READER'S GUIDE TO THE PENNSYLVANIA BULLETIN AND THE PENNSYLVANIA CODE

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give the history of regulations. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised. A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of *Code* and *Bulletin*.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

Title 4—ADMINISTRATION

PART I. GOVERNOR'S OFFICE

[4 PA. CODE CH. 1]

[EXECUTIVE ORDER NO. 2015-11]

Diversity, Inclusion and Small Business Opportunities in Commonwealth Procurement and in Pennsylvania's Economy

September 23, 2015

Whereas, This Administration recognizes that diversity, inclusion and small business opportunities are essential to ensuring Jobs That Pay and to restoring a thriving economy for all Pennsylvanians; and

Whereas, The unemployment rate among Pennsylvania's minority populations is approximately twice the unemployment rate among non-minorities, and the unemployment rate among Pennsylvania's population with disabilities, including service-disabled veterans, is approximately three times the unemployment rate among the non-disabled; and

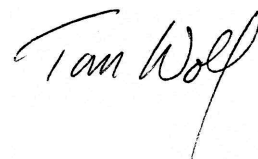

Whereas, Low rates of minority-owned, woman-owned and veteran-owned small business participation in Commonwealth procurement contracts and in Pennsylvania's larger economy contribute to disparities in our unemployment rates; and

Whereas, By previous Executive Order, the executive agencies under the Governor's jurisdiction are prohibited from discriminating in employment because of, among other factors, sexual orientation or gender identity; and

Whereas, By previous Executive Orders and pursuant to law, the executive agencies under the Governor's jurisdiction have all been directed to encourage greater participation from small diverse businesses, such as minority-owned, woman-owned, veteran-owned, and service-disabled-veteran-owned small businesses, as well as organizations that provide meaningful employment and business opportunities for persons with disabilities; and

Whereas, This Administration recognizes the need for goal setting, results measurement and greater coordination among all agencies to ensure and increase diversity, inclusion and small business opportunities in Commonwealth procurement contracts and in Pennsylvania's larger economy.

Now, Therefore, I, Thomas Wolf, Governor of the Commonwealth of Pennsylvania, by the virtue of the authority vested in me by the Constitution and laws of the Commonwealth of Pennsylvania do hereby direct the following.

Governor

Fiscal Note: 2015-11. No fiscal impact; (8) recommends adoption.

RULES AND REGULATIONS

Title 58—RECREATION

FISH AND BOAT COMMISSION

[58 PA. CODE CH. 61]

Boating

The Fish and Boat Commission (Commission) amends Chapter 61 (relating to seasons, sizes and creel limits). The Commission is publishing this final-form rulemaking under the authority of 30 Pa.C.S. (relating to Fish and Boat Code) (code).

A. Effective Date

This final-form rulemaking will go into effect on January 1, 2016.

B. Contact Person

For further information on the final-form rulemaking, contact Laurie E. Shepler, Esq., P. O. Box 67000, Harrisburg, PA 17106-7000, (717) 705-7810. This final-form rulemaking is available on the Commission's web site at www.fish.state.pa.us.

C. Statutory Authority

The amendment to § 61.2 (relating to Delaware River, West Branch Delaware River and River Estuary) is published under the statutory authority of section 2102 of the code (relating to rules and regulations).

D. Purpose and Background

The final-form rulemaking is designed to improve, enhance and update the Commission's fishing regulations. The specific purpose of the amendment is described in more detail under the summary of change.

E. Summary of Change

The management plan for Striped Bass of the Atlantic States Marine Fisheries Commission (ASMFC) calls for management actions when the coastwide spawning stock biomass (SSB) or fishing mortality rates reach thresholds set within the management plan. The SSB threshold is 127 million pounds. The current SSB is just above this at 128 million pounds. At the current fishing mortality rates, there is concern that the SSB will fall below the threshold in the near future. In addition to these concerns, recruitment of young fish has been relatively low in many of the years since 2004. In response to these concerns, the ASMFC Striped Bass Management Board, which includes the Commonwealth as a member, has directed coastal states to reduce fishing mortality rates by 25% beginning in 2015.

ASMFC has directed that the reduction in harvest be implemented prior to the 2015 fishing season. In this Commonwealth, the Striped Bass fishery in the Delaware River and Estuary typically begins in early March. To meet this deadline, the Executive Director, acting under the authority of § 65.25 (relating to temporary changes to fishing regulations), took immediate action to amend § 61.2. Specifically, the Executive Director amended this section to decrease the creel limit for Striped Bass in the River Estuary (from the Pennsylvania line upstream to the Calhoun Street Bridge) during the periods January 1 through March 31 and June 1 through December 31 to one fish and to change the slot limit during the period April 1 through May 31 to 21 to 25 inches. The Executive Director also amended the section to decrease the creel

limit for Striped Bass in the Delaware River (from the Calhoun Street Bridge upstream) to one fish. The temporary changes went into effect on March 1, 2015, and will remain in effect until the Commission, by appropriate action, amends § 61.2.

The Commission amends § 61.2 to read as set forth at 45 Pa.B. 3854 (July 18, 2015).

F. Paperwork

The final-form rulemaking will not increase paperwork and will not create new paperwork requirements.

G. Fiscal Impact

The final-form rulemaking will not have adverse fiscal impact on the Commonwealth or its political subdivisions. The final-form rulemaking will not impose new costs on the private sector or the general public.

H. Public Involvement

Notice of proposed rulemaking was published at 45 Pa.B. 3854. The Commission received one public comment regarding the proposed rulemaking. Copies of the public comment were provided to the Commissioners.

Findings

The Commission finds that:

(1) Public notice of intention to adopt the amendments adopted by this order has been given under sections 201 and 202 of the act of July 31, 1968 (P. L. 769, No. 240) (45 P. S. §§ 1201 and 1202) and the regulations promulgated thereunder, 1 Pa. Code §§ 7.1 and 7.2.

(2) A public comment period was provided, and the public comment received was considered.

(3) The adoption of the amendments of the Commission in the manner provided in this order is necessary and appropriate for administration and enforcement of the authorizing statutes.

Order

The Commission, acting under the authorizing statutes, orders that:

(a) The regulations of the Commission, 58 Pa. Code Chapter 61, are amended by amending § 61.2 to read as set forth at 45 Pa.B. 3854.

(b) The Executive Director will submit this order and 45 Pa.B. 3854 to the Office of Attorney General for approval as to legality and form as required by law.

(c) The Executive Director shall certify this order and 45 Pa.B. 3854 and deposit them with the Legislative Reference Bureau as required by law.

(d) This order shall take effect on January 1, 2016.

JOHN A. ARWAY,
Executive Director

Fiscal Note: Fiscal Note 48A-266 remains valid for the final adoption of the subject regulation.

FISH AND BOAT COMMISSION
[58 PA. CODE CHS. 97, 109, 111 AND 115]
Boating

The Fish and Boat Commission (Commission) amends Chapters 97, 109, 111 and 115. The Commission is publishing this final-form rulemaking under the authority of 30 Pa.C.S. (relating to Fish and Boat Code) (code).

A. Effective Date

This final-form rulemaking will go into effect on January 1, 2016.

B. Contact Person

For further information on the final-form rulemaking, contact Laurie E. Shepler, Esq., P. O. Box 67000, Harrisburg, PA 17106-7000, (717) 705-7810. This final-form rulemaking is available on the Commission's web site at www.fish.state.pa.us.

C. Statutory Authority

The amendments to §§ 97.1, 109.3, 109.4 and 115.11 are published under the statutory authority of section 5123 of the code (relating to general boating regulations). The proposed amendments to Chapter 111 (relating to special regulations counties) are published under the statutory authority of section 5124 of the code (relating to particular areas of water).

D. Purpose and Background

The final-form rulemaking is designed to simplify and improve the Commission's boating regulations. The specific purpose of the amendments is described in more detail under the summary of proposals. On February 12, 2015, the Boating Advisory Board considered the proposed amendments and recommended that the Commission approve the publication of a proposed rulemaking containing the amendments.

E. Summary of Changes

(1) The United States Coast Guard (USCG) issued a final rule at 79 FR 56491 (September 22, 2014) to delete references to type codes in its regulations on the carriage and labeling of USCG-approved personal flotation devices (PFD). Removing these type codes from USCG regulations facilitates future incorporation by reference of new industry consensus standards for PFD labeling that more effectively convey safety information. It is also a step toward harmonization of the regulations of the United States with PFD requirements in Canada and other countries. The final rule went into effect on October 22, 2014.

The USCG final rule deleted references to type codes in USCG regulations on the carriage and labeling of USCG-approved PFDs. This final rule deleted type code language from USCG carriage requirements and from USCG regulations for labeling of new PFDs, but it did not make changes to the number of wearable or throwable PFDs required. It also did not require changes to existing approved PFDs already purchased and in use. In the final rule, the USCG acknowledged that PFDs are typically carried on boats for several years and reaffirms that approved PFDs marked with type codes will still meet carriage requirements as wearable or throwable PFDs, as appropriate, as long as they remain in serviceable condition. The Commission therefore amends §§ 97.1, 109.3, 109.4 and 115.11 to read as set forth in Annex A.

(2) Formerly, the Commonwealth's boating regulations required that a personal watercraft (PWC) must have a

passenger capacity of three or more to be utilized in waterskiing/towing activities and that the PWC must have a competent observer onboard in addition to its operator. Additionally, no more than one person was allowed to be towed behind a PWC (regardless of whether the towed implement may be capable of holding multiple individuals). At the time that these regulations were adopted, it is likely that the largest PWCs manufactured and on the market had a maximum passenger capacity of three.

Since 1999, major manufacturers have produced larger four-person PWCs that are on average 12 feet long by 4 feet to 5 feet wide, weighing about 800 pounds. The power and stability of these larger PWCs is comparable to open motorboats that are also used for towed watersports. Commission regulations did not limit the number of persons that may legally be towed behind boats other than PWCs, except that the boat's maximum passenger capacity may not be exceeded.

In 2005, the National Association of State Boating Law Administrators (NASBLA) revised and adopted model acts for personal watercraft and maximum loading and horsepower capacity compliance. The model acts are intended to establish requirements for the safe operation of PWCs and prohibit the operation of recreational vessels when they exceed the capacity limits identified on the vessel's capacity label or through calculations presented in the *Code of Federal Regulations*. In 2007, NASBLA revised and adopted a model act for safe practices for boat-towed watersports providing best practices for water skiing, wake surfing and tubing activities, and consistent language for adoption. The model acts do not limit the number of individuals to be towed by a PWC as long as the vessel's passenger capacity is not exceeded by the total number of persons operating, observing and being towed.

As defined in § 91.2 (relating to definitions), individuals being towed behind a boat (for example, conventional waterskiing, tubing, kneeboarding, parasailing, and the like) are considered to be passengers of the vessel and must be counted in regard to the boat's maximum passenger capacity. Under § 105.4 (relating to overloading and improper loading), a boat may not be operated when it is loaded with passengers or cargo beyond its safe carrying capacity.

The Commission therefore eliminates the PWC towing regulation since passenger carrying capacity is addressed in other sections of the Commission's regulations. For all boats, the total number of persons being towed, when added to the occupants onboard the boat (that is, the operator, observer and other passengers), cannot exceed the maximum passenger capacity of the boat. The Commission deletes former § 109.3(f) (relating to personal watercraft) and renumbers the remaining subsection to read as set forth in Annex A.

(3) The Little Beaver Creek originates in Ohio and there are two short sections that cross the border into western Beaver County. The uppermost section of the creek in this Commonwealth is less than 200 feet wide and shallow. The lower section of the creek in this Commonwealth, from the State line to the creek's mouth on the Ohio River, flows through the Borough of Ohioville and varies in width. Some portions of this lower section are more than 200 feet wide and boats are not restricted to operating at slow, no wake speed. This lower section is used mostly for fishing, paddling and accessing the Ohio River by use of the Ohioville Borough access area. Since it is difficult for boaters to determine the width of this

lower section and whether they may operate at greater than slow, no wake speed, the Commission designates the lower section (from the mouth upstream to the State line) as a slow, no wake zone in § 111.4 (relating to Beaver County) to minimize conflicts among the various user groups.

The Commission also adds a provision in § 111.4 that the operation of boats powered by internal combustion motors is prohibited on Bradys Run Lake to conform with county regulations. Bradys Run Lake is a 28-acre lake in the center of the county, owned and operated by the Beaver County Recreation and Tourism Department. The Commission amends § 111.4 to read as set forth in Annex A.

(4) Former § 111.9(b) (relating to Bucks County) was confusing since there was not a landmark or distinguishing characteristic (other than buoys during the boating season) to delineate the upstream boundary of the slow, no wake zone. The remainder of the stream is less than 200 feet wide. Therefore, boats are prohibited from operating at greater than slow, no wake speed. The Commission simplifies the regulation by stating that the entire creek, from its headwaters to its confluence with the Delaware River, is a slow, no wake zone. This amendment is a simplification of language and is not an expansion of the current slow, no wake restrictions. The Commission amends § 111.9 to read as set forth in Annex A.

(5) Formerly, § 111.21 (relating to Cumberland County) allowed waterskiing on the Conodoguinet Creek in the vicinity of the Power Company Dam at Cave Hill. The measured stream width throughout a considerable portion of the current skiing area is approximately 200 feet and sometimes less at seasonal summer flow. Numerous staff who have patrolled this area over the years have expressed safety concerns as this area is not conducive to safe skiing activity. Therefore, the Commission eliminates the water skiing zone. The Commission also deletes the paragraph regarding swim zone areas since the Commission does not typically regulate these areas. Additionally, with the elimination of the water ski zone, boats will be prohibited from operating at greater than slow, no wake speed on the channel behind the island since it is less than 200 feet in width. The Commission deletes paragraph (5) since it is redundant. The Commission amends § 111.21 to read as set forth in Annex A.

(6) Darby Creek is a tributary of the Delaware River in Delaware County, southwest of the City of Philadelphia. Darby Creek is currently posted by buoys and signage as a slow, no wake area under an existing Commission Permit to Install Floating Structures and Private Aids to Navigation. The permit includes slow, no wake buoys being placed at the mouth of Darby Creek with the designation continuing upstream to include a lagoon area in front of the Ridley Township Marina and another lagoon area at the mouth of Long Hook Creek. The Commission is responsible for installation and maintenance of the buoys which are in place from Memorial Day through October of each year. The area upstream of Long Hook Creek is less than 200 feet wide. Therefore, boats are prohibited from operating at greater than slow, no wake speed. Approximately 1.5 miles upstream of Long Hook Creek is the refuge waters of the John Heinz National Wildlife Refuge at Tinicum. The refuge waters are tidal and navigable only within 2 hours before and after high tide.

The section of Darby Creek between the mouth and the lagoons is barely wider than 200 feet and can be con-

gested with boat traffic from the Ridley Township Marina. Additionally, there are four sets of bridge piers in the water in this section (that is, railroad, drawbridge, Route 291 and I-95). The Commission therefore amends § 111.23(b) (relating to Delaware County) to be consistent with the area delineated in the Permit to Install Floating Structures and Private Aids to Navigation and the entire length of Darby Creek is designated as slow, no wake. This clarification does not significantly extend the current slow, no wake restrictions. The Commission amends § 111.23 to read as set forth in Annex A.

(7) Section 111.39 formerly prohibited water skiing on the Lehigh River at the Allentown Pool. This pool is between the Tilghman Street Bridge and the Hamilton Street Dam in Allentown. The City of Allentown owns and operates Bucky Boyle Park on the west shore of the river in this area. At one time the park had a swim beach, and safety concerns for the swimmers led to the restriction of water skiing in this area. The swim beach has since been eliminated from the park.

The Commission eliminates the water skiing prohibition in this area since it unnecessarily restricts boating activity. The Commission deletes § 111.39 to read as set forth in Annex A.

(8) Under section 741 of the code (relating to control of property), the Commission may promulgate rules and regulations for the use and protection of all lands or waters owned, leased or otherwise controlled by the Commission. Accordingly, the Commission adopted § 53.8 (relating to boats) to, among other things, prohibit the use of internal combustion engines to propel a boat on Commission lakes. In § 107.2 (relating to electric motors), electric motors are permitted on Commission owned or controlled lakes and on State Park lakes where boating is permitted and the operation of internal combustion engines is specifically prohibited, except as otherwise specified in Chapter 111.

The Commission's interpretation of § 107.2 is that exceptions to the prohibition shall be listed in Chapter 111, but it is redundant to list specific waters where internal combustion engines (sometimes simply referred to as "motors") are prohibited on Commission owned or controlled lakes and on State Park lakes in Chapter 111. Therefore, in an effort to simplify its boating regulations, the Commission deletes redundant provisions from Chapter 111. Commission owned or controlled lakes where internal combustion engines are prohibited are posted onsite and listed on the Commission's web site.

Additionally, some State Park lakes where internal combustion engines are permitted and horsepower restrictions exist or where boating is prohibited are currently not included in Chapter 111. The Commission adds these lakes as part of the other amendments to this chapter. The Commission amends various sections in Chapter 111 to read as set forth in Annex A.

F. Paperwork

The amendments will not increase paperwork and will not create new paperwork requirements.

G. Fiscal Impact

The amendments will not have adverse fiscal impact on the Commonwealth or its political subdivisions. The amendments will not impose new costs on the private sector or the general public.

H. Public Involvement

Notice of proposed rulemaking was published at 45 Pa.B. 3844 (July 18, 2015). Regarding the proposed

amendment to § 111.9, the Commission received one public comment prior to and one public comment after the official comment period. Neither comment was responsive to the proposed rulemaking. The Commission received a total of 23 public comments concerning § 111.21—18 before, 4 during and 1 after the formal comment period. All of the comments generally opposed the proposed rulemaking. Copies of the public comments were provided to the Commissioners.

TITLE 58. RECREATION

PART II. FISH AND BOAT COMMISSION

Subpart C. BOATING

CHAPTER 97. OPERATOR PROVIDED EQUIPMENT

§ 97.1. Personal flotation devices.

(a) The following words and terms, when used in this section, have the following meanings, unless the context clearly indicates otherwise:

Immediately available—A PFD that is within arm’s reach of the operator or passenger while the boat is being

operated. A PFD that is stored in a protective covering or sealed in its original packaging is not immediately available.

PFD—Personal flotation device—A life preserver that is approved by the Commandant of the United States Coast Guard under 46 CFR Part 160 (relating to lifesaving equipment).

Readily accessible—A PFD that is stowed where it can be easily reached or is out in the open ready for wear. A PFD that is stored in a protective covering or sealed in its original packaging is not readily accessible.

Serviceable—When a PFD is fully functional to carry out the purpose for which it was designed and free of tears or defects in the material over the flotation material and the buckles, straps, zippers and other closures are operable.

Throwable PFD—A PFD that is intended to be thrown to a person in the water. A PFD marked as throwable, Type IV, or Type V with Type IV performance is considered a throwable PFD. Unless specifically marked otherwise, a wearable PFD is not a throwable PFD.

Wearable PFD—A PFD that is intended to be worn or otherwise attached to a person’s body. A PFD marked as wearable, Type I, Type II, Type III, or Type V with Type (I, II or III) performance is considered a wearable PFD.

(b) A person may not use a boat unless at least one wearable PFD is on board for each person and the PFD is used in accordance with requirements of the approval label.

(c) A person may not use a boat 16 feet or more in length unless one throwable PFD is on board in addition to the total number of PFDs required in subsection (b). Canoes and kayaks 16 feet in length and over are exempted from the requirements for carriage of the additional throwable PFD.

(d) Required PFDs shall be in good, serviceable condition, legibly marked showing the Coast Guard approval number and displaying the PFD’s intended or approved use. They shall be of an appropriate size, child or adult, for the person for whom it is intended.

(e) When not worn, wearable PFDs shall be stowed so as to be readily accessible. Throwable PFDs shall be immediately available.

(f) This section does not apply to racing shells, rowing sculls and racing kayaks, such as manually propelled boats recognized by National racing associations for use in competitive racing, when the occupants row, scull or paddle with the exception of the coxswain, if one is provided, and which are not designed to carry and do not carry equipment not solely for competitive racing.

(g) Coast Guard approved PFDs shall be acceptable as long as they are in good, serviceable condition with the approval clearly legible.

(h) Children 12 years of age and younger shall wear an approved wearable PFD while underway on any boat 20 feet or less in length and all canoes and kayaks. The operator of the watercraft violates this subsection if he does not cause a child 12 years of age or younger to wear a PFD as required by this subsection.

(i) Beginning November 1 until midnight April 30 of the following year, a person shall wear a Coast Guard approved wearable PFD while underway or at anchor on boats less than 16 feet in length or any canoe or kayak.

CHAPTER 109. SPECIALTY BOATS AND WATERSKIING ACTIVITIES

§ 109.3. Personal watercraft.

(a) As used in this section, "personal watercraft" means a boat less than 16 feet in length which meets the following conditions:

(1) Uses an internal combustion motor powering a water jet pump as its primary source of motive propulsion.

(2) Is designed to be operated by a person sitting, standing or kneeling on, rather than being operated by a person sitting or standing inside the vessel.

(b) It is unlawful for a person to operate, or be a passenger onboard, a personal watercraft on the waters of this Commonwealth unless the person is wearing a United States Coast Guard approved wearable personal flotation device in accordance with § 97.1 (relating to personal flotation devices). Inflatable personal flotation devices may not be used to meet this requirement.

(c) A person operating a personal watercraft equipped by the manufacturer with a lanyard type engine cutoff switch shall attach the lanyard to his person, clothing or personal flotation device as appropriate for the specific vessel.

(d) A person may not operate a personal watercraft between sunset and sunrise.

(e) Subsections (b) and (c) do not apply to a performer participating in a permitted regatta, race, marine parade, tournament or exhibition or to a person preparing to participate in the event at the location and within 48 hours prior to the event.

(f) Except as otherwise provided in this subpart, a person may not operate a personal watercraft on the waters of this Commonwealth unless the person has obtained a Boating Safety Education Certificate as defined in § 91.6 (relating to Boating Safety Education Certificates).

§ 109.4. Waterskiing, aquaplaning, kiteskiing and similar activities.

* * * * *

(f) PFDs. It is unlawful for a person to operate a boat on the waters of this Commonwealth for:

(1) Waterskiing unless each person being towed is wearing a United States Coast Guard approved wearable PFD in accordance with § 97.1 (relating to personal flotation devices). Inflatable PFDs may not be used to meet this requirement.

(2) Wake surfing unless the wake surfer is wearing a United States Coast Guard approved wearable PFD in accordance with § 97.1 or water ski wetsuit as defined in subsection (g). Inflatable PFDs may not be used to meet this requirement.

(g) Water ski wetsuits. A person engaged in slalom skiing on a marked course or a person engaged in barefoot, jump or trick skiing, or wake surfing may elect to wear a wetsuit designed specifically for the activity in lieu of the United States Coast Guard approved wearable PFD required in § 97.1. A United States Coast Guard approved wearable PDF described in § 97.1 shall be carried in the tow boat for each skier electing to wear a water ski wetsuit. The nonapproved water ski wetsuit device shall meet the following criteria:

§ 115.11. Personal flotation devices.

It is unlawful to operate a boat carrying passengers for hire unless it carries sufficient, serviceable United States Coast Guard approved wearable personal flotation devices in accordance with § 97.1 (relating to personal flotation devices) to provide one for the maximum number of passengers and crew members indicated on the certificate. PROPOSED RULEMAKING

FISH AND BOAT COMMISSION

[58 PA. CODE CHS. 53, 105 AND 111]

Boating

The Fish and Boat Commission (Commission) proposes to amend Chapters 53, 105 and 111 (relating to Commission property; operational conditions; and special regulations counties). The Commission is publishing this proposed rulemaking under the authority of 30 Pa.C.S. (relating to Fish and Boat Code) (code).

A. Effective Date

The proposed rulemaking, if approved on final-form rulemaking, will go into effect upon final-form publication in the *Pennsylvania Bulletin*.

B. Contact Person

For further information on the proposed rulemaking, contact Laurie E. Shepler, Esq., P. O. Box 67000, Harrisburg, PA 17106-7000, (717) 705-7810. This proposed rulemaking is available on the Commission's web site at www.fish.state.pa.us.

C. Statutory Authority

The proposed amendment to § 53.8 (relating to boats) is published under the statutory authority of section 741 of the code (relating to control of property). The proposed amendment to § 105.4 (relating to overloading and improper loading) is published under the statutory authority of section 5123 of the code (relating to general boating regulations). The proposed amendment to § 111.40 (relating to Luzerne County) is published under the statutory authority of section 5124 of the code (relating to particular areas of water).

D. Purpose and Background

The proposed rulemaking is designed to simplify and improve the Commission's boating regulations. The specific purpose of the proposed amendments is described in more detail under the summary of proposals. On July 31, 2015, the Boating Advisory Board (BAB) considered these proposals and recommended that the Commission approve the publication of a proposed rulemaking.

E. Summary of Proposals

(1) Earlier this year, the Commission was contacted by numerous boaters and an outfitter regarding § 53.8 that prohibits the use of single-chambered inflatable boats on its lakes. The Department of Conservation and Natural Resources (Department) has a similar regulation that prohibits the use of these boats on State Park lakes. These regulations were promulgated prior to the manufacture and widespread availability of high-quality, durable inflatable canoes, kayaks and stand-up paddleboards.

The use of other inflatable devices is addressed in other sections of Chapter 53 as well. Section 53.16(c) (relating to special use) prohibits launching or retrieving swimming aids such as inner tubes from Commission-owned or Commission-controlled access areas. Float tubes on Commission-owned or Commission-controlled lakes are addressed in § 53.19 (relating to use of float tubes on Commission-controlled lakes). Specifically, they must have

a secondary bladder for additional emergency flotation and the user shall wear a Coast Guard-approved personal flotation device.

Thirty-three states responded to a survey administered by the National Association of State Boating Law Administrators (NASBLA) regarding special regulations relating to the use of inflatable boats. One of the respondents indicated that single-chambered air-inflated devices do not meet that state's definition of "vessel." Another respondent indicated that single-chambered inflatable vessels are prohibited from use statewide. There were no other responses regarding special regulations for recreational use of single-chambered inflatable boats. Additionally, NASBLA does not have a model act regarding inflatable vessels. Therefore, states may deal with specific issues as they see fit.

A review of recreational boating accident statistics in this Commonwealth reveals that there have not been reportable accidents regarding loss of inflation for incidents involving inflatable boats since 1985. With the recent advent of high-quality, durable inflatable boats with less than two separate buoyancy chambers, such as inflatable standup paddleboards, the Commission believes that the current regulation is overly restrictive and may be eliminated. The Commission therefore proposes to amend § 53.8 to read as set forth in Annex A.

(2) The Commission wishes to clarify its regulations regarding overloading and improper loading by adopting language recommended by NASBLA's Model Act for Maximum Loading and Horsepower Capacity Compliance. This model act prohibits the operation of certain recreational vessels when those vessels exceed their loading or powering capacities or exceed the capacity limits identified on the vessel's capacity label or through calculations presented in the *Code of Federal Regulations*. The Commission therefore proposes to amend § 105.4 to read as set forth in Annex A.

(3) Lily Lake is a 160-acre impoundment situated on a 376-acre parcel owned by the Commission in southeastern Luzerne County. The Commission acquired Lily Lake in 1968. When the Commission initially acquired Lily Lake, there was controversy over what uses of the lake should be allowed. Cottage owners insisted on water skiing and high-speed motorboat operation. Staff were opposed to high-powered motorboat activity on the lake primarily because of the size of the lake (approximately 90 acres of boatable water) and concern that allowing water skiing and internal combustion motors would create a safety hazard. The Lily Lake Property Owners' Association (Association) retained legal counsel and sent the Commission a letter on June 29, 1970, detailing its request for a 60 horsepower limitation and other proposals. However, before negotiations with the property owners concluded, the Commission adopted regulations at its May 3, 1971, meeting prohibiting internal combustion engines on Commission lakes. The minutes from that meeting state that "the regulations adopted for all wholly owned Fish Commission lakes [are to] be applied to Lily Lake." The Association again submitted a proposal in 1972 that they believed would allow for compatible, multiple uses of boats for fishing and other activities, including water skiing.

On April 6, 1973, the Commission's Executive Director provided a report on the situation to the Commissioners and referred the matter to the BAB for study. On May 16,

1973, members of the BAB met with the Association to develop a consensus proposal. As a result, they mutually agreed to a high-speed operating zone where all ski operations would occur and that would be buoyed by the Commission. The high-speed operating zone was proposed as being 2,000 feet long and 650 feet wide and approximately 75 feet from the northern shore which was uninhabited.

In addition, the Association proposed a limit of 60 horsepower and maximum of 18 feet in length for all boats on the lake, as initially recommended by their attorney in 1970. The rationale provided at the time was "the 60 HP limitation will make it unattractive to the hard core water skier but would still permit the several cottage owners who own 60 HP boats now to continue to use them." Also expressed was a concern of attracting a large number of boats from outside the area, but it was believed that the horsepower limitation would minimize that.

During discussion of the consensus proposal at a BAB meeting on August 20, 1973, a Commissioner noted that the main reason for the Commission's allowing the use of only electric motors on its lakes was to "prevent noise and pollution." He further stated that since these elements were already present on Lily Lake when the Commission acquired it in 1968, this rationale had to be discounted at this lake.

The consensus proposal was advanced from the BAB to the Commission, and upon approval at its October 20, 1973, meeting, the Commission published a proposed rulemaking at 3 Pa.B. 2882 (December 15, 1973) to prohibit the use of boats with greater than 60 horsepower

engines or greater than 18 feet in length on Lily Lake. Additionally, boats were limited to slow, no wake speed except those operating within the buoyed high speed operating zone, between noon and sunset from the Saturday preceding Memorial Day to September 30. No public comments were received. The regulation went into effect upon final-form publication at 4 Pa.B. 133 (January 26, 1974).

The regulations for Lily Lake have seen minor amendments since 1973. However, there have not been changes to the horsepower or boat length limitations since adoption. The current Permit to Install Floating Structures and Private Aids to Navigation indicates the high-speed zone as 1,500 feet by 600 feet, mid-lake along the opposite shoreline from the boat launch and homes.

The Commission maintains a surfaced launch ramp and parking at Lily Lake that can accommodate 18 vehicle-trailer combinations and more than 25 cars. To date, there are no reportable recreational boating accidents recorded for Lily Lake.

On May 18, 2015, Commission representatives met with members of the Association. The purpose of the meeting was to discuss a request from the property owners association to increase the maximum allowable horsepower to 90 and boat length to 25 feet.

The Commission owns four lakes with horsepower or speed restrictions and the Department owns ten. A comparison of lake acreage to horsepower or mile-per-hour restrictions on these lakes indicates that Lily Lake is currently the second smallest lake and has the highest horsepower allowance.

<i>Name</i>	<i>County</i>	<i>Owner</i>	<i>Acreage</i>	<i>Horsepower or Mile-per-Hour Restriction</i>
Pymatuning Reservoir	Crawford	Department	17,088	20 horsepower
Lake Arthur	Butler	Department	3,225	20 horsepower
Foster Joseph Sayers Lake	Centre	Department	1,730	45 mile-per-hour
Lake Wilhelm	Mercer	Department	1,680	20 horsepower
Glendale Lake	Cambria	Department	1,635	20 horsepower
East Branch Clarion River Lake	Elk	Department	1,554	45 mile-per-hour
Nockamixon Lake	Bucks	Department	1,450	20 horsepower
Lake Marburg	York	Department	1,275	20 horsepower
Beltzville Lake	Carbon	Department	949	45 mile-per-hour
Yellow Creek Lake	Indiana	Department	720	20 horsepower
Harveys Lake	Luzerne	Commission	658	45 mile-per-hour
Lake Canadohta	Crawford	Commission	169	10 horsepower
Lily Lake	Luzerne	Commission	160	60 horsepower
Sugar Lake	Crawford	Commission	90	6 horsepower

The Commission's local law enforcement staff recommend a change to allow boats up to 20 feet in length but that the Commission maintains the horsepower limitation at 60 due to the small size of the impoundment. Boat registration records reveal that an increase in length will potentially allow for an additional 1,672 actively registered motorboats in Luzerne County and the 7 surrounding counties to operate on Lily Lake. It is predicted that the increased length allowance will enhance boating

opportunities for the lake residents and northeast region without having a significant impact on user conflicts or safety on this small impoundment. The Commission therefore proposes to amend § 111.40 to read as set forth in Annex A.

F. Paperwork

The proposed amendments will not increase paperwork and will not create new paperwork requirements.

G. Fiscal Impact

The proposed amendments will not have adverse fiscal impact on the Commonwealth or its political subdivisions. The proposed amendments will not impose new costs on the private sector or the general public.

H. Public Comments

Interested persons are invited to submit written comments, objections or suggestions about the proposed rulemaking to the Executive Director, Fish and Boat Commission, P. O. Box 67000, Harrisburg, PA 17106-7000 within 30 days after publication of this proposed rulemaking in the Pennsylvania Bulletin. Comments submitted by facsimile will not be accepted.

Comments also may be submitted electronically by completing the form at www.fishandboat.com/reg comments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. Electronic comments submitted in any other manner will not be accepted.

D. Purpose and Background

The specific purpose and background of the proposed amendments is described in more detail under the summary of proposal.

E. Summary of Proposal

(1) Hornyhead Chub (Nocomis biguttatus). The Hornyhead Chub is a medium sized minnow with a robust body. Adult length is typically 4 to 6 inches. Breeding males have a distinct bright red spot behind the eye. It is a nest building minnow, constructing large pebble mounds by transporting gravel with its mouth. It inhabits clear, small to medium-sized streams with clean gravel, rubble and sandy substrates. In general, the Hornyhead Chub is highly intolerant of increased siltation and intermittent flows.

The Hornyhead Chub occurs in North America from the Mohawk River system in New York, west to the Red River

system in Manitoba and North Dakota, and south to the Ohio River drainage. It also occurs in the Ozark drainages in Missouri and Arkansas and in an isolated section of West Virginia.

In this Commonwealth, it was historically reported from two locations in Cussewago Creek in Crawford County and a number of locations in the Shenango River drainage in Crawford, Lawrence and Mercer Counties. It was also reported in collections from the Shenango system as well as Conneaut Creek in Crawford and Erie Counties. Recent intensive field work that included surveys of historic sites as well as additional sites presenting suitable habitat in these historic drainages has demonstrated a precipitous decline in Hornyhead Chub populations in this Commonwealth. This species is now apparently confined to approximately 12 miles of Neshannock Creek in Lawrence and Mercer Counties and 2 miles of Conneaut Creek in Crawford County.

The Hornyhead Chub was initially listed as a candidate species in 1999. The current status of this species was reviewed using the Commission's documentation and objective listing/delisting process. Using the "Extent of Occupancy" criterion (B.3) within the Commission's listing process, the Hornyhead Chub's linear occupied stream distance exceeds the cutoff of 10 miles for endangered status by only 4 miles. However, significant threats to its continued existence remain, particularly in the Conneaut Creek. In addition, it was evaluated with NatureServe's Conservation Status Assessments Rank Calculator and received a State Conservation Rank of S1—meaning it is critically imperiled in this Commonwealth with a high to very high risk of extirpation due to its limited range and/or few populations or occurrences. The Fishes Technical Committee of the Pennsylvania Biological Survey (PABS) reviewed this documentation and rank assignment and recommended that the Hornyhead Chub be listed as endangered. Enough information is available to make the determination that it is endangered in this Commonwealth at present and to justify its addition to the Commonwealth's list of endangered fishes. Therefore, the Commission proposes that the Hornyhead Chub be removed from the Pennsylvania list of candidate species under § 75.3 and added to the list of endangered species under § 75.1.

(2) Mountain Brook Lamprey (*Ichthyomyzon greeleyi*). The Mountain Brook Lamprey is a small, nonparasitic lamprey. Adult sizes are small, generally 4 to 6 inches total length. Body color is dark olive on the back and sides, often mottled, transitioning abruptly to a white belly, giving a bicolored appearance. It is easily confused with the parasitic Ohio Lamprey (*Ichthyomyzon bdellium*), which is generally larger with a proportionally larger oral disc and has coloration that fades gradually toward the belly (not strongly bicolored).

The Mountain Brook Lamprey prefers clear, small-medium sized creeks but can be occasionally found in larger waters. In this Commonwealth, it frequently occurs in stocked trout streams and is seldom found in colder streams containing wild Brook Trout (*Salvelinus fontinalis*). Larvae, known as ammocoetes, generally prefer sluggish areas with deposits of mud, muck, silt, sand, detritus and coarse woody debris.

This species occurs in North America from the Ohio River drainage in southwestern New York to northern Alabama and Georgia, where it is highly localized. In this Commonwealth, it occurs throughout the Allegheny River drainage, including the Loyalhanna Creek, French Creek and Clarion River drainages, and the upper Allegheny

River. A small portion of Neshannock Creek in the Beaver River drainage is also occupied.

In 1999, the Mountain Brook Lamprey was listed as a threatened species. Since then, nearly all of this species' historic range in this Commonwealth has been resurveyed and retraction of its range was not noted. In fact, extensions of its known range have been documented, which now includes the Clarion River, Loyalhanna Creek and North Fork Redbank Creek.

The current status of this species was reviewed using the Commission's documentation and objective listing/delisting process. It exceeds Criterion A.1 (Population Reduction) in that there has not been a reduction in historic distribution. Since the Mountain Brook Lamprey occupies more than 150 river miles of waterway, it significantly exceeds Criterion B.3 (Extent of Occupancy). In addition, it was evaluated with NatureServe's Conservation Status Assessments Rank Calculator and received a State Conservation Rank of S4—meaning it is secure in this Commonwealth with a very low risk of extirpation due to its extensive range and/or many populations or occurrences. The Fishes Technical Committee of the PABS reviewed this documentation and rank assignment and recommended that the Mountain Brook Lamprey be delisted. Enough information is available to make the determination that it is secure in this Commonwealth at present and to justify its removal from the Commonwealth's list of threatened fishes. Therefore, the Commission proposes that the Mountain Brook Lamprey be removed from the Pennsylvania list of threatened species under § 75.2.

(3) Ohio Lamprey (*Ichthyomyzon bdellium*). The Ohio Lamprey is a medium sized parasitic lamprey with a single dorsal fin and well developed teeth. Adult size is generally 5 to 10 inches total length. Body color is slate-gray to yellowish-gray, fading to a lighter belly.

The Ohio Lamprey occurs in large streams to large rivers during parasitic phase but enters smaller streams to spawn. Adults are generally found in riffles and runs over gravel, cobble and rubble. Ammocoetes generally prefer sluggish sections of small-medium sized streams with significant deposits of mud, muck, silt, sand, detritus and coarse woody debris. Ammocoetes generally burrow in substrate and filter feed on bacteria, protozoa, and decaying phytoplankton and plant material. Host fishes include Paddlefish, Common Carp, carsuckers, redhorses, black basses, larger catfishes, madtoms, Wall-eye and darters. There is no evidence to support the belief of some that Ohio Lampreys negatively impact game fish populations.

This species occurs in North America from the Ohio River basin from New York to Illinois, and south to northern Georgia. In this Commonwealth, it occurs in the Ohio River, Conewango Creek, Mahoning Creek, Potato Creek, Oswayo Creek and the Allegheny River and the following streams and their tributaries: French Creek, Oil Creek, Sandy Creek and Brokenstraw Creek.

In 1999, the Ohio Lamprey status was changed from threatened to candidate. Current data indicate little if any range reduction has occurred when historic and recent records are compared. It is evident that the Ohio Lamprey remains well-distributed in the Ohio River drainage and may have expanded somewhat, with its known range including Allegheny, Armstrong, Crawford, Erie, Forest, McKean, Potter, Venango and Warren Counties. Of the 150 records reviewed, 52 are post-1999. The Ohio Lamprey likely maintains a continuous distribution throughout the Allegheny River.

The current status of this species was reviewed using the Commission's documentation and objective listing/delisting process. It exceeds Criterion A.1 (Population Reduction) in that there has not been a reduction in historic distribution. Since the Ohio Lamprey occupies more than 150 river miles of waterway, it also significantly exceeds Criterion B.3 (Extent of Occupancy). In addition, it was evaluated with NatureServe's Conservation Status Assessments Rank Calculator and received a State Conservation Rank of S4—meaning it is secure in this Commonwealth with a very low risk of extirpation due to its extensive range and/or many populations or occurrences. The Fishes Technical Committee of PABS reviewed this documentation and rank assignment and recommended that the Ohio Lamprey be delisted. Enough information is available to make the determination that it is secure in this Commonwealth at present and to justify its removal from the Commonwealth's list of candidate fishes. Therefore, the Commission proposes that the Ohio Lamprey be removed from the Pennsylvania list of candidate species under § 75.3.

(4) Bowfin (*Amia calva*). The Bowfin is a large, stout-bodied fish, with an extended ribbon-like dorsal fin and rounded, caudal fin. The Bowfin is noted for its voracious feeding habits usually consuming other fishes. It is capable of breathing atmospheric oxygen, an important adaptation to life in swamps and marshes, where low dissolved oxygen levels, high water temperatures and low water conditions occur frequently. The Bowfin inhabits swamps, marshes, ditches, ponds and lakes, and sluggish sections of rivers and creeks, where it prefers areas with submerged vegetation, undercut banks and coarse woody debris.

This species occurs in North America from Quebec to northern Minnesota in the St. Lawrence River-Great Lakes and Mississippi River basins south to the Gulf of Mexico and on the Atlantic and Gulf Coastal Plain from Susquehanna River drainage in Pennsylvania to the Colorado River, Texas. It has been introduced elsewhere. In this Commonwealth, it is native to the Lake Erie and Ohio River drainages and introduced in the Susquehanna and Delaware River systems.

The Bowfin was listed as a Pennsylvania candidate species in 1991. It has persisted throughout the collection record in the Lake Erie drainage. It was reported from the Pittsburgh area prior to 1882 but was probably extirpated from the Ohio River drainage in this Commonwealth by 1900. There are no historic records from the Pymatuning Lake region or the French Creek drainage in Crawford and Erie Counties, but it was apparently introduced into these systems in the 1980s or 1990s. Those populations have significantly expanded since 2000, and it is now well established in suitable habitat there. The Bowfin is currently common to abundant in Presque Isle Bay, Erie County, and may now be taken regularly in Pymatuning Lake. It also occurs in French Creek and several tributaries, including Conneauttee Creek, Muddy Creek and Cussewago Creek. It is common to abundant in Conneaut Lake and Conneaut Marsh. In addition, it is now widely distributed in the Allegheny River below Kinzua Dam, and it has recently been found in the Ohio and Monongahela Rivers. Populations were known to have been stocked by the Commission in Buhl Lake, Mercer County; Lake Somerset, Somerset County; Glendale Lake, Cambria County; and Black Moshannon Lake, Centre County. As a result of this expansion, Commission staff consider the Bowfin to be recovered in the Ohio River system. This recovery, along with the

stable population in the Lake Erie drainage, justifies removing the Bowfin from the Commission's list of candidate species.

The current status of this species was reviewed using the Commission's documentation and objective listing/delisting process. It exceeds Criterion A.1 (Population Reduction) in that there has not been a reduction in historic distribution and Criterion B.3 (Extent of Occupancy) because it occupies more than 150 river miles of waterway. In addition, it was evaluated with NatureServe's Conservation Status Assessments Rank Calculator and received a State Conservation Rank of S4—meaning it is secure in this Commonwealth with a very low risk of extirpation due to its extensive range and/or many populations or occurrences. The Fishes Technical Committee of the PABS reviewed this documentation and rank assignment and recommended that the Bowfin be delisted. Enough information is available to make the determination that it is secure in this Commonwealth at present and to justify its removal from the Commonwealth's list of candidate fishes. Therefore, the Commission proposes that the Bowfin be removed from the Pennsylvania list of candidate species under § 75.3.

(5) Timber Rattlesnake (*Crotalus horridus*). The Timber Rattlesnake is a large, heavy bodied, venomous snake of the pit viper family (*Viperidae*). They typically have transverse "V" shaped dark bands on black or brown body color. The tail is black with a rattle and the head color distinguishes the color phase of the snake—black or yellow. Timber Rattlesnakes inhabit the forested, mountainous regions of this Commonwealth. They prefer upland forested areas where they forage for small mammals. Talus and/or scree slopes, rocky ledges, outcrops and boulder fields generally with southerly exposures contain the entrances to over-wintering dens.

The current National range of the Timber Rattlesnake encompasses 31 states from Vermont and New Hampshire south to northern Florida, west to eastern Texas and then north through eastern Oklahoma, Kansas and Nebraska, through Iowa into southeastern Minnesota. From southwestern Wisconsin the range retreats south, away from the Great Lakes, through western and southern Illinois and southern Indiana and Ohio.

Prior to European settlement, the range of the Timber Rattlesnake is thought to have spanned most of this Commonwealth. Today, Timber Rattlesnakes occur in 50 of 67 counties in this Commonwealth within forested, mountainous regions with strongholds mainly within the southwest, central and northeast region of this Commonwealth (for example, Ridge and Valley Province, Laurel Highlands, Allegheny Plateau and the Pocono Plateau).

Historically, overhunting and habitat loss have been major threats to Timber Rattlesnake populations. The conversion of forest to agricultural land during the settlement of this Commonwealth by Europeans was likely responsible for the early extirpation of Timber Rattlesnakes from many portions of this Commonwealth (Surface, 1906). Significant declines in Timber Rattlesnake populations were noted in the 1960s to 1970s, primarily due to overhunting. Many counties maintained bounties on Timber Rattlesnakes and held round ups, harvesting hundreds of these animals.

In 1978, the Commission listed the Timber Rattlesnake as a candidate species due to reported population declines from overhunting and habitat loss. Protective measures and regulations by the Commission gradually increased, including permitting of organized hunts (1982), bag limits

(1982, then reduced further in 1993), hunting season shortened to protect gravid females (1993), and minimum size limit and prohibiting take of females (2007). These regulations were designed to discourage harvest of Timber Rattlesnakes, especially gravid females and immature snakes. Also, oversight of organized hunts by Commission personnel and law enforcement has increased, and education and protection measures by the Commission, the Department of Conservation and Natural Resources and the Game Commission, the other land-holding agencies, have also improved.

For the past 20 years, the Commission has reviewed development projects throughout this Commonwealth for their potential to impact Timber Rattlesnake habitat. Recommendations to adjust alignments or modify project areas to avoid dens and gestation areas, seasonal work restrictions or having Timber Rattlesnake monitors onsite during construction to move snakes out of harm's way have avoided and minimized direct and indirect impacts to Timber Rattlesnakes and their sensitive habitats.

In the past decade, encroachment by oil and gas development into Timber Rattlesnake strongholds has increased significantly with the relatively new shale gas industry in this Commonwealth. The northcentral portions of the range, once considered the core undisturbed populations, have been subject to high volume of exploration, well pad construction, pipeline construction, associated roads and infrastructure. However, anecdotal evidence thus far shows that while there are increasing threats to Timber Rattlesnakes through exposure to human disturbance, some of the habitat alteration (for example, pipeline development) can provide important additional basking habitat in areas where canopy closure has posed problems for available basking and gestating habitat. Additionally, most of the well pads thus far are on the top of slopes and plateaus and do not interfere directly with den habitat (Commission observations).

In the last 25 years, Commission biologists began compiling more refined locational information from amateur and professional herpetologists concerned with the conservation of Timber Rattlesnake. Over 600 historic rattlesnake dens (without field checking, many were suspected to be basking areas) were mapped in this Commonwealth. In 2003, the Commission allocated State Wildlife Grant funding to begin a Statewide assessment of these historic Timber Rattlesnake sites, including determining habitat type, ranking the site quality and assessing threats for each site. Phase 1 of the project (2003-2006) resulted in visits to 467 historic sites with 39% (182) confirmed to harbor Timber Rattlesnake. More than 80% of these confirmed sites were ranked as moderate to good quality in terms of viability and habitat.

During Phase 2 of the project (2005-2011), 1,087 sites (both historic and previously unassessed) were assessed and 71% (770) was found to be occupied by Timber Rattlesnakes. An occupied site averaged 6 snakes observed during the assessment, with a range of 1 to 75 per site. The status of the assessed sites was as follows: 39.2% of the sites were ranked as above high to medium quality; 35.2% of the sites were ranked as lower quality sites; 25.3% of the sites were considered historic sites; and 0.3% of the sites were classified as extirpated. Additionally, 65% of the occupied sites surveyed during the site assessment project documented the presence of gravid females, neonates or juvenile timber rattlesnakes, and an additional 20% of occupied sites had snakes that were not examined for their reproductive status. Site assessments have continued annually as part of Phase 3

of the project (2011-present). To date, 1,742 sites have been assessed for the project (2003-2014), resulting in 35.8% of the sites considered high to medium quality sites, 35.5% of the sites represent lower quality sites and 28.4% of the sites were rated as historic or unoccupied at the time of the surveys (1,241 (71%) of assessed sites were occupied). Large portions (estimated 50%) of the Timber Rattlesnake range remain unassessed due to lack of landowner permissions or access difficulty.

A Species Action (recovery) Plan was developed for the Timber Rattlesnake in June 2011 (<http://fishandboat.com/water/amprep/species-plan-timber-rattlesnake.pdf>). Commission staff have been working with its conservation partners to implement actions towards the recovery of the species. Protection of the Timber Rattlesnake will continue, warranting no changes to the take regulations or venomous snake hunt program. Additionally, an external workgroup comprised of representatives from State and Federal landholding agencies and experts in Timber Rattlesnake natural history was convened to review current conservation practices for the Timber Rattlesnake as well as develop and enhance best management practices for the Timber Rattlesnake on State lands, public education programs promoting protection of Timber Rattlesnakes and cooperative agreements with industry likely to encounter critical Timber Rattlesnake habitat. Finally, the Commission is working with East Stroudsburg University to develop a robust long-term population monitoring program of the Statewide population to track changes in the population and continue the understanding of the conservation status of the Timber Rattlesnake in this Commonwealth.

The Amphibian and Reptile Committee of PABS reviewed the Heritage rank of the Timber Rattlesnake and found it be "vulnerable-apparently secure" (S3S4) status—uncommon but not rare and usually widespread in this Commonwealth. On June 22, 2015, the PABS Committee recommended "delisting" status based on the aforementioned data and apparent commonality of the species in this Commonwealth.

The Timber Rattlesnake was listed in 1978 as a Pennsylvania candidate species based on limited knowledge of populations and reported declines due to overhunting and habitat alteration. After a 12-year Statewide assessment project was conducted, current data indicate the rattlesnake retains an extensive distribution across this Commonwealth, with large populations remaining in many areas, thus eliminating it from listing consideration based on Criteria B (Extent of Occurrence), Criteria C (Population Estimates and Decline), Criteria D (Small Population Size) or Criteria E (Probability of Extinction). The threat of overhunting has been significantly reduced through regulations and permit programs. Threats to habitat are ever-changing but may be managed through education and management of the species on public lands. Threats are not quantifiable enough to meet Criteria A2 (Projected Population Reduction). The Timber Rattlesnake exceeds minimum requirements needed for listing as candidate, threatened or endangered status. The Timber Rattlesnake currently appears secure within this Commonwealth, which justifies removal from Pennsylvania's list of candidate species. Therefore, the Commission proposes that the Timber Rattlesnake be removed from the Pennsylvania list of candidate species under § 75.3.

The Commission proposes to amend §§ 75.1, 75.2 and 75.3 to read as set forth in Annex A.

Fishing; Special Fishing Regulations

The Fish and Boat Commission (Commission) proposes to amend Chapter 65 (relating to special fishing regulations). The Commission is publishing this proposed rulemaking under the authority of 30 Pa.C.S. (relating to Fish and Boat Code) (code).

A. Effective Date

The proposed rulemaking, if approved on final-form rulemaking, will go into effect on June 19, 2016.

B. Contact Person

For further information on the proposed rulemaking, contact Laurie E. Shepler, Esq., P. O. Box 67000, Harrisburg, PA 17106-7000, (717) 705-7810. This proposed rulemaking is available on the Commission's web site at www.fish.state.pa.us.

C. Statutory Authority

The proposed amendments to § 65.24 (relating to miscellaneous special regulations) are published under the statutory authority of section 2307 of the code (relating to waters limited to specific purposes).

D. Purpose and Background

The proposed rulemaking is designed to improve, enhance and update the Commission's fishing regulations. The specific purpose of the proposed amendments is described in more detail under the summary of proposals.

E. Summary of Proposals

(1) Opossum Lake, a 47-acre impoundment owned by the Commonwealth and managed by the Commission, is located in Lower Frankford Township, Cumberland

County, approximately 6 miles west-northwest of the Borough of Carlisle. The dam impounds Opossum Creek at river mile 0.5. This lake was completely dewatered in October 2008 to make dam and spillway repairs and modifications per dam safety standards of the Department of Environmental Protection (Department). Following completion of the dam and spillway repairs and modifications as well as construction of numerous habitat enhancement devices, the impoundment was refilled and the Commission resumed annual adult trout stocking during spring 2013 to provide angling opportunities for stocked trout. Additionally, the Commission began to re-establish a high quality warmwater and coolwater fishery through fingerling plants of select fish species beginning in summer 2013. This process is ongoing.

Immediately upon refilling of the lake, the Commission opened the lake to fishing under a miscellaneous special regulation that allows for the harvest of trout under Commonwealth inland seasons, sizes and creel limits but allows catch and release fishing only for all other fish species. The Commission took this approach to allow a balanced fishery to develop under protective regulations while offering acceptable levels of recreational angling opportunities. This regulation will remain in effect until June 18, 2016.

Based on a recent assessment of the fish community, the fishery continues to develop. However, the fishery has not progressed to levels where the Commission believes that regulations should be relaxed at this time. Therefore, the Commission proposes that the current miscellaneous special regulation be extended until deemed appropriate for its removal. Commission staff will continue to monitor the fish populations as they develop and make the necessary adjustments to the species being stocked and the regulations governing the fishery to continually provide high quality recreational angling opportunities at Opossum Lake. Once the warmwater fishery has been re-established, the Commission will propose that the lake be removed from the miscellaneous special regulation and included in one of the Commission's existing warmwater regulation programs.

The Commission proposes to amend § 65.24 to read as set forth in Annex A.

(2) Leaser Lake, a 117-acre impoundment owned by the Commonwealth and managed by the Commission, is located in Lynn Township, Lehigh County, approximately 20 miles west-northwest of Allentown. The dam impounds an unnamed tributary to Ontelaunee Creek. This lake was completely dewatered in 2008-2009 to make dam and spillway repairs and modifications per Department dam safety standards. Following completion of the dam and spillway repairs and modifications as well as construction of numerous habitat enhancement devices, the impoundment was nearly refilled by spring 2013, then partially drained by 20 feet in late summer 2014 for additional repairs and fully refilled in 2015. The Commission resumed annual adult trout stocking during spring 2013 to provide angling opportunities for stocked trout. Additionally, the Commission began to re-establish a high quality warmwater and coolwater fishery through fingerling plants of select fish species beginning in 2013. This process remains on-going albeit with some cancellations, such as walleye fingerlings, required in 2014 due to the partial drawdown.

Immediately upon refilling of the lake, the Commission opened the lake to fishing under a miscellaneous special regulation that allowed for the harvest of trout under Commonwealth inland seasons, sizes and creel limits but allowed catch and release fishing only for all other fish species. The Commission took this approach to permit balanced fish populations to develop under protective regulations while offering acceptable levels of recreational angling opportunities. This regulation will remain in effect until June 18, 2016.

Based on the stocking delay that occurred, a recent fisheries management assessment of the fish community and information from Commission staff and anglers regarding their catches, the growth and abundances of warmwater/coolwater fish populations have not progressed to levels where staff believe that regulations should be relaxed at this time. Therefore, the Commission proposes that the current miscellaneous special regulation be extended until deemed appropriate for its removal. Commission staff will continue to monitor the fish populations as they mature, make necessary adjustments to the species and numbers being stocked, and select regulations governing the fisheries with the goal of providing high quality recreational angling opportunities at Leaser Lake. Once the warmwater/coolwater fish populations have been re-established, the Commission will propose that the lake be removed from the miscellaneous special regulation and included in one of the Commission's existing warmwater regulation programs.

The Commission proposes to amend § 65.24 to read as set forth in Annex A.

F. Paperwork

The proposed rulemaking will not increase paperwork and will not create new paperwork requirements.

G. Fiscal Impact

The proposed rulemaking will not have adverse fiscal impact on the Commonwealth or its political subdivisions. The proposed rulemaking will not impose new costs on the private sector or the general public.

H. Public Comments

Interested persons are invited to submit written comments, objections or suggestions about the proposed rulemaking to the Executive Director, Fish and Boat Commission, P. O. Box 67000, Harrisburg, PA 17106-7000 within 30 days after publication of this proposed rulemaking in the *Pennsylvania Bulletin*. Comments submitted by facsimile will not be accepted.

Comments also may be submitted electronically by completing the form at www.fishandboat.com/reg comments. If an acknowledgment of electronic comments is not received by the sender within 2 working days, the comments should be retransmitted to ensure receipt. Electronic comments submitted in any other manner will not be accepted.

LIQUOR CONTROL BOARD

[40 PA. CODE CH. 3] Management Contracts

The Liquor Control Board (Board), under the authority of section 207(i) of the Liquor Code (47 P. S. § 2-207(i)), proposes to amend §§ 3.141 and 3.143 (relating to management contracts; and Board approval and licensee responsibility).

Summary

In recent years, the Board has encountered a growing number of management contracts, that is, agreements between a licensee and a management company to operate, manage or supervise all or part of the operation of the licensed premises. These agreements, which can involve multilayered business organizations with fees and profits being exchanged among the constituent parts of the licensee and management company, are expressly permitted by the Board's regulation in § 3.141(a) and sections 102 and 447(g) of the Liquor Code (47 P. S. §§ 1-102 and 4-477(g)). In fact, "management company" is defined in section 102 of the Liquor Code as an entity that operates, manages or supervises all or part of a licensed business on behalf of a licensee. However, § 3.143(b)(2) currently precludes a management company from having a pecuniary interest in the licensed business despite the fact that management companies are held to the same standards as a person involved in the license. In response to comments from the regulated community, the Board believes amendments are needed to recognize the reality of the modern business environment in which licensees enter into negotiated management agreements that, while not structured as a formal partnership or joint venture, may involve the sharing of profits and control. The Board further believes that proposed amendments will be more consistent with the statutory definition of "management company" than the regulations.

This proposed rulemaking eliminates the blanket prohibition of a pecuniary interest being held by a management company in § 3.141(d) as well as a similar reference in § 3.143(b)(1). In view of the statutory definition of "management company," the requirement that a management contract reserve to the licensee the capability to direct its own business is proposed to be deleted from § 3.141(b).

Sections 404 and 436 of the Liquor Code (47 P. S. §§ 4-404 and 4-436) provide that only the applicant for, in the case of section 404 of the Liquor Code, the issuance, transfer or extension of a hotel, restaurant or club liquor license, or, in the case of section 436 of the Liquor Code, the issuance or transfer of a distributors', importing distributors' or retail dispensers' license, may have a pecuniary interest in the license. However, the Board believes this provision was not meant to prevent a management company from having control and receiving a share of the profits of the licensed business when the management company is on the license application, particularly given the fact that management companies are required to meet the same eligibility criteria as the applicant under section 470(a.1) of the Liquor Code (47 P. S. § 4-470(a.1)), that is, reputation, criminal history, and current or prior involvement in other licenses, and particularly since "management company" is statutorily defined as an entity that manages or operates a licensed business on behalf of a licensee. The proposed amendments will prevent placing an undue burden on the formation and reporting of management contracts by the

regulated community while remaining consistent with the Liquor Code by having the management company listed on the application, investigated by the Board's Bureau of Licensing and subject to refusal by the Board if the management company would not qualify for the license in its own name.

Affected Parties

The affected parties include present and future licensees that contract with management companies to operate licensed businesses.

Paperwork Requirements

The proposed rulemaking will not require additional paperwork. License applicants are required under § 3.142 (relating to reporting) to identify management companies on license applications, and current licensees are required to notify the Board in the event they enter into management contracts.

Fiscal Impact

There is no anticipated adverse fiscal impact from this proposed rulemaking. This proposed rulemaking is meant to ease the burdens of compliance for the regulated community. Therefore, by making its regulations more accommodating to businesses, the Board anticipates the proposed amendments will have a positive fiscal impact on licensees as well as the Commonwealth.

Effective Date

This proposed rulemaking will become effective upon final-form publication in in the *Pennsylvania Bulletin*.

Public Comments

Interested persons are invited to submit written comments about the proposed rulemaking to Rodrigo Diaz, Executive Deputy Chief Counsel, or Justin Blake, Assistant Counsel, Office of Chief Counsel, Liquor Control Board, Room 401, Northwest Office Building, Harrisburg, PA 17124-0001 within 30 days after publication in the *Pennsylvania Bulletin*. Comments submitted by facsimile will not be accepted.

S. § 745.5(a)), on October 29, 2015, the Board submitted a copy of this proposed rulemaking and a copy of a Regulatory Analysis Form to IRRC and to the Chairpersons of the House Liquor Control Committee and Senate Committee on Law and Justice. A copy of this material is available to the public upon request.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 1

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907)

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an “integrated” plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the Department, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its

application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P. S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Intent to Issue Plan Approvals and Intent to Issue or Amend Operating Permits under the Air Pollution Control Act (35 P. S. §§ 4001—4015) and 25 Pa. Code Chapter 127, Subchapter B. These actions may include the administrative amendments of an associated operating permit.

21-05026C: Carlisle SynTec Inc. (1295 Ritner Highway, Carlisle, PA 17013) for the construction of a devulcanization process to recycle sheet roofing material from their manufacturing process at the facility in Carlisle Borough, **Cumberland County**. The maximum projected increases in air emissions from the facility are less than one ton per year each of total organic compounds and sulfuric compounds. The facility is a Title V facility. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed will comply with all air quality regulatory requirements. Based upon these findings, the Department proposes to issue a plan approval for the proposed construction. If after the project is completed, the Department determines that the sources and control devices are operating in compliance with the plan approval conditions and specifications of the plan approval application, the plan approval requirements will be incorporated into an Operating Permit pursuant to the administrative amendment provisions of 25 Pa. Code § 127.450.

08-00053A: Delmar Energy, LLC (6051 Wallace Road Extension, Suite 100, Wexford, PA 15090) for the construction of three (3) 9,708 bhp (7.2 MW) 4 stroke, lean burn Rolls Royce Bergen B-35:40-V16AG-2 natural gas-fired engine/generator sets, each equipped with both catalytic oxidation and selective catalytic reduction (SCR), at the proposed electric generating station located in Stevens Township, **Bradford County**. The facility will also include one (1) 0.64 MMBtu/hour natural gas-fired natural gas line heater; three (3) storage tanks ranging in size from 2,600 gallons to 6,000 gallons; one (1) desiccant dehydration system; various fugitive emissions. The Department of Environmental Protection's (Department) review of the information submitted by Delmar Energy, LLC indicates that the air contamination sources to be constructed will comply with all regulatory requirements, including monitoring, recordkeeping, and reporting requirements, and pertaining to air contamination sources and the emission of air contaminants including the National Emission Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines, 40 CFR Sections 63.6580—63.6675, the Standards of Performance for Stationary Spark Ignition Internal Combustion Engines, 40 CFR Sections 60.4230—60.4248, the Mandatory Greenhouse Gas Reporting Rule, 40 CFR Part 98, 25 Pa. Code Chapter 123 and the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12. Based on this finding, the Department proposes to issue a plan approval for the proposed construction.

The emissions from each proposed engine included in this project will not exceed the following limits: 0.058 g/bhp-hr and 5.44 TYPY NO_x, 0.114 g/bhp-hr and 10.69 TYPY CO, 0.037 g/bhp-hr and 3.47 TYPY VOCs, 0.0006 lbs/MMBtu and 0.13 TYPY SO_x, 0.050 g/bhp-hr and 4.67 TYPY PM₁₀/PM_{2.5}, 0.0009 g/bhp-hr and 0.84 TYPY formaldehyde, 10 ppmvds at 15% O₂ ammonia; no visible

emissions equal to or greater than 10% for a period or periods aggregating more than three minutes in any 1 hour and equal to or greater than 30% at any time. In addition to the emission limitations, the following is a brief description of the types of conditions the Department intends to place in the plan approval in order to ensure compliance with all applicable air quality regulatory requirements: performance testing requirement for all engines to verify compliance with the emissions limitations; establish a facility-wide leak detection and repair (LDAR) program to account for fugitive emissions from high pressure connections; restrict the engines to natural gas firing only; in addition to performance testing, establish follow-up portable analyzer testing for NO_x and CO for all engines every 2,500 hours of operation.

The facility is a State Only facility. If the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specifications of the application for Plan Approval 08-00053A, the applicant will subsequently apply for a State Only Operating Permit in accordance with 25 Pa. Code Subchapter F. All pertinent documents used in the evaluation of the application are available for public review during normal business hours at the Department's Northcentral Regional office, 208 West Third Street, Suite 101, Williamsport, PA 17701. Appointments for scheduling a review must be made by calling 570-327-0550.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P. S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act (35 P. S. §§ 6026.101—6026.907).

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based

on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

Implementation of Act 11 of 2012

Public Meeting held
November 5, 2015

Commissioners Present: Gladys M. Brown, Chairperson; John F. Coleman, Jr., Vice Chairperson; Pamela A. Witmer; Robert F. Powelson; Andrew G. Place

Implementation of Act 11 of 2012; M-2012-2293611

Tentative Supplemental Implementation Order

By the Commission:

On February 14, 2012, Governor Corbett signed into law Act 11 of 2012 (Act 11), which, inter alia, amended Chapter 13 of the Pennsylvania Public Utility (Code) by incorporating a new Subchapter B, Sections 1350 through 1360 of the Code, which deals with distribution (and collection) systems and allows specified utility types designated therein to petition the Commission to implement an additional rate mechanism, known as a distribution system improvement charge (DSIC) to recover the

costs related to the repair, replacement or improvement of eligible distribution property. See 66 Pa.C.S. §§ 1350—1360.

By Order entered August 2, 2012, the Commission issued a Final Implementation Order in the proceeding in Implementation of Act 11 of 2012, Docket Number M-2012-2293611 (August 2nd Final Implementation Order), which established the procedures and guidelines necessary for those utilities seeking to implement a DSIC mechanism. Since the passage of Act 11 and the issuance of the August 2nd Final Implementation Order, the Commission has granted the petitions to implement a DSIC mechanism for ten jurisdictional utilities. However, various discrete issues regarding the implementation of the DSIC surcharge mechanism that were not fully addressed in our August 2nd Final Implementation Order have arisen. Accordingly, via this tentative order, the Commission solicits comments so as to take further steps to adopt procedures regarding additional implementation issues that have developed over time.

Background

On February 14, 2012, Governor Corbett signed into law Act 11 of 2012 (Act 11), which, inter alia, amended Chapter 13 of the Pennsylvania Public Utility (Code) so as to allow water and wastewater utilities, electric distribution companies (EDCs), and natural gas distribution companies (NGDCs) or a city natural gas distribution operation to implement a DSIC surcharge mechanism which would allow them to offset the additional depreciation and to recover the prudent capital costs associated with certain non-revenue producing, non-expense reducing capital expenditures related to the repair, replacement or improvement of eligible distribution property.

On May 11, 2012, the Commission in Implementation of Act 11 of 2012 entered a Tentative Implementation Order (May 11th Tentative Implementation Order) at Docket Number M-2012-2293611, soliciting comments on proposed procedures and guidelines necessary to implement Act 11, including a DSIC process for investor-owned energy utilities, city natural gas distribution operations, and wastewater utilities and to facilitate a transition from the Section 1307(g) water DSIC procedures to Act 11 DSIC procedures. After reviewing the comments filed in response to the May 11th Tentative Implementation Order, the Commission issued the August 2nd Final Implementation Order at the above-referenced docket, which established the procedures and guidelines necessary to implement Act 11 and included a Model Tariff for DSIC filings.

Subsequently, to date, the Commission has approved petitions to implement a DSIC surcharge mechanism for ten jurisdictional utilities, consisting of one EDC, six NGDCs, one city natural gas distribution operation, and two wastewater companies.¹ However, since those utilities have initiated their DSIC mechanisms, various implementation issues that were not specifically addressed in our August 2nd Final Implementation Order have arisen. Per this Order, the Commission is soliciting comments on the manner it should resolve these additional implementation issues.

¹ At present, Petitions to implement a DSIC mechanism have been approved by the Commission for the following companies: PPL Electric Utilities (PPL), Columbia Gas of Pennsylvania (Columbia), Peoples Natural Gas Company—Equitable Division (PNGC—Equitable), Peoples Natural Gas Company, LLC (Peoples Gas), People's TWP, UGI—Penn Natural Gas, UGI—Central Penn Gas, Philadelphia Gas Works (PGW), Little Washington Wastewater Company (LWWC) and Pennsylvania American Wastewater Company (PAWC).

Discussion

Act 11 amended Chapter 13 of the Code in order to reduce regulatory lag by providing ratemaking flexibility for utilities seeking timely recovery of prudently incurred costs related to the repair or replacement of distribution infrastructure between rate cases and before new base rates have become effective. Specifically, Act 11 incorporated new statutory provisions in Chapter 13, based on the existing DSIC that has been used for over 15 years in the water utility industry², to accelerate the pace of water pipeline replacement and improvements. Under Act 11, the DSIC mechanism is also now available to EDCs, NGDCs, wastewater utilities, and city natural gas operations and will allow those utilities to recover the reasonable and prudently incurred costs related to the acceleration of the repair, improvement and replacement of utility infrastructure on a timelier basis, subject to reconciliation, audit and other consumer protections.³

The DSIC mechanism allows a utility to add to customer rates the recovery of the fixed costs (i.e., depreciation cost and pretax return for all utilities except city natural gas distribution operations) for (1) any eligible plant associated with a repair, replacement or improvement that was not previously reflected in the utility's rates and rate base and (2) has been placed into service as a repair, replacement or improvement during the three-month period ending one month (i.e., quarterly with a one month lag) prior to the effective date of the DSIC mechanism. See 66 Pa.C.S. § 1357(a)(1)(ii). Thereafter, in order to continue to recover the fixed costs of eligible property that is placed into service and associated with an acceleration of its repair, replacement or improvement program through its DSIC mechanism, the utility must provide quarterly DSIC updates that reflect the eligible property that has been placed in service during the three-month period ending one month prior to the effective date of the DSIC update. See 66 Pa.C.S. § 1357(a)(2). Accordingly, the utility is permitted to recover on an ongoing basis (i.e., every three months) the fixed costs of eligible property placed into service that is associated with a repair, replacement or improvement.

Section 1358(d) of the Code provides that the Commission may establish procedures to adjust the DSIC rate, when applicable, by order or regulation. See generally 66 Pa.C.S. § 1358(d)(2). Hence, the Commission is seeking comments from interested parties in order to address issues concerning implementation of the DSIC rate that were not fully addressed in the August 2nd Final Implementation Order.

As more fully explained herein, the Commission seeks comments in the following issue areas regarding the implementation, operation and computation of the DSIC:

- requiring quarterly financial reports for all utilities that use the DSIC mechanism;
- filing and computation issues for when the DSIC is reset to zero;
- treatment of over/under collections, or E-factor, after the DSIC is reset to zero;
- computation issues for determining the DSIC rate cap; and
- requirement to file an LTIP by water utilities that use the DSIC.

² The separate DSIC provisions in Section 1307(g) providing for a sliding scale of rates for water utilities have been deleted in lieu of the general DSIC provisions established in Act 11.

³ See generally 66 Pa.C.S. § 1350 et seq.

A. Uniform Financial Earnings Reports Requirement

The Commission established financial reporting requirements designed to improve its ability to monitor the financial performance and earnings of certain jurisdictional public utilities.⁴ See generally 52 Pa. Code § 71.1 et seq. Act 11 directs that the Commission also use these financial earning reports to monitor the rates of return for companies that have implemented a DSIC mechanism to determine if the utility has experienced earnings above its allowed rate of return or “overearnings.” See 66 Pa.C.S. § 1358(b)(3). The Commission compares the filed return on equity (ROE)⁵ figure from schedule D-2 of the financial earnings report to the allowable equity return rate for the computation of the DSIC rate to determine if the utility can continue to recover under its DSIC mechanism the fixed costs of the eligible property that is reflected in its next quarterly DSIC update or if its DSIC rate must be adjusted. See generally 66 Pa.C.S. § 1358(b)(3). Pursuant to the statutory directive in Act 11, the DSIC rate is to be reset to zero, if, in any quarter, the data reflected in the utility’s most recent quarterly financial earnings report show that the utility will earn a ROR that would exceed the allowable ROR used to calculate its fixed costs under the DSIC mechanism. See 66 Pa.C.S. § 1358(b)(3).

The Commission notes that there is a lag period between the filing dates of the quarterly earnings report and the filing dates of the quarterly DSIC updates. The Commission regulations at 52 Pa. Code § 71.3 set forth different filing report requirements for certain fixed utilities based upon overall revenues. See 52 Pa. Code § 71.3. Currently, some utilities file their financial earnings report on a quarterly basis and some file it on an annual basis. Id. Certain jurisdictional fixed utilities are required to file quarterly reports for the 12-month period ending on March 31st, June 30th, September 30th and December 31st of each year. The first three 12-month period quarterly financial earnings reports for the year, the March 31st, June 30th, September 30th reports, are due to be filed within sixty (60) days of the end of the 12-month reporting period while the fourth quarter 12-month period quarterly financial earnings report, the December 30th report, is due within ninety (90) days of the quarter ending December 31st of each year. However, the Act 11 quarterly DSIC updates are to be filed no later than April 1st, July 1st, October 1st and January 1st of each year. Thus, if the data reflected in the utility’s most recent quarterly financial earnings report show that it has experienced an overearnings for that quarter, presumably its DSIC rate will be reset to zero until the following quarter or three months reflected in that next quarterly DSIC update.

On the contrary, certain jurisdictional utilities are required only to file an annual financial report for the previous 12-month calendar year in accordance with 52 Pa. Code § 71.3(b). These utilities do not have to submit this annual financial report to the Commission until

⁴ On November 30, 2004, however, the Pennsylvania General Assembly signed into law Act 183 concerning alternative telecommunications regulation and broadband deployment. As a result of Act 183, the reporting requirements for the PUC jurisdictional telecommunications companies of Pennsylvania have been streamlined at section 3015(e) of the Public Utility Code. A quarterly earnings report is not listed among those reports now required of PUC jurisdictional telecommunications utilities in Pennsylvania and, therefore, this report does not address telephone company earnings.

⁵ In particular, the allowable cost of equity for the computation of the DSIC rate shall either be the equity return rate in the utility’s most recent fully litigated base rate proceeding or, if that proceeding was over two years ago, the Commission uses the equity return rate used in the quarterly earnings report it prepares which sets forth the achieved return on equity for each company, the last allowed return for that utility, a market return as determined through the analysis of the barometer group data and the most recent returns allowed, per industry, by the Pennsylvania Public Utility Commission and by other regulatory bodies. This report is referred to as the Quarterly Report on the Earnings of Jurisdictional Utilities.

March 31st of the following year, within ninety days after the end of the 12-month period ending December 31st. As a result, if that utility has experienced any overearnings for some portion of the preceding year, under the current financial earnings reporting regimen, these utilities will continue to recover the fixed costs of eligible property under their DSIC mechanisms throughout the year. Nevertheless, in actuality, their DSIC rate should have been reset to zero, pursuant to Section 1358(b)(3) of the Code, at the time they begin to experience an overearning. Consequently, these utilities continue to reap the benefit of their DSIC mechanism even though they may have experienced overearnings for a significant portion of the year, which is unfair to consumers and those utilities that are required to file quarterly financial earnings reports.

Accordingly, the Commission proposes that all jurisdictional utilities that have implemented a DSIC mechanism, including those utilities that are not required to file earnings reports under 52 Pa. Code § 71.3 because their annual revenues do not exceed \$1 million, should be directed to file quarterly earnings reports with the Commission. The Commission also seeks comment on whether or not the quarterly earnings report exemption under 71.4(c) during the pendency of a base rate case for companies with a positive DSIC charge should be eliminated. This puts all utilities with a DSIC mechanism on the same footing in determining whether the utility can appropriately recover through their DSIC the fixed costs of all the eligible plant placed in service that has not previously been reflected in the rate base.

B. Customer Protections—DSIC Rate Reset to Zero

Act 11 includes directives regarding various consumer protection provisions. These consumer protections are set forth in Section 1358 of the Code, 66 Pa.C.S. § 1358. One of the more vital consumer protections involving the implementation of the DSIC mechanism is resetting the DSIC rate to zero. Under certain circumstances, Act 11 requires that a DSIC rate reset to zero. See generally 66 Pa.C.S. § 1358(b)(1)–(3). Specifically, the DSIC rate is reset to zero on the effective date of new base rates that provide for the prospective recovery of the fixed annual costs previously recovered under the utility’s DSIC mechanism. 66 Pa.C.S. § 1358(b)(1). Additionally, for investor-owned utilities, a “reset” of the DSIC rate is also required if, in any quarter, data filed with the Commission in the utility’s most recent quarterly or annual earnings financial report shows that the utility will earn a ROR that would exceed the allowable ROR used to calculate its fixed costs under the DSIC.⁶ 66 Pa.C.S. § 1358(b)(3). Accordingly, the Commission is seeking comment on the rules and procedures it should establish when a utility is required to reset its DSIC rate to zero.

1. Proposed Tariff Supplement to Reset DSIC Rate to Zero

As mentioned above, the DSIC rate is required to be reset to zero on the effective date of new base rates that provide for the prospective recovery of the annual fixed costs of eligible property that were previously recovered under the utility’s DSIC mechanism. 66 Pa.C.S. § 1358(b)(1). Additionally, if a utility’s quarterly financial earnings report reflects an overearning for that particular quarter, the utility is required to reset its DSIC rate to zero. 66 Pa.C.S. § 1358(b)(3). Hence, the Commission tentatively proposes that a utility should be required to file a tariff supplement pursuant to Section 1308(a) of the

⁶ For city natural gas distribution operations, the Commission determined that it would monitor its interest levels and cash flows on a quarterly basis to determine whether a reset is required. See August 2nd Final Implementation Order at pp. 42-43.

Code resetting its DSIC rate to zero if the following occur: (1) upon the effective date of the new base rates and (2) if an overearning is indicated in the utility's most recent quarterly financial earnings report.

The Commission proposes that the utility should incorporate a reference to resetting its DSIC rate to zero within the tariff supplement requesting a general rate increase under Section 1308(d) of the Code, 66 Pa.C.S. § 1308(d). This obviates the need for the utility having to file subsequently a separate second tariff supplement under Section 1308(a) of the Code resetting the DSIC rate to zero upon the effective date of the new base rates. The Commission seeks comment on this tentative proposal.

However, the timing of the tariff supplement to reset the DSIC rate to zero when a utility experiences overearnings is somewhat problematic. As mentioned above, the Commission has tentatively concluded that all utilities with a DSIC mechanism should begin to file their financial earnings report on a quarterly basis—March 31st, June 30th, September 30th and December 31st. However, the Commission notes it has directed the utilities with a DSIC mechanism to schedule the effective dates of their proposed DSIC updates, and the corresponding period for eligible plant additions that will be reflected in each update, to align quarterly with the months of April, July, October, and January. Consequently, as mentioned above, there is a lag time, between the utility addressing the overearnings indicated in the quarterly financial earnings report and resetting the DSIC rate to zero in the next Act 11 quarterly DSIC updates filed thereafter. It may be likely that the utility does not already have an indication or knowledge that it has experienced overearnings at the time it files its quarterly financial earnings report. With this in mind, the Commission proposes that utilities should file their tariff supplement reflecting a zero DSIC rate simultaneously with the filing of their next quarterly DSIC update, effective upon ten-day's notice.

2. DSIC Rate Reset to Zero Upon Effective Date of New Base Rates

In order to continue to recover the fixed costs of eligible property that is placed into service and associated with a repair, replacement or improvement through its DSIC mechanism, the utility must provide quarterly DSIC updates that reflect the eligible property that has been placed in service during the three-month period ending one month prior to the effective date of the DSIC update. See 66 Pa.C.S. §§ 1357(a)(2) and 1357(c)(3). Hence, quarterly DSIC updates are integral to the utility identifying the relevant eligible property and the proper calculation of the fixed costs associated with that eligible property. See 66 Pa.C.S. § 1357(d)(2).

When a utility with a DSIC mechanism files for a general rate increase under Section 1308(d) of the Code, 66 Pa.C.S. § 1308(d), and new base rates become effective, the utility is required to reset its DSIC rate to zero as of the effective date of the new base rates. 66 Pa.C.S. § 1358(b)(1). After resetting the DSIC rate to zero following the effective date of new base rates, only the fixed costs of new eligible property that was not previously reflected in base rates or recovered in the utility's rates (i.e., previously recovered under the DSIC mechanism) may be reflected in a subsequent quarterly DSIC update. 66 Pa.C.S. § 1358(b)(2).

Thus, in order for a utility to begin to recover again the fixed costs of eligible property placed in service that is associated with a repair, replacement or improvement

after the DSIC rate has been reset to zero because of new base rates, it must submit a quarterly DSIC update that reflects only eligible property that meets the above criteria (has not been previously reflected in the utility's rates or rate base). See generally 66 Pa.C.S. §§ 1357(a)(2); 1357(d)(3) and 1358(b)(2). The Commission refers to this as a "stay-out" period because the utility cannot utilize its DSIC mechanism until new eligible property that has not been accounted for in the utility's rates or rate base is present. The Commission believes that the length of this "stay-out" period should be able to be determined from the order issued in the proceeding to establish the utility's new base rates.

The base rates established in a Section 1308(d) general rate case are designed to recover all prudent costs for capital, labor, materials, and input services used in the production function. The calculation of rates is developed on the device of a "test year," which is a 12-month period that is to be representative of operating conditions when the rates being established will be in effect. Generally, most utilities filing for rate increases in excess of \$1,000,000 use a future test year for ratemaking purposes. A future test year employs the utility's normal budget process to project operating results for a future 12-month period.

However, the Commission also now allows utilities to utilize a fully projected future test year (FPFTY) as its baseline for setting new base rates. See 66 Pa.C.S. § 315. As such, a utility requesting to establish new base rates pursuant to a filing under Section 1308(d) of the Code, is seeking to recover the costs of all eligible plant in service, plus the plant that is projected to be in service either within 12 to 24 months depending on if the utility has used a future test year or a FPFTY to calculate its rates. Presumably, if a utility has used a future test year or a FPFTY as the basis for the projection of the costs of all the eligible plant that it will place in service, the new base rates should provide for the prospective recovery of the annual costs of all the eligible property placed into service and that was previously being recovered under the utility's DISC mechanism.

At this juncture, the Commission proposes that if a utility has surpassed the prospective recovery amount associated with the eligible plant placed in service and which was previously reflected in the utility's base rates as a result of using a future test year or FPFTY, it is then eligible to begin to recover again the fixed costs associated with any new repair, replacement or improvement of eligible property reflected in a quarterly DSIC update.⁷

Nevertheless, the Commission seeks comment on what is the criterion to determine whether the prospective recovery amount has been surpassed, which would indicate when the stay-out period has elapsed and the utility may again continue to recover the fixed costs of eligible property reflected in the quarterly DSIC update. The Commission proposes that this criterion should be based upon the total aggregate dollar amount associated with the prospective eligible property placed in service as determined and set forth in the final order establishing the new base rates. The utility should specify the total aggregate amount that is associated with the prospective nature of the eligible property that is to be placed in service, as this is a portion of the baseline for setting the new base rates.

Additionally, the Commission proposes that utilities should continue to file quarterly DSIC updates reflecting

⁷ This scenario would not be true only if the utility is experiencing an overearning over the applicable ROE (whichever ROE governs) at that time.

the eligible property placed into service that was associated with a repair, replacement or improvement during the stay-out period even though they are unable to recover such costs. The primary purpose of a DSIC update is to reflect the additional eligible property that has been placed in service during the prior quarter and for which the utility is seeking cost recovery for under its DSIC mechanism. The Commission believes that the continuous filing of DSIC updates will help it to monitor and verify when the criterion has been met that indicates when the stay-out period has elapsed and the utility may again continue to recover the fixed costs of eligible property so as not to allow for the double-recovery of the fixed costs of eligible property under its DSIC mechanism.

3. *Resetting DSIC Rate to Zero Due to Overearnings*

As indicated above, for investor-owned utilities, a reset of the DSIC rate to zero is required if, in any quarter, data filed with the Commission in the utility's most recent annual or quarterly earnings report show that the utility will earn a ROR that would exceed the allowable ROR used to calculate its fixed costs under the DSIC. See 66 Pa.C.S. § 1358(b)(3).

The Commission acknowledges that an ongoing, uninterrupted DSIC mechanism appears to be cumulative in its effect. The Commission notes that the primary purpose of the quarterly DSIC update is to reflect the additional eligible property that the utility has placed in service during the prior three-month period ending one month prior to the effective date of each DSIC update. See 66 Pa.C.S. § 1357(a)(2). Thus, the utility is continually able to recover the fixed costs of all eligible property less depreciation that it has placed into service that is associated with a repair, replacement or improvement that is reflected in its quarterly DSIC update and that has not previously been reflected in the utility's rate base pursuant to a base rate proceeding.⁸

When a utility's financial earnings report indicates an overearning for a particular 12-month period, Act 11 requires that the utility's approved DSIC rate be reset to zero. See 66 Pa.C.S. § 1358(b)(3). However, the entirety of the fixed costs of the eligible property that was placed into service does not disappear. Rather, the DSIC rate is reset to zero or more specifically, presumed or deemed to be zero; thus, effectively prohibiting the utility from recovering its fixed costs for any eligible property under its DSIC mechanism during the overearnings period.

If the overearning period lasts only one quarter and then ceases, there appears to be no issue regarding the cumulative nature of the DSIC mechanism. The utility can again begin to recover the fixed costs for its cumulative eligible property less depreciation in the next quarterly DSIC update, which would include the new eligible property that has been placed in service during the three month period ending one month prior to the effective date of the DSIC update.

However, an issue seems to arise as to how the cumulative nature of the DSIC mechanism is impacted if overearnings persist for two or more successive quarters going forward. The Commission proposes that during the successive overearnings period, a utility with a DSIC mechanism is prohibited from recovering the current fixed costs of the eligible property that it had placed into service prior to the time that the successive overearnings period began to occur.

Nonetheless, how far back may the utility be able to go to recover the current fixed costs for eligible plant placed

in service once the successive overearnings period ceases? If there has been two or more successive quarters of overearnings and then the overearnings cease to occur, may the utility recover the current fixed costs associated with its cumulative investment in eligible property less depreciation in the future quarter in which the utility is no longer in an overearning status?

The Commission proposes that the utility should be permitted to recover the current fixed costs of all eligible property after a successive overearnings period ceases. DSIC recovery for quarters subsequent to the period of overearnings may include the cumulative cost impact of DSIC eligible costs since the last base rate case. However, there would be no recovery through the 1307(e) reconciliation process of the otherwise DSIC eligible costs that were incurred during the period the utility experienced overearnings.

Finally, there appears to be an underlying issue with regard to the fact that a utility is experiencing successive quarters of overearnings and continuing to utilize its DSIC mechanism. If a utility is experiencing an overearning over a successive and consecutive period of time, this suggests that the utility's existing rates are allowing the utility to recover its costs and expenses and are more than sufficient to provide a fair return to investors and the utility. Therefore, the Commission seeks comment on whether it should require the utility to file a tariff supplement under Section 1308 of the Code to address its overearnings so that the utility can continue to use its DSIC to recover the fixed costs of the eligible property it has placed in service.

4. *Residual E-Factor Portion of the DSIC Rate Upon a Reset of the DSIC Rate*

A DSIC rate is reset to zero when one of the following occurs: (1) upon the effective date of new base rates that provide for the prospective recovery of the fixed cost of eligible property that has been placed in service or (2) when the utility experiences overearnings in a particular quarter. When the DSIC rate is reset to zero the utility cannot continue to recover under its DSIC mechanism the fixed costs of any eligible property that has been placed in service. However, should the utility have the ability to recover or refund the ongoing E-Factor and/or the residual E-factor amounts when the DSIC rate is reset to zero? This residual E-factor amount reflects an overcollection or undercollection upon a reconciliation of projected sales and projected revenue from the prior three-month DSIC period. Therefore, the Commission must determine what happens to any residual overcollections/undercollections that would have been recovered by the utility under its DSIC mechanism if the DSIC rate had not been reset to zero. Accordingly, the Commission is focusing on the E-factor component of the DSIC rate calculation.

The formula for calculation of the DSIC rate is as follows:

$$\text{DSIC} = \frac{(\text{DSI} * \text{PTRR}) + \text{Dep} + e}{\text{PQR}}$$

Thus, there are two primary components to the DSIC rate calculation. The C-Factor is this portion of the DSIC rate calculation:

$$\text{DSIC} = \frac{(\text{DSI} * \text{PTRR}) + \text{Dep}}{\text{PQR}}$$

which represents the current fixed costs of the eligible property. The E-Factor component of the DSIC rate calculation is for error correction of prior period over or under collections. The C-Factor calculation, which is the

⁸ See generally 66 Pa.C.S. § 1357(d)(2).

basic DSIC rate, is determined four times per year while the E-Factor, which reconciles over and under collections, is only determined once per year. Since the fixed costs associated with the repair, replacement or improvement of eligible property will be reflected in the base rates established after the Section 1308(d) base rate proceeding has concluded, the C-Factor truly “zeros” out upon the effective date of the new base rates.

However, there is a residual over or under collection amount reflected in the E-factor that results from the period the DSIC was billed to customers. Once the utility determines the specific amount of the residual over or under collection amount, since it most likely would not have the actual amount until sometime after the DSIC rate has been reset to zero, it should then file a tariff supplement to address that residual amount. Since the over or under collection relates to the prior recovery of approved costs, it appears reasonable that the utility should be required to refund any overcollection to customers and be entitled to recover any undercollections.

Accordingly, the Commission proposes that utilities with ongoing DSIC mechanisms should file a tariff supplement that revises their DSIC tariffs so that language is incorporated therein that allows the utility to file interim revisions to resolve the residual over/under collection or E-factor amount after the DSIC rate is reset to zero. In addition, if a utility seeks to recover an undercollection from customers or refund an overcollection amount to customers in a single quarter for the quarterly period commencing April 1st, this option should be clearly delineated in its tariff.

C. Computation of the DSIC Rate Cap

Section 1358(a)(1) provides that a DSIC may not exceed 5% of amounts billed (wastewater utility) or 5% of distribution rates billed (electric and natural gas utilities); however, upon petition, the Commission may grant a waiver of the 5% limit if necessary to ensure and maintain safe and reliable service. 66 Pa.C.S. § 1358(a)(1). Act 11 makes clear that the DSIC cap for energy utilities is to be applied to distribution revenues only. The Commission stated in the August 2nd Final Implementation Order that the rate cap is a bill limitation that is applied to the distribution rates of each customer, not to aggregated billing revenue. Furthermore, the Commission may grant such a waiver to increase the cap above 5% upon its review and consideration of the requisite petition from a utility. Conversely, Section 1358(a)(2) provides that a DSIC previously granted under Section 1307(g) or subsequently granted under Act 11 to a water utility may not exceed 7.5%.⁹ See 66 Pa.C.S. § 1358(a)(2).

Nevertheless, the statute does not specify the calculation of the DSIC rate cap. In order to accommodate the acceleration of much-needed infrastructure improvements certain utilities may request that the Commission either waive the 5% cap or exclude the E-factor annual reconciliation component from the computation of the rate cap. Clearly, the Commission has the statutory authority to increase the cap above 5% upon petition. However, it is unclear whether it has the statutory authority to exclude the E-factor component from the DSIC rate cap because it related to the time period in which the utility was authorized to charge and collect the designated DSIC rate. Therefore, the Commission seeks comment on

whether it is feasible and in the public interest to allow this to occur and whether it has the statutory authority to do such.

D. Water Utility Long-Term Infrastructure Plans

Section 1360(a) provides that the Commission may accept a prior long-term infrastructure plan filed by a water utility or may require submission of a new LTIIIP pursuant to Section 1360(b). Presently, the Commission has not established a due date for water utilities with previously approved DSICs to file long-term infrastructure improvement plans as it considered the substantial progress made in the water industry over the past 15 years in accelerating the rate of main replacements and other infrastructure improvements.

Nonetheless, the Commission proposes that now is the time for water utilities to file LTIIIPs with the Commission in order to ensure that all utilities that are eligible to implement a DSIC are following uniform rules and procedures regarding Commission-approved DSIC mechanisms. The Commission tentatively proposes that all jurisdictional water utilities be required to file Act 11 LTIIIPs by no later than September 30, 2016. The Commission will establish a staggered schedule for the water utilities to file their LTIIIPs so that it will not have to consider each water utilities at the same time. The Commission solicits comments from water utilities regarding this tentative proposal.

Conclusion

The enactment of Act 11 provides utilities with an additional rate mechanism to recover the capitalized costs related to repair, improvement and replacement utility infrastructure. A DSIC can reduce regulatory lag, improve access to capital at lower rates, and accelerate infrastructure improvement and replacement. The purpose of this Supplemental Tentative Implementation Order is to propose additional procedures and guidelines necessary to implement Act 11 and to solicit public comment. Upon review of any comments from stakeholders, the Commission will issue a Supplemental final implementation order to establish final procedures and guidelines; *Therefore,*

It Is Ordered That:

1. A copy of this Tentative Supplemental Implementation Order shall be published in the *Pennsylvania Bulletin* and posted on the Commission’s website at www.puc.state.pa.us.
