 1307(e) Reconciliation Statement Pilot Program, Docket No. M-2013-2345492 (May 9, 2013), 43 Pa.B. 2971, which streamlines the reconciliation process.

TSC rates, the more likely any fluctuation in TSC costs will be aligned with TSC revenues and the more likely customers in the DSP classes will be those customers who incurred the demand and contributed the revenue. An EDC that chooses to adjust TSC rates on an annual basis may see more of a leveling out of reconciliation differences over time, but it runs a greater likelihood of change in the constituency of its DSP customer classes over the extended time period.

Accordingly, we shall not require the EDCs to change the frequency or timing of TSC reconciliations at this time.

Migration Riders

In the May 19, 2011 order, the Commission asked the parties to address the use of migration riders. PPL advocates in favor of a migration rider that would follow customers who leave the DSP for an EGS. PPL was the only company to advocate for a migration rider. A migration rider, in general, causes some concern about the effect on competition. The Commission strives to ensure that the PTC properly reflects current market conditions. A migration rider has the potential to artificially inflate or depress price signals. Accordingly, evidence of the need for a migration rider should be clear. We anticipate that, by moving to a reconciliation of actual costs with actual revenues, the need or desire for a migration rider will diminish. Therefore, we decline the use of a migration rider at this time. If experience demonstrates that the reconciliation of actual experience does not address the migration issue, we can revisit this issue.

PTC Issues

Several parties raised PTC issues. PTC issues are beyond the scope of this proceeding, and Commission action at this docket on such issues is not necessary to resolve the reconciliation issue.

Conclusion

Our reviews of a reconciliation must look to the logic underlying the reconciliation to ensure that tariff rates have been applied justly, legally, and reasonably, consistent with Sections 1301 and 1307(e). We conclude that Section 1307(e) requires EDCs to reconcile actual TSC revenues with actual transmission costs incurred, and not with historical estimates of transmission, for the reconciliation period.⁹

Going forward, for reconciliation purposes, and to the extent that they are not already doing so, EDCs must reconcile actual revenues based on tariff rates to the actual demand and actual costs incurred for the period being reconciled. EDCs must use actual transmission costs per customer class for reconciliation and must present the Section 1307(e) data on a monthly basis, regardless of the period chosen for reconciliation. EDCs may use either annual or quarterly rates changes.

This order neither mandates nor prohibits volumetric allocation of transmission costs during the period to be reconciled. We will consider any requests to use a volumetric throughput method for pricing or reconciliation on a case-by-case basis.

We do not have a record before us upon which to address generically the use of migration riders in conjunction with reconciliations.

⁹ We recently permitted an EDC to leave in place a TSC reconciliation based on historical estimates of transmission usage. That proceeding speaks for itself, and the use of historical allocators therein is limited to the particulars of that proceeding. Issues identified in that reconciliation (including initial and correcting recoupments and refunds) prompted this generic inquiry. See PPL 2010 TSC Reconciliation (M-2010-2213754).

Further, we shall require settlements and tariffs to address with specificity the process of reconciliation. It will no longer suffice to merely provide that "revenues will be reconciled."

The contact persons for this proceeding are Louise Fink Smith, finksmith@pa.gov, and Shaun Sparks, shsparks@pa.gov, in the Commission's Law Bureau, Lori Burger, lburger@pa.gov, in the Commission's Bureau of Audits, and Anthony Rametta, arametta@pa.gov, in the Commission's Bureau of Technical Services; *Therefore*,

It Is Ordered That:

1. For reconciliation periods beginning on and after July 1, 2013, electric distribution companies (EDCs) shall reconcile class-specific actual transmission service charge (TSC) revenues to actual transmission usage and transmission costs incurred for that period, consistent with this Order and 66 Pa.C.S. §§ 1301 and 1307(e).

2. Any settlements or tariffs which provide for reconciliations must provide specificity as to how reconciliations will be calculated.

3. Notice of this order be published in the *Pennsylvania Bulletin* and posted on the Commission's website and that the order be served on all electric distribution companies in the Commonwealth, the Bureau of Investigation and Enforcement, the Office of Consumer Advocate, the Office of Small Business Advocate, and the Energy Association of Pennsylvania, as well as all parties participating in this proceeding.

Gardner; James H. Cawley; Pamela A. Witmer

In re: Tatkatel, Inc.; A-2010-2179791; A-3112253

Tentative Order

By the Commission:

Tatkatel, Inc. (Tatkatel or the Company), whose utility code is 3112253, is a telecommunications interexchange reseller certificated at A-3112253, on June 4, 2010.

Tatkatel appears to be an inactive business entity. While Tatkatel is not currently delinquent in any way, the Company's attorney advised Commission staff on July 25, 2013, that the Company has never been active and he believes the Company failed to launch after being certificated. Further research by Commission staff revealed an entry on the FCC Form 499 website that Tatkatel is "no longer active" as of April 5, 2010. Commission staff's attempts to reach the Company have similarly been unsuccessful.

Based on the above facts, we tentatively conclude that it is appropriate to revoke Tatkatel's certificate of public convenience without the necessity of a formal complaint as being in the public interest. Where a company does not, or as in this case never did, provide utility service, there is no reason to maintain a certificate of public convenience for that company; *Therefore,*

It Is Ordered That:

1. Revocation of Tatkatel, Inc.'s certificate of public convenience is hereby tentatively approved as being in the public interest.

2. The Secretary serve a copy of this Tentative Order upon the Office of Consumer Advocate, the Office of Small Business Advocate, and the Bureau of Investigation & Enforcement, and also cause a copy of this Tentative Order to be published in the *Pennsylvania Bulletin* with a 30-day comment period.

3. Absent the filing of adverse public comment within 30 days after publication in the *Pennsylvania Bulletin*, this Tentative Order shall become final without further action by the Commission.

4. Upon this order becoming final, and without further action by the Commission, the certificate of public convenience held by Tatkatel, Inc. A-3112253 shall be canceled, and Tatkatel, Inc.'s name stricken from all active utility

lists maintained by the Commission's Bureau of Technical Utility Services and the Assessment Section of the Bureau of Administration.
