SHOWING ON-FIELD RACISM THE RED CARD: HOW THE USE OF TORT LAW AND VICARIOUS LIABILITY CAN SAVE THE MLS FROM JOINING THE ENGLISH PREMIER LEAGUE ON RACISM ROW

I. INTRODUCTION

There has never been a more exciting time to be a fan of soccer, better known throughout the world as the beautiful game.1 Professional players are faster, more talented with the ball, and score more goals than ever before.2 The tournaments, cups, and leagues are followed by hundreds of millions of avid fans.3 Games

Across the pond, English soccer is trying to combat and solve racism issues between professional players on the field.\textsuperscript{14} Two incidents have forced the issue of on-field racism back into the spotlight during the 2011-2012 season.\textsuperscript{15} The first occurred on October 15, 2011, when Luis Suarez, a Uruguayan national who plays for Liverpool FC, told Patrice Evra, a Senegal-born French player who plays for Manchester United, that he did not want to speak with
Evra because of the color of his skin. The second occurred on October 23, 2011, when John Terry, an English national who plays for Chelsea FC, allegedly called Anton Ferdinand, a dark-skinned English player of Queens Park Rangers, a “fucking black cunt.” Racism on the soccer field in England, as well as European soccer generally, has been a persistent problem for decades. The above two incidents have prompted the British Prime Minister to step in to help find a solution. Following these incidents, the President of FIFA, Josep Blatter, stated that he believed there was no on-field racism during soccer games. He also stated that even if a player was subject to racial abuse on the field, he should just shake hands with the abusive player because soccer is just a game. These statements have

Commentators have compared Suarez’s situation to Coundoul’s and fear that the Red Bulls team and management may have “racist tendencies” and a lack of diverse players. \textit{Id.}} Thus, the MLS is presented with the unique opportunity to preemptively mitigate any racism issues as the league continues to grow financially and attract diverse and talented athletes.\footnote{25. For a discussion of how the MLS can avoid or mitigate racism issues in the future, see \textit{infra} notes 193-317 and accompanying text.} With all of the progress that the MLS and soccer have made in America over the past fifteen years, a flare up of ill-handled racism issues could easily destroy the sport’s growing popularity.\footnote{26. See, e.g., Mike Collett & Clare Fallon, \textit{Soccer-Britain Can Crush Racism in Sport, Cameron Says}, REUTERS (Feb. 22, 2012), http://uk.reuters.com/article/2012/02/22/soccer-england-racism-idUKL4E8DM7DV20120222 (reporting David Cameron is afraid if racism in English soccer is not solved, parents may stop bringing their children to games, and children that do attend games may begin imitating racist conduct they see during games); Gary Morley, \textit{Racism in Football: It’s Not Black and White}, CNN (Feb. 23, 2012), http://edition.cnn.com/2012/02/23/sport/football/football-racism-england/index.html (recounting Clyde Best’s experiences dealing with racial abuse, hate, and physical threats while trying to play soccer in England’s top division).} This all asks the question: how should the MLS handle on-field racism?\footnote{27. For a discussion of how the MLS can address on-field racism issues, see \textit{infra} notes 193-316 and accompanying text.}
A key difference between the U.S. and England is the availability of the court system to aggrieved professional athletes. Specifically, the English High Court ruled that the English Football Association’s decisions are not subject to judicial review. The United States, however, allows a professional player to utilize the court system. In the context of on-field racism, this allows the courts to apply tort law and hold a soccer team vicariously liable for the torts of its players under the doctrine of respondeat superior. By using respondeat superior, the MLS and American courts can place the fault and liability of on-field racism onto the team itself. In England, only the player is held liable for his conduct on the field. By holding the team liable instead of just the player, the clubs have a strong incentive to discipline their players following racist conduct on the field and actively promote racism awareness programs to avoid future incidents that could harm the club’s reputation and finances.

This comment begins by laying out the structure of European soccer and describing how FIFA handles the issue of on-field racism. Part III of this comment analyzes why England’s efforts to combat on-field racism have been ineffective. This section will focus on the aforementioned dispute between Patrice Evra and Luis Suarez. Part IV of this comment describes the key differences in sports law between England and the United States. Part V of this comment explains why tort law and vicarious liability will help the MLS avoid, or at least substantially mitigate, on-field racism issues. Finally, Part VI concludes with the recommendation that the MLS adopt the vicarious liability doctrine into its rules to cover racist comments made by players during games.

II. BACKGROUND: HOW THE CONTROVERSIAL PRESIDENT OF FIFA PUT THE SPOTLIGHT ON THE ISSUE OF RACISM BETWEEN PLAYERS

A. Josep (“Sepp”) Blatter

Sepp Blatter, the President of FIFA, is one of the most controversial figures in modern-day sports. After over a decade as the figurehead for the beautiful game, his presidency has been plagued by allegations of corruption and he has often been found at the coming educational events aimed to promote racial integration in soccer, including events involving players from English Premier League clubs).

center of the largest controversies in soccer. Yet none of his prior statements or actions sparked as much of an outcry amongst players, coaches, and fans as his statement that there is no racism on the soccer field. In an interview with CNN on November 18, 2011, Blatter stated:

There is no racism [on the field], there is maybe one of the players towards the others, he has a word or a gesture which is not the correct one, but also the one who is affected by that, he should say it’s a game, we are in a game. At the end of the game, we shake hands.

Some of the most influential names in the world called for Blatter’s resignation after the interview footage circled around the world. In the aftermath of the resignation demands, Blatter made numerous apologies to those who were offended by his comments. In his apology, Blatter also stated that he has personally been leading the battle against racism in soccer during his time in charge of FIFA. Despite Blatter’s belated acknowledgment of the racism problem, he has refused to resign.

During Blatter’s time as president of FIFA, there have been major incidents of racism in all of the top domestic leagues in Europe. This is common knowledge to many, as incidents of racism occur every season. Rio Ferdinand, a Manchester United player, posted on his Twitter account following Blatter’s comments: “Tell me I have just read Sepp Blatter’s comments on racism in football wrong . . . . [I]f not then I am astonished.” Rio’s brother Anton, a player for Queens Park Rangers, allegedly suffered racial abuse directed at him by John Terry, of Chelsea, during a game this year. David Beckham, a former Manchester United player and a current player for the L.A. Galaxy, called Blatter’s comments “appalling” and stated that a simple handshake is not an appropriate way to remedy one of soccer’s biggest problems. Piers Morgan, a British journalist and commentator, stated that “Sepp Blatter just gave
every racist in football a license to abuse” and that “even by [Blatter’s] standards this is utterly outrageous.”

B. The Structure of FIFA and its Role as a Governing Body

For readers unfamiliar with the hierarchy of soccer, FIFA, known more formally as the Fédération Internationale de Football Association, is considered the “world’s soccer governing body.” FIFA is responsible for organizing, officiating, and regulating the largest sporting event on the planet, the World Cup. Each country appoints a representative to the FIFA Congress. The members of the FIFA Congress then vote to elect the President of FIFA. Further, each continent is designated as a “federation,” which is delegated power from FIFA to oversee games that occur within their federation. For example, North America and Central America are known as the “CONCACAF” region, which governs in-

ternational games occurring between members of CONCACAF.\footnote{See id. (noting Confederation of North, Central American, and Caribbean Association Football is “the umbrella organization[ ] of the national football association[ ] in North America).}

Due to the representative nature of FIFA, many players, coaches, and fans consider FIFA the informal central governing body of soccer.\footnote{See, e.g., Executive Pushes for Approval of Headscarf, ASSOCIATED PRESS, Jan. 30, 2012, available at http://www.nytimes.com/2012/01/31/sports/soccer/31iht-soccer31.html (noting “FIFA is soccer’s world governing body” but that FIFA does not possess direct authority over every issue in soccer).}

In order to combat racism, FIFA established an anti-racism campaign known as “Say no to Racism.”\footnote{See About FIFA, Social Responsibility, FIFA Against Racism: A Decade of Milestones, FIFA (Mar. 2, 2012), http://www.fifa.com/aboutfifa/socialresponsibility/news/newsid=1384919/index.html (last visited Mar. 18, 2012) (indicating FIFA launched its “Say no to Racism” campaign during April 2006).} The campaign has been active since 2006 and has a general mission to take measures necessary to eliminate racism from soccer.\footnote{See id. (stating FIFA’s anti-racism responsibilities have increased with increases in “footballers leaving their homeland for foreign shores, which subsequently created potential for the problem [of racism] to enhance, FIFA elected to act more aggressively against racism”).} Every year, it selects a high profile game that is designated a “FIFA Anti-Discrimination Day” which aims to promote awareness of the racism problem, and includes media briefings, a short film, and a special pre-match protocol where the teams and referees stand at midfield displaying a banner that reflects FIFA’s, and all of its members’, commitment to fighting racism.\footnote{See, e.g., Tenth FIFA Anti-Discrimination Day on 13 July 2011, FIFA (Jul. 12, 2011), http://www.fifa.com/tournaments/archive/womensworldcup/germany2011/releases/newsid=1473742.html (stating July 13, 2011 would be FIFA’s tenth anti-discrimination day held during FIFA Women’s World Cup’s semi-final matches in Germany).} The events have been considered successful and the “Say No to Racism” slogan has been displayed during numerous games and even in the FIFA video game series.\footnote{See, e.g., About FIFA, Anti-Racism, FIFA Against Discrimination, FIFA, http://www.fifa.com/aboutfifa/socialresponsibility/antiracism/index.html (last visited Aug. 28, 2012) (providing details regarding all eleven FIFA Anti-Discrimination Days). The “Say no to Racism” banner was also displayed in the FIFA 2010 video game. See id.}

Many players, coaches, and fans thought FIFA was moving in the right direction until Blatter’s comments went viral.\footnote{See, e.g., Kevin Baxter, FIFA’s Sepp Blatter is Out of Touch on Racism, L.A. TIMES (Nov. 26, 2011), http://articles.latimes.com/2011/nov/26/sports/la-sp-baxter-soccer-20111127 (describing FIFA’s Anti-Discrimination Day and its strong impact during 2010 World Cup and asking “[h]ow sincere can Blatter’s stand against racism be when he clearly doesn’t understand the topic?”).}
FIFA Disciplinary Code part 58 outlines punishments for discrimination.\(^{67}\) Section 1(a) requires a suspension for at least five games and a fine of at least CHF (Swiss Franc) 20,000, roughly $22,000 in U.S. dollars, for any player who “offends the dignity of a person or group of persons through contemptuous, discriminatory or denigratory words or actions concerning race, colour, language, religion or origin.”\(^{68}\) Section 1(b) imposes a harsher punishment when “several persons (officials and/or players) from the same club or association simultaneously breach par. 1 (a) or there are other aggravating circumstances, the team concerned may be deducted three points for a first offence and six points for a second offence.”\(^{69}\) If there are further offenses, the team may be relegated to a lower division.\(^{70}\) If the offenses happen in a competition where points are not awarded, the team may be disqualified from the competition.\(^{71}\) The Disciplinary Code also contains provisions to punish racist conduct committed by fans who attend the games.\(^{72}\)

Despite the existence of these provisions, they have rarely been invoked.\(^{73}\) FIFA only possesses jurisdiction over international games and many leagues adopt their own rules and regulations tailored to address the specific problems that occur in their leagues.\(^{74}\)

Further, the vast majority of soccer games and racism issues occur at the domestic level. With FIFA’s president publically denying the existence of the racism problem, it is unlikely FIFA will help find a solution to on-field racism. Therefore, examining the controversial situation in England will provide examples of the failings of domestic leagues trying to combat the racism issue, and help the MLS understand and resolve any future issues that may occur.

III. ENGLAND ON RACISM ROW: THE PATRICE EVRA V. LUIS SUAREZ DISPUTE AS AN EXAMPLE OF THE ENGLISH PREMIER LEAGUE’S FAILURE TO ELIMINATE ON-FIELD RACISM

Fans of the beautiful game largely consider the Barclay’s Premier League (“English Premier League” or “EPL”) the most exciting soccer league in the world. Many of the world’s top players try to prove themselves as one of soccer’s best by playing for a team in the EPL. EPL viewership has even begun permeating the American

This season, the EPL has been nicknamed “racism row” due to the controversy surrounding two players’ conduct towards opposing players during league games. The first was a dispute between Luis Suarez and Patrice Evra, described below. The second was a dispute between John Terry and Anton Ferdinand. A discussion of Terry’s conduct is not included as he is currently awaiting trial following this summer’s European Championship tournament. However, his alleged actions have contributed to the call for reform of racism law in the EPL. The EPL, like the MLS, is a league made up of significant numbers of ethnically diverse players. Therefore, understanding the failings of the EPL

A. Luis Suarez, Patrice Evra, and the Word “Negro”

On January 31, 2011, Liverpool purchased Uruguayan footballer Luis Suarez from AFC Ajax, a football club in the Netherlands, for 26.5 million euros. Suarez, considered a rising talent, was purchased to help reinforce the team after news spread that Liverpool was going to sell Fernando Torres. Liverpool knew, however, that purchasing Suarez could lead to some controversy. During the 2010 World Cup in South Africa, Suarez infamously used his hands to block a header from Ghana’s Dominic Adiyiah in the quarter-final round. Suarez was ejected from the game, Ghana missed the subsequent penalty kick, and Uruguay advanced to the semi-finals. Suarez was vilified by a majority of the soccer community because the handball was considered to be extremely unsporting behavior. Despite knowing of Suarez’s past controversial behavior, the players than in any other year” and percentage of international players increased to a record-high of thirty-eight percent in 2011), with Ollie Williams, *Where the Premier League’s Players Come From*, BBC Sport, http://news.bbc.co.uk/sport2/hi/football/eng_prem/8182090.stm (last updated Aug. 1, 2009, 15:36 GMT) (showing what nation each English Premier League player comes from for 2009-10 season as well as 1989-90 season).

ior, Liverpool was unprepared for the ensuing drama Suarez would bring to the historic club.94

On October 15, 2011, an EPL game between Liverpool and Manchester United took place at Liverpool’s Anfield Stadium in Liverpool, England.95 Patrice Evra, a left defender for United, was assigned to man-mark Suarez on free kicks in United’s half of the field.96 During the second half, Evra and Suarez began arguing during a corner kick, and the referee was forced to step in and separate them.97 After the final whistle, Evra filed a complaint with the referee regarding what Suarez said to him during the game.98

The English Football Association (“FA”) investigated Evra’s complaint and officially charged Suarez with misconduct contrary to FA Rule E3(1) on November 16, 2011.99 In addition, the charge included a breach of FA Rule E3(2) because Suarez had allegedly made reference to Evra’s “ethnic origin and/or colour and/or race.”100 The FA assembled an Independent Regulatory Commission (the “Commission”) to consider the charges in Evra’s complaint.101 During the Commission’s hearing, evidence was received

from match officials, players, managers, and experts. Suarez and the FA, who prosecuted the charge, were both represented by counsel during the proceedings.

1. The Investigation and Ruling of the Regulatory Commission

The primary issue before the Commission was whether Evra’s account of what happened at Anfield was “true and reliable.” The incident in question happened during the sixty-second minute of the game, while Suarez and Evra were standing in Manchester United’s goal area awaiting a corner kick. The conversation occurred entirely in Spanish.

Evra began the conversation by saying “Concha de tu hermana” to Suarez, which is equivalent to the phrase “fucking hell” in English, despite having a different translation. Evra used this phrase in reference to a tackle Suarez made on Evra during the fifty-eight minute of the game. Suarez did not hear Evra, so he asked him to repeat what he said. Evra instead asked Suarez why he had fouled him, to which Suarez replied “porque tu eres negro.” The literal translation of this phrase is “because you are

black.” \footnote{See id. (stating Evra conceded during trial that “porque tu eres negro” translates to “because you are black”). During the game, Evra thought Suarez’s use of “negro” meant “nigger.” See id.}

Much of the factual dispute during the hearing was focused on whether “negro” in Spanish was (a) used in a way that was equivalent the English word “nigger”; (b) a racial insult; or (c) an inoffensive reference to those with dark skin or dark hair. \footnote{See id. at 44-52 (recounting expert testimony and evidence received during trial about cultural and linguistic use of “negro”).}

The Commission, with the aid of expert reports and testimony, concluded that “negro” was used by Suarez to mean “black,” an offensive reference to Evra’s skin color. \footnote{See id. at 69 (“However, we do not believe that Mr Suarez used the Spanish word ‘negro’ in the sense that can reasonably be understood, in English, as ‘nigger.’ Rather, he used it to mean black, both as an adjective and as a noun.”).}

At the time, Evra thought “negro” meant “nigger” and responded to Suarez by stating he was going to punch him. \footnote{See id. at 27 (stating Evra thought Suarez said “nigger” instead of “black” and that Evra threatened to punch Suarez).}

Suarez responded by saying he did not talk to “blacks.” \footnote{See id. at 28-29 (recounting Evra’s second threat toward Suarez and Suarez’s response to Evra’s threat).}

Evra then stated that he was going to punch Suarez, to which Suarez responded “dale, negro, negro, negro,” translated as “okay, blackie, blackie, blackie.” \footnote{See id. at 56 (“This was an unpleasant and petty gesture which appeared designed to aggravate Mr Evra, and was likely to have that effect.”).}

Although Suarez attempted to argue he only said “negro” twice, the Commission officially ruled that he said it five times during the exchange. \footnote{See id. at 96 (stating Commission’s decision that Evra’s belief that Suarez said “negro” five times during the confrontation was correct).}

Following the verbal altercation, Suarez pinched Evra’s left arm. \footnote{See id. at 28 (describing Suarez’s pinching Evra during their confrontation).}

Suarez claimed it was a playful attempt to diffuse the situation. \footnote{See id. at 27-28 (stating Suarez said “[n]o hablo con los negros” in response to Evra’s threat).}

Evra believed Suarez pinched him to point out his dark skin, and thus constituted another racial insult. \footnote{See id. at 48 (stating Evra believed Suarez pinched his arm in order to “defuse the situation”).}

The Commission found that Suarez’s pinch was intended only to aggravate Evra and was not a reference to his color or race. \footnote{See id. at 61 (“This was an unpleasant and petty gesture which appeared designed to aggravate Mr Evra, and was likely to have that effect.”).}
The Commission found Suarez guilty of violating both FA Rule E3(1) and Rule E3(2).122 The Commission noted that references to another player’s skin color are “wholly unacceptable” because “footballers . . . are looked up to and admired by a great many football fans, especially young fans” and because professional footballers should not have to fear racial insults while playing.123 The Commission fined Suarez 40,000 pounds and banned him for eight matches.124 Typically, players are only banned for two matches when they insult other players, but Suarez’s behavior included racial insults, so the Commission quadrupled the standard punishment.125 The Commission based the 40,000 pound fine on Suarez’s weekly salary of 80,000 pounds.126

punishment on evidentiary grounds, but still agreed that the FA should take a strong stance against on-field racism. It finally seemed as if soccer was taking the necessary steps to eliminate racism from the game.

Liverpool, however, immediately rushed to Suarez’s defense. Liverpool’s coach Kenny Dalglish adamantly asserted that Suarez did not intend to racially insult Evra. Liverpool fans all sided with Suarez, and vilified Evra and Manchester United for unfairly charging Suarez. with boos and taunts. One Liverpool fan was caught on video making monkey gestures toward Evra during the game. Tensions peaked when Liverpool and Manchester United played again on February 11, 2012, after Suarez had served his eight match suspension. It is customary for teams to shake hands right before the game starts. Shaking hands symbolizes a friendly, welcoming environment and reinforces the idea that soccer is about unifying people, not dividing them. As the Liverpool players began shaking hands with the United players, Suarez intentionally skipped shaking hands with Evra. Evra grabbed at him, but Suarez kept walking. Throughout the game, the Manchester United fans booed Suarez any time he touched the ball. The game ended with a 2-1 win for United, but that was not the end of the Suarez-Evra matter.

In contrast to Blatter’s comments and Liverpool’s actions, soccer clubs should accept responsibility for the actions of their players and respond with programs designed to educate players about racial integration. The FA, during its proceedings, only focused on Suarez’s malfeasances. What the FA overlooked, however, were the acts and omissions of Liverpool. Leaders of anti-racism organizations have asked why the FA and Liverpool have not taken actions to educate Suarez, and the rest of their players, so incidents like Suarez’s do not happen again.

The unrest resulting from foregoing events have caused the British Prime Minister, David Cameron, to step in and address the issue. Specifically referencing the Suarez controversy, Cameron feared that young children watching the game would observe Suarez’s actions and imitate them. Cameron stated that the English Premier League needed more ethnic minority coaches in order to help combat racism, and announced the British government would donate almost five million dollars to the FA’s coaching center to encourage more ethnic minorities to become coaches. Many in England believe the Prime Minister should stay out of the matter and let the FA handle it. It is clear, however, that the FA was unable to administer a proper punishment to Suarez, raising

IV. THE MLS AND THE EPL: KEY DIFFERENCES IN SPORTS LAW

The MLS and the English Premier League (“EPL”) are similar in many respects.\textsuperscript{169} Both leagues are governed by a set of rules that delineate acceptable and unacceptable conduct during official games.\textsuperscript{170} The MLS is governed by a comprehensive set of rules called the “Laws of the Game” which contain seventeen laws and also include interpretative notes that elaborate on the requirements and rationales for each of the laws.\textsuperscript{171} The EPL is governed by a set of rules titled “Rules of the Football Association,” which set forth the league constitution and the various rules that govern conduct relating to soccer.\textsuperscript{172} Many of the laws in the MLS are mirrored in the EPL and vice-versa.\textsuperscript{173}

A key difference between the MLS and the EPL, however, lies in the way disputes are handled.\textsuperscript{174} In the EPL, the FA assembles a regulatory commission that investigates the claim, hears evidence, and issues a ruling, as exemplified in the Suarez case.\textsuperscript{175} A player can then appeal the decision of the regulatory commission.\textsuperscript{176} Af-
fter the appeal, there are two options left for a disgruntled player. First, the player can initiate arbitration proceedings under Section K of the Rules of the Association. Second, the player can petition for judicial review of the proceedings in the High Court of Justice (“High Court”). In 1991, however, the High Court explicitly decided that FA decisions are not subject to judicial review. Therefore, absent an arbitrator overturning the decision of the FA, there is little hope of a disgruntled player overturning an adverse decision.

In contrast, athletes in America can file civil claims against players in certain instances. Most notably, United States courts have allowed athletes to maintain causes of action against other athletes for intentional tortious conduct that occurs on the field. The Bylaws of the United States Soccer Federation specifically state that players may take their cases to federal or state court after all applicable remedies have been pursued outside of the court system. For the MLS, this means a player must file a grievance, the

181. See Friel, supra note 177 (stating FA will “take great care in the drafting of its written decision” to avoid overturning on appeal). If a player used arbitration to challenge a decision, it is likely the suspension and fine would go into effect anyway and the arbitration process would likely take months. See id.

184. See Bylaws of the United States Soccer Federation, supra note 30 (quoting Bylaw 707: “No Organization [m]ember, official, league, club, team, player, coach, administrator or referee may invoke the aid of the courts in the United States or of a State without first exhausting all available remedies within the appropriate soccer organization, and as provided within the Federation.”).
grievance must be ruled on after a hearing, and then the decision may be appealed.185 After this relatively short process is completed, the Bylaws permit disgruntled players to turn to the courts.186

The difference between the MLS and EPL appeals process is important in a case like Suarez's.187 In England, if Evra is unsatisfied with the FA's decision, his options are very limited.188 In the United States, however, the judicial system is available.189 This allows not only the chance of reversal, but also makes additional laws available to the parties.190 In Suarez's case, it could open the issue of tort law applicability.191 This allows the courts to address issues and fashion remedies that the governing bodies of soccer cannot or will not give out.192

V. HOLDING THE CLUB LIABLE: THE TORT OF INTENTIONAL INFliction OF EMOTIONAL DISTRESS AND RESPONDEAT SUPERIOR

In the United States, it is possible to hold sports teams liable for the torts of their players under the doctrine of respondeat superior.193 In order for the courts to apply respondeat superior, the player must have first committed a tort.194 The following section argues that Suarez's conduct falls within the scope of intentional infliction of emotional distress under the Restatement (Second) of Torts.195 After establishing that Suarez's conduct constituted a tort,
this section then argues that his club could be held liable under respondeat superior.\textsuperscript{196} This section then identifies the advantages of holding soccer clubs liable for the on-field racism of their players.\textsuperscript{197} This section concludes by recommending that the MLS adopt respondeat superior directly into its regulations for on-field racism in order to avoid unnecessary litigation and evidentiary issues.\textsuperscript{198}

A. Intentional Infliction of Emotional Distress

According to the Restatement (Second) of Torts, intentional infliction of emotional distress (“IIED”) requires four elements.\textsuperscript{199} First, the defendant’s conduct must have been extreme and outrageous.\textsuperscript{200} Second, the defendant’s conduct must intentionally or recklessly cause the plaintiff’s distress.\textsuperscript{201} Third, the defendant must have caused the plaintiff’s emotional distress.\textsuperscript{202} Fourth, the plaintiff’s distress must be severe.\textsuperscript{203} For analytical purposes, it will be presumed that Suarez’s conduct occurred in America during an official MLS match while playing for an MLS club.\textsuperscript{204} This will allow the reader to observe how on-field racism could be handled in the United States.\textsuperscript{205} Using the facts from the Commission’s report, the

\textsuperscript{199.} See \textsl{Restatement (Second) of Torts} \textsection{46}(1) (1965) (stating elements of intentional infliction of emotional distress are as follows: (1) “one who by extreme and outrageous conduct”; (2) “intentionally or recklessly” (3) “causes” (4) “severe emotional distress”). If all four elements are met, then the defendant is “subject to liability for such emotional distress, and if bodily harm to the other results from it, for such bodily harm.” \textsl{Id.}\textsuperscript{R}
\textsuperscript{200.} See \textsl{id.}\textsuperscript{R}
\textsuperscript{201.} See \textsl{id.} Because of similarities between the intentional and reckless inquiry and the causation inquiry, both will be treated in the same subsection.\textsuperscript{R}
\textsuperscript{202.} See \textsl{id.}\textsuperscript{R}
\textsuperscript{203.} See \textsl{id.} The proposed Restatement (Third) of Torts \textsection{45} has renamed “emotional distress” to “emotional disturbance.” \textsl{Restatement (Third) of Torts: Liability for Physical and Emotional Harm} \textsection{45} (Tentative Draft No. 5, 2007). Scholars believe that the proposed change merely simplifies the language and “preserves the essence and nature of the Restatement (Second)’s version of IIED.” See Geoffrey Christopher Rapp, \textit{Defense Against Outrage and the Perils of Parasitic Torts}, 43 Ga. L. Rev. 107, 137 (2010) (describing author’s interpretation of Restatement’s (Third) Intentional (or Reckless) Infliction of Emotional Disturbance language).\textsuperscript{R}

following subsections will present the strongest case for an IIED claim by Evra against Suarez.206

1. **Defendant’s Conduct Must be Extreme and Outrageous**

The first element of an IIED claim requires the defendant’s conduct to be “extreme and outrageous.”207 Comment (d) of the Restatement indicates that, in order to satisfy this element, the defendant’s conduct must “go beyond all possible bounds of decency, and to be regarded as atrocious, and utterly intolerable in a civilized community.”208 Comment (d) further states that a proper case “is one in which the recitation of the facts to an average member of the community would arouse his resentment against the actor, and lead him to exclaim, ‘Outrageous!’”209

Since the inclusion of the tort in the Restatement of Torts in 1934, courts have gradually embraced a more flexible standard for IIED claims.210 Scholars consider this standard to be malleable, with courts varying in their application of what constitutes extreme and outrageous conduct.211 As a result, the “extreme and outrageous” inquiry is very fact sensitive.212 Isolated slurs have tradition-facts when applying the elements of an intentional infliction of emotional distress claim.

Later authors of the Restatement came to precisely the opposite conclusion in 1948 and determined that ‘one who, without a privilege to do so, intentionally causes severe emotional distress to another is liable (a) for such emotional distress, and (b) for bodily harm resulting from it.’”).

ally failed to be “extreme and outrageous” without aggravating circumstances. The courts, however, have been supportive of IIED claims that arise from conduct that creates a discriminatory or hostile work environment.

There is an extensive body of scholarship that has developed around the use of racial slurs in an IIED claim. Some scholars believe that discriminatory speech alone should satisfy the “extreme and outrageous” inquiry. One scholar has suggested there should be a rebuttable presumption that certain types of discriminatory speech are extreme and outrageous. The presumption would cover those who are members “of a group protected by existing antidiscrimination statutes” and would apply when “the plaintiff has been harassed or abused on the basis of membership in that group.” Another scholar has pointed out that courts should dis-

tistinguish between public insults and private insults.219 Under this reasoning, individuals should be able to “emotionally repel” private insults.220 Public insults, however, involve a greater degree of humiliation because of the presence of additional parties, and plaintiffs should succeed in court on theories of public insults.221

Both of these scholars’ theories are persuasive in light of Suarez’s actions toward Evra.222 First, Evra suffered a public insult from Suarez.223 The insult was uttered in the presence of third parties.224 Furthermore, because sports are publicized events, by filing a complaint, millions of additional people learned of Suarez’s statements.225 This made it impossible for Evra to “emotionally repel” what Suarez had said to him.226 Second, Evra is a Senegal-born

French player. In America, therefore, Evra would be part of a protected minority group as a player of African descent. Thus, a court could find that Suarez’s conduct satisfies the “extreme and outrageous” standard under these theories. American courts have not addressed an issue similar to Suarez’s conduct because, unlike American sports leagues, the EPL is a diverse league with players from around the world. With the recent internationalization of the MLS, courts may be forced to address the issue, and the above scholarly theories support why on-field racism should be treated differently than a typical IIED claim.

2. Intention and Causation

The second and third elements of an IIED claim require the defendant to act “intentionally or recklessly” when causing severe emotional distress. Under IIED, intent is satisfied if the defendant acted purposefully to cause severe emotional distress or instead knew that severe emotional distress was substantially certain to result from defendant’s conduct. Courts addressing the issue

Soccer games, like many sporting events, are particularly emotional events for the athletes involved.235 Players are heavily invested in winning a game and “trash talking” is a common feature of many sporting events.236 Courts have recognized that some plaintiffs may be in especially vulnerable positions when evaluating the merits of an IIED claim.237 This type of situation is recognized in the Restatement itself:238

Although courts have not addressed IIED claims with facts similar to Suarez’s case, racial insults directed at opposing players during games undoubtedly cause distress.239 In the Commission’s decision, it was explicitly noted that the rapport of both Suarez and Evra was one of “animosity.”240 The Commission noted that, after hearing evidence, Suarez’s reference to Evra’s skin color was intended to “wind [Evra] up.”241 Therefore, it seems likely that Suarez intended his conduct to cause emotional distress to Evra.242

241. See id. at 114 (stating Suarez selected his words because he knew they would wind Evra up).

242. See supra notes 240-241 and accompanying text.
Further, the fact that Suarez referenced Evra’s skin color supports the conclusion that he intended his comments to go outside the normal scope of trash talk. By stating he kicked Evra because he was black and that he did not want to speak with Evra because he was black, Suarez was doing more than just “wind[ing] up” Evra. Finally, but for Suarez’s conduct, Evra would not have suffered severe distress; therefore, Suarez’s conduct was the direct cause of Evra’s distress.

3. Severe Emotional Distress

The final element of an IIED claim is that severe emotional distress must result from the defendant’s conduct. For this element, courts require that “the distress must be so severe that no reasonable person should be expected to endure it.” An important aspect of this element is that the Restatement does not require actual physical harm. Courts typically treat severity and “extreme and outrageous” as a sliding scale test. The less extreme the defendant’s conduct is, the more evidence the plaintiff may need to demonstrate severe distress.

In Suarez’s case, the Commission repeatedly referenced Evra’s distress in their ruling, despite its irrelevance to Evra’s claim of ra-
cial abuse. First, an interviewer from Canal+ saw Evra after the game ended and asked for an interview. Not only did the interviewer noticed Evra was “very distressed” but the rest of the Canal+ staff could tell Evra was upset as well. The Commission accepted that “Evra was angry and upset during the remainder of the game and at the end of it as a result of Mr Suarez using the insulting words.” Perhaps the most convincing evidence of Evra’s distress from Suarez’s conduct was his response to Suarez’s abuse. Evra threatened to punch Suarez twice after he referenced Evra’s skin color in their confrontation.

One scholar has noted the irony in recognizing that emotional harms can be as painful as physical harms but self-defense cannot be used as a legitimate defense in IIED claims. After reading both the Restatement and case law, the author acknowledged that there is no privilege to use force in defense against IIED. In Evra’s case, he felt the urge to respond violently to Suarez’s racial insults. Had Evra actually followed through on his threat, any future self-defense actions brought by him would have failed. What Evra’s response to Suarez does reveal, however, is that Evra

was so distressed that he could only respond to Suarez in a violent, aggressive manner. Further, even though physical manifestations are not required, the Canal+ interviewer noticed Evra was "very distressed" after exiting the dressing room, well over 30 minutes after the incident occurred. In the locker room following the game, Evra’s teammates described Evra as uncharacteristically angry and upset. The Commission’s finding on the matter paints a persuasive image of Evra as a shaken, distressed individual after his confrontation with Suarez.

4. Evidentiary Issues in Evra’s Potential IIED Claim

There are steep evidentiary requirements needed to satisfy an IIED claim. Although IIED is a difficult tort to plead and prove, it is a tort largely created by professors and scholars. Therefore, the academic arguments above should be persuasive and aid the courts in finding a plausible IIED claim against Suarez. The Commission’s report, however, does not analyze the impact of Suarez’s conduct from an IIED lens. Formal findings about the extent of Evra’s distress are in the report, but are largely undeveloped. If the case were brought in the United States’ court system, discovery would elicit more facts relevant to the IIED claim.

The ultimate solution to these evidentiary issues, however, is for the MLS to adopt vicarious liability directly into their regulations.271

B. Respondeat Superior

1. Legal Standard

Respondeat superior is a form of vicarious liability.272 Vicarious liability creates "liability for the tort of another person."273 This is an exception to the legal principle that individuals should be held liable for their own legal faults.274 Under the doctrine of respondeat superior, employers can be held liable for the torts committed by their employees.275 Importantly, the employer does not need to be at fault in order for the proper application of respondeat superior.276

The key legal issue in respondeat superior cases is whether the employee was acting within the "scope of their employment" when the tort was committed.277 If courts find the employee committed the tortious action while acting within the scope of their employment,

ment, the employer will be held jointly and severally liable. 278 One of the many rationales behind respondeat superior is that it encourages employers to take measures to discourage employees’ tortious conduct. 279 By shifting liability onto the party who is benefited by the employee’s work, it properly places the risk of such work on the employer as well. 280

In the past, courts have applied a variety of tests to determine whether an employee’s conduct is within the scope of their employment. 281 Modern courts have settled on asking whether the employee had the “purpose” or “intent” to serve the employer at the time of the tortious conduct. 282 Compared to past tests, the purpose or intent inquiry has made it more difficult for intentional tort claims to impose respondeat superior liability. 283 However, the courts have been willing to extend employer liability in professions that carry inherently high risks of employees committing certain

PAGE KEETON ET AL., PROSSER AND KEETON ON TORTS, § 69, at 500 (5th ed. 1984) (noting that English law in sixteenth century held that employers were not liable for employees torts unless employer commanded employee to commit specific tort). The courts recognized this rule was too strict and then embraced the “implied command doctrine” which held employers liable if they impliedly told their employees to commit the tort. See id. Eventually, the courts abandoned the legal “fiction” of a command. American courts now use the scope of the employment test. See DOBBS, supra note 194, § 335, at 910 (citing Porter v. tortious conduct. For example, a court found that bar owners are liable for bartenders who lose their temper and intentionally harm patrons. The court’s reasoning focused on the bartending profession as one that carries an inherent risk of intentional violence, and thus the bar owners should be subject to both the benefits and burdens of owning a bar.

A recent trend in respondeat superior scholarship examines the liability of sports teams for the torts of their employees. In a landmark California case, a court held the Los Angeles Lakers vicariously liable for an intentional assault committed by Kermit Washington, one of their players. The case was decided under a unique California vicarious liability law, but the decision has prompted persuasive arguments for an extension of vicarious liability to teams for a variety of tortious conduct committed by their players. In a case like Suarez’s, however, the threshold is much lower for holding a soccer club liable for non-violent torts committed by their players. Much of the reasoning in the scholarship regarding intentional assaults and batteries serves to strengthen the

2. Suarez’s Case Under “Scope of the Employment”

Under the “scope of the employment” test, a court will look to whether Suarez’s conduct had the purpose or intent of serving his employer, the soccer club.292 Plainly stated, the purpose of a soccer club, like any sports team, is to win games.293 In pursuit of winning games, unnerving opponents is not only common, but encouraged.294 Trash talk has become such a commonplace in NFL games that the league has begun monitoring games in order to crack down on it by imposing fines and penalties.295 Soccer, like football, contains a lot of trash talk between players on the field.296 Successful trash talking will unnerve an opponent, which increases the likelihood of winning a game.297

In the Commission’s decision it was specifically noted that Suarez’s conduct was an attempt to “wind up” Evra.\textsuperscript{298} The exchange was described as “confrontational and hostile.”\textsuperscript{299} Video evidence confirmed that the two players were clearly upset with each other during the confrontation.\textsuperscript{300} Although Liverpool would deny that they sanctioned or encouraged Suarez’s racial abuse, both factors are irrelevant when applying respondeat superior.\textsuperscript{301} Suarez had the intent of unnerving Evra, which would help Liverpool beat Manchester United.\textsuperscript{302} Suarez’s conduct can therefore be said to have the purpose of furthering Liverpool’s goal of winning games.\textsuperscript{303}

An additional inquiry under the Restatement of Agency § 245, which applies to the tortious use of force, focuses on “the customs of the enterprise.”\textsuperscript{304} When the customs of the enterprise, meaning the customs of the particular profession, increase the foreseeability of tortious conduct by employees, courts are willing to hold employers liable for the intentional use of force by their employees.\textsuperscript{305} Examining whether Suarez’s conduct was a foreseeable custom of soccer will strengthen the argument that Liverpool should be held

In furtherance of both the employee’s and employer’s goal of winning games, players who will do whatever it takes to win are purchased.\textsuperscript{307} In sports such as football and hockey, violence is not only a common trait in players, but it is desired by coaches.\textsuperscript{308} When players go too far and exceed the customary violence in football and hockey, the additional tortious violence is foreseeable conduct.\textsuperscript{309} Employers are benefited by the violence that stays within the acceptable limits of the game, and scholars argue that, similar to the bartender case above, the teams should be responsible for the pitfalls of excessive violence as well.\textsuperscript{310}

Suarez would take the on-field trash talking too far. When the conduct is foreseeable, courts are willing to hold the employer liable. In Suarez’s case, it would make Liverpool liable for his intentional infliction of emotional distress on Evra.

C. Why Should the Clubs be Held Liable?

Following Suarez’s conduct, anti-racism organizations pointed their finger at Liverpool. As Suarez’s employer, these organizations believed that Liverpool should have accepted responsibility for the incident. Now that Suarez’s conduct has thrust on-field racism into the spotlight, many are calling for educational programs for international players in order to avoid the issue in the future.

The benefit of holding a soccer club liable for the on-field racism of their players is it helps alert the club’s owners of the problem and allows them to intervene. Upon hearing of Suarez’s toward Barcelona games and that repeated violence at end of games is slowly ruining one of soccer’s once great rivalries).

conduct, the owners of Liverpool immediately flew to England in order to begin rebuilding the club’s reputation.321 By legally shifting the liability of on-field racism to the club, it provides an incentive for the club to undertake preventative educational programs in order to avoid monetary liability and bad press from on-field racism.322

Monetary judgments collected from the club could be donated to fund educational programs for anti-racism organizations, such as Kick it Out or Show Racism the Red Card.323 Similar to situations where office employees misbehave and professionals are brought in to run educational classes, clubs could donate money to organizations dedicated to solving the on-field racism issue.324

would then attend educational programs before and after incidents in order to avoid future problems.  

Shifting liability to the clubs would also send a strong signal to fans, players and coaches that soccer is finally ready to fight on-field racism. Despite Sepp Blatter’s opinion that the problem does not exist, it has become a huge issue in England. Blatter made FIFA’s ambivalence clear, thus placing the onus on the individual leagues to combat the problem. In America, vicarious liability provides the opportunity for an inclusive and systematic solution to on-field racism.

D. Pros and Cons of Tort Law and Recommendations

The foregoing analysis provides ample evidence for holding a soccer club vicariously liable when their players’ on-field racism satisfies the elements of IIED. The question remains, however, whether there is a better way for the issue to be handled. A hot topic in sports law scholarship is the role of the courts in shaping

sports law.332 Some scholars fear that unnecessary judicial involvement in sports law will “chill” the sport.333 Other scholars believe a special sport court should be established to handle sports law cases in the United States.334 Although the courts are the ultimate arbitrators in our society, there are persuasive reasons for keeping their involvement in sports law limited.335

Those involved in the soccer leagues themselves are in the best position to craft solutions for the unique problems professional sports pose.336 Sometimes, however, those who govern the league are slow or unwilling to respond to new problems in the sport.337 When this occurs, the use of the court system is ideal to help force those governing the league into action.338

In order to avoid unnecessary litigation and increased docket loads on the already strained court system, the MLS should make clubs vicariously liable by modifying their misconduct rules. This would allow the MLS to use their expertise to fashion a punishment for clubs when their players egregiously violate the misconduct rules, as Suarez did, by using discriminatory language toward another player. If the MLS is unwilling or slow to act, then the court system is available to any aggrieved athlete. While the courts are not experts in the customs and fine-points of the game, their prior involvement in sports law has sparked scholarship advocating for further reform of sports law issues, signaling their involvement could be beneficial.

VI. Conclusion

The resurgence of on-field racism in England has once again shown that soccer’s current efforts to provide a discrimination-free environment are inadequate. The controversy involving Luis Suarez reflected the English FA’s renewed commitment to tackling on-field racism, but many fear the FA punished the wrong culprit. The head of soccer’s anti-racism organizations believe Liverpool anti-racism plan for him to review in order to develop solutions to on-field racism). The judgment against Suarez by the FA prompted public support for Cameron to step in and consider possible solutions to the issue. See id.

340. See Carlsen & Walker, supra note 332, at 414 (arguing for creation of “Sports Court” because it would be both “less expensive and more flexible . . . and would be more responsive to the needs of the professional sports industries concerned. Erpool should also be held responsible. Without educating players about racial integration in an international game, a brief ban and fine of half a week’s salary has a weak deterrent effect. Suarez, and Liverpool, have still not recognized that his conduct was fundamentally wrong.

Due to differences in sports law between America and England, the court system is available to aggrieved athletes in America. Tort law can hold employers vicariously liable for the torts of their employees in certain instances. Suarez’s conduct would likely satisfy the requirements for the intentional infliction of emotional distress and his conduct was likely within the scope of his employment as a player for Liverpool. Therefore, in America, Evra could take the case to court and hold Liverpool vicariously liable for Suarez’s conduct. Holding the club liable for the on-field racism of their player creates numerous incentives for club owners to take preventive measures so incidents like Suarez do not harm the club’s reputation or financials. It also provides the opportunity to fund anti-racism educational programs for international players who may not be used to societal norms that differ from their home country.

Although the court system is available to aggrieved athletes in America, there are reasons that the issue can and should be handled by the league itself. Armed with expertise and authority to modify the laws of the game, the MLS can alter their regulations to include vicarious liability for on-field racism. While it may not be the ultimate solution, it is certainly a step in the right direction. On-field racism is one of the few blemishes left harming the otherwise beautiful game. The good news is that America can preemptively show racism the red card before it harms the growing popularity of the MLS.

Carlsen & Walker, supra note 332, at 414 (arguing for creation of “Sports Court” because it would be both “less expensive and more flexible . . . and would be more responsive to the needs of the professional sports industries concerned. Information costs would be lower because decisions would be made by an entity already familiar with that conduct necessary for effective play, and with better access to necessary facts.”).
