READER'S GUIDE TO THE *PENNSYLVANIA BULLETIN* AND THE *PENNSYLVANIA CODE*

Pennsylvania Bulletin

The *Pennsylvania Bulletin* is the official gazette of the Commonwealth of Pennsylvania. It is published every week and includes a table of contents. A cumulative subject matter index is published quarterly.

The *Pennsylvania Bulletin* serves several purposes. First, it is the temporary supplement to the *Pennsylvania Code*, which is the official codification of agency rules and regulations and other statutorily authorized documents. Changes in the codified text, whether by adoption, amendment, repeal or emergency action must be published in the *Pennsylvania Bulletin*. Further, agencies proposing changes to the codified text do so in the *Pennsylvania Bulletin*.

Second, the *Pennsylvania Bulletin* also publishes: Governor's Executive Orders; State Contract Notices; Summaries of Enacted Statutes; Statewide and Local Court Rules; Attorney General Opinions; Motor Carrier Applications before the Pennsylvania Public Utility Commission; Applications and Actions before the Department of Environmental Protection; Orders of the Independent Regulatory Review Commission; and other documents authorized by law.

The text of certain documents published in the *Pennsylvania Bulletin* is the only valid and enforceable text. Courts are required to take judicial notice of the *Pennsylvania Bulletin*.

Adoption, Amendment or Repeal of Regulations

Generally an agency wishing to adopt, amend or repeal regulations must first publish in the *Pennsylvania Bulletin* a Notice of Proposed Rulemaking. There are limited instances when the agency may omit the proposal step; it still must publish the adopted version.

The Notice of Proposed Rulemaking contains the full text of the change, the agency contact person, a fiscal note required by law and background for the action.

The agency then allows sufficient time for public comment before taking final action. An adopted proposal must be published in the *Pennsylvania Bulletin* before it can take effect. If the agency

wishes to adopt changes to the Notice of Proposed Rulemaking to enlarge the scope, it must repropose.

Citation to the *Pennsylvania Bulletin*

Cite material in the *Pennsylvania Bulletin* by volume number, a page number and date. Example: Volume 1, *Pennsylvania Bulletin*, page 801, January 9, 1971 (short form: 1 Pa.B. 801 (January 9, 1971)).

Pennsylvania Code

The *Pennsylvania Code* is the official codification of rules and regulations issued by Commonwealth agencies and other statutorily authorized documents. The *Pennsylvania Bulletin* is the temporary supplement to the *Pennsylvania Code*, printing changes as soon as they occur. These changes are then permanently codified by the *Pennsylvania Code Reporter*, a monthly, loose-leaf supplement.

The *Pennsylvania Code* is cited by title number and section number. Example: Title 10 *Pennsylvania Code*, § 1.1 (short form: 10 Pa. Code § 1.1).

Under the *Pennsylvania Code* codification system, each regulation is assigned a unique number by title and section. Titles roughly parallel the organization of Commonwealth government. Title 1 *Pennsylvania Code* lists every agency and its corresponding *Code* title location.

How to Find Documents

Search for your area of interest in the *Pennsylvania Code*. The *Pennsylvania Code* is available at www.pacode.com.

Source Notes give the history of regulations. To see if there have been recent changes, not yet codified, check the List of *Pennsylvania Code* Chapters Affected in the most recent issue of the *Pennsylvania Bulletin*.

A chronological table of the history of *Pennsylvania Code* sections may be found at www.legis.state.pa.us/cfdocs/legis/CH/Public/pcde_index.cfm.

The *Pennsylvania Bulletin* also publishes a quarterly List of Pennsylvania Code Sections Affected which lists the regulations in numerical order, followed by the citation to the *Pennsylvania Bulletin* in which the change occurred. The *Pennsylvania Bulletin* is available at www.pabulletin.com.

Printing Format

Material proposed to be added to an existing rule or regulation is printed in **bold face** and material proposed to be deleted from a rule or regulation is enclosed in brackets [] and printed in **bold face**. Asterisks indicate ellipsis of *Pennsylvania Code* text retained without change. Proposed new or additional regulations are printed in ordinary style face.

Fiscal Notes

Section 612 of The Administrative Code of 1929 (71 P. S. § 232) requires that the Office of Budget prepare a fiscal note for regulatory actions and administrative procedures of the administrative departments, boards, commissions or authorities receiving money from the State Treasury stating whether the proposed action or procedure causes a loss of revenue or an increase in the cost of programs for the Commonwealth or its political subdivisions; that the fiscal note be published in the *Pennsylvania Bulletin* at the same time as the proposed change is advertised. A fiscal note provides the following information: (1) the designation of the fund out of which the appropriation providing for expenditures under the action or procedure shall be made; (2) the probable cost for the fiscal year the program is implemented; (3) projected cost estimate of the program for each of the 5 succeeding fiscal years; (4) fiscal history of the program for which expenditures are to be made; (5) probable loss of revenue for the fiscal year of its implementation; (6) projected loss of revenue from the program for each of the 5 succeeding fiscal years; (7) line item, if any, of the General Appropriation Act or other appropriation act out of which expenditures or losses of Commonwealth funds shall occur as a result of the action or procedures; (8) recommendation, if any, of the Secretary of the Budget and the reasons therefor.

The required information is published in the foregoing order immediately following the proposed change to which it relates; the omission of an item indicates that the agency text of the fiscal note states that there is no information available with respect thereto. In items (3) and (6) information is set forth for the first through fifth fiscal years; in that order, following the year the program is implemented, which is stated. In item (4) information is set forth for the current and two immediately preceding years, in that order. In item (8) the recommendation, if any, made by the Secretary of Budget is published with the fiscal note. See 4 Pa. Code § 7.231 *et seq.* Where “no fiscal impact” is published, the statement means no additional cost or revenue loss to the Commonwealth or its local political subdivision is intended.

Reproduction, Dissemination or Publication of Information

Third parties may not take information from the *Pennsylvania Code* and *Pennsylvania Bulletin* and reproduce, disseminate or publish such information except as provided by 1 Pa. Code § 3.44. 1 Pa. Code § 3.44 reads as follows:

§ 3.44. General permission to reproduce content of Code and Bulletin.

Information published under this part, which information includes, but is not limited to, cross references, tables of cases, notes of decisions, tables of contents, indexes, source notes, authority notes, numerical lists and codification guides, other than the actual text of rules or regulations may be reproduced only with the written consent of the Bureau. The information which appears on the same leaf with the text of a rule or regulation, however, may be incidentally reproduced in connection with the reproduction of the rule or regulation, if the reproduction is for the private use of a subscriber and not for resale. There are no other restrictions on the reproduction of information published under this part, and the Commonwealth hereby consents to a reproduction.

TITLE 237. JUVENILE RULES

PART I. RULES

Subpart A. DELINQUENCY MATTERS

CHAPTER 4. ADJUDICATORY HEARING

Rule 409. Adjudication of Delinquency.

A. Adjudicating the [juvenile delinquent] Juvenile Delinquent. Once the court has ruled on the offenses as provided in Rule 408, the court shall conduct a hearing to determine if the juvenile is in need of treatment, supervision, or rehabilitation.

1) *Not in [need] Need.* If the court determines that the juvenile is not in need of treatment, supervision, or rehabilitation, the court shall enter an order providing that:

a) [**jurisdiction shall be terminated**] **the petition shall be dismissed** and the juvenile shall be released, if detained, unless there are other reasons for the juvenile's detention; and

b) any records, fingerprints, and photographs taken shall be expunged or destroyed.

2) *In [need] Need.*

a) If the court determines that the juvenile is in need of treatment, supervision, or rehabilitation, the court shall enter an order adjudicating the juvenile delinquent and proceed in determining a proper disposition under Rule 512.

b) The court also shall order the law enforcement agency that submitted the written allegation:

i) to take, or cause to be taken, the fingerprints and photographs of the juvenile if not previously taken pursuant to this case, and

ii) to ensure that these records, including the case reference number, are forwarded to the central repository maintained by the Pennsylvania State Police.

B. *Timing.*

1) If the juvenile is in detention, the court shall make its finding within twenty days of the ruling on the offenses pursuant to Rule 408.

2) If the juvenile is not in detention, the court shall make its finding within sixty days of the ruling on the offenses pursuant to Rule 408.

C. Extending Time by Agreement. The time restrictions under paragraphs (B)(1) and (B)(2) may be extended if there is an agreement by both parties.

Comment

Under paragraph (A), absent evidence to the contrary, evidence of the commission of acts that constitute a felony is sufficient to sustain a finding that the juvenile is in need of treatment, supervision, or rehabilitation. *See* 42 Pa.C.S. § 6341(b).

If the court determines that the juvenile is not in need of treatment, supervision, or rehabilitation and the court enters an order [**terminating jurisdiction**] **dismissing the petition**, the victim, if not present, shall be notified of the final outcome of the proceeding. *See* Victim's Bill of Rights, 18 P.S. § 11.201 *et seq.*

This rule addresses adjudicating the juvenile delinquent or [**releasing the juvenile from the court's jurisdiction**] **dismissing the petition**. This determination is different from finding the juvenile committed a delinquent act under Rule 408.

Pursuant to 42 Pa.C.S. § 6308(c)(3), all fingerprints and photographic records are to be destroyed upon order of the court if the juvenile is not adjudicated delinquent.

Pursuant to paragraph (A)(1)(b), the court is to specify which items are to be expunged and which items are to be destroyed. *See* Rule 172(A)(2) and its Comment.

Pursuant to paragraph (A)(2)(b)(ii), a case reference number is to be included to help track this case. *See* Comment to Rule 170 for further description of a case reference number.

A report on the disposition is to be sent to the Juvenile Court Judges' Commission. *See* 42 Pa.C.S. § 6309(d).

For dispositional hearing procedures, see Chapter Five.

REPORT

Proposed Amendment of Pa.R.J.C.P. 409

The Juvenile Court Procedural Rules Committee proposes the amendment of Rule 409 to change the outcome from "termination of jurisdiction" to "dismissal of petition" when the court finds the juvenile is "not in need."

In a delinquency proceeding, if a court's ruling on the offenses is that the juvenile did not commit the alleged offenses, the Juvenile Act requires the petition be dismissed. *See* 42 Pa.C.S. § 6341(a). Rule 408 tracks this legislatively mandated outcome. *See* Pa.R.J.C.P. 408(B)(1). If the court rules that the juvenile committed the alleged offenses, but the juvenile is not in need, the Juvenile Act requires the proceeding be dismissed. *See* 42 Pa.C.S. § 6341(b). In contrast, Rule 409 states that court shall enter an order terminating jurisdiction. *See* Pa.R.J.C.P. 409(A)(1)(a).

As mentioned, the Juvenile Act has two outcomes: 1) dismissal of the petition; and 2) dismissal of the proceeding. The Juvenile Act requires the delinquency petition to include both the alleged offenses and a statement that the juvenile is in need. *See* 42 Pa.C.S. § 6334(a)(1). Therefore, a failure to substantiate either requirement would result in dismissal of the petition, which then operates to dismiss the proceeding.

Within the Rules, there are two outcomes: 1) dismissal of the petition; and 2) termination of jurisdiction. Procedurally, there is no difference between a dismissal of a petition pursuant to Rule 408 and termination of jurisdiction pursuant to Rule 409 because the outcomes are the same: there is no adjudication of delinquency after consideration of the merits. *See also In Interest of Morrow*, 583 A.2d 816, 818 (Pa. Super. 1990) (jeopardy attached once testimony commenced at the adjudicatory hearing). Moreover, for purposes of expungement, the termination of jurisdiction is considered the same as a dismissed petition. *See* Pa.R.J.C.P. 170(A)(2) and Comment.

The Committee discussed concerns that "jurisdiction," as used in Rule 409, might be conflated with the use of

that term in other parts of the Rules. *See, e.g.*, Pa.R.J.C.P. 630. Accordingly, to resolve any ambiguity, the Committee proposes to amend Rule 409(A)(1)(a) to state that the petition shall be dismissed when the juvenile is found not to be in need.

The Committee invites all comments, concerns, and suggestions regarding this rulemaking proposal.

TITLE 246. MINOR COURT CIVIL RULES

PART I. GENERAL

CHAPTER 400. ENFORCEMENT OF JUDGMENTS RENDERED BY MAGISTERIAL DISTRICT JUDGES FOR THE PAYMENT OF MONEY

Rule 402. Request for Order of Execution. Entry of Judgment in Court of Common Pleas **or Philadelphia Municipal Court.**

A. Execution of a judgment for the payment of money rendered by a magisterial district judge may be ordered by a magisterial district judge in whose office the judgment was rendered or entered, provided the plaintiff files in that office

(1) not before the expiration of 30 days from the date the judgment is entered by the magisterial district judge, and

(2) within five years of that date,
a request for an order of execution.

B. The request form shall be attached to the order, return and other matters required by these rules.

C. The plaintiff may enter the judgment, for the purpose of requesting an order of execution thereon, in an office of a magisterial district judge other than that in which it was rendered only if levy is to be made outside the county in which the judgment was rendered and the office in which the judgment is entered for execution is that of a magisterial district judge whose magisterial district is situated in the county in which levy is to be made.

The plaintiff may enter the judgment in such other office by filing therein a copy of the record of the proceedings containing the judgment, certified to be a true copy by the magisterial district judge in whose existing office the judgment was rendered or by any other official custodian of the record.

D.(1) The plaintiff may enter the judgment in the court of common pleas in any county **or the Philadelphia Municipal Court**. When so entered, the indexing, revival and execution of the judgment shall be in accordance with procedures applicable in the court of common pleas **or the Philadelphia Municipal Court**.

(2) The judgment may be entered in the court of common pleas **or the Philadelphia Municipal Court** by filing with the prothonotary **or Philadelphia Municipal Court Administrator** a copy of the record of the proceedings containing the judgment, certified to be a true copy by the magisterial district judge in whose office the judgment was rendered or by any other official custodian of the record.

(3) The judgment may be entered in the court of common pleas **or the Philadelphia Municipal Court** after 30 days from the date the judgment is entered by the magisterial district judge. The judgment may not be entered in the court of common pleas **or the Philadelphia Municipal Court** after five years from the date the judgment is entered by the magisterial district judge.

(4)(a) Within 14 days of entering the judgment in the court of common pleas **or the Philadelphia Municipal Court**, the plaintiff shall file satisfactory proof of the entry of judgment with the magisterial district court that entered the judgment, and the magisterial district court shall vacate the judgment from its docket.

(b) If after 14 days of entering the judgment in the court of common pleas **or the Philadelphia Municipal Court**, the plaintiff fails to comply with subparagraph 4(a) of this rule, the defendant may file such proof with the magisterial district court that entered the judgment, and the magisterial district court shall vacate the judgment from its docket.

(5) Except as provided in [paragraphs] subparagraphs D(4) and D(6) of this rule, once the judgment is entered in the court of common pleas **or the Philadelphia Municipal Court** all further process must come

from [the court of common pleas] that court and no further process may be issued by the magisterial district judge.

(6) The magisterial district judge shall enter satisfaction on the docket of the magisterial district court proceedings upon the filing by any party in interest of a certified copy of the docket entries of the court of common pleas **or the Philadelphia Municipal Court** showing the judgment and satisfaction have been entered in [the court of common pleas] that court.

E.(1) As used in this rule, a judgment marked "expired" is a judgment that cannot be satisfied, revived, or vacated because the five-year period designated in Rule 402 has elapsed.

(2) If the plaintiff does not request an order of execution in a magisterial district court or enter the judgment in a court of common pleas **or the Philadelphia Municipal Court** within five years of the date the judgment was entered by the magisterial district judge, then the judgment shall be marked expired.

Official Note: The discretionary language used throughout paragraphs A, C and D is intended to reflect the various options available to the plaintiff for executing upon a judgment rendered by a magisterial district judge. In contrast, Rule 403A provides that "[u]pon the filing of the request form, the magisterial district judge. . . shall issue the order of execution thereon."

Under [subdivision] paragraph A of this rule, the execution proceedings are commenced by requesting an "order of execution." The request may not be filed before the expiration of 30 days after the date the judgment is entered by the magisterial district judge. This will give the defendant an opportunity to obtain a supersedeas within the appeal period. The request must be filed within five years of the date the judgment is entered by the magisterial district judge. No provision has been made for revival of a judgment in magisterial district court proceedings.

[Subdivision] Paragraph C provides for entering the judgment, for the purpose of requesting an order of execution, in an office of a magisterial district judge other than that in which the judgment was rendered when levy is to be made outside the county in which the judgment was rendered. *Compare* Pa.R.C.P. No. 3002.

As to [subdivision] paragraph D, *see* Section 1516 of the Judicial Code, 42 Pa.C.S. § 1516. The [30 day] 30-day limitation in the rule appears to be required by this Section. Certification by the magisterial district judge should not be done before the expiration of 30 days after the date of entry of the judgment. The only method available to renew a judgment would be to record the judgment in the [Prothonotary's] prothonotary's **or Municipal Court Administrator's** office prior to the expiration of the five-year period and then follow the applicable Rules of Civil Procedure for the revival of judgments. *See* Pa.R.C.P. No. 3025 *et seq.*; *see also* Phila. M.C.R. Civ.P. No. 126c. Also, [subdivision] paragraph D makes clear that when the judgment is entered in the court of common pleas **or the Philadelphia Municipal Court**, all further process shall come from [the court of common pleas] that court and that no further process shall be issued by the magisterial district judge except that the magisterial district judge shall enter on the magisterial district court docket vacating of

the judgment due to its entry at the court of common pleas **or the Philadelphia Municipal Court**, or proof of satisfaction of a judgment that had been entered in the court of common pleas **or the Philadelphia Municipal Court** and subsequently satisfied in that court. This exception is necessary so that procedures exist for entering satisfaction of all judgments with the magisterial district court, regardless of whether the judgment has been certified to and satisfied in the court of common pleas **or the Philadelphia Municipal Court**. A plaintiff filing a judgment in the court of common pleas **or the Philadelphia Municipal Court** is required to file satisfactory proof of the entry of judgment with the magisterial district court that entered the judgment, and the magisterial district court will then vacate its judgment. This step ensures that only the enforceable common pleas **or Philadelphia Municipal Court** judgment will be reportable as an outstanding liability of the defendant.

[**Subdivision**] Paragraph E provides that a judgment shall be marked expired if the plaintiff does not request an order of execution in a magisterial district court or enter the judgment in a court of common pleas **or the Philadelphia Municipal Court** within five years of the date the judgment was entered by the magisterial district judge. Limiting the time period for entry of the judgment to five years will give a plaintiff sufficient time to act without indefinitely penalizing a defendant.

REPORT

Proposed Amendment of Pa.R.C.P.M.D.J. No. 402

Entry of Judgment

I. Introduction

The Minor Court Rules Committee (“Committee”) is planning to propose to the Supreme Court of Pennsylvania the amendment of Pa.R.C.P.M.D.J. No. 402. This rule addresses entry of judgment in a magisterial district court or a court of common pleas. The Committee is proposing to (A) clarify the procedure for a request for an order of execution that will take place outside the county where the magisterial district court judgment was rendered, and (B) add the Philadelphia Municipal Court as an additional court where a magisterial district court judgment may be entered.

II. Discussion

(A) Request for an Order of Execution

The Committee has received inquiries in recent years regarding a magisterial district judge’s authority to reject a request for an order of execution that will take place outside the county where the judgment was rendered (*i.e.*, out-of-district execution), and, instead, require the plaintiff to go directly to a magisterial district court in the other county to pursue execution.

Pa.R.C.P.M.D.J. No. 402A currently provides:

Execution of judgment for the payment of money rendered by a magisterial district judge may be ordered by a magisterial district judge in whose office the judgment was rendered or entered provided the plaintiff files in that office

(1) not before the expiration of 30 days after the date the judgment is entered by the magisterial district judge, and

(2) within five years of that date,
a request for an order of execution.

In contrast, Pa.R.C.P.M.D.J. No. 402C provides:

A plaintiff may enter the judgment, for the purpose of requesting an order of execution thereon, in an office of a magisterial district judge other than that in which it was rendered only if levy is to be made outside the county in which the judgment was rendered and the office in which the judgment is entered for execution is that of a magisterial district judge whose magisterial district is situated in the county in which levy is to be made.

The Committee was advised that some magisterial district courts have interpreted the discretionary language in Rules 402A and C as permitting a magisterial district court to reject a request for an order of execution that will take place outside the county where the judgment was rendered, and require the plaintiff to file the request in the other county. The Committee disagrees with this interpretation of the rule, and is of the opinion that the discretionary language used in Rules 402A and C is for the sole benefit of the plaintiff to elect where to enter the judgment for execution.

(B) Philadelphia Municipal Court

Currently, Rule 402 provides, among other things, that a plaintiff may enter a judgment rendered by a magisterial district court in the court of common pleas of any county. *See* Rule 402D(1). When entered in the court of common pleas, the judgment is subject to the indexing, revival and execution procedures applicable in the court of common pleas. *Id.* Entering a judgment in the court of common pleas, and submission of proof thereof to the magisterial district court, has the effect of vacating the underlying magisterial district court judgment, so that only one judgment remains in effect for execution purposes. *See* Rule 402D(4).

While reviewing Rule 302 (pertaining to venue) on a separate matter, a Committee member observed that the venue rule specifically permits the transfer of cases to and from the Philadelphia Municipal Court, while the rule on entry of judgments limits transfers to a magisterial district court or a court of common pleas. The Committee agreed that permitting entry of judgments in the Philadelphia Municipal Court would be useful to litigants, and discussed amending Rule 402 to add the Philadelphia Municipal Court as a court where a magisterial district court judgment may be entered.

The Philadelphia Municipal Court Rules of Civil Procedure permit entry of judgments from other courts: “[j]udgments of other Pennsylvania jurisdictions within the jurisdictional amount of this court may be transferred to this court by filing a certified copy of all the docket entries in the action and a certification of the amount of judgment or a certified copy of the transcript of the judgment.” *See* Phila.M.C.R.Civ.P. No. 125a. Judgments entered in Philadelphia Municipal Court are treated in the same manner as judgments entered in the Court of Common Pleas of Philadelphia County.

Judgment recovered in the Philadelphia Municipal Court shall be a lien upon property in the same manner and to the same extent that judgment recovered in the Court of Common Pleas of Philadelphia County is a lien. All such judgments shall be indexed in the judgment index or indices of Philadelphia County in the same manner as judgments of the court of common pleas are indexed.

42 Pa.C.S. § 1124. With regard to judgments of magisterial district courts, 42 Pa.C.S. § 1516, referenced in the Official Note to Rule 402, provides:

[a] judgment of a magisterial district judge shall not operate as a lien on real property until a transcript of the record showing a final judgment of a magisterial district judge has been filed in the manner prescribed by general rules in the office of the clerk of the court of common pleas of the county where the property is situated, or in the office of the clerk of the branch of the court of common pleas embracing such county.

42 Pa.C.S. § 1516.

The Committee did not find that these provisions prohibit entry of magisterial district court judgments in the Philadelphia Municipal Court. The Committee agreed that permitting entry of judgments in the Philadelphia Municipal Court would achieve consistency between the courts, and provide litigants with an additional venue to initiate the judgment enforcement process. Accordingly, the Committee agreed to add references to the Philadelphia Municipal Court in Rule 402, as well as to add references to the Philadelphia Municipal Court and a procedural rule of that court to the Official Note.

III. Proposed Changes

The Committee plans to propose an amendment to the Official Note to Rule 402 to clarify that the discretionary language used in paragraphs A, C and D is intended to reflect the options available to the plaintiff, and contrast those paragraphs with Rule 403A, which provides that “[u]pon the filing of the request form, the magisterial district judge . . . shall issue the order of execution thereon.”

The Committee also plans to propose the amendment of Rule 402 to add references to the Philadelphia Municipal Court throughout paragraphs D and E of the rule. The Committee will also propose amending the Official Note to add references to the Philadelphia Municipal Court, as well as a pertinent reference to Phila.M.C.R.Civ.P. No. 126c.

The Committee will also propose minor stylistic changes throughout Rule 402.

RULES AND REGULATIONS

Title 52—PUBLIC UTILITIES

PENNSYLVANIA PUBLIC UTILITY COMMISSION

[52 PA. CODE CHS. 61 AND 67]

[L-2015-2498111]

Steam Heat Distribution System Safety Regulations

The Pennsylvania Public Utility Commission, on August 3, 2017, adopted a final rulemaking order to amend its existing steam heating service regulations and provide new steam safety requirements.

Executive Summary

Section 1501 of the Public Utility Code requires every public utility in Pennsylvania to “maintain adequate, efficient, safe, and reasonable service and facilities” and to “make all such repairs, changes, alterations, substitutions, extensions, and improvements in or to such service and facilities as shall be necessary or proper for the accommodation, convenience, and safety of its patrons, employees, and the public.” 66 Pa.C.S. § 1501. Pursuant to that authority and Section 501 of the Public Utility Code, 66 Pa.C.S. § 501, the Pennsylvania Public Utility Commission (Commission or PUC) has amended and added safety regulations governing steam heat distribution facilities of steam utilities under the Commission’s jurisdiction.

The Commission adopted these regulations to facilitate safety inspections of steam utilities by the PUC’s Pipeline Safety Division. The regulations modernize and update the accident reporting regulations similar to recently revised regulations for electric, gas, and water utilities. The regulations add requirements for notification of major construction, operating and maintenance plans, customer education, recordkeeping, employee training, periodic inspections, steam leaks and emergency reports, welding, and service outage reports. The regulations also emphasize that steam utilities must adhere to Pennsylvania One Call (the Underground Utility Line Protection Act) and comply with standard safety codes.

Final Rulemaking Order

By the Commission:

By Order entered November 5, 2015, the Pennsylvania Public Utility Commission (Commission) issued a Proposed Rulemaking Order to amend and expand its steam heating service regulations in Chapter 61 of the Pennsylvania Code. See 52 Pa. Code §§ 61.1—61.31. Pursuant to its authority and duty under the Public Utility Code, 66 Pa.C.S. §§ 501, 1501, the Commission proposed revisions and updates to Sections 61.1, 61.11, and 61.12. The Commission proposed adding a new subchapter titled “Safety Requirements,” adding Sections 61.41—61.53. The Commission also proposed minor revisions to Chapter 67

to apply the service outage regulations to jurisdictional steam distribution companies.

Comments to the Proposed Rulemaking Order were filed by NRG Energy Center Harrisburg LLC and NRG Energy Center Pittsburgh LLC (collectively the “NRG Companies”), Veolia Energy Philadelphia, Inc. (“VEPI”) and the Independent Regulatory Review Commission (“IRRC”). The Commission has reviewed those comments and now issues this Final Rulemaking Order.

Background

The Commission first promulgated the current regulations governing steam heating service on March 11, 1946. See 52 Pa. Code §§ 61.1—61.27, 61.31. The Commission promulgated Section 61.28 regarding the filing of annual financial reports on May 7, 1988. See 18 Pa.B. 2106; see 52 Pa. Code § 61.28. Otherwise, Chapter 61 governing steam heating service has not been revised or amended. The Commission maintains jurisdiction over only a few steam heating utilities: the aforementioned NRG Companies and VEPI. Due to the low number of jurisdictional steam utilities and the perception of fewer risks and dangers presented in the regulation of steam than in the regulation of gas, the Commission historically retained very few staff and inspectors to oversee the few steam utilities operating in the Commonwealth.

While steam distribution systems present fewer dangers than natural gas distribution systems, accidents and incidents can still occur. For example, on July 18, 2007, a 20-inch diameter steam pipeline owned and operated by the Consolidated Edison Company of New York, Inc. (Con Ed) ruptured in Midtown Manhattan in New York City, where escaping steam broke through the pavement, creating a large crater at a busy intersection.¹ The rupture also impacted surrounding telecommunications facilities and natural gas and electric transmission and distribution facilities. The New York Public Service Commission (NYPSC), which regulates jurisdictional steam corporations in New York, determined that Con Ed’s procedures did not adequately address the regulatory requirements of 16 NYCRR 420.4(b)(5). See N.Y. PUB. SERV. LAW § 80 (general powers of the NYPSC as to steam heating). Therefore, the NYPSC identified a number of recommendations for improvement by Con Ed to its procedures, inspections, system surveillance, training, facility repairs, and feasibility analyses.²

State representatives of the Pennsylvania General Assembly, understanding that the Commonwealth has similar steam pipelines and facilities, asked the PUC’s Gas Safety Division, now the Pipeline Safety Division, to spearhead inspections of steam heat facilities in Pennsylvania. Three PUC Pipeline Safety inspectors began steam training in 2009, first attending a week-long training with Con Ed in New York City. In 2010, three PUC Pipeline Safety staff began attending IDEA (International District Energy Association) training on a semi-yearly to yearly basis. This international training broadly covers all topics and facets of steam distribution.

The Commission’s Pipeline Safety Division created a steam inspection form, based in significant part on New

York's steam distribution system safety regulations. See 16 NYCRR 420.1—420.15. Accordingly, the Commission sought in the Proposed Rulemaking Order to memorialize the requirements provided in the steam inspection form through the promulgation of steam heat safety regulations.

In the spirit of the Regulatory Review Act, 71 P.S. 745.2, and in order to facilitate the regulatory review process, Commission staff informally proposed draft regulations outside the regulatory review process and discussed those draft regulations with company representatives of the NRG Companies and VEPI. Commission staff held numerous collaborations and discussions with NRG and VEPI.

Discussion

As stated in the November 15, 2015 Proposed Rulemaking Order, the Commission embarked on this rulemaking proceeding in order to modernize and update its existing steam heat regulations and to add steam heat safety regulations to empower the PUC's Pipeline Safety Division to conduct inspections of jurisdictional steam distribution facilities for the purpose of ensuring public safety and protecting the public interest. Section 1501 of the Public Utility Code requires every public utility in Pennsylvania to "maintain adequate, efficient, safe, and reasonable service and facilities" and to "make all such repairs, changes, alterations, substitutions, extensions, and improvements in or to such service and facilities as shall be necessary or proper for the accommodation, convenience, and safety of its patrons, employees, and the public." 66 Pa.C.S. § 1501. Pursuant to this authority and the Commission's power to promulgate regulations, 66 Pa.C.S. § 501(b), and the Commonwealth Documents Law, 45 P.S. § 1201, the Commission proposed steam heat safety regulations in order to prescribe the minimum safety requirements for the design, fabrication, installation, inspection, testing, operation, and maintenance of steam distribution systems in the Commonwealth of Pennsylvania.

As stated previously, the only active jurisdictional steam public utilities are the NRG Companies and VEPI, as those entities invoke public utility status by "distributing or furnishing . . . steam . . . to or for the public for compensation." See 66 Pa.C.S. § 102. Notably, in the future the Commission and the Pipeline Safety Division may uncover other steam facilities in the Commonwealth that distribute steam to or for the public for compensation and therefore require a certificate of public convenience from the Commission in order to legally operate. See 66 Pa.C.S. §§ 1101—1103.

Accordingly, the Commission regulates the distribution facilities of jurisdictional steam public utilities. 66 Pa.C.S. §§ 102, 501. The Commission does not have safety jurisdiction over steam distribution companies that do not qualify as public utilities under the Public Utility Code. As to the production of steam, the Pennsylvania Department of Labor & Industry retains legal authority and regulatory oversight by conducting the inspections of the boilers³ that produce the steam. 35 P.S. § 1331.1; see 34 Pa. Code §§ 3a.1—3a.171.

In the Proposed Rulemaking Order, the Commission proposed specific revisions and additions to Chapter 61 and Chapter 67 of its regulations.

³ A boiler is a closed vessel where water is heated or where steam is generated or superheated or any combination thereof, under pressure or vacuum for external use through the direct application of heat from the combustion of fuels or from electricity. A boiler includes fired vessels for heating or vaporizing liquids other than water where those vessels remain separate from processing systems. 35 P.S. § 1331.2 (providing further definitions for specific types of boilers, heaters, and associated equipment).

Revisions to Existing Sections 61.1, 61.11, and 61.12.

Section 61.1 Definitions

As stated in the Proposed Rulemaking Order, the proposed amendment to the definition of service line reflects a more specific, modern definition, and explains that the "point of service termination is the customer's property line, unless otherwise provided by contract." See Annex A, Section 61.1. We proposed deleting the distinctions between low pressure and high pressure, as those archaic distinctions are not very helpful in the steam distribution industry as pressures utilized by companies differ and vary on a wider spectrum. Pressures can range from 100 pounds per square inch gauge (psig) to 210 psig, depending on the system and the company. We also proposed amending the definition for service line of the customer to stress and clarify the importance of the specific service line termination point and not just the general service line. See Annex A, Section 61.1.

Comments from VEPI and IRRC and Resolution

VEPI proposed two additional definitions for "steam distribution system" and "steam utility" to distinguish between distribution system safety and general plant or facility safety. IRRC recommended adding a definition for "termination point" to be used in the definitions of "service line" and "service line of the customer." IRRC also recommended that the Commission should clarify the terms "steam public utility," "steam utility," "utility," "steam facility," "facility," "steam distribution system," and "steam distribution utility" as the terms appear to be used interchangeably.

We agree with suggestions of VEPI and IRRC and have made the appropriate changes in new Annex A. Specifically, we use the term "steam utility" throughout the regulations.

Section 61.11 Accidents

On September 23, 2011, the Commission entered a Final Rulemaking Order pertaining to public utilities' service outage response and restoration practices. See Docket L-2009-2104274 (Final Rulemaking Order entered Sep. 23, 2011); see 14 Pa.B. 4511 (effective Jan. 7, 2012). In that Final Rulemaking Order, the Commission modernized and revised the accident regulations for electric, gas, and water utilities. See *id.* at 7-25, Annex A (revising Section 57.11 for electric, Section 59.11 for gas service, and Section 65.2 for water service). However, we did not update the relevant section, 52 Pa. Code § 61.11, for steam utilities. Therefore, through this comprehensive rulemaking to modernize and update our steam heat distribution regulations, we proposed similar changes to Section 61.11, as currently exist in Sections 57.11, 59.11, and 65.2 of our regulations. Since IRRC approved these changes in 2011, the Commission sought in the Proposed Rulemaking Order comments on whether it should apply similar proposed revisions in our steam heat regulations.

We inserted the word "steam" in the existing Section 61.11(a) for clarity purposes. See Annex A, Section 61.11(a). We proposed revising Section 61.11(b)(2) regarding reportable accidents to reflect the existing language in the relevant electric, gas, and water regulations. We proposed revising Section 61.11(b)(3) to reflect the property damage provisions in Sections 57.11 and 59.11 of the electric and gas regulations. See Annex A, Section 61.11(a) (mirroring the \$50,000 market value proper damage requirement). We proposed adding Section 61.11(b)(5) for steam facilities to mirror Section 59.11(b)(4) regarding the emergency shutdown of a liquefied natural gas facility. See Annex A, Section 61.11(b)(5).

In 2011, we modernized our regulations to account for potential physical or cyber-attacks that cause an interruption of service or over \$50,000 in damages, or both. Here, we proposed a similar provision for our steam regulations. See Annex A, Section 61.11(b)(6).

As in our existing electric, gas, and water regulations, we proposed an exception for reporting due to injuries suffered as a result of a motor vehicle accident with utility facilities unless a vehicle involved in the accident is owned by the utility or driven by a utility employee while on duty. See Annex A, Section 61.11(c).

The existing Section 61.11(c) provides for telegraphic reports. The term “telegraph” is antiquated and out of common parlance. In light of this and the fact that proposed Section 61.11(e) provides for written reports, we proposed deleting this section. Instead, we proposed requirements for telephone reports using similar language found in our electric, gas, and water regulations. See Annex A, Section 61.11(d).

As for written reports, we proposed adding similar requirements that are currently found in our existing electric, gas, and water regulations. Written reports will need to be made on the Form UCTA-8 within 30 days of the occurrence of a reportable accident. At a minimum, the accident report form will need to include: (1) the name of the steam utility; (2) the date of the reportable accident; (3) the date of the report; (4) the location of the reportable accident; (5) the name, age, residence, and occupation of injured or deceased persons; (6) a general description of the reportable accident; and (7) the name and telephone number of the reporting officer. See Annex A, Section 61.11(e).

In the same vein as our electric, gas, and water regulations, in this Section we proposed adding Section 61.11(f) providing for the availability of UCTA-8 forms on the Commission’s web site and Section 61.11(g) explaining that reporting requirements may not be limited to the requirements of Section 61.11. See Annex A, Section 61.11(f)-(g); see also 52 Pa. Code §§ 57.11(f)-(g), 59.11(f)-(g), 65.2(f)-(g).

Comments from VEPI and Resolution

VEPI suggests changing the use of “may” in Section 61.11(c) to “shall” so that the steam utility clearly understands what type of injuries do not need to be reported. We agree with VEPI’s suggestion and have made the appropriate changes in new Annex A. We have also changed the word “may” to “shall” in other appropriate sections of the new Annex A.

Section 61.12 Interruptions of service

Here, we proposed inserting the word “steam” in the existing Section 61.12(a) for clarity purposes. See Annex A, Section 61.12(a). Section 61.12 is very similar to the gas regulation in Section 59.12, except that Section 59.12 does not require records of interruptions of service be kept for six years. However, Section 59.45 in our gas regulations requires a natural gas distribution utility to keep records of service interruptions for five years. See 52 Pa. Code § 59.45 (item number 65). Therefore, we requested comments as to the appropriate duration for recordkeeping of a steam utility regarding interruptions of service.

Comments from VEPI and Resolution

VEPI suggests that maintaining records for 3 years is more reasonable than 6 years, and VEPI notes that 3 years is consistent with the record-keeping requirements under Section 61.42 and Section 61.49. We agree in part

with VEPI’s suggestion and have made the appropriate change. Specifically, we have changed the record retention requirement to 5 years.

New Safety Requirements Regulations: Sections 61.41—61.53

The Commission modeled some of these proposed safety regulations on New York’s existing regulations, but made adjustments to reflect the current best practices and modern standards in the existing steam distribution industry in the Commonwealth. See 16 NYCRR 420.1—420.15.

Section 61.41 Purpose and Policy

In Section 61.41(a), the Commission explains the purpose of these steam distribution safety regulations: “to prescribe the minimum safety requirements for the design, fabrication, installation, inspection, testing, operation, and maintenance of steam distribution systems in the Commonwealth of Pennsylvania.” See Annex A, Section 61.41(a); see 61.41(b) (requiring steam public utilities to adhere to the requirements of this section). Section 61.41(c) clearly provides the Commission with the power to inspect the distribution systems of steam utilities. Section 61.41(d) explains that this section does not apply to the generation, production, or piping steam downstream of the customer’s property line.

Comments from IRRC and Resolution

IRRC notes that based on the definitions in Section 61.1, the termination point may be the property line or a point provided by contract. Accordingly, IRRC suggests that the Commission should either add a definition of “termination point” or amend this subsection to include the possibility that the point is described in contract. To address IRRC’s concern, we have added a definition for “Customer’s Piping” in Section 61.1 which both clarifies and eliminates an additional definition or amendment.

Section 61.42 Safety and compliance with standard code

Similar to the Commission’s gas regulations at 52 Pa. Code § 59.33, we proposed Section 61.42(a) explaining that a steam utility “shall at all times use every reasonable effort to properly warn and protect the public from danger, and shall exercise reasonable care to reduce the hazards to which employees, customers, and others may be subjected to by reason of its equipment or facilities.” See Annex A, Section 61.42(a). In order to ensure that steam companies keep up with best practices and the most updated and applicable standards of the American Society of Mechanical Engineers (ASME), we proposed Section 61.42(b) requiring steam utilities to comply with standard code. See Annex A, Section 61.42(b). Here, we also proposed providing the Commission with the discretion to determine whether a particular redesign, repair, modification, or replacement of a facility constitutes a new facility subject to these regulations and thus subject to the latest ASME standards. Annex A, Section 61.42(b). Generally, if a grandfathered facility is substantially redesigned, repaired, or replaced, we required the updated facility to conform to the latest governing code standards. The steam utilities may informally consult with Commission staff as to any questions on what may or may not constitute a redesign, repair, replacement, or modification.

Here, we also required steam utilities to adhere to the Underground Utility Line Protection Act (“PA One Call” or “Act 287”). See 73 P.S. § 176; see Annex A, Section 61.42(c). PA One Call requires underground facility owners, including public utilities, to become members of the

One Call System, a Commonwealth-wide communication system that provides a single nationwide toll-free telephone number or 811 number for excavators, designers, or other persons covered by Act 287 to call facility owners and notify them of their intent to perform excavation, demolition, or similar work. 73 P.S. §§ 176-177.

Similar to our gas regulations, 52 Pa. Code § 59.33(d), we proposed Section 61.42(d), explaining that a steam utility shall be subject to enforcement and inspections of its facilities, books, and records. As in the gas regulations at 52 Pa. Code § 59.33(e), we proposed Section 61.42(e), requiring a steam utility to keep adequate records to assure compliance with this subsection. We proposed this recordkeeping requirement for three years. See Annex A, Section 61.42(e).

Comments from IRRC and Resolution

As to subsection (a), IRRC suggests deleting the word “every.” As to subsection (b), IRRC seeks clarification as to the standards for existing facilities and the possible difficulty for utility compliance. In subsection (c) and (e) respectively, IRRC suggests that the reference to “PA One Call” is premature as the legislation for PUC enforcement is still pending in the state legislature and that the term “adequate records for compliance” is vague.

We agree with IRRC in part. First, we have deleted the word “every” from subsection (a). As to the standards for existing facilities, we will rely upon the applicable standards of the ASME. As to the vagueness of the term “adequate records for compliance,” we are confident that the small number of steam utilities combined with their expressed willingness of cooperation will enable the Commission to obtain the necessary records for determining compliance.

We have also added a subsection (f) to define the applicability of this regulation. As to the reference to “PA One Call,” we note that at this point, there is proposed legislation that may be enacted before the effective date of this regulation. Notwithstanding, we do not believe it is a prerequisite for the Commission to have enforcement responsibility for “PA One Call.” Finally, we point out that we have been working very closely with the NRG Companies and VEPI before and after the drafting of these regulations and it is the firm opinion of the NRG Companies and VEPI that specifying the records for compliance at this point would not be in the Commission’s best interest.

Section 61.43 Notification of major construction

Similar to the Commission’s gas regulations at 52 Pa. Code § 59.38, we proposed requiring the steam utility to notify the Commission and the Commission’s Gas Safety Division of proposed major construction, reconstruction, or maintenance at least 30 days in advance of commencing work. Similar to the gas regulation, we defined major work as a single project involving more than \$300,000 in expenses or more than 10% of the cost of the utility’s plant in service, whichever is less. See Annex A, Section 61.43. We sought comment on whether this is an appropriate definition for major construction. Similar to the gas regulation, we proposed requiring the notification of construction to include (1) description and location of proposed work; (2) type of facility involved; (3) estimated starting date; (4) estimated completion date; (5) design pressure; (6) estimated cost; (7) name and address of reporting steam company; (8) contact information for person in charge of the project; and (9) notification to the Commission of the completion date. Annex A, Section 61.43; see also 52 Pa. Code § 59.38.

Comment from IRRC and Resolution

IRRC suggests that Paragraph 9 “Notification to the Commission of the completion date” should be restated. We agree with IRRC and have eliminated Paragraph 9 and created a subsection (B) which provides the necessary clarification. With consultation and agreement from the NRG Companies and VEPI, we have created a \$250,000 threshold for notification of major construction.

Section 61.44 Operating and maintenance plan

In Section 61.44, we proposed requiring steam utilities to establish and file with the Secretary of the Commission and the Gas Safety Division a detailed, written operating and maintenance plan. See Annex A, Section 61.44(a). We listed the minimal requirements for this plan, including (1) detailed instructions for employees, (2) welding procedures, (3) procedures for reporting and investigating steam leaks, (4) procedures to correct deficiencies, (5) procedures for facility surveillance, (6) a list of qualified utility employees, and (7) steam distribution system turn-on procedures. See Annex A, Section 61.44(b). We required the steam utility to adhere to these operating procedures and maintenance plan filed with the Commission. See Annex A, Section 61.44(c). Revisions to the plan would need to be submitted at least 30 days in advance of the effective date of those revisions. See Annex A, Section 61.44(a).

Comments from VEPI and IRRC and Resolution

VEPI and IRRC both requests that the Commission specify and exact date by which the plan is required to be in place and VEPI and IRRC both request clarification as to whether “the plan” in the last sentence of Subsection (a) refers to the original plan, or if it is referring to subsequently revised plans. We have provided an exact date and the necessary clarification.

Section 61.45 Security planning and emergency contact list

At the outset, we noted that Chapter 101 of our regulations requires a steam utility to develop and maintain four written plans: (1) physical security plan, (2) cyber security plan, (3) emergency response plan, and (4) business continuity plan. 52 Pa. Code §§ 101.2—101.3. Therefore, we noted in this section that steam utilities shall adhere to the requirements of Chapter 101. See Annex A, Section 61.45(a).

Under Chapter 101, an emergency response plan must, at a minimum, include: (1) identification and assessment of the problem, (2) mitigation of the problem in a coordinated, timely, and effective manner, and (3) notification to appropriate emergency services and officials. 52 Pa. Code § 101.3(a)(4)(i)—(iii). Additionally, within its Chapter 101 emergency response plan, we proposed requiring a steam utility to also specifically provide procedures to establish: (1) the availability of necessary personnel, equipment, tools, and materials at the scene of an emergency, (2) an action plan that protects people first and then property, (3) emergency facility shutdown protocols, (4) safety protocols, and (5) safety service main or outage restoration protocols. See Annex A, Section 61.45(b).

We also required a steam utility to file with the Commission and the Gas Safety Division each January a list of the utility’s responsible officials for contact during an emergency. See Annex A, Section 61.45(c). The steam utility would serve this list on affected municipalities and immediately report revisions of this list to those municipalities and to the Commission. See id.

Comments from IRRC and Resolution

IRRC questions the need to require annual reporting of the list of the utility's responsible officials to both the Commission's Secretary and the Gas Safety Division. IRRC also questions the filing of any revisions to the list on just the Gas Safety Division. While we appreciate IRRC's concern, we will respectfully continue our long-standing practice of dual reporting which has been agreed to by both the NRG Companies and VEPI. As to the revisions, we prefer that the revisions be reported solely to the now Pipeline Safety Division, which has an immediate need for updated information.

Section 61.46 Customer education and information program

We proposed requiring a steam utility to maintain customer and education programs through the use of media that sufficiently and comprehensively reaches, to the extent possible, all customers in the particular service territory. See Annex A, Section 61.46(a)-(b). We required a steam utility to file with the Commission and Gas Safety Division each January a current description of its customer education and information program, including the means of implementation and any samples of descriptive literature and other educational aids. See Annex A, Section 61.46(c).

Comment from IRRC and Resolution

IRRC suggests that this requirement is vague and should be replaced with a specific standard. As stated previously, the Commission has worked closely with the NRG Companies and VEPI. Both have indicated agreement with the requirement and all agree that flexibility is crucial. If experience indicates that specific standards in the form of binding regulations are required, we can revisit this issue in the future.

Section 61.47 Employee training

Here, we proposed requiring every employee and supervisor of a steam utility to receive and complete annual training at sufficiently progressive levels to ensure the safe implementation of all the procedures required in this subchapter on Safety Requirements. See Annex A, Sections 61.47(a). Before on-the-job training in field operations, new employees shall receive basic classroom training. See Annex A, Section 61.47(b).

Comments from IRRC and Resolution

IRRC has raised concerns regarding employee training. According to IRRC, Subsection (a) is vague regarding the training progression level. IRRC also is concerned about the subjects in which employees and supervisors must receive annual training. Finally, IRRC questions whether it is reasonable and appropriate for all employees in the operations, maintenance and testing to receive training at all progression levels.

In general, it is Commission's position that each employee is required to be qualified on the specific tasks as defined in the steam utilities comprehensive Operator Qualification Program. The level of training that the employees receive must qualify them to perform cover tasks that they are assigned. However, in response to IRRC's concern, we have clarified the category of new employees that should receive basic classroom training.

Section 61.48 Periodic inspections

In this section, we proposed requiring a steam utility to inspect steam traps and piping assemblies for general condition at least three times each calendar year, as we understand that this would be practicable and in align-

ment with best practices. We sought public comment on whether this requirement is sufficient.

Similar to the New York regulations, we also proposed mandatory checking of blow-off valves for operability immediately prior to closing each associated main valve during a scheduled shutdown of a section of the steam distribution pipeline system. We also proposed inspections of accessible expansion joints at least twice annually. See Annex A, Section 61.48(b)-(c); see 16 NYCRR 420.8(b)-(c).

We also proposed annual inspections of service valves and manholes owned by the steam utility. See Annex A, Section 61.48(d)-(e). Finally, we proposed requiring the inspection and testing of remote system pressure indicating devices every two years. See Annex A, Section 61.48(f).

Comments from NRG Companies and IRRC and Resolution

Both the NRG Companies and IRRC expressed concerns with the requirement of three inspections per year. The NRG Companies and IRRC both suggest one inspection of the steam traps and piping assemblies. We agree with the NRG Companies and IRRC and have changed the inspection requirement to once a year.

Section 61.49 Records

Here, we required a steam utility to maintain records documenting inspections, maintenance, tests, and all other matters required by this chapter for at least three years. Those records would be kept on file and readily available to Commission staff. See Annex A, Section 61.49. This provision is similar to the Commission regulation governing gas safety. See 52 Pa. Code § 59.33(e).

In light of Section 61.12 of our existing regulations (requiring service interruption records for six years) and proposed Section 61.42(e) (requiring records demonstrating compliance with safety codes for three years), we sought comment on whether any of these recordkeeping requirements are duplicative or whether we need to break out and specify different recordkeeping requirements for different subject areas, as in our gas regulations. See 52 Pa. Code § 59.45 (Preservation of records).

Comments from IRRC and Resolution

IRRC has raised two questions: Is the steam utility required to keep an extra copy of its records and is the steam utility required to have offices in Pennsylvania? We agree with IRRC's suggestion and have deleted both the reference to "copies" and "in the Commonwealth of Pennsylvania." In response to IRRC's subsequent comment concerning record retention, we will change the time frame for record retention to 5 years throughout the regulation.

Section 61.50 Welding—qualification and nondestructive testing

In this section, we required the performance of welding in accordance with the latest standards of the American Society of Mechanical Engineers. See Annex A, Section 61.50(a). We required nondestructive testing of inaccessible field welds and new pipeline testing at system pressure. See Annex A, Section 61.50(b). New construction pipelines shall be pressure tested to 1.5 times the maximum allowable operating pressure. See Annex A, Section 61.50(c). Ten percent of all field welds on existing steam pipeline facilities shall be subject to random nondestructive testing. The results of this testing would determine the test rates in future years, decreasing or increasing the test rate based on results of the prior year. See Annex A, Section 61.50(d).

Comments from the NRG Companies, VEPI and IRRC

Noting the comments from the NRG Companies and VEPI, IRRC suggests that the Commission should review those comments and clarify the regulation to clearly state what types of testing are acceptable. IRRC also recommended that the Commission should explain why the testing required by the regulation is the best alternative.

After further consultation with the NRG Companies and VEPI, we have clarified this subsection by deleting the pressure testing requirement for new construction pipelines. We have also clarified the requirement for field welds and we have added a limitation on pressure tests.

Section 61.51 Steam leaks and steam emergency reports

Since emergency leaks “require an immediate response to protect life and property” we proposed requiring that those leaks “shall be worked continuously until repairs are completed or until the condition is no longer hazardous.” See Annex A, Section 61.51(a). We explained that emergency leaks are those that could cause property damage or personal injury or any leak which, in the judgment of the operating personnel at the scene, is regarded as potentially hazardous. See *id.* Notably, emergency leaks could be caused by forces outside of the steam distribution system, such as water main breaks, flooding, earthquakes, or other serious weather events.

In order to discern emergency leaks from nonemergency leaks, we explained that nonemergency leaks are those that are “not immediately hazardous at the time of discovery and can be reasonably expected to remain that way.” See Annex A, Section 61.51(b). Therefore, we proposed that those nonemergency leaks need not be confronted immediately, but must be reexamined within six months from the date of discovery, and repaired within a reasonable time. See Annex A, Section 61.51(b). We understand that many steam leaks are very minor and nonhazardous, similar to a faucet of dripping water. Unlike minor gas leaks, which present imminent danger, minor steam leaks may not necessarily require immediate confrontation and repair. However, we stressed to the steam utilities that these minor leaks shall be recorded, confronted, and repaired within a reasonable time, as even minor leaks, nonhazardous at discovery, could eventually become more hazardous over time. See Annex A, Section 61.51(c). Therefore, we proposed requiring a steam utility to identify all leaks, compile a written report of each emergency and nonemergency steam leak, and keep an event log on record. See Annex A, Section 61.51(c)—(e). The event log shall contain (1) the location of leak or emergency; (2) the time the report is first received; (3) description as to type of leak or emergency; (4) the time personnel are first dispatched to location; (5) the time of arrival of personnel at location; and (6) the times of dispatch and arrival of any additional personnel called to the location. See Annex A, Section 61.51(e).

Finally, we proposed that a steam utility shall have available for inspection by the Commission’s Gas Safety Division, on or before the 16th day of each calendar month, a summary analysis of its performance in responding to reports of steam leaks and emergencies. See Annex A, Section 61.51(f).

Comments from the NRG Companies, VEPI and IRRC

In reviewing Section 61.44(4), which relates to an operating and maintenance plan, and subsection (b), which requires non-emergency leaks to be re-examined within 6 months from the date of discovery and repairable within a reasonable time, IRRC raises a concern as to whether these are two different standards for one type of

leak? IRRC also requests an explanation as to what constitutes a “summary analysis.” The NRG Companies suggests that the date of the 16th of the month for the summary analysis of steam leak reports be changed to the end of the month to better coincide with normal company reporting procedures. VEPI raises a question concerning the extent of vaporization.

In response to IRRC’s concern, we note that Section 61.44 specifically relates to required written operating and maintenance plans. As to the content of the “summary analysis” of the steam utilities performance in responding to reports of steam leaks and emergencies, we are expecting the steam utility to provide basic information that enables the Commission to access their overall performance. Simply stated, we are requesting a summary of the steam utilities’ performance in responding to reports of steam leaks and emergencies. However, for clarification, we have deleted the word “analysis” and in response to a subsequent comment from IRRC concerning the time frame for record retention, we have added a 5-year requirement.

As to the NRG Companies and VEPI concerns, we have changed the date for the summary analysis from the 16th of the month to the end of the month and we have added a subsection that addresses vaporization.

Section 61.52 Facility failure investigation

Similar to New York’s regulation, 16 NYCRR 420.14, we proposed requiring each steam utility to establish procedures to analyze each failure that causes injury or damage in order to determine the cause and minimize the possibility of recurrence. See Annex A, Section 61.52(a). These procedures would need to provide for the selection of samples of the failed facility or equipment for laboratory examination, as necessary. See *id.* The steam utility shall fully cooperate with Commission staff and any necessary independent consultants regarding the testing or surveying of any facilities or equipment deemed potentially attributable to the facility failure or accident. See Annex A, Section 61.52(b). During meetings between PUC staff and steam company representatives, the question of what constitutes a “facility failure” arose. We found consensus in determining that a “facility failure occurs when the facility fails to perform the function it was designed for.” See Annex A, Section 61.52(c).

Comment from the NRG Companies and Resolution

In response to a concern from the NRG Companies, we have added a subsection which addresses the qualifications of the independent consultant.

Section 61.53 Asbestos control

Many old buildings and facilities in the Commonwealth still contain asbestos. Therefore, we proposed requiring a steam utility to have procedures to safely manage and abate asbestos materials from all accessible manholes, vaults, and other areas that contain steam facilities. See Annex A, Section 61.53(a). We required the steam utility to have emergency procedures to control and eliminate asbestos-contaminated debris resulting from the failure of any steam pipeline or facility. See Annex A, Section 61.53(b).

The public health threat of asbestos is well-known and well-documented. Accordingly, we required a steam utility to have a program that maintains in safe condition all asbestos materials on all exposed piping and fittings in the steam distribution system and the gradual elimination of all asbestos materials to the extent practicable and feasible. See Annex A, Section 61.53(c). We proposed

requiring a steam utility “to eliminate all asbestos materials to the extent practicable and feasible.” See Annex A, Section 61.53(c). We sought further public comment as to whether this proposed language best serves the public interest.

Finally, we emphasized that the procedures regarding asbestos control must comply with all applicable rules and regulations regarding the removal, handling, and disposal of asbestos materials. See Annex A, Section 61.53(d).

Comment from IRRC and Resolution

In response to IRRC’s jurisdictional concern, we have deleted this subsection.

Service Outage Requirements: Chapter 67

Section 67.1 General Provisions

On September 23, 2011, the Commission entered a Final Rulemaking Order pertaining to public utilities’ service outage response and restoration practices. See Docket L-2009-2104274 (Final Rulemaking Order entered Sep. 23, 2011); see 14 Pa.B. 4511 (effective Jan. 7, 2012). Among other things, the Final Rulemaking Order amended the Commission’s service outages regulations in Chapter 67 of the Pennsylvania Code. Chapter 67 expressly applies to electric, gas, water, and telephone utilities, but does not expressly apply to steam utilities. See 52 Pa. Code § 67.1(a). The Commission also sought comment on whether Chapter 67 should apply to the service outage regulations of jurisdictional steam utilities. We have added a sentence which states that steam utilities with fewer than 50 customers shall provide such notice when at least 10% of total customers experience such an interruption. In addition, the Commission adds the word steam in four places in Section 67.1 to make the section’s application to steam heat utilities clear. See Annex A, Section 67.1.

Regulatory Review

Under section 5(a) of the Regulatory Review Act (71 P.S. § 745.5(a)), on January 27, 2016, the Commission submitted a copy of the notice of proposed rulemaking, published at 46 Pa.B. 658 (February 6, 2016), to IRRC and the Chairpersons of the House Consumer Affairs Committee and the Senate Consumer Protection and Professional Licensure Committee for review and comment.

Land Exchange with the Turnpike Commission; State Park Natural Area Designation Change at Hickory Run State Park

The Department of Conservation and Natural Resources (Department), Bureau of State Parks, has approved a project with the Turnpike Commission (Commission) for the replacement of the Commission's Hawk Falls Bridge located adjacent to Hickory Run State Park and adjacent to the Hickory Run State Park Mud Run Natural Area, Forest and Kidder Townships, Carbon County. This project falls within the Pennsylvania Turnpike's Northeast extension (I-476), which bisects a portion of Hickory Run State Park.

This notice consists of two parts:

Part A: An amendment to the State Parks Natural Areas listing to remove 10 acres of State park land from the designation as it relates to construction for this project.

Part B: A land exchange proposal consisting of the Commission's permanent right-of-way (ROW) of 14.244 acres of State park land in exchange for 46.649 acres of replacement lands.

Part A: Amendment to the State Parks Natural Areas Listing

Summary: The following areas are proposed to be amended as part of the State Parks Natural Areas listing under 17 Pa. Code § 17.5 (relating to Natural Area designation procedure). The Commission has proposed a permanent ROW acquisition of State park land for the purpose of the Hawks Falls Bridge replacement project, Penn Forest and Kidder Townships, Carbon County. The purpose of this amendment is to remove approximately 9.7 acres of land located within the Hickory Run State Park Mud Run Natural Area designation.

State Parks Natural Areas Proposed Amendment

The original advertisement for the addition of the Mud Run Natural Area was published at 26 Pa.B. 2828 (June 15, 1996).

Project documents will be available for review from December 2, 2017, until January 1, 2018, at the Hickory Run State Park Office and on the Commission's web site at www.patpconstruction.com/mpA89/.

Questions or comments on this proposed amendment should be forwarded to John Hallas, Director, Bureau of State Parks, Attn: RMPD—Planning Section, P.O. Box 8551, Harrisburg, PA 17105-8551, RA-Park-Operations@pa.gov. Comments must be received within 30 days following publication of this notice.

Part B: Commission—Land Exchange

Summary: The Commission proposes to replace the Hawk Falls Bridge, located adjacent to Hickory Run State Park and adjacent to the Hickory Run State Park Mud Run Natural Area, Forest and Kidder Townships, Carbon County. This project falls within the Pennsylvania Turnpike's Northeast extension (I-476), which bisects a portion of Hickory Run State Park. The Commission is proposing a permanent ROW acquisition of State park land consist-

ing of 14.244 acres which is needed for the purposes of constructing a new bridge. The lands now comprising Hickory Run State Park were divested from the Federal government as a Recreational Demonstration Area, which affords these lands additional protections to those already prescribed in 17 Pa. Code Chapter 15 (relating to State Parks Natural Areas—statement of policy). In addition, these lands are also encumbered by the National Park Service's Land and Water Conservation Fund (LWCF) program. LWCF funds were used to help develop the facilities within the Hickory Run State Park. Subsequently, due to the aforementioned Federal restrictions, the Commission is required to provide replacement lands that exceed both the acreage and appraised value of the land being taken. To that end, the Commission is working to fulfill the requirements for the land exchange as required by the Department's Bureau of State Parks, the National Park Service's Recreational Demonstration Area administrators and the LWCF administrators. Some of the land exchange requirements include official land surveys, yellow-book appraisals, Environmental Site Assessments, NEPA-level environmental analysis and a Determination of Effects report.

Therefore, the Department's Bureau of State Parks is proposing to grant to the Commission a permanent ROW acquisition of 14.244 acres of State park land. In exchange, the Commission will provide the Department's Bureau of State Park with 46.649 acres of replacement lands as more fully described as follows.

1) 14.244 acres of State park land for use as a permanent ROW with the Commission. These permanent ROW to be conveyed from the Department's Bureau of State Parks to the Commission exist as three separate areas, all adjacent to the bridge replacement project lands. a) Area A—10.689 acres; b) Area B—3.127 acres; and c) Area C—0.428 acre:

a) Area A—10.689 acres—required ROW for limited access

All that certain tract or parcel of land situate in Penn Forest and Kidder Townships, Carbon County, and being bounded and described according to the Commission's Plan No. R/W 8996-C, WBS No. A-088.59S001-3-02, October 11, 2017, mile post A-87.94 to A-89.36, and as follows to wit:

Beginning at a point in the East Legal ROW Line for Limited Access at its intersection of the new Required ROW Line for Limited Access, said point being located 100.00 feet right of and opposite I-476 Survey and ROW Baseline Station 925+50.00;

Thence along the former East Legal ROW Line for Limited Access for the following 11 courses and distances:

1. North 12°32'22" West a distance of 2,993.42 feet to a point being located 14.10 feet right of and opposite I-476 Survey and ROW Baseline Station 955+46.57;

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

**UNDER ACT 2, 1995
PREAMBLE 1**

Acknowledgment of Notices of Intent to Remediate Submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Sections 302—305 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.302—6026.305) require the Department to publish in the *Pennsylvania Bulletin* an acknowledgment noting receipt of Notices of Intent to Remediate. An acknowledgment of the receipt of a Notice of Intent to Remediate is used to identify a site where a person proposes to, or has been required to, respond to a release of a regulated substance at a site. A person intending to use the background standard, Statewide health standard, the site-specific standard or intend to remediate a site as a special industrial area shall file a Notice of Intent to

Remediate with the Department. A Notice of Intent to Remediate filed with the Department provides a brief description of the location of the site, a list of known or suspected contaminants at the site, the proposed remediation measures for the site and a description of the intended future use of the site. A person who demonstrates attainment of one or a combination of cleanup standards or receives approval of a special industrial area remediation identified under the act will be relieved of further liability for the remediation of the site for contamination identified in reports submitted to and approved by the Department. Furthermore, the person shall not be subject to citizen suits or other contribution actions brought by responsible persons not participating in the remediation.

Under sections 304(n)(1)(ii) and 305(c)(2) of the act, there is a 30-day public and municipal comment period for sites proposed for remediation using a site-specific standard, in whole or in part, and for sites remediated as a special industrial area. This period begins when a summary of the Notice of Intent to Remediate is published in a newspaper of general circulation in the area of the site. For the following site, proposed for remediation to a site-specific standard or as a special industrial area, the municipality, within which the site is located, may request to be involved in the development of the remediation and reuse plans for the site if the request is made within 30 days of the date specified as follows. During this comment period, the municipality may request that the person identified as the remediator of the site develop and implement a public involvement plan. Requests to be involved and comments should be directed to the remediator of the site.

For further information concerning the content of a Notice of Intent to Remediate, contact the environmental cleanup program manager in the Department regional office listed before the notice. If information concerning this acknowledgment is required in an alternative form, contact the community relations coordinator at the appropriate regional office. TDD users may telephone the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

AIR QUALITY

PLAN APPROVAL AND OPERATING PERMIT APPLICATIONS

The Department has developed an "integrated" plan approval, State Operating Permit and Title V Operating Permit program. This integrated approach is designed to make the permitting process more efficient for the De-

partment, the regulated community and the general public. This approach allows the owner or operator of a facility to submit permitting documents relevant to its application for all sources related to a facility or a proposed project, affords an opportunity for public input, and provides for a decision on the issuance of the necessary permits.

The Department received applications for Plan Approvals or Operating Permits from the following facilities.

Copies of the application, the Department's analysis, all pertinent documents used in the evaluation of the application and subsequently prepared proposed plan approvals/operating permits are available for public review during normal business hours at the appropriate Department Regional Office. Appointments for scheduling a review must be made by calling the appropriate Department Regional Office. The address and phone number of the Regional Office is listed before the application notices.

Persons wishing to file a written protest or provide comments or additional information, which they believe should be considered prior to the issuance of a permit, may submit the information to the Department's Regional Office. A 30-day comment period from the date of this publication will exist for the submission of comments, protests and information. Each submission must contain the name, address and telephone number of the person submitting the comments, identification of the proposed Plan Approval/Operating Permit including the permit number and a concise statement regarding the relevancy of the information or objections to issuance of the permit.

A person wishing to request a hearing may do so during the 30-day comment period. A public hearing may be held, if the Department, in its discretion, decides that a hearing is warranted based on the information received. Persons submitting comments or requesting a hearing will be notified of the decision to hold a hearing by publication in the newspaper, the *Pennsylvania Bulletin* or by telephone, when the Department determines this type of notification is sufficient. Requests for a public hearing and any relevant information should be directed to the appropriate Department Regional Office.

Permits issued to the owners or operators of sources subject to 25 Pa. Code Chapter 127, Subchapter D or E, or located within a Title V facility or subject to 25 Pa. Code § 129.51(a) or permits issued for sources with limitations on their potential to emit used to avoid otherwise applicable Federal requirements may be submitted to the United States Environmental Protection Agency for review and approval as a revision to the State Implementation Plan. Final Plan Approvals and Operating Permits will contain terms and conditions to ensure that the sources are constructed and operating in compliance with applicable requirements in the Air Pollution Control Act (35 P.S. §§ 4001—4015), 25 Pa. Code Chapters 121—145, the Federal Clean Air Act (42 U.S.C.A. §§ 7401—7671q) and regulations adopted under the Federal Clean Air Act.

Persons with a disability who wish to comment and require an auxiliary aid, service or other accommodation to participate should contact the regional office listed before the application. TDD users may contact the Department through the Pennsylvania AT&T Relay Service at (800) 654-5984.

46-0297: Prudential Insurance Company of America (2101 Welsh Road, Dresher, PA 19025) a plan approval to operate four (4) existing diesel-fired generator engines to provide standby emergency power in Upper Dublin Township, **Montgomery County**. The primary pollutant of concern is nitrogen oxides (NO_x) from the combustion process. Each engine will be restricted to 100 hours of operation per year and the facility will be classified as a synthetic minor based on its potential emissions. The plan approval will include monitoring, record keeping, and reporting requirements designed to address all applicable air quality regulations.

09-0240: Mazza Iron and Steel (60 Solar Drive, Fairless Hills, PA 19030), Falls Township, **Bucks County**. The Plan Approval application is for the installation and operation of an electric metal shredder and a ferrous and non-ferrous metals processing facility. The pollutant of concern is Particulate Matter (PM) as the process consists of receiving large amounts of ferrous and non-ferrous metal. The metal will be separated out through various techniques by using various process lines each giving off small amounts of PM emissions. Mazza Iron and Steel is a minor facility for PM emissions. Mazza Iron and Steel will help control PM emissions by using a water/foam injection system at the shredder. The Plan Approval will contain monitoring, recordkeeping and operating restrictions designed to minimize emissions and keep the facility operating within all applicable air quality requirements.

36-03209A: Bareville Woodcraft Co. (70 Farmland Road, Leola, PA 17540) for the installation of a 4.97 MMBtu/hr wood fired boiler at the wood working facility located in Upper Leacock Township, **Lancaster County**. The expected facility emissions as a result of the changes proposed are: PM 1.74 tpy, SO_x 0.54 tpy, NO_x 10.67 tpy, CO 6.53 tpy and VOCs 0.37 tpy. The facility is a State Only facility. DEP's review of the information submitted by the applicant indicates that the air contamination sources as constructed or modified will comply with all regulatory requirements pertaining to air contamination sources and the emission of air contaminants including the best available technology requirement (BAT) of 25 Pa. Code §§ 127.1 and 127.12, and 40 CFR Part 63 Subpart JJJJJJ—National Emissions Standards for Hazardous Air Pollutants for Industrial, Commercial, and Institutional Boilers Area Sources. Based on these findings, the Department proposes to issue a plan approval for the proposed construction. If, after the project has been implemented, the Department determines that the sources are constructed and operated in compliance with the plan approval conditions and the specification of the application for plan approval, the requirements established in the plan approval may be incorporated into an Operating Permit pursuant to the provisions of 25 Pa. Chapter 127.

Also, the facility

has removed four (4) existing emergency generators. Based on the information provided by the applicant and DEP's own analysis, the proposed changes will result in potential emissions increases in the amount(s) of 34.99 tons of carbon monoxide, 16.46 tons of nitrogen oxides, 30.76 tons of volatile organic compounds (VOCs), 3.97 tons of particulate matter, and 3.44 tons of total Hazardous Air Pollutants (HAP) per year.

The facility will be required to conduct stack testing of the proposed compressor engines within 180 days of startup, with retesting via portable analyzer to occur annually thereafter. The Plan Approval will contain additional testing, monitoring, recordkeeping and work practice requirements designed to keep the facility operating within all applicable air quality requirements. The subject sources will also be subject to the requirements of New Source Performance Standards, 40 CFR Part 60, Subparts JJJJ, for Stationary Spark-Ignition Internal Combustion Engines, and OOOOa, for Crude Oil and Natural Gas Facilities.

MINING ACTIVITY NPDES DRAFT PERMITS

This notice provides information about applications for a new, amended or renewed NPDES permits associated with mining activity (coal or noncoal) permits. The applications concern industrial waste (mining) discharges to surface water and discharges of stormwater associated with mining activities. This notice is provided in accordance with 25 Pa. Code Chapters 91 and 92a and 40 CFR Part 122, implementing provisions of The Clean Streams Law (35 P.S. §§ 691.1—691.1001) and the Federal Clean Water Act (33 U.S.C.A. §§ 1251—1376).

The Department of Environmental Protection (Department) has prepared a draft NPDES permit and made a tentative determination to issue the NPDES permit in conjunction with the associated mining activity permit.

Effluent Limits for Coal Mining Activities

For coal mining activities, NPDES permits, when issued, will contain effluent limits that are the more stringent of technology-based (BAT) effluent limitations or Water Quality Based Effluent Limits (WQBEL).

The BAT limits for coal mining activities, as provided in 40 CFR Part 434 and 25 Pa. Code Chapters 87—90 are as follows:

<i>Parameter</i>	<i>30-Day Average</i>	<i>Daily Maximum</i>	<i>Instantaneous Maximum</i>
Iron (Total)	3.0 mg/l	6.0 mg/l	7.0 mg/l
Manganese (Total)	2.0 mg/l	4.0 mg/l	5.0 mg/l
Suspended solids	35 mg/l	70 mg/l	90 mg/l
pH*		greater than 6.0; less than 9.0	
Alkalinity greater than acidity*			

* The parameter is applicable at all times.

A settleable solids instantaneous maximum limit of 0.5 ml/l applies to: surface runoff (resulting from a precipitation event of less than or equal to a 10-year 24-hour event) from active mining areas; active areas disturbed by coal refuse disposal activities; mined areas backfilled and revegetated; and all other discharges and drainage (resulting from a precipitation event of greater than 1-year 24-hour to less than or equal to a 10-year 24-hour event) from coal refuse disposal piles. Similarly, modified BAT limits apply to iron, manganese and suspended solids in surface runoff, discharges and drainage resulting from these precipitation events and those of greater magnitude in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Exceptions to BAT effluent limits may be applicable in accordance with 25 Pa. Code §§ 87.102, 88.92, 88.187, 88.292, 89.52 and 90.102.

Effluent Limits for Noncoal Mining Activities

The limits for noncoal mining activities as provided in 25 Pa. Code Chapter 77 are pH 6 to 9 and other parameters the Department may require.

Discharges from noncoal mines located in some geologic settings (for example, in the coal fields) may require additional water quality based effluent limits. If additional effluent limits are needed for an NPDES permit associated with a noncoal mining permit, then the permit description specifies the parameters.

In addition to BAT or WQBEL limits, coal and noncoal NPDES permits establish effluent limitations in the form of implemented Best Management Practices (BMPs) identified in the associated Erosion and Sedimentation Plan, the Reclamation Plan and the NPDES permit application. These BMPs restrict the rates and quantities of associated pollutants from being discharged into surface waters in this Commonwealth.

More restrictive effluent limitations, restrictions on discharge volume or restrictions on the extent of mining that may occur are incorporated into an NPDES permit when necessary for compliance with water quality standards and antidegradation requirements (in accordance with 25 Pa. Code Chapters 91—96).

The procedures for determining the final effluent limits, using a mass-balance equation or model, are found in Technical Guidance Document 563-2112-115, Developing National Pollutant Discharge Elimination System (NPDES) Permits for Mining Activities. Other specific factors to be considered include public comments and Total Maximum Daily Load(s). Additional discharge limitations may apply in the event that unexpected discharges occur.

Discharge rates for surface mining activities are precipitation driven. Discharge rates for proposed discharges associated with underground mining are noted in the permit description.

Persons wishing to comment on an NPDES draft permit should submit a written statement to the Department at the address of the district mining office indicated before each draft permit within 30 days of this public notice. Comments received within the comment period will be considered in the final determinations regarding the NPDES permit applications. Comments must include the name, address and telephone number of the writer and a concise statement to inform the Department of the exact basis of a comment and the relevant facts upon which it is based.

The Department will also accept requests or petitions for a public hearing on NPDES permit applications, as provided in 25 Pa. Code § 92a.82(d). The request or petition for a public hearing shall be filed within 30 days of this public notice and contain the name, address, telephone number and the interest of the party filing the request, and state the reasons why a hearing is warranted. A public hearing may be held if the Department considers the public interest significant. If a hearing is scheduled, a notice of the hearing on the NPDES permit application will be published in the *Pennsylvania Bulletin* and a newspaper of general circulation within the relevant geographical area. When a public hearing is held, the Department will consider comments from the public hearing in the final determination on the NPDES permit application.

Plan Description: Approval is granted for a Special Study to the Official Plan of Hamilton Township in Adams County. The project is known as the Act 537 Special Study—Change in Treatment Facility (DEP Code No. C1-01917-ACT). The plan provides for the transfer of the Hamilton Township sanitary sewer system to the New

Oxford Municipal Authority (NOMA). All sewage flow from Hamilton Township will be directed to the NOMA Wastewater Treatment Facility. The present connection with Berwick Township will be eliminated, and an interconnection with NOMA will be constructed. All intermunicipal agreements are in place, and there is sufficient capacity within the existing pump station and sewage treatment facility. No projected overloads are anticipated. The Department's review of the sewage facilities update revision has not identified any significant environmental impacts resulting from this proposal. Any required NPDES Permits or WQM Permits must be obtained in the name of the municipality or authority, as appropriate.

SEWAGE FACILITIES ACT PLAN DISAPPROVAL

Plan Disapprovals Granted Under the Pennsylvania Sewage Facilities Act.

Plan Location:

<i>Borough or Township</i>	<i>Borough or Township Address</i>	<i>County</i>
Washington Township	120 Barto Rd. Barto, PA 19504	Berks

Plan Description: The sewage planning exemption request submitted for the Rosalie Fronheiser Subdivision, DEP Code No. A3-06971-140-3E, APS Id 954333, is disapproved. The purpose of this plan is to create one new single family residential building lot to use Washington Township's sewers and wastewater treatment plant. The proposed residual tract has an existing dwelling served by the public sewerage system. The project is located along Route 100 at the junction with Passmore Road. The project does not qualify for the use of a planning exemption because sewage flows from the proposed residence would be tributary to the Weinstein Road pumping station, a facility that is under a corrective action plan for hydraulic overload. Reference Chapter 71 § 71.51(b)(2)(ii). Therefore, the proposal must be submitted using the Component 3 sewage planning module forms.

LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 2

The following plans and reports were submitted under the Land Recycling and Environmental Remediation Standards Act (35 P.S. §§ 6026.101—6026.907).

Provisions of Sections 301—308 of the Land Recycling and Environmental Remediation Standards Act (act) (35 P.S. §§ 6026.301—6026.308) require the Department to publish in the *Pennsylvania Bulletin* a notice of submission of plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the act's remediation standards. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis for selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling analytical results which demonstrate

that remediation has attained the cleanup standard selected. Submission of plans and reports, other than the final report, will also be published in the *Pennsylvania Bulletin*. These include the remedial investigation report, risk assessment report and cleanup plan for a site-specific standard remediation. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements.

For further information concerning plans or reports, contact the environmental cleanup program manager in the Department regional office under which the notice of receipt of plans or reports appears. If information concerning plans or reports is required in an alternative form, contact the community relations coordinator at the appropriate regional office. LAND RECYCLING AND ENVIRONMENTAL REMEDIATION

UNDER ACT 2, 1995 PREAMBLE 3

The Department has taken action on the following plans and reports under the Land Recycling and Environmental Remediation Standards Act.

Section 250.8 of 25 Pa. Code and administration of the Land Recycling and Environmental Remediation Standards Act (act) require the Department to publish in the *Pennsylvania Bulletin* a notice of its final actions on plans and reports. A final report is submitted to document cleanup of a release of a regulated substance at a site to one of the remediation standards of the act. A final report provides a description of the site investigation to characterize the nature and extent of contaminants in environmental media, the basis of selecting the environmental media of concern, documentation supporting the selection of residential or nonresidential exposure factors, a description of the remediation performed and summaries of sampling methodology and analytical results which demonstrate that the remediation has attained the cleanup standard selected. Plans and reports required by the act for compliance with selection of remediation to a site-specific standard, in addition to a final report, include a remedial investigation report, risk assessment report and cleanup plan. A remedial investigation report includes conclusions from the site investigation; concentration of regulated substances in environmental media; benefits of reuse of the property; and, in some circumstances, a fate and transport analysis. If required, a risk assessment report describes potential adverse effects caused by the presence of regulated substances. If required, a cleanup plan evaluates the abilities of potential remedies to achieve remedy requirements. A work plan for conducting a baseline remedial investigation is required by the act for compliance with selection of a special industrial area remediation. The baseline remedial investigation, based on the work plan, is compiled into the baseline environmental report to establish a reference point to show existing contamination, describe proposed remediation to be done and include a description of existing or potential public benefits of the use or reuse of the property. The Department may approve or disapprove plans and reports submitted. This notice provides the Department's decision and, if relevant, the basis for disapproval.

For further information concerning the plans and reports, contact the environmental cleanup program manager in the Department regional office under which the notice of the plan or report appears. If information concerning a final report is required in an alternative form, contact the community relations coordinator at the appropriate regional office. The Department has taken the following actions on previously received permit applications, requests for Environmental Assessment approval and requests for Water Quality Certification under section 401 of the Federal Water Pollution Control Act (FWPCA) (33 U.S.C.A. § 1341).

Except as otherwise noted, the Department has granted 401 Water Quality Certification certifying that the construction and operation described will comply with sections 301—303, 306 and 307 of the FWPCA (33 U.S.C.A. §§ 1311—1313, 1316 and 1317) and that the construction will not violate applicable Federal and State water quality standards.

Persons aggrieved by an action may appeal that action to the Environmental Hearing Board (Board) under section 4 of the Environmental Hearing Board Act and 2 Pa.C.S. §§ 501—508 and 701—704. The appeal should be sent to the Environmental Hearing Board, Second Floor, Rachel Carson State Office Building, 400 Market Street, PO Box 8457, Harrisburg, PA 17105-8457, (717) 787-3483. TDD users may contact the Board through the Pennsylvania AT&T Relay Service, (800) 654-5984. Appeals must be filed with the Board within 30 days of publication of this notice in the *Pennsylvania Bulletin* unless the appropriate statute provides a different time period. Pennsylvania's Exceptional Event Analysis for the May 2016 Fort McMurray Fires

The Department of Environmental Protection (Department) is seeking public comment on Pennsylvania's Exceptional Event (EE) analysis for the May 2016 Fort McMurray fires in Fort McMurray, Alberta, Canada. The EE analysis was prepared to outline the impacts that the byproducts (nitrogen oxides and volatile organic compounds) of the Fort McMurray fires had on ozone formation across this Commonwealth from May 24—26, 2016.

On May 21, 2007, the United States Environmental Protection Agency (EPA) promulgated a rule to oversee the review and handling of air quality monitoring data influenced by EEs (EE Rule). See 72 FR 13560 (March 22, 2007). The intent of the EE Rule was to modify the handling of air monitoring data due to EEs for which the Clean Air Act's (42 U.S.C.A. §§ 7401—7671q) normal planning and regulatory process was not appropriate. Subsequently, on October 3, 2016, the EPA promulgated final amendments to its original EE Rule. See 81 FR 68216 (October 3, 2016). One of the major revisions to the original EE Rule was the handling of ambient ozone concentration data as it relates to EEs, specifically wild-fire events. In addition, under 40 CFR 50.14 (relating to treatment of air quality monitoring data influenced by exceptional events), air quality state agencies must follow the public comment process and document that the comment period was open for a minimum of 30 days prior to final submission of the EE analysis to the EPA Regional Administrator.

The Commonwealth's EE analysis is available for public comment on the Department's web site at <http://www.ahs.dep.pa.gov/eComment> or by contacting Sean Nolan at (717) 772-3377 or senolan@pa.gov.

The Department must receive comments no later than January 2, 2018. Commentators are encouraged to submit comments using the Department's eComment system at <http://www.ahs.dep.pa.gov/eComment> or by e-mail to ecomment@pa.gov. Written comments may be submitted to the Policy Office, Department of Environmental Protection, Rachel Carson State Office Building, P.O. Box 2063, Harrisburg, PA 17105-2063. Use "EE Analysis on Fort McMurray Fires" as the subject line in written communication.

In the notice published at 46 Pa.B. 7598 (December 3, 2016), the Department of Health (Department) published the guidelines and fees that a health care provider or facility may charge in response to a request for production of medical charts or records. This notice updates the notice published at 46 Pa.B. 7598.

The Secretary of Health (Secretary), under 42 Pa.C.S. §§ 6152 and 6152.1, is directed to adjust annually the amounts which may be charged by the health care provider or facility.

The Secretary is directed to base these adjustments on the most recent changes in the Consumer Price Index reported annually by the Bureau of Labor Statistics of the United States Department of Labor. For the annual period of October 31, 2016, through October 31, 2017, the Consumer Price Index was 2.0%.

Accordingly, effective January 1, 2018, the following fees may be charged by a health care facility or health

care provider in response to a request for production of medical charts or records:

	<i>Not to Exceed</i>

Any fee that the health care provider may impose for providing the information (or a summary or explanation of the information) in an electronic format shall not be greater than the labor costs in responding to the request. The United States Department of Health and Human Services has stated that the labor costs may not include costs associated with searching for and retrieving the requested information.

b. *Health record used or maintained in other types of format (for example, paper).* Under 45 CFR 164.524(c)(4), if the individual requests a copy of the protected health information or agrees to a summary or explanation of the information, the covered entity may impose a reasonable, cost-based fee, provided that the fee includes only the cost of:

(i) Labor for copying the protected health information requested by the individual, whether in paper or electronic form.

(ii) Supplies for creating the paper copy or electronic media if the individual requests that the electronic copy be provided on portable media.
